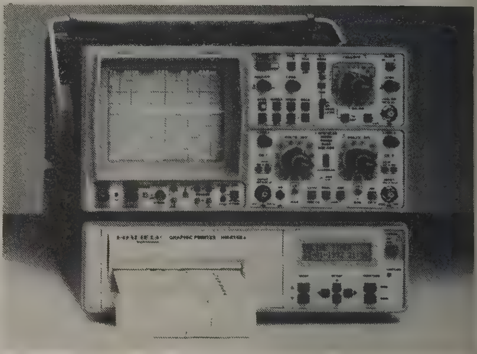
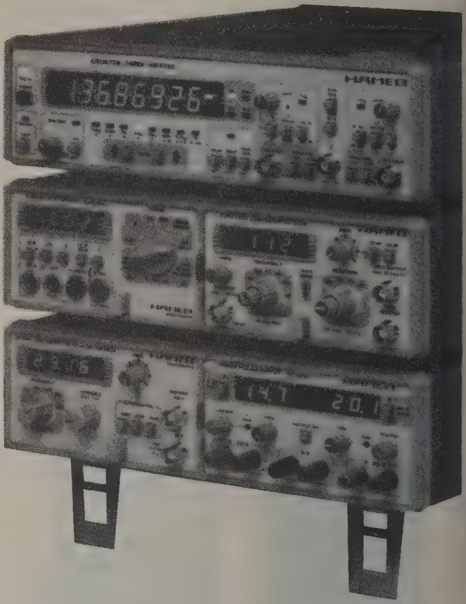
For more than 30 years, HAMEG has been engaged in the manufacture of oscilloscopes and a variety of other test instruments in Germany. HAMEG is known throughout the industry as a supplier of attractively priced instruments based on innovative technology which continues to set new standards of quality and performance.

HAMEG OSCILLOSCOPES



HM203-7	2-Channel 20MHz (analog)/component tester
HM205-3	2-Channel 20MHz (analog/digital), 20MS/s
HM408	2-Channel 40MHz (analog/digital), 40MS/s
HM604	2-Channel 60MHz (analog)
HM1005	3-Channel 100MHz (analog)
HM1007	2-Channel 100MHz (analog/digital), 40MS/s
HD148	Thermal Printer for analog/digital scopes
	Accessories, IEEE-488 + RS232 Interfaces

HAMEG MODULAR SYSTEM – Series 8000



HM8001	Mainframe (power supply) is the "heart" of the System, accommodating any two modules.
HM8011-3	Digital Multimeter 4 1/2 digit
HM8014	Milliohm Meter 200mΩ-20kΩ
HM8018	LC Meter 200µH-200H, 200pF-100µF
HM8021-3	Frequency Counter DC-1,6GHZ
HM8026	Wow and Flutter Meter
HM8027	Distortion Meter, 20Hz-20kHz
HM8028	Spectrum Analyzer 0.5-500MHz
HM8030-4	Function Generator 0.3Hz-3MHz
HM8032	Sine Wave Generator, 20Hz-20MHz
HM8035	Pulse Generator 2Hz-20MHz
HM8038	Tracking Generator for HM8028
HM8040	Power Supply 2x0-20V/0.5A, 5V/1A
HM8042	Transistor Curve Tracer
HM8070	Checkpoint Tester with 5 displays

HAMEG PROGRAMMABLE SYSTEMS – Series 8100

HM8112-2	Multimeter 6 1/2 digit
HM8122	Universal Counter/Timer DC-1GHz
HM8130	Function Generator 10mHz-10MHz
HM8133	RF-Synthesizer 1Hz-1GHz
HM8142	Power Supply 2x0-30V/1A, 5V/2A
	Programmable with opt. interfaces
	Also function as stand-alone units

MINIGLOSSARY ENCAPSULATION

MATERIALS/HANDLING

Catalyst: A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

Conformal coating Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

Curing agent: See catalyst.

Hardener: See catalyst.

Hermetic: A permanent gas-tight seal.

RTV: Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

Thermoplastic: Plastic materials which can be made to flow *repeatedly* with the application of heat.

Thermosetting: Plastics which once cured cannot be made to flow again.

Thixotropy: The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

Viscosity: Measured in units of *poise* or *centipoise.* The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

PROCESSING

Casting: Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

Dip coating: Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

Embedding: Wherein an encapsulant substantially fills all voids in and about an assembly.

Impregnation: A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

Molding: Similar to casting except this process usually implies multicavity molds and costly machines.

Potting: Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

DIELECTRIC

Arc resistance: An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

Breakdown voltage: The voltage at which an encapsulant fails electrically.

Capacitance: The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

Corona: A luminous discharge of electricity due to air ionization when a certain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

Dielectric: Insulator (Nonconductor.)

Dielectric constant: The property of a material that determines its ability to store electrostatic energy.

Dielectric strength: The ratio of dielectric breakdown to the thickness of insulating material.

Dissipation factor: The ratio of a dielectric material's energy losses.

Flashover: Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

Insulation resistance: (IR) An insulating material's total DC leakage.

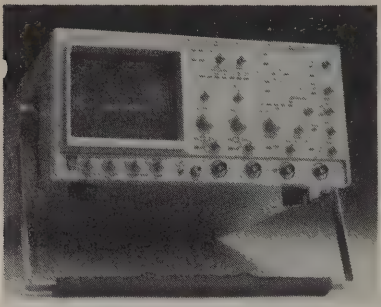
Surface resistivity: The resistance of the surface of an insulating material to the flow of direct current.

Voltage endurance: Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

Volume resistivity: The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

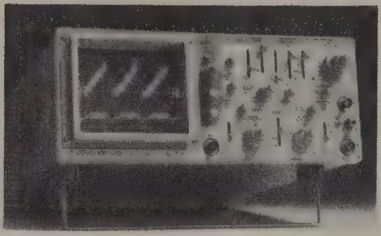
KENWOOD

100 Programmable Steps & NTSC/PAL TV Line Counter Functions



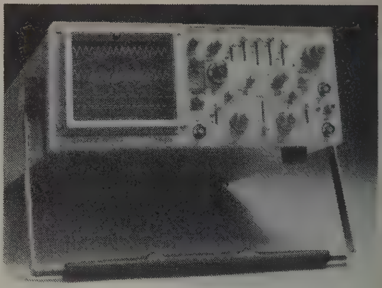
CS-6040: 150MHz, 4-Channel Oscilloscope with Readout & Cursor Measurement.
CS-6030: 100 MHz, 4-Channel Oscilloscope with Readout & Cursor Measurement. The CS-6040/6030 features a maximum of 100 programmable steps of front-panel setting values (20 steps x 5 blocks), which can be read out as required, a TV line counting function extremely valuable in video signal waveform observation, & a trigger counter function useful in digital waveform observation. These scopes display setting values using a CRT readout function, having cursor functions for digital measurements of waveform.

The 100MHz Scope that Proves Simple Can be Better



CS-5170: 100MHz, 2-Channel Oscilloscope with Readout & Cursor Measurement.
CS-5175: 100MHz, 2-Channel Oscilloscope. The CS-5170/5175 have economical pricing & superior performance in a dual channel 100MHz oscilloscope. The CS-5170 offers on-screen digital readout & measurement cursor functions for quick & easy operation. The CS-5175 offers the same performance as the CS-5170 but eliminates the CRT readout & cursors. Vertical-axis sensitivity can be set from 1mV to 5V/div & is continuously adjustable using an attenuator.

Basic Technology, High Quality and Performance



CS-5165: 60MHz, 3-Channel Oscilloscope.
CS-5155: 50MHz, 3-Channel Oscilloscope. These oscilloscopes boast the same high quality that has made even more sophisticated scopes from Kenwood true leaders in their field. The CS-5165/5155 offer a true delayed sweep, a bright CRT, and high sensitivity. These scopes clearly provide functions & performance beyond expectations for instruments in this class, making them truly powerful tools for the engineer. The vertical-axis sensitivity can be set from 1mV to 5V/div, with continuously variable adjustment in between settings.

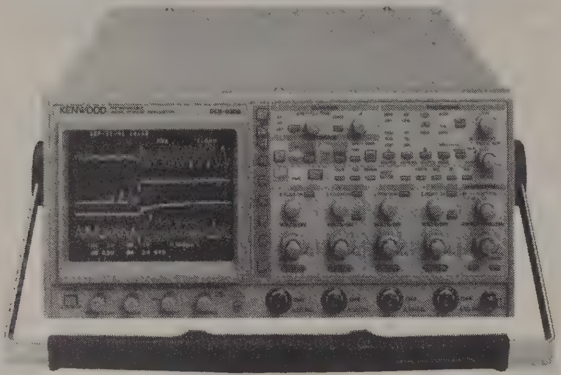
KENWOOD DIGITAL STORAGE OSCILLOSCOPES

DCS SERIES

- 100 MS/s (4Channel Simultaneously)
- GPIB/RS-232C Programmable
- 100 MHz (4 Channel Full Attenuation)
- 16K-word Segmentable Memory



Specifications

(Note: The DCS-9200 and DCS-9120 have 2-channel storage)

Real-time mode			
CRT			
Type		150mm rectangular with internal graticule	
Accelerated voltage		Approx. 17kV	
Effective area		8 x 10 div (1 div = 10mm)	
Vertical amplifier (CH1, CH2, CH3, CH4)			
Sensitivity		5mV/div to 5V/div ±2% (10°C~35°C)	
		1mV/div to 2mV/div ±4% (10°C~35°C)	
Attenuator		1mV/div to 5V/div in 1-2-5 sequence of 12 steps and	
		variable adjustment, with adjustable volume	
Input Impedance		1MΩ ±1%, 23pF ±3pF	
Frequency response			
	DC	DC to 100 MHz (-3dB) (5mV/div to 5V/div)	
		DC to 20MHz (-3dB) (1mV/div, 2mV/div)	
	AC	5Hz to 100MHz (-3dB) (5mV/div to 5V/div)	
		5Hz to 20MHz (-3dB) (1mV/div, 2mV/div)	
Sweep			
Sweep modes		A-sweep	
Sweep time	**A**	20ns/div to 0.5s/div ±2% (10°C~35°C)	
		In 1-2-5 sequence of 23 steps, and variable adjustment	
	B	20ns/div to 50ms/div ±2% (10°C~35°C)	
		In 1-2-5 sequence of 20 steps	
Magnified sweep		10 x ±5% (both A and B)	
Digital storage mode			
Vertical amplifier (CH1, CH2, CH3, CH4)			
Vertical resolution		8 bit (25 dots/div)	
Dynamic range		±5 div	
Frequency response (Single shot event)	**DC**	Effective storage frequency: DC to 40MHz [16MHz] (sine interpolation)	
	AC	Effective storage frequency: 5Hz to 40MHz [16MHz] (sine interpolation)	
Equivalent sampling	**DC**	DC to 100MHz (-3dB) (5mV/div to 5V/div)	
		DC to 20 MHz (-3dB) (1mV/div, 2mV/div)	
	AC	5Hz to 100MHz (-3dB) (5mV/div to 5V/div)	
		5Hz to 20MHz (-3dB) (1mV/div to 2mV/div)	
Rise time		Effective rise time: 16ns [40ns] max (linear interpolation)	
		Equivalent sampling periodic time: 3.5ns	
Memory use in each mode			
NORM sampling		Display memory (data)	2kword/CH (200 dots/div)
		Display memory (REF)	2Kword/CH
		Acquisition memory	16Kword/CH
		REF memory	16Kword/CH
Equivalent sampling		Display memory (data)	2kword/CH (200 dots/div)
		Display memory (REF)	2Kword/CH
		Acquisition memory	2kword/CH
		REF memory	2kword/CH
Roll mode		Display memory (data)	2kword/CH (200 dots/div)
		Display memory (REF)	2Kword/CH
		Acquisition memory	16kword/CH
		REF memory	16kword/CH
Memory backup		Battery back: Approx. 30,000hr at room temperature	
		Acquisition memory	16kword/CH
		REF memory	16kword/CH
Sweep time/display modes			
NORM sampling		20ns/div to 500s/div (20ns/div to 1μs [2μs]/div for expanded range	
		(Max sampling speed: 100MS/s [40MS/s])	
Peak detector		10μs/div 500s/div	
Equivalent sampling		20ns/div to 1μs [2μs]/div	
Roll mode		0.2s/div to 500s/div	
Storage modes			
NORM		Data updated each time an acceptable trigger is received	
SINGLE		Data maintained after storage	
AVG		Arithmetic mean of 2, 4, 8, 16, 32, 64, 128 and 256 cycles	
PEAK		Glitch detection to 50ns	
ROLL		Data continuously recorded and updated on the CRT screen	
Equivalent sampling		Random	
Memory partitioning		2kword x 8 blocks	
Expansion and compression			
Expansion		In hold state, SWEEP TIME/DIV is made faster than current	
		sweep time	
Expansion		Data expansion possible by setting sweep time	
		(expansion of up to 100:1 possible around trigger points)	
Compression		Data can be compressed by setting a sweep time/div slower	
		than the current time in the hold state	
Interpolation		Linear, sine, spline	
Trigger			
Pre-trigger		0 to 80 div (in whole divs; div display or time display)	
		(0 to 10 div with 2Kword memory)	
Post-trigger		0 to 10,000 div (in each div; div display or time display)	
B trigger		B starts after delay	
		B triggered after delay	
		Trigger count: 1 to 2,000 counts	
X-Y			
NORM		DC to 40 MHz [16MHz] (sampling speed variable using	
		sweep time/div)	
Equivalent sampling		DC to 100MHz	
Interfaces			
GP-IB (conforms to IEEE 488-1978 standards)			
Operations		Input/output of waveform data, data output and control	
		for the front panel	
Command set		64 commands	
Data format			
Waveform data		8 bit (same as digital storage mode)	
Cursor data		10 bit (same as readout)	
Analog control data		±1.0 bit (div display section) (% display not specified)	
Prices		7699./6399./9239./7699.	

Specifications subject to change without notice.

MINIGLOSSARY
CONNECTORS

Connector terminology is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

Shape—Circular, cylindrical, and rectangular.

Electrical application—High voltage, RF, microwave, input/output, etc.

Mechanical application—Printed circuit, rack & panel, cable, etc.

Conductor type—Coaxial, flat cable, ribbon cable, flex circuit, etc.

Termination method—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

Contact: The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

Contact alignments: Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

Male vs. female: In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

Closed entry: A female contact which prevents entry of a male contact larger than a specific size.

Open entry: A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

Hermaphrodite: Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

Hermetic seal: Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

Waterproof seal: May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

Printed circuit connector: Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

Edgeboard. May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

Two-piece: One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

Readout: Describes the arrangement at the terminating edge of a PC board. May be single or double. A double readout PC board has termination strips on each side not usually interconnected.

Ribbon connectors: A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

Ribbon contact connector: Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

Solderless terminal: Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

Crimp termination: A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

Insulation displacement: Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

Service rating: The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

Withstanding voltage: Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

KIKUSUI

KIKUSUI INTERNATIONAL CORP.

KIKUSUI OSCILLOSCOPES

Kikusui multifunction digital/analog or analog only oscilloscopes are way ahead of the competition, feature for feature and dollar for dollar. These versatile, low-cost portables are easy to use and highly ergonomic with clear, sharp displays.

- ☐ Unprecedented 400 point per division resolution
- ☐ 4K memory per channel
- ☐ Frequencies to 100 MHz
- ☐ Peak-to-peak level lock automatic triggering holds the signal in-sync
- ☐ Alternate sweep mode
- ☐ Cursor measurements
- ☐ Optional plug-in GPIB or RS-232C interface cards (output only)

Model	Description
COR 5502U	100MHz, DSO, 100Ms/S, 2 channels
COR 5501U	100MHz, DSO, 20Ms/S, 2 channels
COR 5561U	60MHz, DSO, 20Ms/S, 2 channels
COR 5541U	40MHz, DSO, 20Ms/S, 2 channels

Model	Description
COR 5521U	20MHz, DSO, 20Ms/S, 2 channels
COR 5500U	100MHz, Analog only, 2 channels
COR 5560U	60MHz, Analog only, 2 channels

VERSATILE X-Y DISPLAY MONITORS These high definition 6" and 7" monitors are perfect for both built-in and bench applications.

- ☐ Electrostatic deflection CRT
- ☐ 0.45 mm spot size
- ☐ Frequencies from DC to 5 MHz on all three axes
- ☐ Simple BNC connectors

Model	Description
COS 1610	6" display (no case)
COS 1611	6" display (w/ case)
COS 1711	7" display (w/ case)

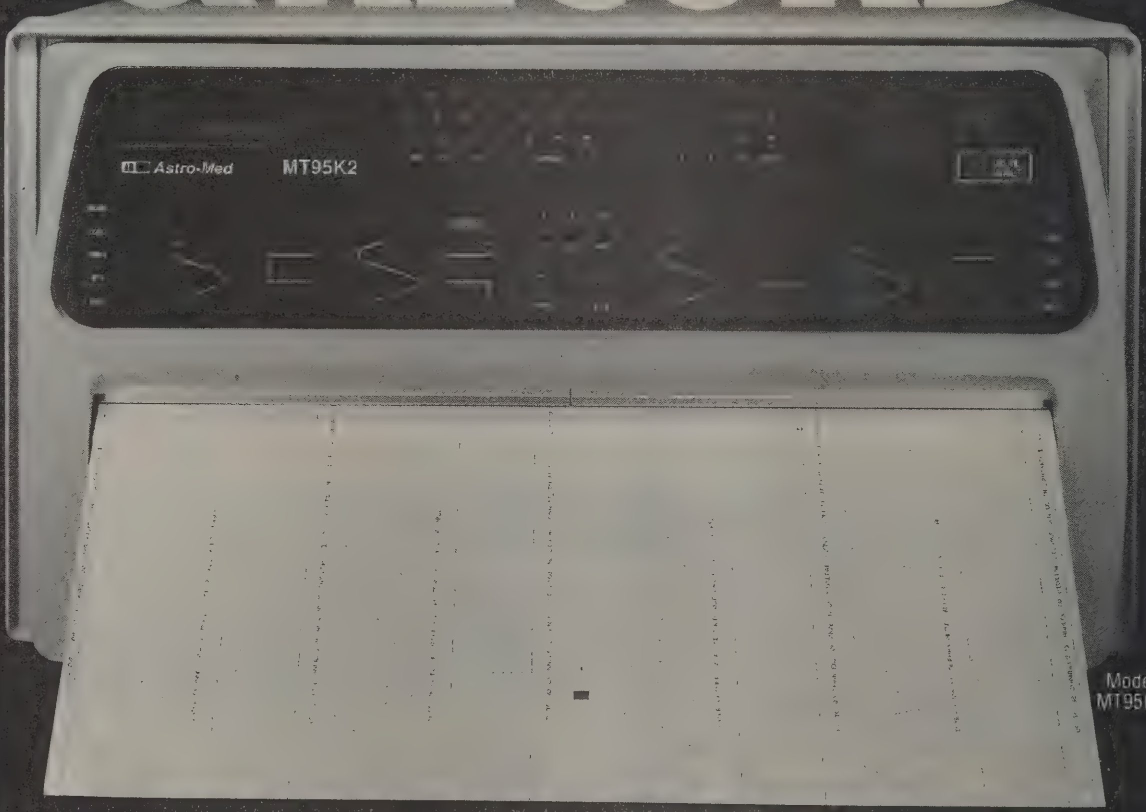
THE ALL NEW ASTRO-MED

MONITOR & RECORD



Model MT95K2

- **No Delay…see full traces on monitor while recording!**
- **Personal Chart Setups with on-board floppy drive**
- **Data Capture…up to 32 megabytes in RAM; 120 megabyte internal hard drive; stream to external drive via SCSI**
- **8 to 32 Waveform Channels…plus 64 events; DC to 20 kHz; chart speeds to 500 mm/sec**
- **Laser Printer Chart Resolution…300 dpi; clear, crisp traces**

Put simply, the MT95K2 is another major Astro-Med innovation in "chart recording": you can preview your data, record it, store it, play it back, send it to disk for analysis, record it again, and more! Whether you need a basic 8 channel recorder or a sophisticated 32 channel recording system, the MT95K2 is the perfect platform for you today.

Call, Fax, or write for details!

Astro-Med, Inc.

DC TO 25 kHz REAL TIME RESPONSE

FINALLY! A BATTERY POWERED 8-CHANNEL FIELD AND LAB RECORDER

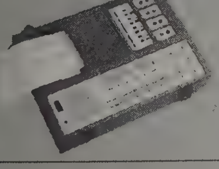
- Only 28 Lbs Including Internal Battery
- Full 8-1/2 Inch Wide Chart
- Data Capture and Playback–32 kSamples per Channel
- Eight Separate and Overlapping Channels
- Internal Battery, AC, and 12 VDC Operation
- Chart Speeds to 200 mm/sec

The new Dash 8 Field and Lab Recorder is the world's first and only truly portable eight channel recorder. Powered by an internal battery (or external 120/220 VAC), the Dash 8 is at home anywhere.

The Dash 8 records eight channels of data from DC to 25 kHz real time as well as eight event channels along with eight channels of alphanumeric data.

Traces are clear and sharp under all conditions. There are no pens, no liquids, and no moving parts to break and wear out thanks to Astro-Med's New Technology thermal recording technique.

Other portable field recorders from Astro-Med



Dash IV 4-channel field and lab recorder features real-time frequency response from DC to 25 kHz full scale. Family of plug-in "personality modules" permits recording of temperature, strain, current, voltage, and more

Dash II is world's toughest, most powerful 2-channel portable field recorder. Records separate and overlapping channels and prints time, date, and speed automatically. Full range of signal conditioners adapt it to any application

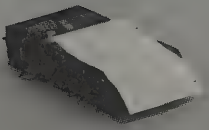
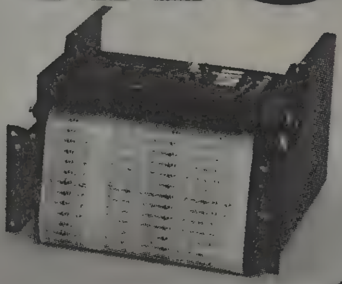
Astro-Med





An OEM digital recorder for every industrial and medical application

For the OEM digital recorder that your equipment deserves, talk to Astro-Med. Only Astro-Med has the complete line-up–from 2 inch to 12 inch machines. And since all Astro-Med digital recorders use the same dual port interface, you can expand your product line quickly and inexpensively.

Astro-Med digital recorders. With no moving parts, high speed, and beautiful diagnostic-quality tracings. Clearly superior. Developed and made by the leader in industrial and medical OEM recorders since 1971!

Send for our new OEM digital recorder catalog today. Or call toll free 800-343-4039 for immediate service.

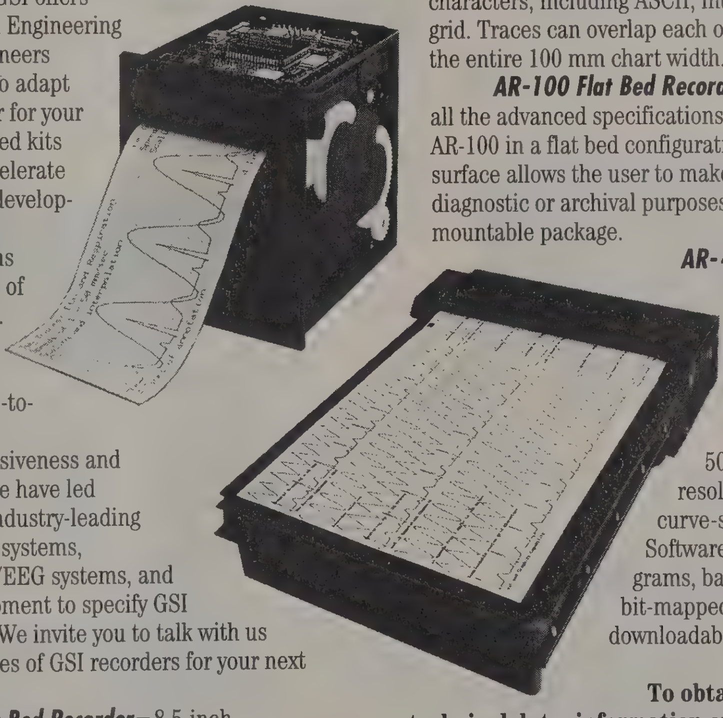
General Scanning
OEM Thermal Array Recorders

A Total Solution for Instrument Designers

General Scanning offers design engineers more than 20 years of technical leadership in meeting OEM requirements for versatile, dependable high-resolution thermal array chart recorders. You can rely on GSI advanced recorder technology for ease of software and hardware integration...features that assure printhead longevity, provide automated paper loading and infinitely variable chart speeds... and a wide choice of flexible, user-defined text and background formats.

In addition, GSI offers unmatched Custom Engineering resources. GSI engineers will work with you to adapt or design a recorder for your instrument. PC-based kits are available to accelerate software interface development. Experienced, creative applications support is also part of GSI's total solution. Our goal is to help you reduce your product's time-to-market.



GSI's responsiveness and technical excellence have led manufacturers of industry-leading patient monitoring systems, defibrillators, ECG/EEG systems, and stress testing equipment to specify GSI recorder products. We invite you to talk with us about the advantages of GSI recorders for your next product design.

AR-200 Flat Bed Recorder– 8.5-inch (216 mm), 32-trace recorder, with 12 lines of floating annotation. Prints background, trace, text, bit-mapped graphics at 800 x 200 dpi, and offers chart speeds up to 100 mm/sec. A breakthrough in ease of integration, small size, light weight, and cost. A programmable current limit allows maximum flexibility in host instrument power supply design

AR-42 Recorder– 2-inch (50 mm) recorder. 3 waveforms, up to 8 lines of annotation, chart speeds infinitely adjustable up to 50 mm/sec. Half the size and weight of conventional units. 800 dpi resolution. Parallel, serial, or switch interfaces give the designer more flexibility.

GSI
CUSTOM CONCEPT
ENGINEERING

AR-100 Recorder– Easy to integrate, 4-inch (100 mm) recorder. Up to 6 traces, 6 lines of real-time annotation, chart speeds up to 100 mm/sec. User-programmable background grids, automatic paper loading. Requires minimal panel space. Memory-mapped, multifunctional interface. Supports 246 alphanumeric characters, including ASCII, international, default grid. Traces can overlap each other and print over the entire 100 mm chart width.

AR-100 Flat Bed Recorder– Incorporates all the advanced specifications and features of the AR-100 in a flat bed configuration. Flat undersurface allows the user to make chart notations for diagnostic or archival purposes. Compact, drop-in mountable package.

AR-41 Recorder– 2-inch (50 mm) recorder, features 2 waveforms with 2 lines of annotation at chart speeds from 20 mm/hr. to 50 mm/sec. 800 dpi resolution. Proprietary curve-smoothing algorithm. Software generates histograms, bar charts, other bit-mapped images, and downloadable grids.

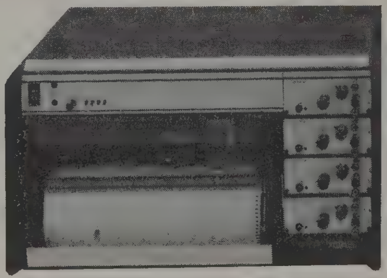
L 120 / L 200 / L 250

Standard flatbed recorders

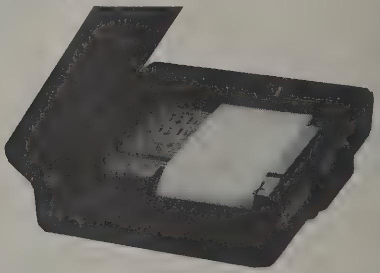
1 - 2 channels with 120, 200 and 250 mm chart width mV, V, mA, TC´s Type S, K, J and RTD



L7005

Economy low-cost vertical rackmount recorder

2, 4 and 6 channel versions with 250 mm chart width mV, V, mA, TC´s Type S, K, J and RTD



LM 23

Mobile mini recorder with carrying case

1 - 2 channel versions with 120 mm chart width mV, V - ranges, battery operated

FULL LINE OF OEM - RECORDERS AVAILABLE

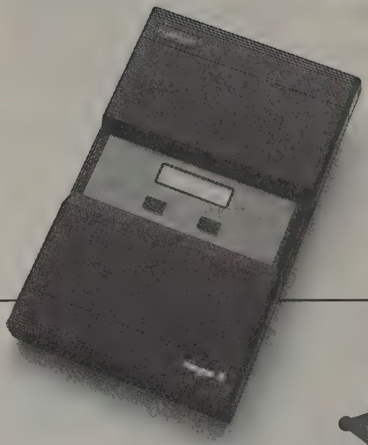
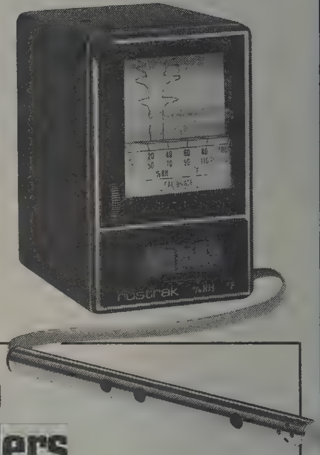
RECORDERS AND DATA LOGGERS...

FOR ALL YOUR RECORDING NEEDS, THINK RUSTRAK





Rustrak Ranger Data Loggers

Rustrak Ranger data loggers are microprocessor-based recording, reporting and analyzing systems. Data is collected, stored in memory and then transferred to a PC. Recording can take place for a year or more. Rangers are rugged enough for use in the harshest environments; their battery operation and compact size also make them ideal for use in remote locations or where space is limited. Easily programmed through just two keys, the Ranger's LCD prompts the operator during the set-up sequence. Pronto software, included free with every data logger, is used for plotting, analyzing, hard copy reporting and storage of the data. Accessories include input modules, probes and tamper-proof and weatherproof enclosures. Available in a 4 channel or an 8 channel analog/digital model with 4 math channels.

Rustrak Strip Chart Recorders

For over 30 years, Rustrak has produced the most comprehensive strip chart recorder line in the industry for the accurate and dependable recording of trend data. Compact size makes Rustrak the ideal choice for portable applications and for areas where space is limited. Packaged in 1 to 3 channel or 100 mm configurations, the recorders are used for recording input signals such as dc voltage and current, ac voltage and current, temperature, humidity, pressure, events and more. Over 350 combinations of writing and chart speed are available. Available with or without digital display. Continuous recording from 10 minutes to 1500 days on one roll of paper. Accuracy as low as 1% of span and response time as fast as .25 second. Standard features include interchangeable gear trains, access window, chart advance, tear-off or reroll mode, a rugged finish, and mounting brackets.

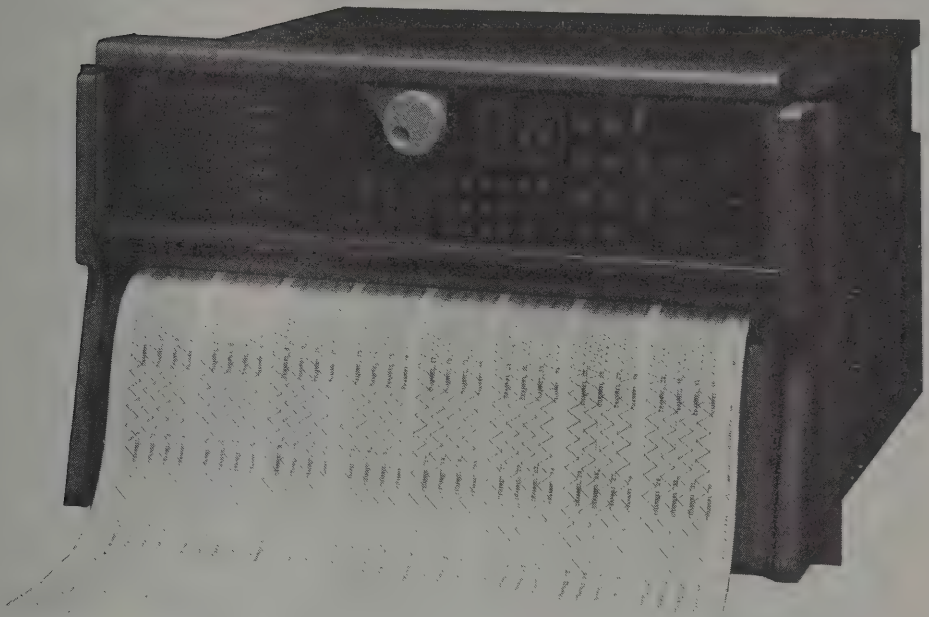
Wow! That Must Be a Western Graphtec Recorder...



Western Graphtec has the right technology for every challenge: high performance **Arraycorders** with four to 32 channels, as well as a wide selection of field portable models. Proven **Pen Recorders** from one to twelve channels, made for lab and field use. A comprehensive line of **Servocorders**, now including some of the most modern digital models. **Multicorders** and **Hybrid Recorders** for every budget. **X—Y Recorders**, and **Data Acquisition Systems**...and so much more.

And yet despite all of our science and technological innovations, we never forget that high tech was supposed to make our lives easier—not more difficult. Western Graphtec: dedicated to the **Science of Simplicity.**

Shown above, the remarkable new Mark 12 Data Management System. Combining the best features of paper-based recorders and computer-based data acquisition systems:

- 4 to 32 channels—each with 20kHz bandwidth
- Built in video monitor
- SCSI port for streaming data to disk in real-time.
- Design-your-own-charts and grids versatility
- 2 million sample battery-backed memory

We even created our own printhead—a single 15" array which eliminates the data gap suffered by 2-headed recorders. Completely designed and built right here in the USA with a two year warranty on everything. That's power. That's Western Graphtec.

Saft gives you the power of choice.

No matter what your product or design, Saft gives you the power to choose exactly the right power source.

Got a product with definite space restrictions? No problem. Need a highly reliable battery that can withstand extreme temperatures? Saft has a variety of battery chemistries that fill the bill.

Just bring us your product specifications. Saft will bring you an energy solution. Maybe several. After all, we've already designed batteries for computers, aviation, defense, medical, home appliances, even aerospace. And our outstanding energy design capabilities continue to solve new energy problems for our customers every day.

Saft's broad range of quality batteries are found virtually everywhere. From the Nicad® rechargeables that power portable electronics. To OEM batteries for sophisticated aircraft. Highly reliable batteries for emergency power and electric vehicle propulsion. Even advanced, high technology batteries for commercial and defense applications.

So don't let a limited power selection limit your thinking. Saft gives you the power to create the ultimate design–with the ultimate power source. For more information on our full line of electro-chemical power systems, contact SAFT America Inc., 711 Industrial Blvd., Valdosta, GA 31601. Or talk directly to one of our Saft energy specialists at (912) 247-2331.

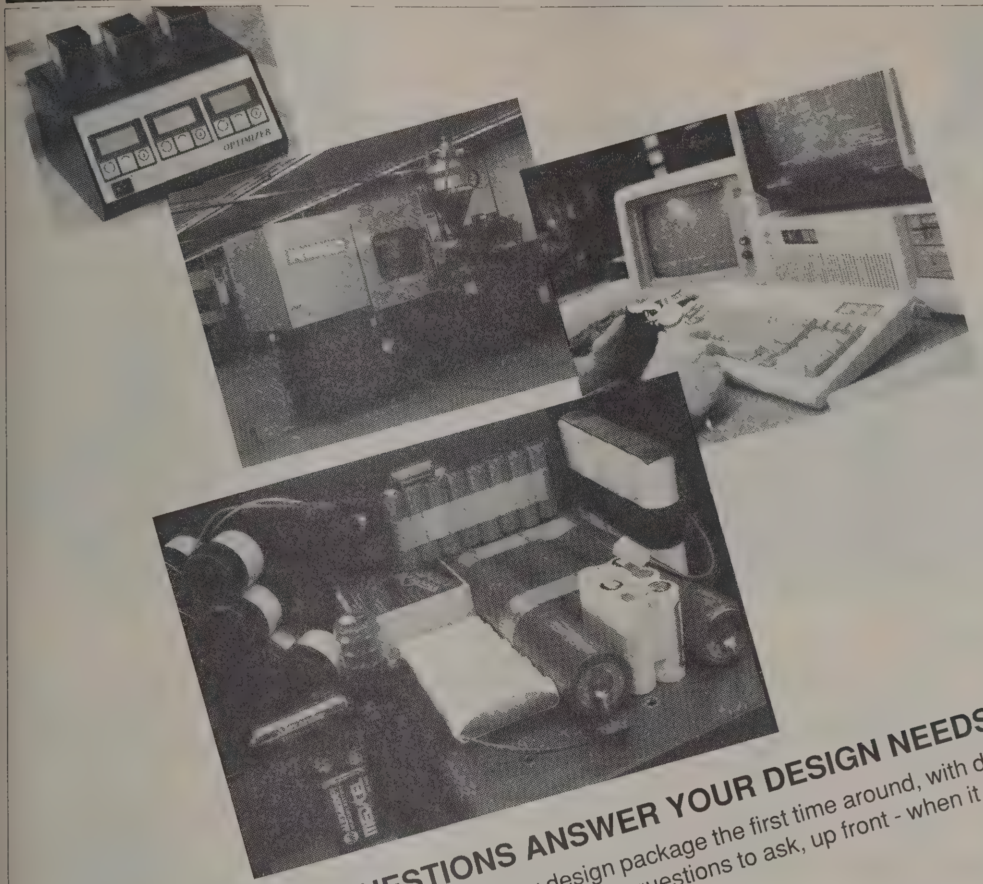
Silver-cadmium	Cd	AgO	1.4	230	1.05	55	120
Zinc-nickel oxide	Zn	Ni oxides	1.75	185	1.6	55	110
Zinc-air[c]	Zn	Air (O_2)	1.6	815	1.1	150	155
Cadmium-air[c]	Cd	Air (O_2)	1.2	475	0.8	90	90
Zinc-O_2	Zn	O_2	1.6	610	1.1	130	120
H_2-O_2	H_2	O_2	1.23	3,000	0.8	45	65
Reserve:							
Cuprous chloride	Mg	CuCl	1.5	240	1.4	45	65[d]
Silver-chloride	Mg	AgCl	1.6	170	1.5	60	95[d]
Zinc-silver oxide	Zn	AgO	1.85	285	1.5	30	75[e]
Thermal	Ca	[b]	2.8	240	2.6	10	20[f]
Ammonia-activated	Mg	*m*-DNB	2.2	1,400	1.7	22	60[g]
High-temperature	NA	S	2.1	685	1.8	200	[h]
	Li	S	2.2	1,150	1.8	200	[i]
Solid electrolyte	Ag	Polyiodide	0.66	. . .	0.6	180	75[j]
Fuel cell:							
Hydrogen[c]	H_2	Air	1.23	26,000	0.7		[k]
Hydrazine[c]	N_2H_4	Air	1.5	2,100	0.7	800[b]	[l]
Methanol[c]	CH_2OH	Air	1.3	1,400	0.9	175[b]	185[m]

[a] Delivered capacity when discharged at normal temperatures (20°C) at normal discharge rates.
[b] Based on fuel consumption only.
[c] Weight of air not considered in computation of watt hours.
[d] Water-activated
[e] Automatically activated; high rate discharge; 2- to 10-min rate.
[f] Fused salt; heat-activated; high rate discharge; 2- to 10-min rate.
[g] Four-minute discharge rate.
[h] β-alumina electrolyte, 300°C operation.
[i] Fused salt; 350°C operation.
[j] Solid $RbAg_4I_5$ electrolyte.
[k] Several different cathode materials used.
[l] Fuel consumption is based on source of H_2.
[m] Based on methanol battery-fuel supply in situ.



OUR KEY QUESTIONS ANSWER YOUR DESIGN NEEDS

You'll get the right battery design package the first time around, with delivery to meet your schedule. We know the right questions to ask, up front - when it counts.

23 years experience

Each year Alexander:

- Grades and sorts more than seven million nickel-cadmium cells.
- Assembles more than three million batteries.
- Produces 16 million mercury cells.
- Welcomes FDA inspections.
- Manufactures sophisticated nickel-cadmium battery chargers and analyzers/conditioners.

In-house packaging

Alexander Batteries are packaged with your choice of casing including:

- Shrink-wrapped insulation vinyl.
- Custom-design vacuum formed.
- Custom-designed injection molded. Tools and dies are produced 'in-house'.

Major suppliers

- Alexander
- Emmerich
- Eveready
- Gates (GE)
- Panasonic
- Powersonic
- Rayovac
- Saft
- Sanyo
- Varta

Electrochemical systems

- Alkaline
- Carbon Zinc
- Lithium
- Mercury
- Nickel-Cadmium
- Lead Acid
- Silver Oxide
- Zinc Chloride

Avex/Saft solid cathode lithium cells offer performance characteristics unequaled by other battery systems—over ten years shelf life, operating temperatures from -40°C to +175°C, three voltage levels, high energy densities, and low self discharge rates. Ideal for many applications such as utility meters, oil well logging equipment, memory backup, alarms, and military equipment.

SAFT offers many systems:
LC = Lithium Copper Oxide (-40°C to +85°C);
LCP = Lithium Copper Oxyphosphate (-40°C to 85°C);
LM = Lithium Manganese Dioxide (-20°C to +50°C);
LS = Lithium Thionylchloride (-40°C to +85°C)

Note: Special cells are designed for use up to 135°C and 175°C.

***FEATURES**
F = Integral Fuse
S = Spiral Construction
HT = High Temperature (175°C)
HR = High Rate
GTM = Glass to Metal Seal
B = Bobbin Construction
E = Epoxy Encapsulated
GC = Gold Plated Contacts
MT = Medium Temperature (135°C)
UL = UL Recognized Component

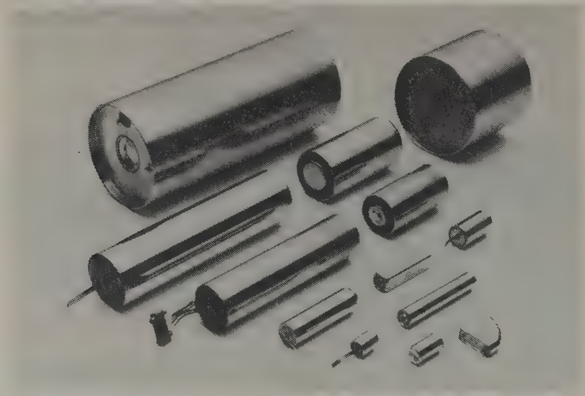
LONG LIFE LITHIUM/THIONYL CHLORIDE PRIMARY BATTERIES

BATTERY
ENGINEERING, INC.



FEATURES

- High energy density
- 304 L Stainless Steel construction
- Hermetic reinforced glass-to-metal seals
- 10 year shelf life
- High reliability
- Stable operating voltage (3.67 open circuit voltage)
- Wide operating temperature (-55°C to +200°C)
- Ability to withstand vibration and high G shock
- Inspection to MIL-1-45028 available

ADDITIONAL SERVICES AVAILABLE

- Custom design and fabrication of cells
- Packaging of cells into custom battery packs
- Contract funded research

Battery Engineering, Inc., a manufacturer of standard and custom-designed lithium batteries, is committed to the development, engineering, and production of high energy density power sources for industrial, medical, and military applications.

A pioneer in Lithium Technology since 1977, Battery Engineering has been at the forefront of the design and packaging of lithium batteries. Today, Battery Engineering has state of the art facilities, and extensive engineering, quality control and R&D capabilities.

Lithium/Thionyl Chloride Batteries offer distinct advantages over other battery systems, the most significant being low self-discharge, high reliability, and the highest energy density of any electrochemical power source.

Engineering for Safety: Battery Engineering's batteries will perform safely if they are operated within the guidelines as described in the free brochure, *Safety First: A Manual for the Safe Storage and Handling of Lithium/Thionyl Chloride Batteries.*

TYPE	A (mm)	B (mm)	C (mm)	Capacity	Volume (cc)	Weight (g)

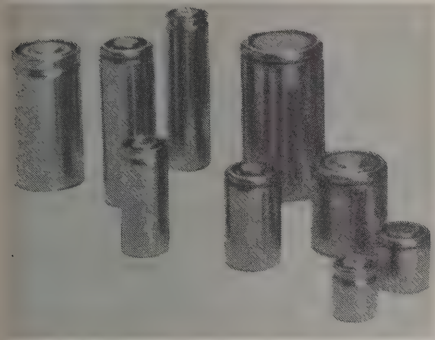
Leadership in Portable Power Solutions

SEALED RECHARGEABLE NICKEL CADMIUM BATTERIES

Gates Energy Products



- Nominal cell voltage 1.2V.
- Standard range for use up to +50°C (cell temperature)
- Goldtop High temperature cells range up to +70°C (cell temperature)
- The sizes shown are maximum overall bare cell dimensions.
- Fast charge systems will require charge control for high rate termination.

ULTRAMAX™ Cells (GL-Series)
Premium performance for maximum runtime in high technology portable electronic products.

Model Number	Cell Type	Capacity (mAhr) 0.2C min.	1.0C min.

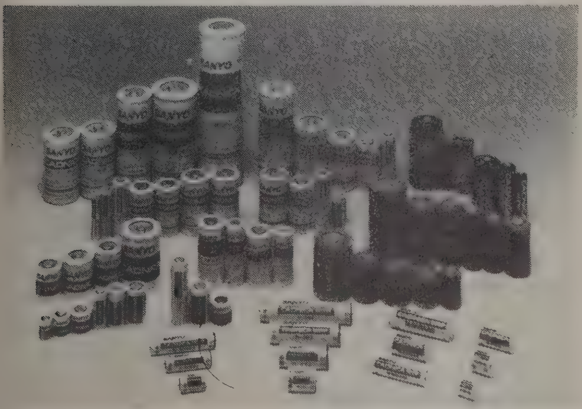
SANYO **Cadnica Batteries meet your design requirements.**



- Over 73 Models
- Capacities from 50 MaH to 20,000 MaH
- Temperature range from -20°C to +70°C
- Extra series provides 40% higher capacities
- Slim series flat oblong shape for higher energy density for the space.
- Over 500 charge/discharge cycles
- Assembled to your custom design

BATTERY SPECIALTIES

Leadership in Portable Power Solutions

RECHARGEABLE SEALED LEAD ACID BATTERIES

Gates Energy Products

Genesis™

"Application Built" — Rechargeable Sealed-Lead Battery

- Sixty percent greater power density at high rates of discharge when compared to conventional sealed-lead batteries.
- Greater power density allows the UPS designer to downsize by thirty to fifty percent.
- High reliability coupled with "office-compatible" convenience for distributed UPS systems.

APPLICATIONS

HrD Series - High Rate Discharge
CyD Series - Extended Cycle/Service life
ExD Series - High temperature & vibra- Applications

Primary applications for the Genesis G12V120W15 & G12V190W15 are uninterruptible power supplies used as distributed power backup systems, especially for medium-computer and network PC applications.

Power Output

G12V120W15

5 Minute-250 watts/cell 1500 watts/battery
10 Minute-190 watts/cell 1140 watts/battery
15 Minute-120watts/cell 720 watts/battery

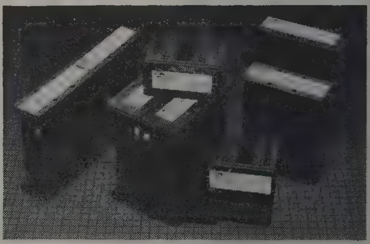
G12V190W15

5 Minute-350 watts/cell 2100 watts/battery
10 Minute-280 watts/cell 1680 watts/battery
15 Minute-190 watts/cell 1140 watts/battery

Gates Energy Products

CYCLON AND MONOBLOCS

- High Capacity- 2.5 to 25 AH
- Long Life-
  Float- Up to 10 years
  Cyclic-200-2000 dependent on depth of discharge.
- Wide Temperature Range- -65°C to +65°C
- Flexible Designs- Voltage and configuration to your specification



POWER PS SONIC

FEATURES

- Suspended Electrolyte
- Leak Proof
- Easy Handling
- Overcharge Protection
- Cycle or Float Applications
- High Discharge Rate
- Compact and Rugged
- Extended Shelf Life

EAGLE EP PICHER

Carefree®

RECHARGEABLE BATTERY

MADE IN U.S.A.

Carefree magnum
EAGLE PICHER
Carefree UPS
RECHARGEABLE BATTERY

- Performs to Rated Capacity on First Cycle.
- Largest Selection of Sealed, Rechargeable Lead Acid Batteries
- Lead Calcium Grid. Constant Charge Characteristics Throughout Life.
- Long Life and High Reliability

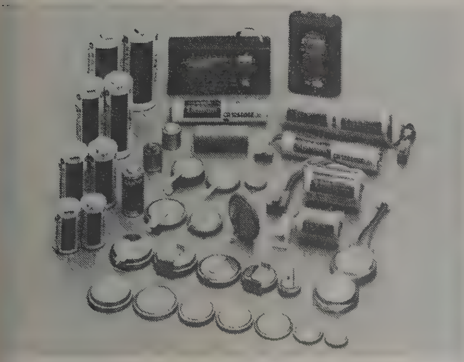
Leadership in Portable Power Solutions

LITHIUM BATTERIES

SANYO Lithium



- 3V operating voltage
- -40° to +85°C temperature range
- Laser seal construction
- 35-5000 MaH - primary capacities
- 12-90 MaH - rechargeable capacities
- Various termination styles

EAGLE EP PICHER

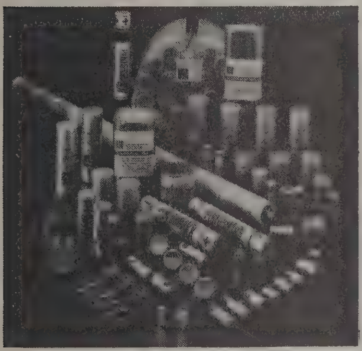
Keeper II®

- Highest utilization of valuable board space compared to cylindrical cells
- Wave solderable up to 5 seconds
- Hermetically sealed
- Capacity 350-1750 Mah
- 3.5V operating voltage

Electrochem

ELECTROCHEM INDUSTRIES

Lithium Systems



- Widest variety of lithium technologies and chemistries
- Sizes DD's-button cells
- Capacities: 200 MaH-300 AH
- Temperatures: -40°C to 150°C
- Operating voltage: 3.0-3.8VDC

TADIRAN

Lithium Inorganic Batteries

- Hermetically sealed
- 3.6 V operating voltage
- 370 to 27000 MaH
- Temperature range: -55°C to +85°C

DURACELL BATTERIES

DURACELL *BATTERIES*

ALKALINE

PRIMARY CELLS & BATTERIES

DURACELL® alkaline-manganese dioxide batteries are the popular choice for most consumer, industrial and military applications where an economical, general purpose battery is required. Advantages include high energy output, reliability, long shelf life, and superior low temperature performance.(1) In standard sizes, the DURACELL® alkaline battery system is generally available in cylindrical and multicell configurations.

Duracell is committed to working with manufacturers in the design and production of tomorrow's electronic products. Our Account Managers can provide expert applications and product specifications assistance to help you match the optimum premium battery system to your requirements. We are also ready to assist you in developing your concepts into successful products by offering global supply and distribution information and production launch support. If you have additional questions, or would like to discuss your applications with one of our Account Managers, please contact Duracell. We would appreciate hearing from you.

(1) Operating temperature range is -4°F (-20°C) to 130°F (54°C)
(2) Rated at 70°F (21°C). Typical capacities can be higher based on user's particular application.
(3) Terminal code: F-flat; S-snap; RF-recessed flat; CS-coiled springs; IS-insulated screw; MS-miniature snap; TL-tab leads.
(4) Dimensions are IEC/ANSI standards.
* Dimensions are Duracell standards

LITHIUM/MnO$_2$
PRIMARY CELLS & BATTERIES

DURACELL® lithium-manganese dioxide (Li/MnO$_2$) batteries possess high energy density, high rate capability over a broad temperature range,[1] and excellent capacity retention determined at over 95% after five years at room temperature. DURACELL® Li/MnO$_2$ batteries are ideally suited for a wide range of uses, from supplying high current output for pulse-type applications to providing long-term standby power for memory retention.

Duracell is committed to working with manufacturers in the design and production of tomorrow's electronic products. Our Account Managers can provide expert applications and product specifications assistance to help you match the optimum premium battery system to your requirements. We are also ready to assist you in developing your concepts into successful products by offering global supply and distribution information and production launch support. If you have additional questions, or would like to discuss your applications with one of our Account Managers, please contact Duracell. We would appreciate hearing from you.

(1) Operating temperature range is -40°F (-40°C) to 140°F (60°C). Information on performance beyond this range available upon request.
(2) Rated at 68°F (20°C). Typical capacities can be higher based on user's particular application.
(3) Li/MnO$_2$ cells should not be charged. UL has established these values as the maximum current the cell will tolerate in the event of diode failure.
(4) Terminal code: F-flat; PC-printed circuit board pins; C-connector; T-tabs.
(5) DL223A is also available as DL223AR with wire leads, connector and Velcro patch for computer clock/calendar, and memory back-up applications.

NICKEL-METAL HYDRIDE

RECHARGEABLE CELLS & BATTERIES

DURACELL® nickel-metal hydride batteries deliver the highest energy density and excellent rate capability in a rechargeable chemical system. In high power consumer devices, nickel-metal hydride batteries are the preferred rechargeable battery due to one hour charge capability, broad temperature range[1] and long cycle life.

Duracell is committed to working with manufacturers in the design and production of tomorrow's electronic products. Our Account Managers can provide expert applications and product specifications assistance to help you match the optimum premium battery system to your requirements. We are also ready to assist you in developing your concepts into successful products by offering global supply and distribution information and production launch support. If you have additional questions, or would like to discuss your applications with one of our Account Managers, please contact Duracell. We would appreciate hearing from you.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C

CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E

EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J

JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K

kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L

LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M

MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O

OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P

PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T

TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

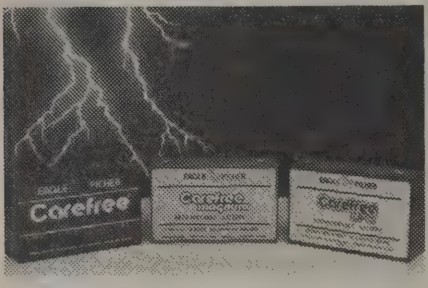
YIG yttrium iron garnet

Z

ZIF zero insertion force

Carefree®

Valve Regulated, Lead-Acid Rechargeable Batteries



Eagle-Picher features the world's largest selection of sealed, lead-acid, rechargeable batteries

Powerful Features

Performs at rated capacity on first cycle.

No memory limitations.

Delivers rated capacity upon demand, whether use is cyclic or stand-by.

Lead-Calcium grid. Maintains constant charge characteristics throughout life.

Long life and High reliability.

Requires only proper recharging for years of service.

Rechargeable. Provides hundreds of charge-discharge cycles.

Charging

The life of all maintenance-free, lead-acid batteries can be greatly affected by the charging method used. To achieve optimum performance and life from batteries, the charging method must be adjusted to the conditions of service.

Float Service

A battery in float service is being subjected to continuous charging and is called upon to deliver power at infrequent intervals or in case of a power outage. Under this condition, the battery charging should be:

Constant potential	2.28-2.32 Volts/Cell
Limiting Current	20%-Rated Capacity in Amps
Charging Time	Continuous

Cyclic Service

A battery in cyclic service is normally being discharged at a more frequent interval than when it is in float service. In cyclic service it has less time to recharge. Under this condition, the battery charging should be:

Constant Potential	2.50-2.55 Volts/Cell
Limiting Current	50%-Rated Capacity in Amps
Charging Time	10-24 Hours

TIME KEEPER™

Computer Clock Batteries

Saves You And Your Customers Time & Money Every Day.

Over 9 million 286 and 386-based PC's are currently in use. An estimated 14 million more will be shipped in the next two years. Each one requires a replaceable battery which maintains the internal real time clock and important configuration files.

Your customers can rely on Time Keeper to provide that power. Every Day! And, because these batteries are produced in the USA, you can rely on Eagle-Picher for lower prices, reliable service and instant delivery. Every Time!

Keeper II®

Memory Backup & Consumer Replaceable Batteries

The electrochemistry of Eagle-Picher's Keeper II Lithium batteries ensures years of dependable service in stand-by applications where long-life memory back-up is required.

Its prismatic design allows the Keeper II to be customized to meet unique commercial applications.

Keeper II® Batteries

Years of low rate, continuous use.

Standby power for 10 years and more.

Microcalorimetry tests show an 80% retention of capacity in 15 years.

Highest utilization of valuable board space when compared to round and cylindrical cells.

Energy density is significantly higher than other chemistries.

Wave solderability.

Underwriters Laboratories recognized component.

Hermetically sealed to ensure long life and non leakage at high temperatures.

All Eagle-Picher batteries are made in the United States of America

Lithium Batteries

For Military And Aerospace Applications

Eagle-Picher has been producing cells and batteries for the Aerospace market for over 30 years. This long-term commitment has made us one of the world's most diversified battery manufacturers.

Today, our Electronics Division produces more than 20 different cell systems, including:

- Lithium/Carbon Monofluoride
- Lithium/Thionyl Chloride
- Reserve Lithium/Thionyl Chloride
- Calcium/Thionyl Chloride
- Silver-Zinc
- Reserve Silver-Zinc
- Nickel-Hydrogen
- Calcium/Calcium Chromate Thermal
- Lithium-Alloy/Iron Disulfide Thermal
- Lead Acid
- Sealed Nickel-Cadmium
- Vented Nickel-Cadmium
- Nickel-Zinc

Lithium Battery Systems

Eagle-Picher produces the two most energetic lithium systems available on the market today: Lithium/Carbon monofluoride (Li/CF$_x$) and Lithium/Thionyl chloride (Li/SOCl$_2$).

Development And Production Capabilities

Eagle-Picher's in-house capabilities are unmatched in the industry. A group of over 100 engineers, for design and project management, enables Eagle-Picher to staff a battery program of any magnitude. 200 people in our machine tool facility fabricate tooling and fixturing for hardware development and production.

Eagle-Picher has built qualified batteries for nearly every major weapons system currently used by the U.S. Government. We've earned a reputation for high quality, low cost development and production.

Eagle-Picher produces Lithium anode cells in LI/CF$_x$, Li/SOCL$_2$, and Reserve Li/SOCL$_2$. Batteries and cells are produced both as special purpose designs and "off the shelf" existing designs. Some of the existing cells and batteries are listed below.

Batt/Cell Part #	Type & Configuration	OCV	Cap. (Ahr.)	Vol (In^3)	Wt. (g.)	Remarks

Customer Service

Eagle-Picher's battery facilities benefit from a unique combination of multiple system capability and a large support organization. Those benefits, coupled with strong customer orientation, Midwest economics and our long-term commitment to the product, have made us a leader in the industry of special purpose military batteries. The large existing production base, plus continued development into new battery technologies, is assurance that Eagle-Picher will meet your battery needs now, and still be here to produce them in the future.

FOR THE FINEST IN BATTERIES & BATTERY SYSTEMS

Specializing in batteries, value added assemblies, battery chargers and battery holders for over a quarter of a century, HOUSE OF BATTERIES is the industry leader in design and engineering assistance for custom battery packs. EPA approved recycling program for spent nickel cadmium and lead batteries. Free battery design guides are available. Ready made or custom built, HOUSE OF BATTERIES is first in selection and responsive personal service.

ELECTROCHEM - Manufacturer of Quality, High Performance Primary Lithium Batteries

Electrochem, a U.S. manufacturer, has over 15 years of experience in designing and assembling primary lithium cells and batteries. The highest standards for performance and reliability are maintained. We develop and manufacture cells and packs to meet customers' technical and operational requirements.

*Non-Magnetic Cells

BCX 72-Lithium Bromine Complex/Spirally Wound

Unique BCX technology for superior performance in moderate drain rate and low temperature applications requiring long life and high capacity.

CSC 93 and PMX 150 Lithium Sulfuryl Chloride/Spirally Wound

With unique design and chemistry, CSC and PMX cells feature "no voltage delay" and higher rate and temperature capability. Designed for applications requiring immediate power on demand or frequent on/off operation. PMX for higher temp (up to 150°C), rugged environments.

QTC-Lithium Thionyl Chloride/Bobbin

QTC cells are ideal for CMOS RAM backup and many other low drain rate applications. Low self discharge rate. Low cost. Single/multiple cell packaging available with customer specified connectors.

Custom Battery Packs

Electrochem can design custom battery packs specifically for your application. Safety and reliability are designed and manufactured into every pack taking into account application requirements, cell matching, protective circuitry, and vibration and shock specifications.

MISSION STATEMENT

"Our mission is to strive for Excellence in service, products, and performance. We will be Accountable to our customers, our suppliers, our community, and each other. Our Credibility will be assured and reinforced through this commitment.

Gates Energy Products
Industrial Battery Division

Gates Energy Products sealed-lead CYCLON cells and batteries feature a patented "starved electrolyte" system which affords longer life, superior performance, reliability, and durability. They are available in single cells as well as standard and custom assemblies. GENESIS batteries are 30% smaller and lighter than conventional batteries; have low internal resistance, high rate discharge and fast charge capability.

EVEREADY®

ENGINEERING FOR INNOVATION

The name consumers trust
For over 100 years, Eveready has had a rich tradition of innovation and ingenuity. EVEREADY developed the world's first dry cell in the late 1800's. Since then, through a total commitment to quality, EVEREADY remains one of the most recognized and most trusted brand names of consumer products the world over.

Comprehensive technical support
EVEREADY provides a consulting service of experienced battery engineers as an aid to manufacturers in need of special battery designs. In a recent survey of OEM customers, EVEREADY sales managers were rated significantly better than the competition on their knowledge and expertise in battery technology and in the service they provide.

For help with your specific battery problems, call (314)982-2000 or write Eveready Battery Company, Inc., Battery Engineering, 1EBC, Checkerboard Square, St. Louis, MO 63164.

CHOOSE THE RIGHT BATTERY FOR THE RIGHT JOB

	Characteristics	Configurations	Battery Voltage	Applications
CLASSIC (Zn/MnO_2) Standard C/Zn 	Economical, dependable Variety of shapes and sizes Good shelf life Voltage drops gradually with use Reduced performance at low temperatures	AA C D 6V 9V Other Cylindrical and Rectangular	1.5 to 510	*Low to moderate periodic power needs* Radios, flashlights, lanterns, small lighted toys and novelties, barricade flashers, lighting and alarm systems, electric fence controllers, laboratory instruments, smoke detectors, remote control transmitters
SUPER HEAVY DUTY (Zn/MnO_2) Premium C/Zn 	Premium power at popular prices Variety of shapes and sizes Good shelf life Excellent leakage resistance Lasts longer than standard C/Zn batteries	AA AAA C D 6V 9V Other Rectangular	1.5 to 9	*Moderate to heavy current or regular use* Flashlights and lanterns, moderate power portable audio devices, calculators, motor driven devices, communication equipment, electronic games, remote control transmitters, clocks
ENERGIZER (Zn/MnO_2) Alkaline 	Premium price Variety of shapes and sizes Best, longest lasting power source Excellent shelf life Best low temperature characteristics Best voltage maintenance under load	AA AAA AAAA C D 9V Other Cylindrical and Rectangular	1.5 to 9	*Heavy current or continuous use* High power flashlights and lanterns, cameras and photo accessories, high drain toys and games, high power portable audio devices - Boom Boxes, CD players, personal stereo - "Walkman," portable TV's, smoke detectors, shavers, portable communication systems, medical instruments, clocks

	Characteristics	Configurations	Battery Voltage	Applications
MANGANESE DIOXIDE (Zn/MnO_2) 	Lower cost and energy density than silver oxide, mercuric oxide, and zinc air Variety of shapes and sizes Excellent shelf life Gradual sloping discharge curve Good low temperature characteristics Good resistance to shock, vibration, and acceleration	Miniature	1.5 to 12	*Miniature battery powered electronic equipment* Calculators, photo, novelties, watches, remote controls
MERCURIC OXIDE (Zn/HgO) 	Variety of shapes and sizes Outstanding shelf life High capacity Good resistance to shock, vibration, and acceleration Relatively flat discharge curve	AA 9V Miniature Other Cylindrical	1.35 to 8.4	*Miniature battery powered electronic equipment* Cameras, exposure meters, instruments, hearing aids, watches, calculators, microphones
SILVER OXIDE (Zn/Ag_2O) 	Variety of shapes and sizes Outstanding shelf life High capacity Flat discharge curve Good low temperature characteristics Good voltage maintenance under load Exceptional salting resistance Good resistance to shock, vibration, and acceleration	Miniature Photo	1.5 to 6	*Miniature battery powered electronic equipment* Hearing aids, cameras, instruments, watches, calculators
ZINC AIR (Zn/O_2) 	Variety of shapes and sizes Excellent shelf life until activated Highest capacity-to-volume ratio for miniature batteries Flat discharge curve Good low temperature characteristics Good resistance to shock, vibration, and acceleration Activated by removing tab covering from air access hole Must have access to air (oxygen) to operate	Miniature Hearing Aid 9V	1.4 to 8.4	*Miniature battery powered electronic equipment* Hearing aids, pagers
NICKEL CADMIUM (Ni/Cd) Rechargeable 	Variety of shapes and sizes Can be assembled into multicell packs Relatively flat discharge curve Good high and low temperature performance High resistance to shock, vibration, and acceleration Long cycle life, up to 1000 charges Higher self discharge than ENERGIZER alkaline Fast charge types available Consumer cells and chargers available Capacities from 80 mAh to 4 Ah available	AA AAA C D 9V	1.2 to 7.2	*Rechargeable devices, standby power and replacement cells for high usage devices* Portable tools and appliances, photoflash, remote control models, standby power, alarm systems, personal pagers, cordless phones, cellular phones, high use consumer devices, portable computers
LITHIUM (Li) 	Variety of shapes and sizes High energy density Outstanding shelf life Leak resistant UL Recognition on most sizes Good low and high temperature use and storage performance	AA Miniature Cylindrical	1.5 to 6	*Long life, low to moderate drain electronic equipment* Watches, calculators, cameras, memory back-up, hearing aids, pagers 1.5V AA for High Drain, High Tech Applications

Gates Energy Products

Industrial Battery Division

CYCLON® SEALED-LEAD BATTERIES

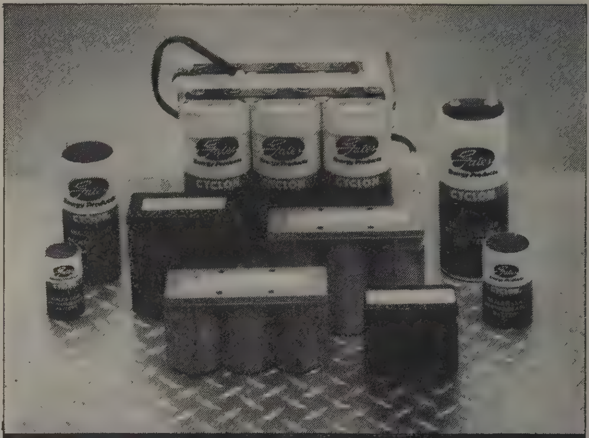
Gates invented and patented the starved-electrolyte, oxygen recombining sealed-lead battery. The unique construction of Gates' sealed-lead cells offers advantages not found in conventional lead-acid batteries. The starved electrolyte system allows recombination of gas to prevent dry-out and the venting of acid vapor, effectively eliminating terminal corrosion and allowing mounting in any position.

Gates offers a wide range of sealed-lead single-cell and monobloc batteries.

- **Cyclon®** – single cells for design versatility
- **Monoblocs** – standard batteries for volume applications

Cyclon single cells can be custom assembled to meet your precise needs. Available in three basic design sizes – 2.5, 5.0 and 25 Ah – Gates single cells can be connected in series or parallel to meet voltage, capacity and space requirements.

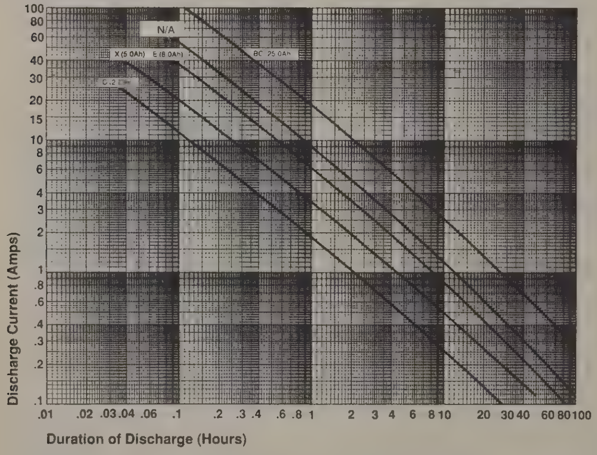
Monobloc batteries offer you the convenience of a pre-assembled component for a diversity of applications. Monoblocs are available in 4-, 6- and 12-volt modules of 2.5, 5.0 and 8.0 Ah sizes. These can also be connected in series or in parallel for additional voltage and amp-hour capacity.



A full range of Cyclon batteries offers superior performance, including longer life, designed to meet your application-specific needs.

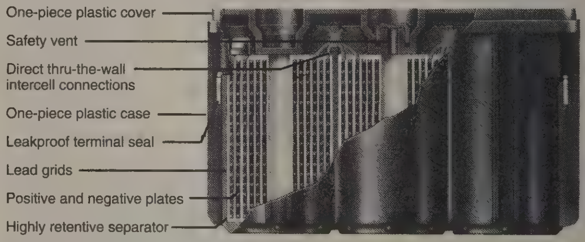
Standard batteries are available in a wide range of voltage and amp-hour choices, using either shrink-sleeve or plastic case packaging. If your needs are more specialized, Gates can custom assemble batteries to your precise amp-hour and voltage requirements with the packaging type, geometry and terminations best suited to your design.

SEALED-LEAD PERFORMANCE CHARACTERISTICS



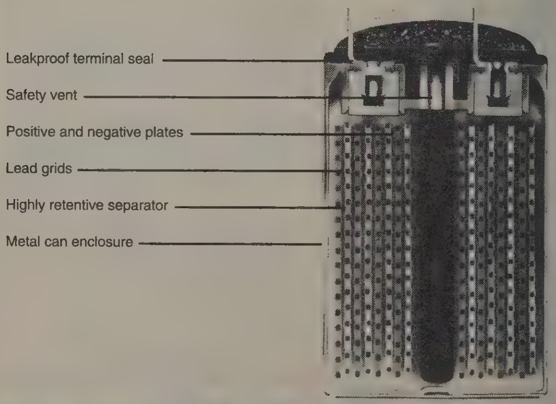
New cells must be cycled appropriately before full rated capacity, as shown on this curve, is reached.

GATES MONOBLOC BATTERY CONSTRUCTION



One-piece plastic cover
Safety vent
Direct thru-the-wall intercell connections
One-piece plastic case
Leakproof terminal seal
Lead grids
Positive and negative plates
Highly retentive separator

GATES SINGLE-CELL CONSTRUCTION



Leakproof terminal seal
Safety vent

Gates Energy Products

Industrial Battery Division

GENESIS® SEALED-LEAD BATTERIES

The new Genesis line of sealed-lead batteries has been specifically designed to meet a variety of customer needs and is available in different ratings, to provide unsurpassed reliability and performance. Genesis sets new industry standards in weight, size, terminal design, longevity and high-rate discharge power.

The expanded Genesis line includes an "application built" series; the HrD for high-rate discharge with 100% rated capacity on the first cycle, the CyD for cycle duty over short and long run times and the ExD for extreme duty performance under high temperatures and in severe environments.

Smaller and Lighter

Because of its high volumetric power density, Genesis provides equivalent power at high rates of discharge in 30% less space and weight.

Low Internal Resistance

Utilizing Gates' patented pure lead-tin technology, thin plate design provides the lowest internal resistance in the industry.

Industry Standard Sizes

Genesis is designed to fit into existing UPS cabinets, thereby reducing the amount of engineering needed for retrofit.

Maintenance-Free Design

Recombinant sealed technology combined with hardened copper terminals eliminates periodic terminal tightening, while assuring no acid leakage.

The Genesis sealed-lead acid battery is now available in three versions for use in high-rate discharge, cycle-duty, and extreme-duty applications.

Office Compatible

The Genesis battery features a flame-retardant, UL 94-VO case, flame arrestor vent (except 50 w/cell) and sealed design for use in the office environment.

Long Life

Gates' technology has been proven in demanding telecommunications field conditions for more than 17 years.

GENESIS PRODUCT FAMILIES

PORTABLE POWER
HIGH ENERGY LITHIUM BATTERIES

POWERDEX®

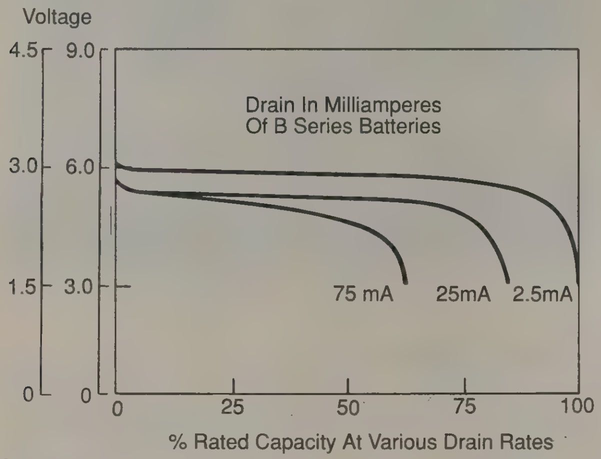
An Ultra-Thin, Ultra-Light, High-Energy Lithium Battery

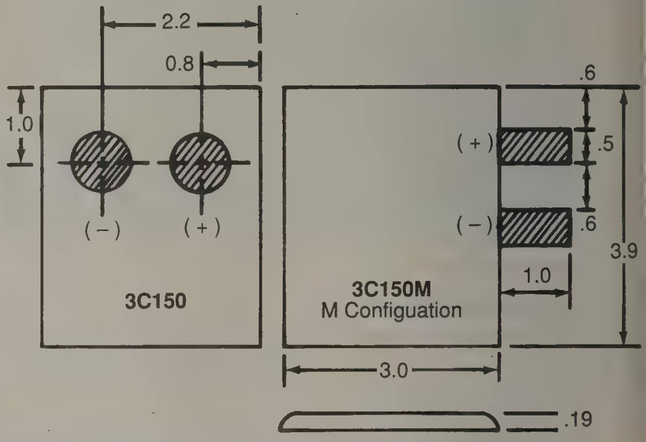
POWERDEX
POWERDEX

Portable Power

The Gould POWERDEX® primary battery is portable power technology advanced to a new plane. Outstanding power-to-weight and power-to-volume ratios offer the broadest possible freedom for product designs. The wafer-thin construction of POWERDEX® batteries provides reliable high-energy density in a light weight, compact package. POWERDEX® is the battery of choice where high energy density is acquired in a planar geometry configuration.

Typical Technical Data





C Series Batteries Dimensions (cm)

For Smartcard applications, customized 0.07 cm thin battery is available.

Advantages

- High energy density
- Flat Discharge curve
- Planar Construction
- Customized capacity
- Long shelf life
- Unique terminal arrangement

A New Dimension in Portable Power...

The POWERDEX® battery brings planar geometry to the contemporary design of electronic equipment. With high energy density, high capacity, and a flat discharge profile, the advanced technology of POWERDEX® planar batteries expands the potential of product design and performance.

The exceptionally efficient bipolar cell design and construction of the POWERDEX® battery provides low-resistance connection between cells. Together with this advanced construction, lithium manganese dioxide chemistry produces a reliable portable power source for today's electronic devices.

...For a New Generation of Products

The POWERDEX® battery is an excellent choice of portable power for low- to medium-drain applications. Its planar geometry can be accommodated in a wide range of electronic devices.

Characteristics of Gould Powerdex® Lithium Power Source Batteries

Battery Designation		Standard Dimensions (cm)	Nominal Voltage	Rated Capacity mAh	Recommended Max. Discharge Rate mA

FOR MEMORY BACK-UP SYSTEMS

COIN CELL SERIES

Printed circuit board-mounted lithium coin cell battery holders eliminate the need for permanent solder tab mounting of cells. Unique molded design permits easy insertion and removal of battery without soldering or special tools. Fits 3-volt coin cells: Sizes 10mm, 12mm, 16mm, 20mm, 23mm, 24/25mm and 30mm. UL flammability rating-UL94V-0.

HORIZONTAL SERIES

Fits 3-volt lithium and other horizontal cells: sizes 2/3A, 1/2AA, AA, C, 2N and 1/3N, 9 volt batteries, too. Simple PC board mounting with fast-on tab terminals for hardware soldering and eyelet mounting.
UL flammability rating — UL94V-0.

BATTERY PACK SERIES

Four styles: PC (Printed Circuit), W (Wire), SF (Snap Fastener, male/female terminals), quick-connect solder lug. Fits all AA and AAA type cells, 2, 3 and 4 cell capacity. Corrosion-free nickel plated contacts, impact-resistant nylon #6. UL flammability rating — UL94V-2.

ALSO AVAILABLE: BATTERY HARDWARE, 9V SNAPS, PLASTIC BATTERY CASES.

[a] Delivered capacity when discharged at normal temperatures (20°C) at normal discharge rates.

[b] Based on fuel consumption only.

[c] Weight of air not considered in computation of watt hours.

[d] Water-activated

[e] Automatically activated; high rate discharge; 2- to 10-min rate.

[f] Fused salt; heat-activated; high rate discharge; 2- to 10-min rate.

[g] Four-minute discharge rate.

[h] β-alumina electrolyte, 300°C operation.

[i] Fused salt; 350°C operation.

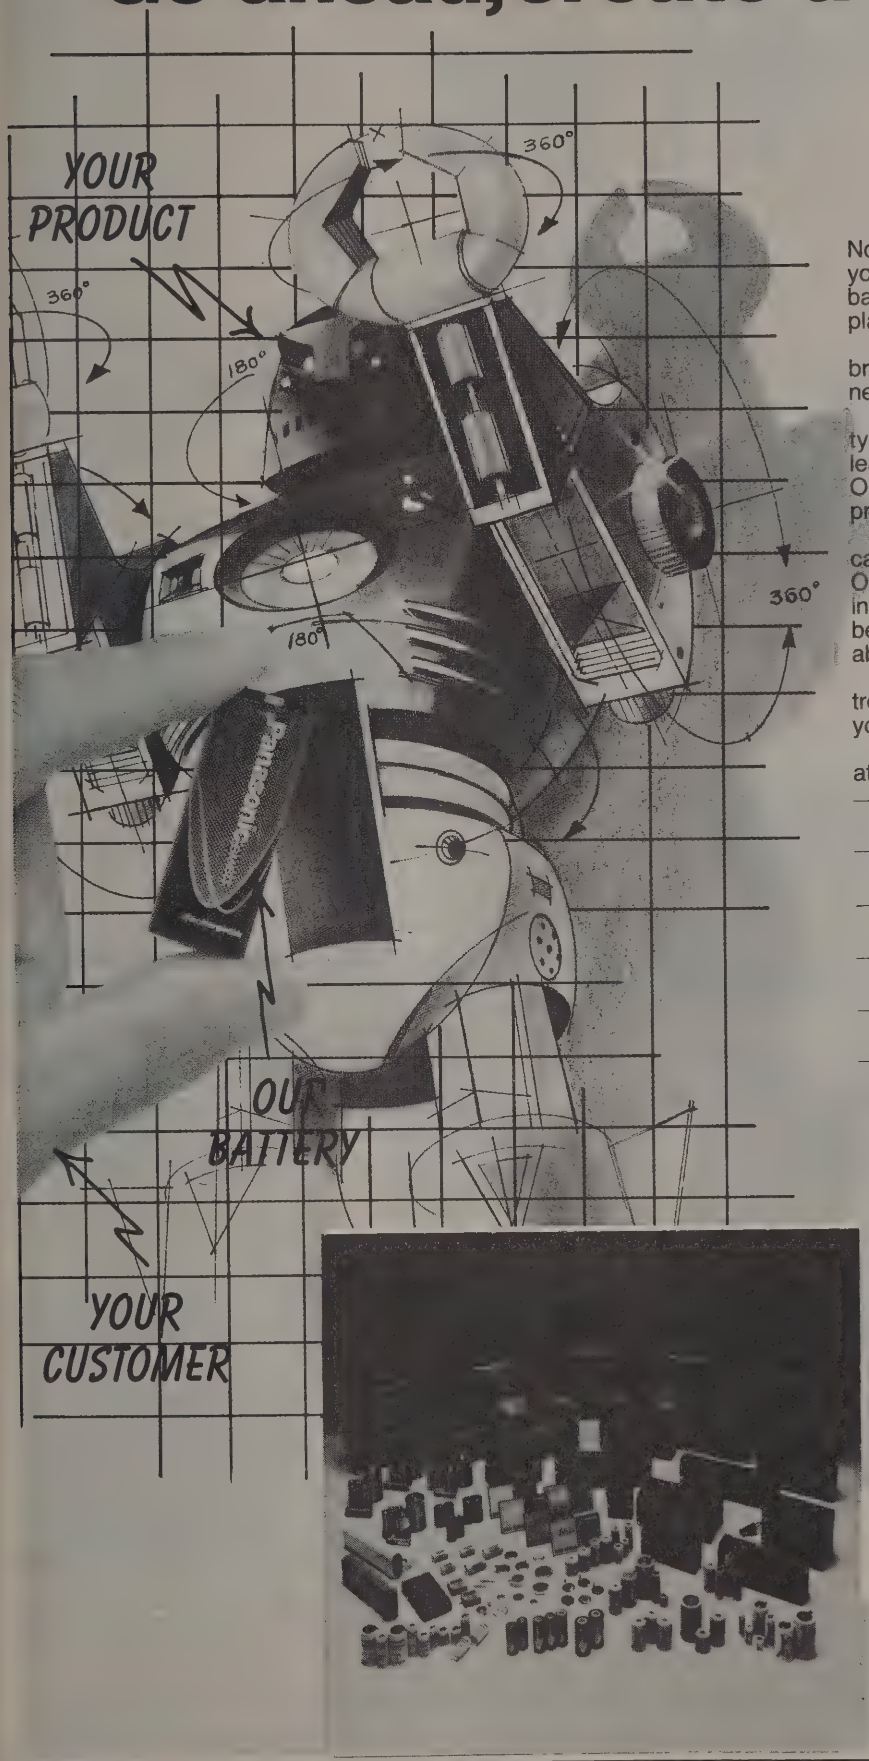
[j] Solid $RbAg_4I_5$ electrolyte.

[k] Several different cathode materials used.

[l] Fuel consumption is based on source of H_2.

[m] Based on methanol battery-fuel supply in situ.

Go ahead, create a monster.



No matter how monstrous...or how small... your product may be, Panasonic has a battery to make it walk, run, hop, bop, work, play...or anything else you have in mind.

Surprised? Panasonic sells one of the broadest battery lines in the world, with new ones on the way.

So, it stands to reason that we have plenty to choose from. Including Ni-Cd, sealed lead and lithium rechargeable batteries. Or lithium, micro, alkaline or manganese primary batteries.

That's not all! You can choose super high capacity batteries. Rapid rechargeables. Or compact power sources for the ultimate in small size and portability. And they'll all be 100% tested to ensure top quality, reliability and durability.

With an eye toward the future, we're introducing new power sources that'll take your products well into the 21st century.

Panasonic batteries. They're your creative power source.

Are you getting all you want from eem?

EEM/Electronic Engineers Master is **user**-named, **user**-driven, and **user**-sensitive.

You, the electronic engineer, are the individual the thousands of manufacturers represented in EEM are trying to reach. **You** are the reason hundreds of manufacturers place their data pages in EEM—so that **you can specify their product in your project.**

EEM wants to know:

- what's new
- what products you are looking for
- what you call them
- what are their basic parameters
- where do they belong in the EEM Product Sections

What kind of reference material/engineering aids will help you make your electronic component choices:

- glossaries
- nomographs
- charts
- product selection guides

Write to the editor: The Editor
EEM/Electronic Engineers Master
645 Stewart Ave.
Garden City, NY 11530

Plainview Batteries offers a wide selection of rechargeable miniatures-Nickle-Cadmium in the range 1.2 to 4.8V, 15to600 mAh; and Nickel Metal Hydride Hydricell™ batteries in a rapidly expanding number of ratings. All feature maximum capacity for their size, low internal resistance, long life and easy re-charging...all at attractive low prices.

Nickel-Cadmium models retain over 50% of their original capacity after one year at room temperature. Design life is 5 to 7 years at a constant trickle charge rate.

Hydricells have up to 50% greater capacity than Nickel-Cadmium equivalents. Environmentally-friendly, they're well-suited for applications requiring no cadmium, lead or mercury. May be continuously trickle-charged, or quick charged under controlled conditions.

Check the standard-unit tables for the model that's perfect for your application. Should you require a 'special', we'll be happy to assemble it for you, using our extensive line of button cells as 'building blocks'.

ETERNACELL®

LITHIUM-TCL

Ideally Suited for Clock Battery Replacement or as Original Equipment

The TCL system allows operation of many electronic functions in addition to volatile memory support—with just a single cell. Today's Lithium batteries exceed all the previously accepted operating parameters for primary batteries and allow design freedom from virtually all shelf life and operating temperature constraints. While not intended for high rate applications, **Eternacell TCL batteries offer a combination of features unmatched by any other lithium battery system.**

Committed to Continuing Development

Formed in 1970 specifically to develop and apply high energy battery systems, Power Conversion introduced the first commercial lithium systems and today is the leading manufacturer of lithium batteries in the world, supplying both high and low rate requirements for commercial, industrial and government applications. Today Power Conversion markets three lithium battery systems to cover all types of applications from low rate miniaturization to larger size, high rate cells capable of meeting extreme environmental requirements

These systems are:
TCL — Lithium Thionyl Chloride ($Li/SOCl_2$)
MDX— Lithium Manganese Dioxide (Li/MNO_2)
SDX — Lithium Sulfur Dioxide (Li/SO_2)

General Specifications of TCL Eternacell® Lithium Thionyl Chloride Batteries

The Eternacell® TCL is offered in a complete line ranging in capacity from 0.8 ampere hours to 11 ampere hours. The following features are standard:

- Every cell is a power limited cell designed for safe operation.
- Every cell incorporates a safety vent in the cell case.
- Every cell is hermetically sealed.
- Every cell is 100% voltage checked, and 100% high temperature stored prior to shipment.

*20ga Insulated 1.75 Inch Axial Lead Wire Each Terminal

Over the last twenty years Eternacell lithium batteries have been meeting the power needs of hundreds of products around the world -- in personel computers, utility meters, security products, industrial controls, and high performance military and aerospace products. Custom pack 3V and 6V batteries are available in addition to the sizes listed above. Every cell is approved by Underwriters Laboratory, Inc. Eternacell also offers the largest number of sizes, terminations, and mounting options available.

LITHIUM BATTERIES
Packaged to fit

If your design needs a lithium battery, we can provide the right battery system that will fit your requirements exactly, even for the most hostile environments. Power Conversion is the largest U.S. producer of lithium cells and batteries, from miniature cells to large complex multicell battery designs.

• Lithium Sulfur Dioxide	2.9V/cell
• Lithium Thionyl Chloride	3.7V/cell
• Lithium Manganese Dioxide	3.4V/cell

We have designed, qualified, and produced a broad range of hi-rel lithium batteries to satisfy virtually any application over the past twenty years.

Count on our experience to develop the high-rate, low rate, or special battery system for your project. Call us today.

PolySwitch® **Resettable** Devices for the Battery Market

Noncycling, low-profile polymer devices provide reliable, resettable protection for rechargeable batteries

Weldable nickel leads and narrow, low-profile design make PolySwitch strap products extremely easy to install on the edges of battery packs.

Solid-state PolySwitch strap SRP and PRP products provide reliable, noncycling protection for rechargeable batteries and their surroundings. Sensitive to both current and temperature, the devices protect against external short circuits and internal overheating.

PolySwitch devices are positive temperature coefficient resistors that increase in resistance when heated by temperature or excess current.

A PolySwitch device "trips" and remains "latched" in a high resistance state until a fault is removed. Latching prevents continuous cycling, which occurs in bimetallic products, and can cause a short-circuiting metal object to overheat and create a potential fire hazard.

- The devices are rugged-they have no contacts to weld closed and their solid-state design is insensitive to shock and vibration.
- PolySwitch devices are remotely resettable-they can trip and automatically reset thousands of times.
- Low resistance remains stable over time and has minimal impact on battery life.
- All products are TUV and UL recognized.

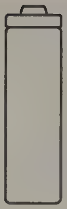
SELECTOR GUIDE

STANDARD (VR and VBE)



Engineered for cycling applications Saft's two standard series are proven classics manufactured in hundreds of millions of units They are available in cylindrical (VR) and button (VBE) format, and feature ''sintered'' type electrode technology providing reduced charge times as well as permanent charge acceptance.

The VBE is unique among button batteries in delivering high-intensity power peaks. Both series offer an excellent cost/performance ratio.

Saft type	Format	Capacity C_5Ah	Voltage (V)	Dimensions (mm)		Weight (g)

HIGH ENERGY (VE, VRE and VSE)

To create significant capacity gains for the same volume, Saft has upgraded its sintered electrode technology. And to meet the needs of increasingly light and compact applications, the company has developed and implemented nickel foam electrode technology for the VSE series.
The result is an 'ultra-high energy' battery, fully recommended for the whole range of portable electronics applications.

HIGH POWER: ULTRA-FAST CHARGE AND FAST DISCHARGE (VY)

With a highly reduced charge time (15 minutes) for a high-performance discharge rate, these cells are specially designed for cordless tools. Their high capacity (1.4 Ah) significantly increases the run time of the tools, and they benefit from recent upgrades in internal connections which enhance both discharge performance and reliability. The use of "sintered" electlode technology ensures a long cycling life.

Saft type	Format	Capacity C_5Ah	Voltage (V)	Dimensions (mm)		Weight (g)

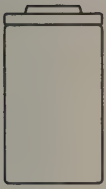
* Maximum dimensions of sleeved cells (CFG).

HIGH POWER, PERMANENT CHARGE AND FAST DISCHARGE (VP)

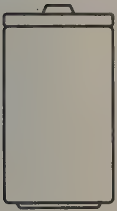


Specially engineered to meet the constraints of applications such as cordless vacuum cleaners and emergency medical equipment, which require permanent charge and frequent high intensity discharge, this series is designed to provide the longest possible lifetime.

Saft type	Format	Capacity C_5Ah	Voltage (V)	Dimensions (mm) Ø*	Dimensions (mm) H*	Weight (g)
VP 134 series						
VP Cs 1300	Cs	1.30	1.2	22.4	42.3	48

* Maximum dimensions of sleeved cells (CFG).

HIGH TEMPERATURE (VT)



These cells are available in varied formats and accept a permanent charge in high-temperature environments such as security lighting installations. Specially adapted electrodes and electrolyte ensure a considerable lifetime, further enhanced in the VTD 70 by virtue of an improved electrode and separator.

Saft type	Format	Capacity C_5Ah	Voltage (V)	Dimensions (mm) Ø*	Dimensions (mm) H*	Weight (g)

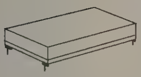
BACK-UP MEMORY (GBH and VBM)



GBH and VBM button cells have been designed to operate in permanent charge to supply back-up memory for both mass market and industrial applications. Assembly has been engineered to facilitate insertion on integrated circuits. The Memoguard tolerates extremely high discharge peaks, and its integrated assembly makes it a genuine electronic component, as reliable as a chip.

Saft type	Capacity C_5Ah	Voltage (V)	Dimensions (mm) Ø*	Dimensions (mm) H*	Weight (g)

** For other available products, see the MEMOGUARD R Catalogue.

PRISMATIC (GP)

GP cells are specially shaped to contain high energy in a small volume - a unique Saft design.
With sintered electrodes providing a prolonged life-time and a fast charge potential, they are tailored to such high technology applications as portable telecoms handsets.

Saft type	Capacity C_5Ah	Voltage (V)	Dimensions L x l x H (mm)	Weight (g)

Recharageable Batteries

Model	Nominal voltage (V)	Nominal capacity†1 (mAh)	Standard charge/discharge current (mA)	Max. discharge current (mA)		Charge/discharge Cycle characteristics	Charging method (constant voltage charge)	Dimensions (mm)		Weight (g)
				continuous†2	pulse†3			diameter (D)	height (H)	
ML1220*	3	12	0.1	2	5	3,000 cycles with 0.6mAh (discharge depth of 5%) 500 cycles with 2.4mAH (discharge depth of 20%)	3.1±0.15V trickle charge (2.8 ~ 3.1V)	12.5	2.0	0.7
ML2016*	3	25	0.3	8	20	3,000 cycles with 1.25mAh (discharge depth of 5%) 500 cycles with 5mAH (discharge depth of 20%)	3.1±0.15V trickle charge (2.8 ~ 3.1V)	20.0	1.6	1.8
ML2430*	3	90	0.5	10	20	3,000 cycles with 4.5mAh (discharge depth of 5%) 500 cycles with 18mAH (discharge depth of 20%)	3.1±0.15V trickle charge (2.8 ~ 3.1V)	24.5	3.0	4.0

* denotes model supplied with PC-mount terminal.
†1 Nominal capacity is determined to an end voltage of 2.0V when the battery is allowed to discharge at a standard current level at 23°C.
†2 Current value is determined so that 50% of the nominal capacity is obtained with an end voltage of 2.0V at 23°C.
†3 Current value for obtaining 2.0V cell voltage when 15sec. pulse applied at 50% discharge depth (23°C).
Sanyo batteries are UL recognized components (File No. MH12383). ●Consult us for details of items not described in this catalog.

Also featuring NI-CD memory back-up batteries. Please call for more information.

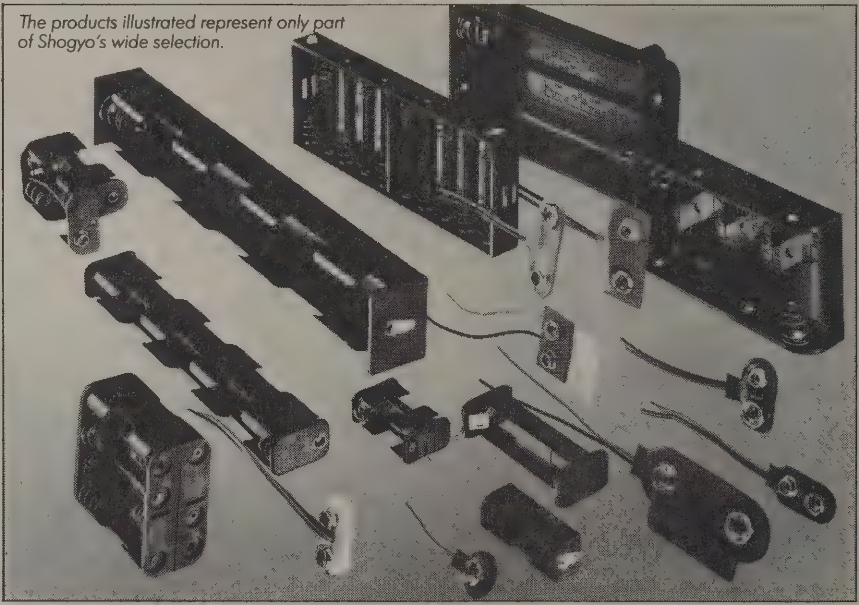
SHOGYO
BATTERY HOLDERS & SNAPS

Your design deserves Shogyo quality and reliability.
You deserve...
Shogyo Service...comprehensive, responsive and fast
Shogyo Professionalism...the helpful experience you need
Shogyo Prices...always competitive, usually better
and...
Shogyo Selection...with complete custom design capabilities

Including a diverse offering of:

- D, C, A, AA, AAA holders.
- 1, 2, 3, 4, 6, 8, 10 cell holders.
- Specialty holders (eg. two C cell/one 9V holders).
- Standard and high-retention holders.
- Holders and snaps with PC mountable pins.
- Holders with pre-fitted mounting holes; battery snaps, lead wires, or solder terminals; black, white or metal finishes; and polyethylene, UL 94 VO or stainless steel construction.
- Snaps in your choice of mountings, or unmounted.
- Snaps made from stainless steel or extra high-retention phosphorous-bronze.
- Hand straps in nylon, vinyl and cloth, your choice of lengths and attachment devices.
- And much more.



The products illustrated represent only part of Shogyo's wide selection.

For immediate assistance and specific information on the product(s) you require:

Description

BATTERY HOLDER

PART NUMBER: 6S-2/3A
SPECIFICATIONS: * Housing Material: 30% glass filled PBT, UL flammability rating 94 V-O. Color, black.
- Contact Materal: Spring hard stainless steel.
- Contact Finish: 1.27μm(50μ") min. nickel all-over, 3.81μm (150μ") min. tin/lead selective tails.

BATTERY HOLDER COVER

PART NUMBER: C-2018
SPECIFICATIONS: * Cover Material: Polystyrene, black UL 94 V-1.
* Application: Recommended for use with battery holder P/N 6S-2/3A.

Description

BATTERY HOLDER

PART NUMBER: 6S-AA
SPECIFICATIONS: * Housing Material: 30% glass filled PBT, UL flammability rating 94 V-O. Color, black.
- Contact Materal: Spring hard stainless steel.
- Contact Finish: 1.27μm(50μ") min. nickel all-over, 3.81μm (150μ") min. tin/lead selective tails.

BATTERY HOLDER COVER

PART NUMBER: C 6S-AA
SPECIFICATIONS: * Cover Material: Polystyrene, black UL 94 V-1.
* Application: Recommended for use with battery holder P/N 6S-AA.

CHARACTERISTICS OF BATTERIES AND FUEL CELLS

System	Anode	Cathode	Theoretical battery		Practical battery		
			Voltage, V	Capacity, Ah/kg	Typical voltage, V	Capacity^a	
						Wh/kg	Wh/dm^3
Primary:							
Leclanche	Zn	MnO_2	1.6	230	1.2	65	175
Magnesium	Mg	MnO_2	2.0	270	1.5	100	195
Organic cathode	Mg	*m*-DNB	1.8	1,400	1.15	130	180
Alkaline MnO_2	Zn	MnO_2	1.5	230	1.15	65	200
Mercury	Zn	HgO	1.34	185	1.2	80	370
Mercad	Cd	HgO	0.9	165	0.85	45	175
Silver oxide	Zn	AgO	1.85	285	1.5	130	310
Zinc-air	Zn	Air (O_2)	1.6	815	1.1	200	190
Li-organic electrolyte	Li	^{b}	2.1-5.4	130-660	1.8-3.2	250	400
Secondary:							
Lead-acid	Pb	PbO_2	2.1	55	2.0	37	70
Edison	Fe	Ni oxides	1.5	195	1.2	29	65
Nickel-cadmium	Cd	Ni oxides	1.35	165	1.2	33	60
Silver-zinc	Zn	AgO	1.85	285	1.5	100	170
Silver-cadmium	Cd	AgO	1.4	230	1.05	55	120
Zinc-nickel oxide	Zn	Ni oxides	1.75	185	1.6	55	110
Zinc-air^c	Zn	Air (O_2)	1.6	815	1.1	150	155
Cadmium-air^c	Cd	Air (O_2)	1.2	475	0.8	90	90
Zinc-O_2	Zn	O_2	1.6	610	1.1	130	120
H_2-O_2	H_2	O_2	1.23	3,000	0.8	45	65
Reserve:							
Cuprous chloride	Mg	CuCl	1.5	240	1.4	45	65^d
Silver-chloride	Mg	AgCl	1.6	170	1.5	60	95^d
Zinc-silver oxide	Zn	AgO	1.85	285	1.5	30	75^e
Thermal	Ca	^{b}	2.8	240	2.6	10	20^f
Ammonia-activated	Mg	*m*-DNB	2.2	1,400	1.7	22	60^g
High-	NA	S	2.1	685	1.8	200	^{h}
temperature	Li	S	2.2	1,150	1.8	200	^{i}
Solid electrolyte	Ag	Polyiodide	0.66	. . .	0.6	180	75^j
Fuel cell:							
Hydrogen^c	H_2	Air	1.23	26,000	0.7		^{k}
Hydrazine^c	N_2H_4	Air	1.5	2,100	0.7	800^b	^{l}
Methanol^c	CH_2OH	Air	1.3	1,400	0.9	175^b	185^m

[a] Delivered capacity when discharged at normal temperatures (20°C) at normal discharge rates.

[b] Based on fuel consumption only.

[c] Weight of air not considered in computation of watt hours.

[d] Water-activated

[e] Automatically activated; high rate discharge; 2- to 10-min rate.

[f] Fused salt; heat-activated; high rate discharge; 2- to 10-min rate.

[g] Four-minute discharge rate.

[h] β-alumina electrolyte, 300°C operation.

[i] Fused salt; 350°C operation.

[j] Solid $RbAg_4I_5$ electrolyte.

[k] Several different cathode materials used.

[l] Fuel consumption is based on source of H_2.

[m] Based on methanol battery-fuel supply in situ.

TADIRAN
LITHIUM BATTERIES

Power Your Products Into The 21st Century℠

NOBODY PACKAGES LITHIUM'S POWER SO EFFECTIVELY, OR HELPS YOU SOLVE DESIGN PROBLEMS SO PERFECTLY.

SIZE DD
TADIRAN LITHIUM INORGANIC BATTERY
TADIRAN

A FULL LINE TO MEET YOUR EVERY NEED, WITH EXPERT DESIGN CONSULTING SERVICE.

For PC Real-Time Clocks, Back-up Memories, Electronic Utility Meters, Microprocessor-Based Transmitters, Portable Equipment, Sonobuoys, Medical Equipment, Security Systems. . . Tadiran Lithium Batteries offer so much:

☐ Long Operating Life—15 Years & More—due to their low self-discharge characteristics—less than 1% per year, and hermetically-sealed construction! ☐ High Cell Voltage—more than twice the voltage of other batteries (3.6V)! ☐ High Energy Density—up to 700 Wh/kg! ☐ Wide Operating Temperature Range: −55°C to +85°C! ☐ Safe! ☐ UL-Recognized! ☐ Cost-Effective—saving space and reducing weight; lowest cost per unit of energy! ☐ Complete Range of Ratings & Configurations! ☐ Liberal Sampling Program! ☐ Proven Performance & High Reliability!

TAMURA BATTERY CHARGERS

Wall Plug-In, 120VAC, 60Hz.

file no. E82180

file no. LR38236

Tamura battery chargers are particularly suited for charging NiCd, lead acid and Gel-Cell batteries. They are UL 1310 listed for battery charger circuits. Contact the battery manufacturer for recommended voltage and current. For additional UL/CSA/VDE models see DC Power Supplies section for DC regulated and unregulated models and Transformers section for AC to AC models.

FEATURES

- UL Listed For Battery Charger Ckts.
- UL 544 Medical Capability.
- Thermal Overload Protection.
- 100% Testing.
- Transformer: 3 flange bobbin.
- US 3-Blade Ground Plug Available.
- Temp Range: 0 to +40°C.
- Case Temp Rise: ≤35°C.
- Oper Humidity: 10-90% RH.
- Material: Black ABS resin/UL 94-V0.
- No Audible Noise.

Sealed Rechargeable Battery

Because you know what's watts, go with Gates and Tauber.

There's no substitute for dependable battery power.

That's why discriminating engineers specify Gates Nickel Cadmium or Sealed Lead-Acid batteries for their critical applications.

Gates gives you the most watts per cubic inch of battery possible and a selection second to none.

And Tauber gives you Gates quality in the exact configuration you need.

"WE SHAPE THE POWER THAT LETS YOU SHAPE THE FUTURE!"

— Bob Tauber, Pres.

When you need dependable battery power configured to your exact specs, you need Tauber. We work with all cell types to meet the increasingly sophisticated demands of today's OEMs.

Tauber puts innovative engineering and design assistance, quality controlled craftsmanship and value into every job.

Call today for our FREE brochure and learn how we can shape the power that will help you shape the future.

Tauber's extensive off-the-shelf offerings include:

Primary Cells: Alkaline, Carbon-Zinc, Lithium, Mercury Silver Oxide, Zinc-Chloride andZinc-Air, from Duracell, Panasonic, Electrochem, Kodak, Varta, Tadiran and Rayovac.

Rechargeable Cells: Sealed Lead-Acid, Gelled and Starved Electrolyte, Nickel-Cadmium Cylindrical or Button Cells, Silver-Zinc Button Cells and Lead-Calcium Maintenance-Free Wet Cells from Altus/El-Power, Gates-G.E., Moli, Mule, Panasonic, Sonnenschein, Tadiran, Varta, Yuasa, Powersonics and Power Conversion.

Battery Chargers: Constant Voltage/ Constant Current, Cyclic and Float Duty from Xenotronix, Sonnenschein and Ault.

Battery Holders: All varieties, from Bogen/ MPD.

Switching Power Supplies.

Custom Battery Packs

tdi BATTERIES

Your TDI specialist will recommend the right design for your application.

With over 20 years experience and a seasoned team of battery system experts, we are uniquely qualified to offer you field-proven quality products and quickly deliver the support you need to succeed in a rapidly-changing market.

Meeting this growing demand for specialized batteries for custom applications is the focus of TDI. We begin the design process by getting to know your company, your applications and your needs.

With an extensive engineering staff, state-of-the-art manufacturing capabilities and strict adherence to SPC and Mil-Spec quality controls, TDI puts more energy into meeting your needs...so you get more out of your custom battery assemblies.

• FAST TURNAROUND • QUALITY PRODUCTS
• ENGINEERING SUPPORT

• NICAD • LEAD ACID
• LITHIUM (Primary and Rechargeable)
• NICKEL METAL HYDRIDE • ALKALINE • & OTHERS

For a wide range of applications:

• Cordless & Cellular Phones
• Communications • Medical Equipment
• Lap Top Computers • Business Electronics
• Military • Portable Instruments
• Memory Back-Up
• Emergency Lighting • Power Tools

TDI Stocks all Major Manufacturers' Batteries

• PANASONIC • GATES • SAFT
• SANYO • VARTA • DURACELL
• EVEREADY • TADIRAN
& Other Major Manufacturers

NP Series

The industry standard for reliable back-up power.

NPH

Specially engineered for high-rate discharge applications.

NPX

Next generation in UPS/back-up power batteries.

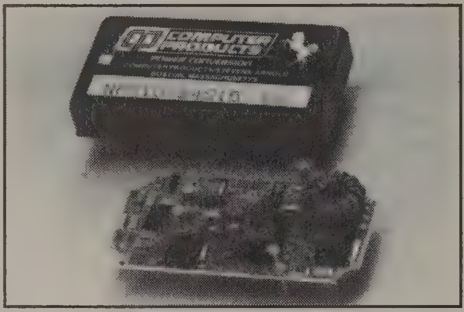
AC/DC Switchers

- General Purpose, Universal Input, 25W to 1500W
  - Medical Approved Versions
  - FCC/VDE B Versions
- External Supplies with Battery Charging Option
- Modular Power Supply, 1-6 Outputs, PFC, 1200W
- Encapsulated & Linear Power Supplies



DC/DC Converters

- High Density, 5W to 200W, NFC, AFC5-F, BASiX™ Series
- High Performance, 15W to 30W WR15/WR30 Series
- General Purpose, 0.5W to 100W
- Non-Isolated, 5W to 360W

GLOBAL CAPABILITIES

Computer Products

- Established in 1968
- ISO9000 Certification
- Agency Approvals
- Worldwide Manufacturing Operations
- Over 300 Standard Products
- Custom Design Capability
- Statistical Control & TQM

THINK OF IT AS THE 911 OF THE POWER SUPPLY INDUSTRY.

Need power supply help in a hurry? Call the TODD Power-Phone. Our engineers are trained to help you solve virtually any OEM power supply problem, from the earliest stages of design to last minute system trouble-shooting.

Need standard, modified, or custom switching power supplies? Just call the TODD Power-Phone. We'll get them to you on time, every time. Guaranteed.

Want general information? One call to the TODD Power-Phone can get you catalogs, spec sheets, prices, or anything else you need for your company's immediate or long-term power supply requirements.

The TODD Power-Phone.
Immediate response, immediate solutions.
It's a real life-saver.

Power Supply Modules

abbott

WHEN RELIABILITY IS IMPERATIVE.®

For MIL SPEC and critical industrial applications where reliability is the prime consideration, Abbott Power Supplies have been the predominant choice for the past 32 years. This enduring acceptance has been earned through sound design, dependable components, meticulous workmanship, exhaustive quality control and proven performance in the field under severe operating conditions. Whatever your demanding requirements, you will find the correct Abbott Power Supply module in the pages listed below.

A member of the ADWEST Group.

Military Power Supplies

Index/Table of Contents

INPUT	DESCRIPTION	POWER	MODEL	PAGE
AC-DC CONVERTERS				
115 Vac, 47-440 Hz, Single phase	High density AC/DC converters; single and dual outputs	20-200 watts	AW Series	D-1492 D-1493
115/220 Vac; 47-400 Hz, Single or Three Phase (Delta or WYE)	Multi-inputs, customer selectable	50 watts 100 watts	AM Series	D-1494 D-1495
115/220 Vac; 47-440 Hz, Single or Three Phase (Delta or WYE)	High power switcher, low EMI	500 watts	MH Series	D-1496
115 Vac; 47-440 Hz	High power switching power supply; single and triple outputs	300 watts	M Series	D-1497
115 Vac; 47-440 Hz	Low EMI, 200 kHz switcher; single and triple outputs	60 watts 100 watts	MB Series	D-1499 D-1498
115/220 Vac; 60/400 Hz	High power linear power supply; single or dual outputs	12-210 watts	LV & LLV Series	D-1500
115 Vac; 400 Hz	Low EMI, 200 kHz switcher; single and triple outputs	60 watts & 100 watts	WM Series	D-1499 D-1501
115 Vac; 400 Hz	Linear power supplies; single and dual outputs	12-280 watts	W & WW Series	D-1502
115 Vac 400 Hz 3Ø	High density, single and dual outputs	100-420 watts 48-60 watts	WL & WWL Series	D-1503
DC-DC CONVERTERS				
28 Vdc and 270 Vdc	Very High Density, board mountable	100-280 watts	SM Series	D-1504
14-32 Vdc	Full Mil, high density; single and dual outputs	20-50 watts 100-200 watts	AB Series	D-1506 D-1505
28 Vdc	High efficiency, 100 kHz switcher; single and triple output	60 watts 100 watts 200 watts	BC Series	D-1509 D-1508 D-1507
28 Vdc	Linear, low noise power supplies; single and dual outputs Output voltage: 5-50 Vdc	12-100 watts 3-210 watts	C Series CC Series	D-1510
28 Vdc	Linear, low noise power supplies; single and dual output. Output voltage: 5-500 vdc	2-170 watts	B & BB Series	D-1511
90-160 Vdc	High density, single and dual converters	20-200 watts	AW Series	D-1492 D-1493
100-300 Vdc	Multi-input, customer selectable; single and triple outputs	50 watts	AM Series	D-1494
200-300 Vdc	Multi-input, customer selectable; single outputs	100 watts	AM Series	D-1495
DC-AC INVERTERS				
24-30 Vdc	Sine Wave Inverter	180 watts; 27, 115 Vac, 400-1600 Hz	SN Series	D-2227
24-30 Vdc	Sine Wave Inverter	5-120 watts; 27, 115 Vac 400-1600 Hz	S Series	D-2226

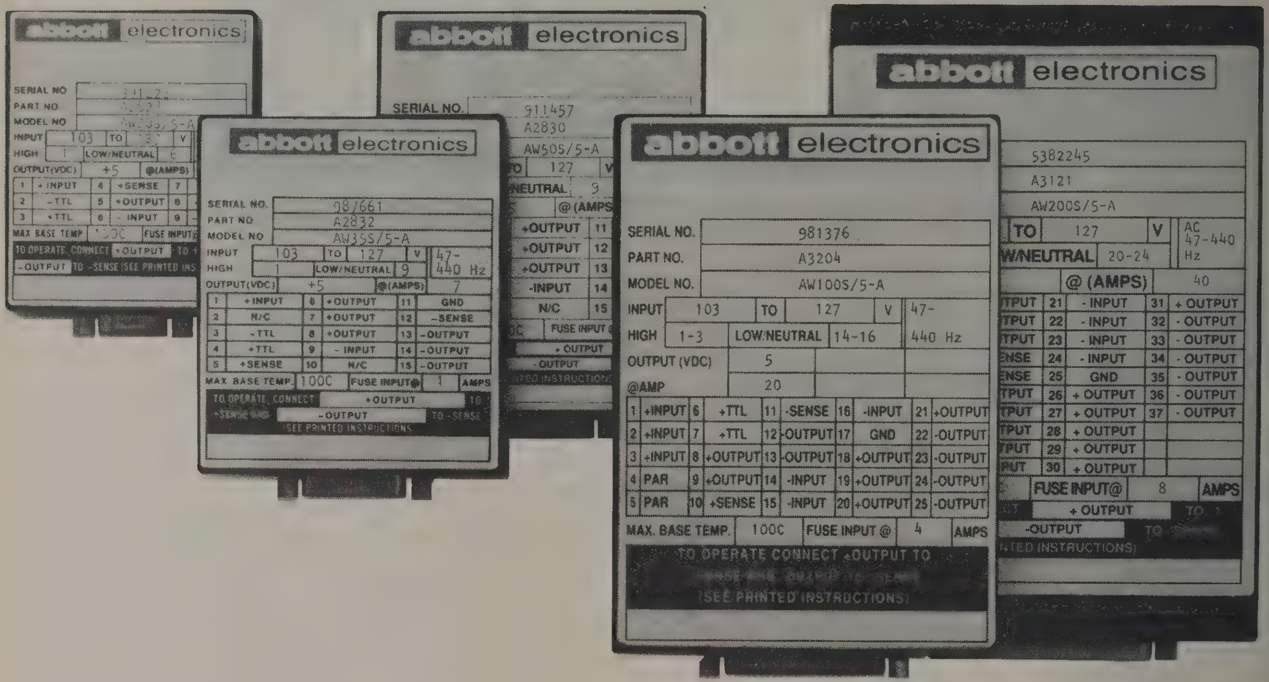
MILITARY POWER SUPPLIES

New High Density AC/DC Converters – 20-200 Watts

MODEL AW 20-200



SPECIFICATIONS

Input:
103 to127 V rms; 47-440 Hz
Single Phase and 90 to 160 V dc.

Efficiency:
65% minimum. Typically 70-80% (nominal input, full load, room ambient).

Line Regulation:
0.1% or 10 mV, whichever is greater, for each output with input change from low line to high line at constant load.

Load Regulation:
10 mV or 0.1%, whichever is greater. (Each output from no load to full load at constant line).

Pard (Noise and Ripple):
25 mV rms, 100 mV P-P for 5 V output, 50 mV rms, 200 mV P-P for other voltages; measured at 25 MHz bandwidth over temperature range.

Isolation Voltage:
700 Vdc, input to output;
500 Vdc, input to case;
200 Vdc, output to case.

Insulation Resistance:
50 megohms between input and output, input and case, output and case, when measured at 50 Vdc.

Temperature Range:
Operating: -55°C to +100°C maximum, at center of the baseplate. Storage: -55°C to +125°C, ambient.

Temperature Coefficient:
0.01%/°C maximum over entire temperature range.

Input Transient Protection:
Unit will provide normal regulated output and withstand 180 V ac for 0.1 second, in accordance with MIL-STD-704A (under AC input operating mode).

Load Transient Recovery:
Output voltage returns to regulation limits within 0.5 milliseconds after 50% change in load current.

Load Transient Overshoot:
0.5 V maximum from nominal voltage set point.

Short Circuit Protection:
Each output is independently protected against a short circuit of any duration and automatically restores to normal when overload is removed.

Remote Sensing:
Compensates up to 0.5 volt drop in output leads.

Remote Inhibit:
Provides for remote turn on/off with TTL logic signal. Application of TTL Signal (logic 1) will inhibit the output.

Parallelability:
The 100 watt and 200 watt units allow for multiple unit current sharing without the need for external components, via a single pin connection on each unit.

Electromagnetic Interference:
Units, when tested in accordance with MIL-STD-462, meet the majority of the requirements of MIL-STD-461C for conducted and radiated, emission and susceptibility, for Class A1, A2 and A3 equipment for input power leads. For further details regarding levels and extent of compliance in each class or requirement, consult your nearest sales office.

Reliability:
The Mean Time Between Failure (MTBF) is calculated per MIL-HDBK-217E at 50°C baseplate temperature with maximum operating input voltage and maximum rated output power.

The MTBF for AW20S at ground benign environment is 199,209 hours. With the MIL-STD-2000 option, MTBF was calculated to be 288,278 hours of ground benign. The standard AW200S at ground benign and naval sheltered is 100,000 and 15,000 hours, respectively. Please consult the local sales office for additional environments and models.

Environment:
Units meet MIL-STD-810C, altitude, shock, acceleration, vibration and MIL-S-901C high-impact shock requirements. For information, please consult factory.

Hook Up:
Via D-Subminiature Connectors.

Options

The following standard options are available on the AW Series power supplies.

Enhanced Reliability:
-ER Option provides increased reliability by using higher levels of military grade components. (To order, add "-ER" after model number, i.e., AW200S/15-A-ER).

MIL-STD-2000:
Workmanship standard, MIL-STD-2000 version of each unit is available. This option includes "-ER" option as a standard feature. Case size will increase, consult sales office for dimensions on AW100 and AW200. (To order, add "-M" after "A" in model number, i.e., AW200S/12-A-M).

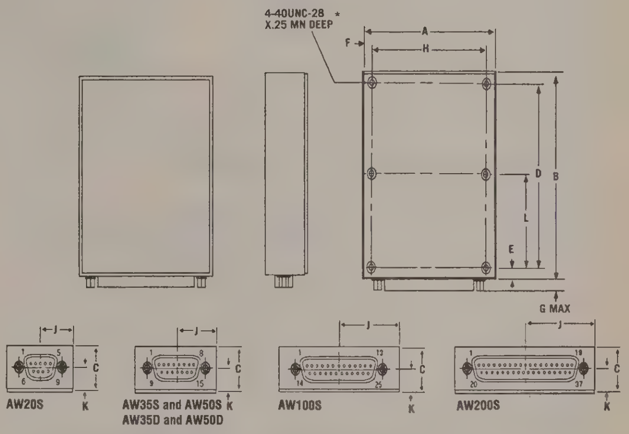
Tolerances: Inches - .xxx = ±0.015 or .xx = ±0.03; MM - .xx = ±0.4 OR .X = ±0.8.
Material: Base - For AW100 and AW200, 6061-T6. For the others, 5052-H32. Case for all models - Steel.
Finish: black flat lacquer per FED-STD-595, Color 37038.
Mounting: 4-40 THD inserts 1/4" minimum depth are provided in baseplate. Steel 4-40 bolts American Standard, unified national coarse series, slotted studs are supplied with each unit. Metric hardware and inserts available as a special order.
Metric: M3 inserts and hardware.

MECHANICAL DRAWINGS



* Number of mounting holes: 4 places for all other models.

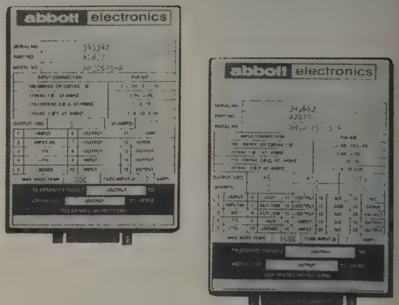
MILITARY POWER SUPPLIES

High Density DC/AC to DC Converters

MODEL AM

SPECIFICATIONS

Input: Inputs for 50 watt model:
"U" input ranges: 90-130 Vac; 47-440 Hz, Single Phase or Three Phase (Delta, WYE). 180-260 Vac, 47-440 Hz, Single Phase or Three Phase (Delta). 200-300 Vdc. For these input ranges, add (U) to model number AM50S/5-A(U). "S" input ranges: 100-200 Vdc. For this input range, add (S) to model number AM50S/5-A(S).
Efficiency: 65% minimum. Typically 75% (Full load, room ambient).
Line Regulation: Single and Main: .1% or 10 mV, whichever is greater. Triple ±15 V: 100 mV maximum; 12 V: 60 mV maximum.
Load Regulation: Single and Triple: 10 mV or 0.1%, whichever is greater. Auxiliary Outputs: 150 mV max. over the temperature range.
Pard (Noise and Ripple): 25 mV rms, 100 mV P-P at 25 MHz bandwidth for 5 V outputs and 200 mV for other voltages; measured over temperature range.
Isolation Voltage: 1000 V dc, input to output; 1000 V dc, input to case; 200 V dc, output to case.
Insulation Resistance: 50 megohms minimum between input and outputs, input and case, outputs and case, when measured at 50 V dc.
Temperature range: Operating: –55°C to +100°C maximum, at center of the baseplate. Storage: –55°C to +125°C, ambient.
Temperature Coefficient: 0.01%°C maximum over entire temperature range.
Input Transient Protection: Unit will not be damaged or exhibit degradation of performance when subjected to input transients in accordance with MIL-STD-704A, MIL-STD-704D and MIL-STD-1399, as applicable to corresponding input configurations. Consult your nearest sales office if further details are needed.
Load Transient Recovery: Main output voltage returns to regulation limits within 0.5 milliseconds after 50% change in load current.
Load Transient Overshoot: 0.5 V from nominal voltage set point, single and triple outputs.
Short Circuit Protection: All outputs are completely protected against a short circuit of any duration. Outputs automatically restore to normal when overload is removed.
Remote Sensing: Compensates for up to 0.5 volt drop in output leads. (Single and main output only.)
Remote Inhibit: Provides for remote turn on/off with TTL logic signal. Application of TTL Signal (logic 1) will inhibit the outputs.
Preload Requirements: For triple output only. A one amp minimum load is required on the main for full load capabilities on the auxiliaries.
Electromagnetic Interference: Units, when tested in accordance with MIL-STD-462, meet the majority of the requirements of MIL-STD-461C for conducted and rediated, emission and susceptibility, for Part 2, Class A1B equipment, for input power leads. For further details regarding levels and extent of compliance in each class, input configuration, or requirement, consult your nearest sales office.
Reliability: The Mean Time Between Failure (MTBF) per MIL-HBDK-217E calculated for standard model AM50S under operating conditions of 50°C baseplate, maximum operating input voltage and maximum rated output power, is 160,300 hours for a ground benign environment and 20,200 hours for a naval sheltered environment. With "-ER" option MTBF was calculated to be 240,000 hours for a ground benign environment and 25,000 for naval sheltered environment. Please consult factory for additional environments and models.
Environment: Units meet MIL-STD-810D, altitude, shock, acceleration, vibration and MIL-S-901C, high-impact shock conformance.



- Customer Selectable Multi-inputs
- Wireless Submodular Construction for High Reliabilty
- Current Mode Control
- Standard Current Limiting

PRODUCT SELECTION GUIDE

Single Output Standard Models

Nominal Output Voltage	Output Current (Amps)	Weight[1] (Oz.)	Weight[1] (Grams)	Model Number
5.0	10.0	12	340	AM50S/5-A
5.2	9.62	12	340	AM50S/5.2-A
15.0	3.33	12	340	AM50S/15-A
24.0	2.08	12	340	AM50S/24-A
28.0	1.79	12	340	AM50S/28-A

1. Maximum weight, not including options.

Triple Output Standard Models

MILITARY POWER SUPPLIES

New High Density AC/DC Converters – Multiple Inputs

MODEL
AM
100

SPECIFICATIONS

Input:
Inputs for 100 watt model
103 to 127 Vac; 47-440 Hz, Single Phase
206 to 254 Vac, 47 to 440 Hz, Single Phase;
200 to 300 Vdc.

Efficiency:
65% minimum. Typically 75% (Full load, room ambient).

Line Regulation:
0.1% or 10 mV, whichever is greater.

Load Regulation:
10 mV or 0.1%, whichever is greater.

Pard (Noise and Ripple):
25 mV rms, 100 mV P-P for 5 V dc output and 50 mV rms, 200 mV P-P for other voltages; measured at 25 MHz bandwidth over temperature range.

Isolation Voltage:
1,000 V dc, input to output;
1,000 V dc, input to case;
500 V dc, output to case.

Parallelability:
Multiple unit current sharing without the need for external components, via a single pin connection on each unit.

Insulation Resistance:
50 megohms minimum between input and outputs, input and case, outputs and case, when measured at 50 V dc.

Temperature Range:
Operating: -55°C to +100°C maximum, at center of the baseplate. Storage: -55°C to +125°C, ambient.

Temperature Coefficient:
0.01%/°C maximum over entire temperature range.

Input Transient Protection:
Unit will not be damaged or exhibit degradation of performance when subjected to input transients in accordance with MIL-STD-704A, MIL-STD-704D and MIL-STD-1399, as applicable to corresponding input configurations. Consult your nearest sales office if further details are needed.

Load Transient Recovery:
Output voltage returns to regulation limits within 0.5 milliseconds after 50% change in load current.

Load Transient Overshoot:
0.5 V from nominal voltage set point.

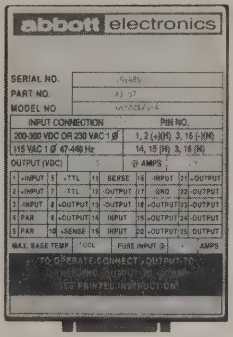
Short Circuit Protection:
Output completely protected against a short circuit of any duration. Output automatically restores to normal when overload is removed.

Remote Sensing:
Compensates up to 0.5 volt drop in output leads.

Remote Inhibit:
Provides for remote turn on/off with TTL logic signal. Application of TTL Signal (logic 1) will inhibit the output.

Electromagnetic Interference:
Units, when tested in accordance with MIL-STD-462, meets or minimizes the majority of the requirements of MIL-STD-461C for conducted and radiated, emission and susceptibility, for Part 2, Class A1b, equipment for input power leads; with different levels of compliance under each input configuration. For further details regarding levels and extent of compliance in each class, input configuration, or requirement, consult your nearest sales office.

Reliability:
The Mean Time Between Failure (MTBF) PER MIL-HDBK-217e for an AM100S was calculated to be 75,000 hours. Please consult the local sales office for specific environments and models.



Environment:
Units meet MIL-STD-810D, altitude, shock, acceleration, vibration and MIL-S-901C high-impact shock requirements. For information, please consult factory.

Hook Up:
Via D-Subminiature Connectors.

OPTIONS

The following standard options are available on the AM Series power supplies.

Enhanced Reliability:
-ER Option provides increased reliability by using higher levels of military grade components.

SINGLE OUTPUT

Nominal Output Voltage	Output Current (Amps)	Weight[1] (Oz.)	Weight[1] (Grams)	Model Number
5	20.00	28	775	AM100S/5-A
5.2	19.23	28	775	AM100S/5.2-A
12	8.33	28	775	AM100S/12-A
15	6.67	28	775	AM100S/15-A
24	4.17	28	775	AM100S/24-A
28	3.57	28	775	AM100S/28-A

MILITARY POWER SUPPLIES

60 Hz to DC

MODEL MH

SPECIFICATIONS

Input: 103.5 to 126.5 V rms standard, 47 to 440 Hz, single phase. For 207 to 253 V rms input, add "(230)" to model number, i.e., MH500S/15-DE(230). Other inputs available (Option H and Option -3).

Efficiency: 65% minimum.

Line Regulation: Within 0.2% or 25 mV (whichever is greater) for input change of 103.5 to 126.5 V ac with load constant.

Load Regulation: Within 0.2% or 25 mV (whichever is greater) for change from no load to full load with line constant.

Pard (Noise and Ripple): 50 mV rms, 100 mV peak-to-peak maximum at 25 MHz bandwidth.

Isolation Voltage: 500 V dc input to output and input to case, 100 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Polarity: Inputs and outputs are isolated. Either positive or negative side of output may be grounded.

Temperature Range: Operating: 0°C to +71°C maximum at center of mounting base. Storage: −55°C to +85°C.

Temperature Coefficient: 0.03%/°C maximum over entire temperature range.

Input Transient Protection: Unit will withstand 180 V ac for 0.1 second in accordance with MIL-STD-704.

Load Transient Recovery Time: Output voltage returns to regulation limits within 300 microseconds after a 50% change in load current.

Holdup Time: 20 ms after nominal input is lost at full load.

Short Circuit Protection: Completely protected against an overload or short circuit of any duration. Output automatically restores to normal when the overload is removed. (Foldback to 60%.)

Output Overvoltage Protection: A non-crowbar type OVP. Input must be recycled to restore output.

Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.3 volt in the load leads.

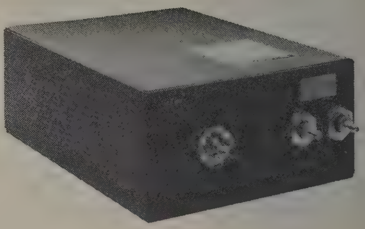
Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to radiated and conducted interference.

Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output power was calculated to be 54,530 hrs. for a ground benign environment.

Environment: Encapsulated and hermetically sealed to meet the environmental requirements of MIL-STD-810C, MIL-S-901C and MIL-E-5400P, Class 2, including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Maintainability: Units are repairable at depot level.

Connectors: Standard unit is provided with an input solder pin header and an output "hermetic seal" stud-type connector.



FEATURES

- 500-Watt Switching 100 kHz Power Supply
- High Efficiency, 65% Minimum
- Meets MIL-STD-461B, MIL-STD-810C and MIL-S-901C
- Standard Soft-start and Short Circuit Protection

Output Voltage Range[1]	Output Current (amps)	Weight[2] (Lbs.)	Model Number
4.75—5.25	100	15	MH500S/5-DE
11.40—12.60	41.67*	15	MH500S/12-DE
14.25—15.75	33.33*	15	MH500S/15-DE
22.80—25.20	20.83*	15	MH500S/24-DE
26.60—29.40	17.86*	15	MH500S/28-DE

* Rounded figures. Total watts equal 500.

1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 50 mV for nominal output voltages 5 to 15 V dc and 60 mV for outputs 24 to 28 V dc.
2. Weights are ±5%.

OPTIONAL FEATURES

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard input header. (To order, replace the "D" in the model number with "A", i.e., MH500S/5-AE.)

Wide Input Voltage: With **Option H**, the units operate either from 115 V ac ±15% or 230 V ac ±15%. (To order, add an "H" after the "E" in the model number, i.e., MH500S/5-DEH or MH500S/5-DEH (230).)

Remote Turn On/Off: Option L provides isolated terminals to turn output(s) on/off with TTL logic signal. (To order, add "L" after "E" in model number, i.e., MH500S/5-DEL.)

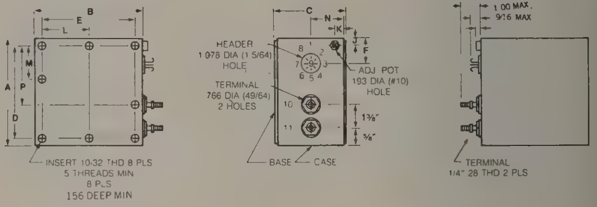
Remote Output Adjustment: With **Option R**, an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "E" in model number, i.e., MH500S/5-DER.)

Wider Operating Temperature: −20°C to +71°C is available with **Option T**. (To order, add "T" after "E" in model number, i.e., MH500S/5-DET.)

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military-grade components. (To order, add "-ER" after model number, i.e., MH500S/5-DE-ER.)

WYE Input: Option -3 changes input to 3-phase, 4-wire "WYE". (To order, add "-3" to the end of the model number, i.e., MH500S/5-DE-3.)

MECHANICAL DIMENSIONS



A	B	C	D	E	F	J	K	L	M	N	P
7	10	3½	6.46	9.45	2 3/32	¼	⅜	4.73	2.14	1 11/16	4.32

Tolerances: If a fraction, ±1/32 in, a decimal, ±.015 in.

Material: Base—Aluminum 6061-T6, Case—Steel.

Finish: Black flat lacquer per FED-STD-595. Color 37038.

Mounting: 10-32 THD inserts 5/32" minimum depth are provided in baseplate. Steel 10-32 bolts American Standard, unified national fine series, slotted studs are supplied with each unit. Metric hardware and inserts available as a special order.

MILITARY POWER SUPPLIES

60 Hz to DC

MODEL
M300

SPECIFICATIONS

Input: 103.5 to 126.5 V rms standard, 47 to 440 Hz. single phase. Other inputs available (Options H and -3).

Efficiency: 60% minimum at full load.

Line Regulation: Within 0.2% or 25 mV (whichever is greater) for change from low line to high line with load constant.

Load Regulation: Within 0.2% or 25 mV (whichever is greater) for change from no load to full load with line constant.

Auxiliary Output Tracking Accuracy: The negative output will track the positive output within 200 mV for all rated conditions. (M300T).

Pard (Noise and Ripple) for Main and Auxiliary Outputs: 30 mV rms, 100 mV peak to peak (maximum) at 25 MHz bandwidth, over the entire temperature range.

Isolation Voltage: 500 V dc input to output. 500 V dc input to case. 100 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Temperature Range: Operating: 0°C to +71°C maximum at center of baseplate. Storage: −55°C to +85°C ambient.

Temperature Coefficient: 0.1%/°C maximum for main and auxiliary outputs over the entire temperature range.

Input Transient Protection: Unit will withstand 143.8 V ac to 0.3 second in accordance with MIL-STD-1399.

Load Transient Recovery Time: Output voltage returns to regulation limits within 1.5 millisecond for main and 100 microseconds for auxiliary outputs after a 50% change in load current.

Holdup Time: 10 ms after nominal input is lost at full load.

Short Circuit Protection: Completely protected against a short circuit of any duration. Outputs automatically restore to normal when the overload is removed. All outputs will foldback for overload.

Current Limiting: Output current is limited to 120% on main and auxiliary outputs (±10%) under overload conditions.

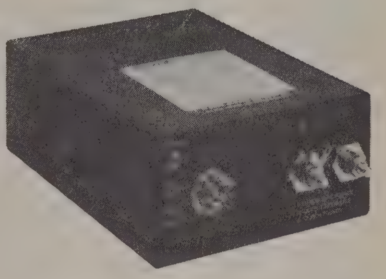
Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.5 volt in the load leads.

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to conducted interference (meets CE03, CS01, CS02 and CS06).

Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output power was calculated to be 77,455 hours for a ground benign environment and 11,642 hours for a naval sheltered environment. With Enhanced Reliability Option -ER ground benign is 119,771 hours; naval sheltered is 16,233 hours. (M300T).

Environment: Encapsulated and hermetically sealed to meet the environmental requirements of MIL-STD-810C and MIL-S-901 including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Connectors: Standard unit is provided with solder-pin input header and a hermetic seal, stud-type, output connector.



FEATURES

- 300-Watt Single and Triple Output, Switching Power Supply
- High Efficiency, 60% Minimum
- Short Circuit Protection Standard
- Meets MIL-STD-461B, MIL-STD-810C and MIL-S-901C

Output Voltage Range[1] (Main)	Output Voltage Range[1] (Aux)	Output Current[2] (Main)	Output Current[2] (Aux)	Wt.[3] (Lbs.)	Model Number

22.80-25.20		12.5		8.0	M300S/24-D
26.60-29.40		10.7		8.0	M300S/28-D
4.8 - 5.3	±11.4-±12.6	48	2.5	8.2	M300T/5/12-D
4.8 - 5.3	±14.3-±15.8	48	2.0	8.2	M300T/5/15-D

1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 35 mV.
2. Maximum output power equals 300 Watts.
3. Weights are ±5%.

OPTIONAL FEATURES

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard header. (To order, replace the "D" in the model number with "A," i.e., M300T/5/15-A or M300S/5-A.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E**, enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., M300T/5/15-DE or M300S/5-DE.)

Wide Input Voltage: With **Option H** the units will operate from 90 to 126.5 V ac, with 20% derating in output power. (To order, add an "H" after the "D" in the model number, i.e., M300T/5/15-DH or M300S/5-DH.)

Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" after "D" in model number, i.e., M300T/5/15-DL or M300S/5-DL.)

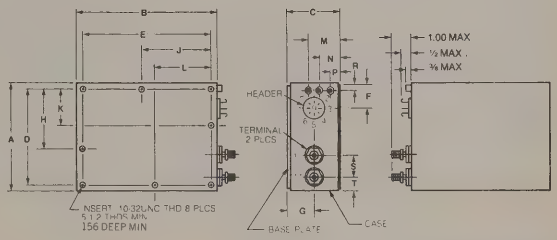
Remote Output Adjustment: With **Option R** an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., M300T/5/15-DR or M300S/5-DR.)

Wider Operating Temperature: −20°C to +71°C is available with **Option T.** Pard (noise and ripple) specification increases to 200 mV peak-to-peak. (To order, add a "T" after "D" in model number, i.e., M300T/5/15-DT or M300S/5-DT.)

WYE Input: Option -3 changes input to 3-phase, 4 wire "WYE". (To order, add "-3" to the end of the model number, i.e., M300T/5/15-3 or M300S/5-D-3).

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military grade components. (To order, add "-ER" after model number, i.e., M300T/5/15-ER or M300S/5-ER.)

MECHANICAL DIMENSIONS (M300T)



A	B	C	D	E	F	G	H	J
6	8	3	5.50	7.50	1 13⁄32	1½	3.411	4.113

K	L	M	N	P	R	S	T
2.089	3.387	1 11⁄16	1 3⁄32	½	⅜	1¼	¾

Tolerances: If a fraction, ±1⁄32 inch, a decimal, ±.015 inch.

Material: Base—Aluminum 6061-T6, Case—Steel.

Finish: Black flat lacquer per FED-STD-595. Color 37038.

Mounting: 10-32 THD inserts 5⁄32″ minimum depth are provided in baseplate. Steel 10-32 bolts American Standard, unified national fine series slotted studs are supplied with each unit. Metric hardware and inserts available as a special order.

MILITARY POWER SUPPLIES

60 Hz to DC

MODEL
MB100

SPECIFICATIONS

Input: 103.5 to 126.5 V rms standard, 47 to 65 Hz, single phase. Other inputs available (Option H).

Efficiency: 65% minimum at full load.

Line Regulation: 10 mV input change of 103.5 to 126.5 V ac with load constant.

Load Regulation: 10 mV for main output, 0.5% for auxiliary outputs for change from no load to full load with line constant.

Auxiliary Output Tracking Accuracy: The negative output will track the positive output within 100 mV for all rated conditions.

Pard (Noise and Ripple) for Triple Output: 100 mV p-p (Max.); Single Output 5 V: 100 mV p-p; 28 V: 200 mV p-p (Max.).

Isolation Voltage: 700 V dc input to output. 500 V dc input to case, 200 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Temperature Range: Operating: −20°C to +71°C maximum at center of baseplate. Storage: −55°C to +85°C ambient.

Temperature Coefficient: 0.01%/°C maximum for main and auxiliary outputs over the entire temperature range.

Input Transient Protection: Unit will withstand 143.8 V ac for 0.3 second in accordance with MIL-STD-1399, Sec. 103.

Load Transient Recovery Time: Output voltage returns to regulation limits within 0.5 millisecond for main and auxiliary outputs after a 50% change in load current.

Load Transient Over/Undershoot: 0.8 V or 3% (whichever is greater) from nominal voltage set point.

Short Circuit Protection: Completely protected against a short circuit of any duration. Outputs automatically restore to normal when the overload is removed. Auxiliary outputs will fold back for overload.

Current Limiting: Output current is limited to 120% on main, 150% on auxiliary outputs (±10%) under overload conditions.

Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.5 volt in the load leads (on 5 V main output).

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to radiated and conducted interference.

Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output power was calculated to be 97,930 hours for a ground benign environment and 17,632 hours for naval sheltered (MB100T).

Environment: Encapsulated and hermetically sealed to meet the environmental requirements of MIL-STD-810C and MIL-S-901 including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Connectors: Standard unit is provided with solder-type, single-pin input terminals and a solder-type, multiple-pin output header.

OPTIONAL FEATURES

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard header. (To order, replace the "D" in the model number with "A," i.e., MB100T/5-12-A or MB100S/5-A.)

Severe Shock, Acceleation and Vibration: Special encapsulation, **Option E**, enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., MB100T/5/12-DE or MB100S/5-DE.)

Wide Input Voltage: With **Option H**, the units will operate from 90 to 130 V ac, with 20% derating in output power. (To order, add an "H" after the "D" in the model number, i.e., MB100T/5/12-DH or MB100S/5-DH.)

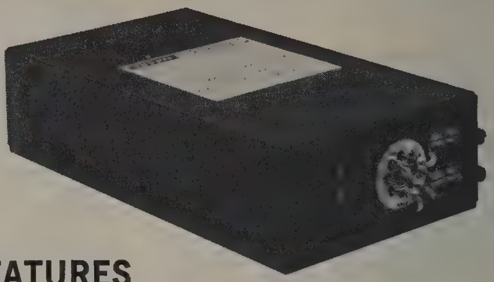
Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" after "D" in model number, i.e., MB-100T/5/12-DL or MB100S/5-DL.)

Remote Output Adjustment: With **Option R**, an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., MB100T/5/12-DR or MB100S/5-DR.)

Internal Overvoltage Protection: Option -1 provides a non-crowbar internal OVP on the main output (Output 1). Input must be recycled to restore output. (To order, add "-1" afer "D" in model number, i.e., MB100T/5/12-D-1 or MB100S/5-D-1.)

50/50 Distributed Power: Option -7 distributes 50 watts to the main and 50 watts to the auxiliaries. (To order, add "-7" to the end of the model number, i.e., MB100T/5/12-D-7.)

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military-grade components. (To order, add "-ER" after model number, i.e., MB100T/5/12-D-ER or MB100S/5-D-ER.)



FEATURES

- 100-Watt Single and Triple Output, 200 kHz Switching Power Supply
- High Efficiency, 65% Minimum
- −20°C to +71°C Temperature Range
- Meets MIL-STD-461B, MIL-STD-810C and MIL-S-901C
- Low Profile

Output Voltage Range[1] (Main)	Output Current[2] (Main)	Output Voltage Range[1] (Aux)	Output Current[2] (Aux)	Wgt.[3] (Lbs.)	Wgt.[3] (Kgs.)	Model Number

MILITARY POWER SUPPLIES

60 Hz/400 Hz to DC

MODEL
MB60
WM60

SPECIFICATIONS:

Input: 103.5 to 126.5 V rms standard, MB: 47-440 Hz, single phase; WM: 320 to 480 Hz, single phase.

Input Transient Protection: Unit will withstand 180 Vac for 0.1 second in accordance with MIL-STD-704A, Category B.

Efficiency: Minimum at full load: 65%.

Line Regulation: Input change of 103.5 to 126.5 V rms, with load held constant.
Single: 0.1% or 10mV, whichever is greater.
Triple: 0.1%, all outputs.

Load Regulation: No load to full load, with line held constant.
Single: 10 mV or 0.1%, whichever is greater.
Triple: Main output, 0.2%; Auxiliaries, 0.5%.

Load Transient Recovery: Output voltage returns to regulation limits within 0.5 mS after a 50% change in load current.

Load Transient Overshoot: 0.8V or 3% (whichever is greater) from nominal voltage set point.

Pard (Noise and Ripple): Measured at 25 MHz bandwidth. Single Output Unit: 30mV rms; P-P: 5V – 2.0%, 12 or 15V – 1.0%, 24 or 28V – 0.7%. Triple Output Unit: 30mV rms; 100mV P-P for main and auxiliary outputs. Note: Turn on at low temperature extreme can result in increased PARD measurements prior to unit warm up (1-3) minutes. Consult nearest sales office for applications details.

Temperature Range: MB (single and triple): Operating, −20°C to +85°C maximum, at center of baseplate. Storage, −55°C to +105°C ambient.
WM (single and triple): Operating, −55°C to −100°C maximum, at center of baseplate. Storage, −65°C to +125°C ambient.

Temperature Coefficient: 0.03%/°C maximum over entire temperature range.

Auxiliary Output Tracking: Negative output tracks positive within 100 mV for all rated conditions of line and load at ambient conditions, with positive set at nominal, ±50 mV (250 mV for all rated conditions of line, load, temperature or set point).

Isolation Voltage: 700 VDC, input to output; 500 VDC, input to case; 200 VDC, output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, output and case, when measured at 50 VDC.

Overvoltage Protection: Electronic overvoltage protection standard for singles and main output of triples.

Short Circuit Protection: Completely protected against a short circuit of any duration. Output automatically restores to normal when overload is removed.

Current Limiting: Foldback current limiting standard for all outputs, 120%, ±10% limit for singles and main, 160% for auxiliary outputs, ±30% under overload conditions.

Remote Sensing: On single output units, main output on triple. Compensates for up to 0.5 V drop in load leads.

EMI: Units meet MIL-STD-461C for select curves, please consult factory for detailed information.

Environment: Encapsulated and hermetically sealed units meet MIL-STD-810C altitude, shock and acceleration.

Hook Up: Standard unit is provided with a solder-type multiple-pin output header, and solder turrets.

OPTIONS

"A" – Hermetic Connectors: Replaces solder header/turret with military connectors:
Input: MS3113H10-6P
Output: MS3113H14-12P
Other hermetic, MIL connectors available on special order.

"E" – Severe Shock, Vibration, Acceleration: Extra encapsulent to meet 60g shock, 30g vibration, 50g acceleration and MIL-S-901C, High Impact Shock.

"L" – Remote Enable/Inhibit: Provides for remote turn on/off with TTL logic signal. (Logic 1 will enable).

"ER" – Enhanced Reliability: Provides increased reliability via higher level MIL grade components.

PRODUCT SELECTION GUIDE

Model MB	Main Output/ Current[1]	Output #2[1]	Output #3[1]	Weight[2] (lbs)	(kgs)	Model WM
MB60S/5-D	5V@12A			2.10	0.95	WM60S/5-D

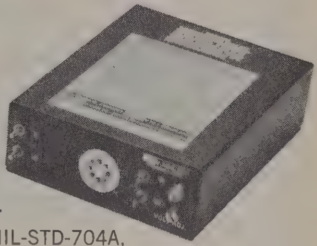
MB60T/5/15-D	5V@6A	+15V@1A	−15V@1A	2.16	0.98	WM60T/5/15-D

1. Single/Main Output adjust range ±5%, 35 mV resolution. Auxiliary Output adjust ±0.5V.
2. Typical, not including options, weight ±5%.

FEATURES



- Sub-modular internal construction, wireless board to board connections.
- Field proven, 200 kHz, MOSFET, forward converter topology.
- Input transient protection per MIL-STD-704A, Category B.
- Short circuit protection, foldback current limiting and OVP.
- Meets comprehensive MIL-STD-810C environmental conditions.
- Built in EMI filter to MIL-STD-461C.

MILITARY POWER SUPPLIES

60 Hz to DC

MODEL
LV

SPECIFICATIONS

INPUT: 105 to 125 VRMS, 55 to 65 Hz or 380 to 420 Hz single phase. May be operated down to 47 Hz with 20% derating.

EFFICIENCY: 35% typical for 5V; 65% for 28V.

LINE REGULATION: 0.05% (±1 VC for LLV model).

LOAD REGULATION: 0.10%.

PARD (NOISE & RIPPLE): 1 mVRMS or 5 mV p-p.

OUTPUT ADJUSTMENT RANGE: ±5% of nominal at output terminals.

ISOLATION VOLTAGE: 500 VDC input to output, input to case and output to case.

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case when measured at 50 VDC.

POLARITY: Inputs and outputs are isolated, either positive or negative output may be grounded.

TEMPERATURE RANGE: Operating −20°C to +71°C baseplate temperature; −40°C to +85°C (Option T); storage: −55°C to +85°C.

TEMPERATURE EFFECT COEFFICIENT: 0.015% per degree Celsius maximum.

ENVIRONMENT: Hermetically sealed to meet environmental requirements of MIL-STD-810C. Meet MIL-S-901C 5-ft. hammer drop.

ADJUSTMENT RANGE: Equipped with internal potentiometer. External adjustment potentiometer available.

SHORT CIRCUIT PROTECTION: Completely protected against short circuit of any duration. Output automatically restores to normal after removal of short.

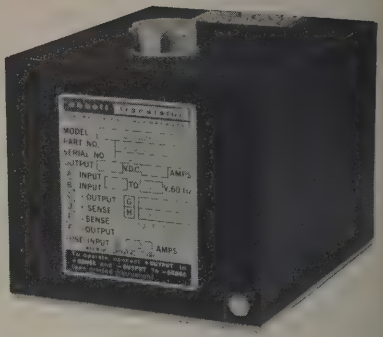
INPUT TRANSIENT PROTECTION: 143.8 VRMS, for 0.3 seconds.

REMOTE ERROR SENSING: (LV series only). Regulator monitors output voltage directly at the load using extra "sensing" leads and compensates for dc voltage drop up to 0.4 volt in load leads.

LOAD TRANSIENT: Output voltage returns to regulation limit within 100 microseconds after 50% step change in load current.

ELECTROMAGNETIC INTERFERENCE: Meets MIL-STD-461A, methods CE01 and CEQ3 for conducted emissions.

RELIABILITY: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of +50°C baseplate temperature, maximum rated output power for LV5DE20-1 was calculated to be 68,987 hrs. for ground benign environment and 10,384 hrs. for naval sheltered environment. MTBF for LLV12-DE0.5-1 was calculated to be 186,947 hrs. for a ground benign environment and 30,081 for naval sheltered environment. With Enhanced Reliability Option (ER) MTBF for LV5DE20-1 (ER) was calculated to be 236,033 hrs. for ground benign environment and 35,585 hrs. for naval sheltered environment. For LLV12DE0.5-1 (ER) MTBF was calculated to be 330,349 hrs. for ground benign environment and 50,682 hrs. for a naval sheltered environment.



FEATURES

- Up to 65% efficiency
- Low Output Ripple, 5 mV peak-to-peak
- 0.1% Regulation
- Single and Dual Outputs

SINGLE OUTPUT: LV SERIES

Output Voltage Range (VDC)	Output Current (Amps)	Size (see Dwg.)	Weight (Lbs.)	Model Number

	1.5	13D	9.1	LLV15DE1.5

OPTIONAL FEATURES

TTL: (L Option) Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off. The power supply will turn-on with TTL logic "1", and turn-off with TTL logic "0". To specify this feature, please add an "L" to the character after the character "E" in the model number. (EXAMPLE: LV5DE6 to LV5DEL5)

SPECIAL CONNECTORS: A hermetically sealed military-type connector is available for the LV series (as shown in picture). Please consult your nearest Abbott Sales Office for details.

WIDER OPERATING TEMPERATURE RANGE: (T Option) −40°C to +85°C operating temperature range available. Please consult your nearest Abbott Sales Office for details.

OVER TEMPERATURE PROTECTION: (OT Option) Removes input power when conduction surfaces exceed safe limits. Please consult your nearest Abbott Sales Office for details.

OVERVOLTAGE PROTECTION: (-1 Option) An internal crowbar type OVP is available. Unit will crowbar output when output voltage exceeds adjustable set point. Unit input power must be recycled to restore unit. To specify this feature, please add a "-1" after the last number in the model number. (EXAMPLE: LV5DE6 to LV5DE6-1)

WIDER INPUT VOLTAGE RANGE: (H Option) Available at a voltage range 210 to 250 VAC. Please consult your nearest Abbott Sales Office for details.

ENHANCED RELIABILITY: (ER Option) This option provides increased reliability by using enhanced military grade components. This feature allows the power supply to meet customer specific requirements as to "Hi-Rel" components.

MILITARY POWER SUPPLIES

400 Hz to DC

MODEL
WM100

SPECIFICATIONS

Input: 103.5 to 126.5 V rms standard, 320 to 480 Hz, single phase. **Other inputs** available (See Options H and -3).

Efficiency: 65% minimum at full load.

Line Regulation: 10 mV for input change of 103.5 to 126.5 V ac with load constant.

Load Regulation: 10 mV on main output. 0.5% on auxiliary outputs for change of no load to full load with line constant.

Auxiliary Output Tracking Accuracy: The negative output will track the positive output within 100 mV for all rated conditions. (WM100T).

Pard (Noise and Ripple) for Triple Output: 100 mV p-p (Max.); Single Output 5 V: 100 mV p-p; 28 V: 200 mV p-p (Max.).

Isolation Voltage: 700 V dc input to output. 500 V dc input to case, 200 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Temperature Range: Operating: −55°C to +100°C maximum at center of baseplate. Storage: −65°C to +125°C ambient.

Temperature Coefficient: 0.01%/°C maximum for main and auxiliary outputs over entire temperature range.

Input Transient Protection: Unit will withstand 180 V ac for 0.1 second in accordance with MIL-STD-704A category B.

Load Transient Recovery Time: Output voltage returns to regulation limits within 0.5 millisecond for main and auxiliary outputs after a 50% change in load current.

Load Transient Over/Undershoot: 0.8 V or 3% (whichever is greater) from nominal voltage set point.

Holdup Time: 2.0 ms after nominal input is lost at full load.

Short Circuit Protection: Completely protected against a short circuit of any duration. Outputs automatically restore to normal when the overload is removed. Auxiliary outputs will fold back for overload.

Current Limiting: Output current is limited to 120% on main, 150% on auxiliary outputs (± 5%) under overload conditions.

Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.5 volt in the load leads (on 5 V main output).

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to radiated and conducted interference.

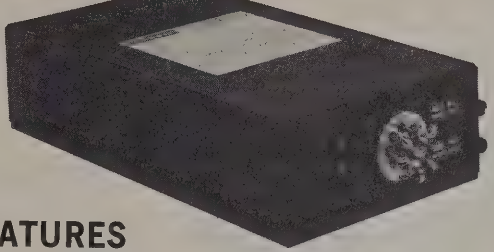
Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output power was calculated to be 99,468 hours for a ground benign environment and 14,985 hours for Air Inhabited (WM100T).

Environment: Encapsulated and hermetically sealed to meet the environmental requirements of MIL-STD-810C and MIL-S-901C including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Connectors: Standard unit is provided with solder-type, single-pin input terminals and a solder-type multiple-pin, output header.

Output Voltage Range[1] (Main)	Output Current[2] (Main)	Output-Voltage Range[1] (Aux)	Output Current[2] (Aux)	Wgt.[3] (Lbs.)	Wgt.[3] (Kgs.)	Model Number
4.75-5.25	20.0			3.0	1.5	WM100S/5-D
11.40-12.60	8.3			3.0	1.5	WM100S/12-D
14.25-15.75	6.6			3.0	1.5	WM100S/15-D
22.80-25.20	4.2			3.0	1.5	WM100S/24-D
26.60-29.40	3.6			3.0	1.5	WM100S/28-D
4.8-5.8	15.0	±11.5-±12.5	1	3.5	1.6	WM100T/5/12-D
4.8-5.8	15.0	±14.5-±15.5	0.8	3.5	1.6	WM100T/5/15-D

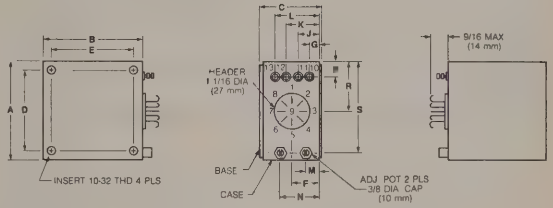
1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 35 mV.
2. Maximum output power equals 100 Watts.
3. Weights are ±5%.



FEATURES

- 100-Watt Single and Triple Output, 200 kHz Switching Power Supply
- High Efficiency, 65% Minimum
- −55°C to +100°C Temperature Range
- Meets MIL-STD-461B, MIL-STD-810C and MIL-STD-704A
- Low Profile

MECHANICAL DIMENSIONS (WM100T)



A	B	C	D	E	F	G	J
4	7½	1⅞	3.44	6.94	⅞	⅜	11/16

OPTIONAL FEATURES

Special Connectors: Military-type hermetically sealed connectors are provided as **Option A** in place of our standard header and the input terminals. (To order, replace the "D" in the Model number with "A," i.e., WM100T/5/12-A or WM100S/5-A.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E**, enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., WM100T/5/12-DE orWM100S/5-DE.)

Wide Input Voltage: With **Option H**, the units will operate from 90 to 130 V ac, with 20% derating in output power. (To order, add an "H" after the "D" in the model number i.e., WM100T/5/12-DH or WM100S/5-DH.)

Remote Turn On/Off: **Option L** provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" after "D" in model number i.e., WM-100T/5/12-DL or WM100S/5-DL.)

Remote Output Adjustment: With **Option R**, an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number i.e., WM100T/5/12-DR or WM100S/5-DR.)

Internal Overvoltage Protection: **Option -1** provides a non-crowbar internal OVP on the main output (Output 1). Input must be recycled to restore output. (To order, add "-1" after "D" in model number, i.e., WM100T/5/12-D-1 or WM100S/5-D-1.)

WYE Input: **Option -3** changes input to 3-phase, 4 wire "WYE." (To order, add "-3" to the end of the model number, i.e., WM100T/5/12-3 or WM100S/5-D-3.)

50/50 Distributed Power: **Option -7** distributes 50 watts to the main and 50 watts to the auxiliaries. (To order, add "-7" to the end of the model number, i.e., WM100T/5/12-D-7.)

Enhanced Reliability: **-ER Option** provides increased reliability by using enhanced military-grade components. (To order, add "-ER" after model number, i.e., WM100T/5/12-D-ER or WM100S/5-D-ER.)

MILITARY POWER SUPPLIES

400 Hz to DC

MODEL
W
and WW

SPECIFICATIONS

INPUT VOLTAGE RANGE: 105 to 125 VRMS

INPUT FREQUENCY RANGE: 380 to 420 Hertz, 1 phase

INPUT POWER: Per MIL-STD-704A for category B equipment

LINE REGULATION: 0.1% (0.2% for duals) or 10 mv (whichever is greater) for input change of 105 to 125 VRMS with load constant

LOAD REGULATION: 0.1% (0.2% for duals) or 20 mv (whichever is greater) for change from no load to full load with line constant

RIPPLE: 0.02% or 5 mv RMS (whichever is greater) 25 mv peak-to-peak maximum, each output, measured with scope having 25 MHz bandwidth

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in the table by means of an externally accessible screwdriver adjustment potentiometer

TRACKING ACCURACY: The negative output will track the positive output to within 1.0% or 100 mv (whichever is greater) for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment

ISOLATION VOLTAGE: 750 vdc input to output and input to case • 200 vdc output to case

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 vdc.

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded

TEMPERATURE RANGE: Operating: −55°C to +100°C maximum at center of mounting base Storage: −65°C to +125°C

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum

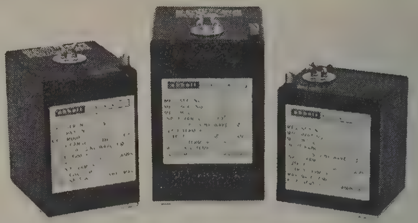
ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810C and MIL-E-5400P, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output automatically restores to normal when the overload is removed

INPUT TRANSIENT PROTECTION: MIL-STD-704A Figure 3, Limit 1 (180 VAC for 0.1 seconds)

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 100 microseconds (200 microseconds for duals) after 50% step change in load current

ELECTROMAGNETIC INTERFERENCE: Built to meet the requirements of MIL-STD-461 for generation of and susceptibility to radiated and conducted interference



High Performance

- Encapsulated and hermetically sealed to meet MIL-STD-810C and MIL-E-5400P, Class 2.
- Operating temperature range: −55°C to +100°C.
- Low Peak-to-Peak Ripple.
- Tight line and load regulation.
- High reliability. Up to 214,600 hrs. MTBF per MIL-HDBK-217C.
- Compact. Power density up to 2 watts per cu. in.
- Low EMI.

RELIABILITY: MTBF per MIL-HDBK-217C up to 214.600 Hrs.

OVER-VOLTAGE PROTECTION*: An internal, non-crowbar type OVP is available. Power supply turns off when output voltage exceeds set-point.

TTL*: Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off.

* Inclusion of these optional features on these models will most likely require that the case size increases slightly. Please consult nearest Abbott sales office for further details.

MILITARY POWER SUPPLIES

400 Hz to DC

MODEL WL AND WWL

SPECIFICATIONS

INPUT VOLTAGE RANGE: 105-125 VRMS 3ϕ delta.

INPUT FREQUENCY RANGE: 380-420 Hz.

INPUT TRANSIENT PROTECTION: 180 VRMS for 0.1 seconds per MIL-STD-704, Figure 3, Limit 1.

LINE REGULATION: 0.1% or 20 mV, whichever is greater.

ELECTROMAGNETIC INTERFERENCES: Meets MIL-STD-461A, methods CE and CS for conducted emissions.

TURN-ON/TURN-OFF OVERSHOOT: 0.2% or 20 mV, whichever is greater.

LOAD REGULATION: 0.1% or 20 mV, whichever is greater. For load change of no load to full load.

RIPPLE: 0.02% or 5 mVRMS (whichever is greater) 25 mV peak-to-peak.

TRACKING ACCURACY: (WWL models only) The negative output will track the positive output to within 100 mV for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment.

POLARITY: Outputs are isolated. Either positive or negative may be grounded.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed.

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The regulator circuit action compensates for a DC voltage drop up to 0.5 volts in the load leads.

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limit within 100 microseconds after 50% step change in load current for units outputting 10A or less.

ISOLATION VOLTAGE: 750 VDC between input and output, input and case, and 200 VDC between output and case.

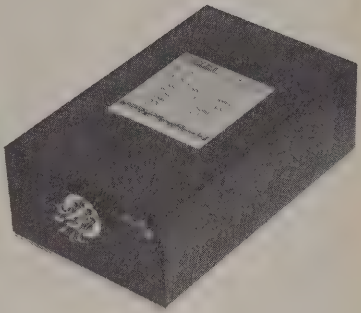
INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case when measured at 50 VDC.

TEMPERATURE RANGE: −55°C to +80°C baseplate temperature. 80% rated power at −55°C to +100°C. Storage: −65°C to +125°C.

RELIABILITY: MTBF per MIL-HBK-217D under operating conditions of 50°C baseplate temperature, maximum rated output power for standard model was calculated to be 164,406 hrs. for ground benign environment and 25,633 hrs. for air inhabited transport. With Enhanced Reliability Option (ER) MTBF was calculated to be 883,580 hrs. for ground benign environment and 94,956 hrs. for air inhabited transport.

ENVIRONMENT: Hermetically sealed and encapsulated to meet MIL-STD-810C, including altitude (to 1.3 inches of Hg), acceleration, vibration, shock and temperature altitude cycling.

EFFICIENCY: Typical 55%.



SINGLE OUTPUT: WL SERIES

OPTIONAL FEATURES

OVERVOLTAGE PROTECTION: (−1 Option) An internal crowbar-type OVP is available. Unit will crowbar output when output voltage exceeds adjustable set point, to 10% or 2V above maximum rated output. To specify option, add "−1" to model number.

ENHANCED RELIABILITY: (ER Option) This option provides increased reliability by using a higher level of military grade components. This feature allows the power supply to meet customer specific requirements as to "Hi-Rel" components. Please consult your nearest Abbott Sales Office for details.

TTL: (L Option) Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off. The power supply will turn-on with TTL logic "1" and turn-off with TTL logic "0". To specify this feature, please add an "L" to the character preceding the first dash of the model number.

3ϕ WYE: (−3 Option) This input voltage is also available as an option. To specify, add "−3" to the end of the model number.

MILITARY POWER SUPPLIES

New Very High Density DC to DC Converters, PCB Mountable

MODEL SM 200

SPECIFICATIONS

Input:
18 to 36 V dc.

Efficiency:
Typical (normal input, full load, room ambient) 75 - 85%.

Line Regulation:
0.1% over entire input range with load held constant.

Load Regulation:
No load to full load with constant line 0.2%.

Pard (Noise and Ripple):
1% typical at 25MHz bandwidth, measured over temperature range.

Isolation Voltage:
1,000 V dc, input to output;
500 V dc, input to case;
500 V dc, output to case.

Insulation Resistance:
50 megohms minimum between input and output, input and case, output and case, when measured at 50 V dc.

Temperature Range:
Operating: -55°C to +100°C maximum, at center of the baseplate. Storage: -55°C to +125°C, ambient.

Temperature Coefficient:
0.02%/°C typical over entire temperature range.

Input Transient Protection:
Unit will not be damaged and will withstand 50 V dc for 0.1 second, in accordance with MIL-STD-704D.

Load Transient Recovery:
Output voltage returns to regulation limits within 200 microseconds after change of load from 20 to 80%, 50 to 100% and line change from low line to high line.

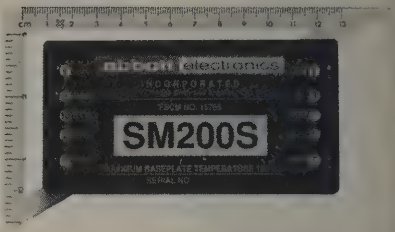
Load Transient Overshoot:
0.2 V from nominal voltage set point.

Environment:
Units meet MIL-STD-810C, altitude, shock, acceleration, vibration and MIL-S-901C high-impact shock conformance.

Remote Sensing:
Compensates up to 0.5 volt drop in output leads.

Short Circuit Protection:
Completely protected against a short circuit of any duration. Output automatically restores to normal when overload is removed.

Remote Inhibit:
Provides for remote turn on/off with TTL logic signal. Application of TTL Signal (logic 0) will inhibit the output.



Internal Input/Output Overvoltage Protection:
Output: Provides an internal crowbar type OVP. Input must be recycled to restore output.
Input: Provides automatic recycling type OVP.

Hook Up:
Via pins - Board mounted. Pins can be located on either the top or baseplate side. Consult sales office for details.

MILITARY POWER SUPPLIES

New High Density 100/200 Watt DC/DC Converters

MODEL AB

SPECIFICATIONS & FEATURES

Input:
18 to 32 Vdc.

Efficiency:
65% minimum. Typically (nominal input, full load, room ambient) 70-80%.

Line Regulation:
10 mV or 0.1%, whichever is greater, over entire input range with load held constant.

Load Regulation:
10 mV or 0.1%, whichever is greater from no load to full load with line held constant.

Pard (Noise and Ripple):
25 mV rms, 100 mV P-P at 25 MHz bandwidth, measured over temperature range.

Isolation Voltage:
500 V dc, input to output; 400 V dc, input to case; 100 V dc, output to case.

Insulation Resistance:
50 megohms between input and output, input and case, output and case, when measured at 50 V dc.

Temperature Range:
Operating: -55°C to +100°C maximum, at center of the baseplate. Storage: -55°C to +125°C, ambient.

Parallelability:
Multiple unit current sharing without the need for external components, via a single pin connection on each unit.

Temperature Coefficient:
0.01%/°C maximum over entire temperature range.

Input Transient Protection:
Unit will provide normal regulated output and withstand 50 V dc for 0.1 second, in accordance with MIL-STD-704D.

Load Transient Recovery:
Output voltage returns to regulation limits within 0.5 milliseconds after 50% change in load current.

Load Transient Overshoot:
0.5 V from nominal voltage set point.

Short Circuit Protection:
Completely protected against a short circuit of any duration. Output automatically restores to normal when overload is removed.

Remote Sensing:
Compensates for up to 0.5 volt drop in leads.

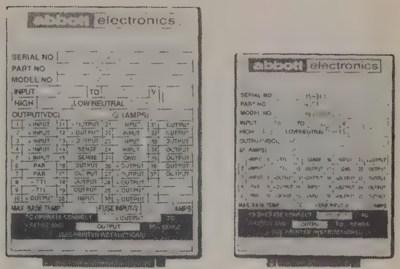
Remote Inhibit:
Provides for remote turn on/off with TTL logic signal. Application of TTL Signal (logic 1) will inhibit the outputs.

Electromagnetic Interference:
Meets MIL-STD-461C (test reports available upon request).

Reliability:
The Mean Time Between Failure (MTBF) is calculated per MIL-HDBK-217E at 50°C baseplate temperature with maximum operating input voltage and maximum rated output power. The MTBF for AB200S at ground benign and naval sheltered is 294,500 and 58,000 respectively. Please consult the local sales office.

Environment:
Units meet MIL-STD-810C, altitude, shock, acceleration, vibration and MIL-S-901C high-impact shock requirements.

Hook Up:
Via D-Subminiature Connectors.



OPTIONS

The following standard options are available on the AB Series power supplies.

Enhanced Reliability:
-ER Option provides increased reliability by using higher levels of military grade components. (To order, add "-ER" after model number, i.e., AB200S/15-A-ER).

MIL-STD-2000:
Workmanship standard, MIL-STD-2000 version of each unit is available. This option includes "-ER" option as a standard feature. Case size will increase. Consult sales office for dimensions. (To order, add "-M" after "A" in model number, i.e., AB200S/12-A-M

SINGLE OUTPUT

Nominal Output Voltage	Output Current (Amps)	Weight[1] (Oz.)	Weight[1] (Grams)	Model Number

MILITARY POWER SUPPLIES

High Density 20/35/50 Watt DC-DC Converters

MODEL
AB
20/35/50

SPECIFICATIONS & FEATURES

Input: 14-32 Vdc.

Input Transient Protection: Unit will withstand 50 Vdc for 0.1 second in accordance with MIL-STD-704D.

Efficiency: 65% minimum typically (nominal input, full load, room ambient) 70-80%.

Line Regulation: Input change of 14 to 32 Vdc with constant load. 0.1% or 10mV, whichever is greater.

Load Regulation: No load to full load with constant line: 10mV or 0.1%, whichever is greater.

Load Transient Recovery: Output voltage returns to regulation limits within 0.5 milliseconds after a 50% change in load current.

Load Transient Overshoot: 0.5V from nominal voltage set point.

Pard (Noise and Ripple): 25mV rms, 100mV P-P at 25 MHz bandwidth, measured at room ambient.

Temperature Range: Operating: −55° C to 100° C maximum, at center of baseplate. Storage, −65° C to 125° C, ambient.

Temperature Coefficient: 0.01%° C maximum over entire temperature range.

Isolation Voltage: 500 Vdc, input to output; 400 Vdc, input to case; 100 Vdc, output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, output and case, when measured at 50 Vdc.

Remote Sensing: Compensates for up to 0.5 volt drop in leads.

Short Circuit Protection: Competely protected against a short circuit of any duration. Output automatically restores to normal when overload is removed.

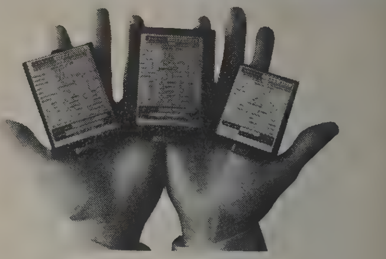
EMI: Meets MIL-STD-461C (Test report available upon request.)

Reliability: All MTBF's per MIL-HDBK-217E, 50° C baseplate, high line and full load.

Environment: Units meet MIL-STD-810C, altitude, shock, acceleration, vibration and MIL-S-901C, high-impact shock conformance. Hermetically sealed units available. Please consult factory.

Hook Up: Via D-Subminiature connectors.

Remote Inhibit: Provides for remote turn on/off with TTL logic signal. Application of TTL Signal (logic 1) will inhibit the output.



- All New Wireless Submodular Construction
- Extra Wide Input Range
- Current Mode Control
- MIL-STD-2000 Version Available
- Standard Current Limiting
- Inherent Over Voltage Control
- Qualified by rigorous Environmental Stress Screening

MILITARY POWER SUPPLIES

28 VDC to DC

MODEL
BC200

SPECIFICATIONS

Input: 22 to 32 V dc standard, 18 to 32 V dc optional (see Option H).

Efficiency: 60% minimum at full load.

Line Regulation: 10 mV for input change of 22 to 32 V dc with load constant.

Load Regulation: 10 mV main output. 0.5% on auxiliary outputs for change of no load to full load with line constant.

Auxiliary Output Tracking Accuracy: The negative output will track the positive output within 100 mV for all rated conditions (BC200T).

Pard (Noise and Ripple) for Main and Auxiliary Outputs: 20 mV rms; 100 mV peak to peak (maximum), at 25 MHz scope bandwidth, over the entire temperature range.

Isolation Voltage: 400 V dc input to output, 200 V dc input to case, 200 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Temperature Range: Operating: −55°C to +100°C maximum at center of baseplate. Storage: −65°C to +125°C ambient.

Temperature Coefficient: 0.01%/°C maximum for main and auxiliary outputs over entire temperature range.

Input Transient Protection: Unit will withstand 50 V dc for 0.1 second in accordance with MIL-STD-704D.

Load Transient Recovery Time: Output voltage returns to regulation limits within 0.5 millisecond for main and auxiliary outputs after a 50% charge in load current.

Load Transient Overshoot: 0.8 V or 3% (whichever is greater) from nominal voltage set point.

Short Circuit Protection: Completely protected against a short circuit of any duration. Outputs automatically restore to normal when overload is removed. Auxiliary outputs will fold back for overload.

Current Limiting: Output current is limited to 120% on main, 150% on auxiliary outputs (±10%) under overload conditions.

Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.5 volts in the load leads (on 5 V main output).

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to radiated and conducted interference.

Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output was calculated to be 75,274 hours for a ground benign environment and 27,522 hours for an air inhabited environment. With -ER option MTBF was calculated to be 560,669 hours for a ground benign environment and 175,234 hours for an air inhabited environment.

Environment: Encapsulated and hermetically sealed to meet environmental requirements of MIL-STD-810C including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Connectors: Standard unit is provided with an input and main output "hermetic seal" stud connector, for the auxiliary outputs a solder-type multiple-pin, output header.

Output Voltage Range[1] (Main)	Output Current[1] (Main)	Output Voltage Range[1] (Aux)	Output Current[2] (Aux)	Weight[3] (Lbs.)	Model Number
4.75-5.25	40.0			5.5	BC200S/5-D

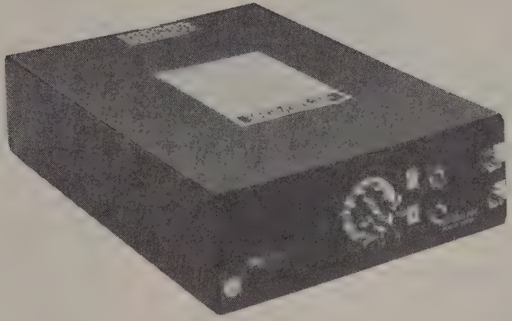
14.25-15.75	13.5			5.5	BC200S/15-D
22.80-25.20	8.5			5.5	BC200S/24-D
26.60-29.40	7.5			5.5	BC200S/28-D
4.8-5.8	30	±11.5-±12.5	2.1	5.5	BC200T/5/12
4.8-5.8	30	±14.5-±15.5	1.7	5.5	BC200T/5/15

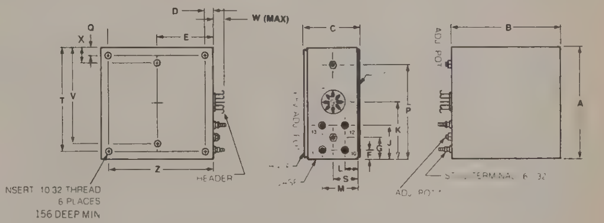
1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 35 mV.
2. Maximum output power equals 200 Watts.
3. Weights are ±5%.



FEATURES

- 200-Watt Single and Triple Output, 100 kHz Switching DC/DC Converter
- High Efficiency, 60% Minimum
- −55°C to +100°C Temperature Range
- Meets MIL-STD-461B, MIL-STD-810C and MIL-STD-704D for Input Transient Protection

MECHANICAL DIMENSIONS



* This adjustment pot used only on triple output model.

All pins appear on both models. Pins 1, 2, 8 and 9 are used for triple output.

A	B	C	D	E	F	G	J	K	L
5¾	8	1⅞	.280	3.749	½	1¹⁄₁₆	1²¹⁄₃₂	2⅞	⁹⁄₁₆

M	P	Q	S	T	V	W	X	Z
1⁵⁄₃₂	4¹¹⁄₁₆	.280	²⁷⁄₃₂	5.470	5.120	⁹⁄₁₆ MAX	.630	7.219

Tolerances: If a fraction, ±¹⁄₃₂ inch, a decimal, ±.015 inch.

Material: Base—Aluminum 6061-T6. Case—Steel.

Finish: Black flat lacquer per FED-STD-595. Color 37038.

Mounting: 10-32 THD inserts ⁵⁄₃₂″ minimum depth are provided in baseplate. Steel 10-32 bolts American Standard, unified national fine series, slotted studs are supplied with each unit. Metric hardware and inserts available as a special order.

PIN DESIGNATIONS

1. Common (Aux)
2. +V (Aux)
3. N/C
4. +Sense
5. Ground
6. −Sense
7. N/C
8. −V (Aux)
9. Internal Connection
10. +Input (DC)
11. −Input (DC)
12. +5V Output
13. 5V Return

OPTIONAL FEATURES

All options apply to both single and triple output units unless otherwise specified.

Special Connectors: Military-type hermetically sealed connectors are provided as **Option A** in place of our standard header and studs. (To order, replace the "D" in the model number with "A," i.e., BC200S/5/12-A.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E**, enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., BC200T/5/12-DE.)

Wide Input Voltage: With **Option H**, the units will operate from 18 to 32 V dc, with 20% derating in output power. (To order, add an "H" after the "D" in the model number, i.e., BC200S/5-DH.)

Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" after "D" in model number, i.e., BC200T/5/12-DL.)

Remote Output Adjustment: With **Option R**, an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., BC200S/5-DR.)

Flexible Current Feature: Option -5 assigns 10 watts from the 2nd and 3rd auxiliary outputs to main output. (To order, add "-5" after model number, i.e., BC200T/5/12-D-5.)

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military-grade components. (To order, add "-ER" after model number, i.e. BC200T/5/12-D-ER.)

Internal Over Voltage Protection: Option -1 provides a non-crowbar internal OVP on single output and 5 V main on triple outputs. (To order, add "-1" after the D in model number, i.e., BC200S/5-D-1.)

4.8-5.8	15	±14.5-±15.5	0.8	3.2	1.5	BC100T/5/15-D

1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 35 mV.
2. Maximum output power equals 100 watts.
3. Weights are ±5%.

OPTIONAL FEATURES

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard header. (To order, replace the "D" in the model number with "A" i.e., BC100T/5/12-A or BC100S/5-A.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E**, enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., BC100T/5/12-DE or BC100S/5-DE.)

Wide Input Voltage: With **Option H**, the units will operate from 18 to 32 V dc with 20% derating in output power. (To order, add an "H" after the "D" in the model number, i.e., BC100T/5/12-DH or BC100S/5-DH.)

Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" after "D" in model number, i.e., BC100T/5/12-DL or BC100S/5-DL.)

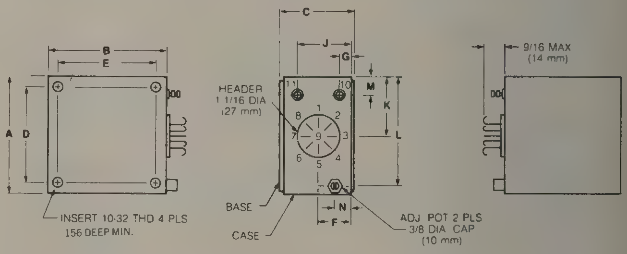
Remote Output Adjustment: With **Option R**, an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., BC100T/5/12-DR or BC100S/5-DR.)

Internal Overvoltage Protection: Option -1 provides a non-crowbar internal OVP on the main output (Output 1). Input must be recycled to restore output. (To order, add "-1" after the"D" in model number, i.e., BC100T/5/12-D-1 or BC100S/5-D-1.)

50-50 Distributed Power: Option -7 distributes 50 watts to the main and 50 watts to the auxiliaries. (To order add "-7" to the end of the model number, i.e., BC100T/5/12-D-7.)

Flexible Current Feature: Option -5 assigns 10 watts from 2nd and 3rd auxiliary outputs to main output. (To order, add "-5" after model number, i.e., BC100T/5/12-D-5.)

MECHANICAL DIMENSIONS (BC100T)



A	B	C	D	E	F	G

MILITARY POWER SUPPLIES

BC-60 Series
60 Watt DC-DC Converters

MODEL
BC 60

SPECIFICATIONS:

Input: 18-36 Vdc (28 Vdc nominal)

Input Transient Protection: 50 Vdc for 0.1 second per MIL-STD-704D

Efficiency: Typical (nominal input, full load, room ambient). Single output: 72 to 79%. Triple output: 70%.

Line Regulation: Input change of 18-36Vdc, constant load. Single: 0.1% or 10mV, whichever is greater. Triple: 0.1%, all outputs.

Load Regulation: No load to full load, constant line. For singles and main output (triples): 0.1% or 10mV, whichever is greater; auxiliaries, 0.5%.

Load Transient Recovery: Output voltage returns to regulation envelope within 0.5 mS for 50% load charge.

Load Transient Overshoot: 0.5V or 3%, whichever is greater, from nominal set point at full load, for 50% load charge.

Pard (Noise and Ripple): Measured at 25 MHz bandwidth. Single Output Unit: 30mV rms; P-P: 5V-2.0%, 12 or 15V - 1.0%, 24 or 28V - 0.7%. Triple Output Unit: 30mV rms; 100mV P-P for main and auxiliary outputs.

Temperature Range: Operating, −55° C to 100° C maximum at center of baseplate. Storage, −65° C to 125° C ambient. Note: Turn on at low temperature extreme can result in increased PARD measurements prior to unit warm up (1-3 minutes). Consult nearest sales office for application details.

Temperature Coefficient: 0.03%/°C maximum over entire temperature range.

Auxiliary Output Tracking: Negative output tracks positive within 100mV for all rated conditions, with auxiliaries set at nominal output voltage (±200mV).

Isolation Voltage: 400Vdc, input to output; 200Vdc, input to case; 200Vdc, output to case.

Insulation Resistance: 50 megohoms minimum between input and output, input and case, output and case when measured at 50Vdc.

Overvoltage Protection: Electronic overvoltage protection standard; 120% limit ± 10%, non-crowbar. Requires recycling of input for recovery.

Short Circuit Protection: Protected against short circuit of any duration. Automatic recovery when overload is removed.

Current Limiting: Foldback current limiting standard for all outputs, 120% (± 10%) limit for single output and main output on triples; 150% (± 10%) for auxiliary output on triples.

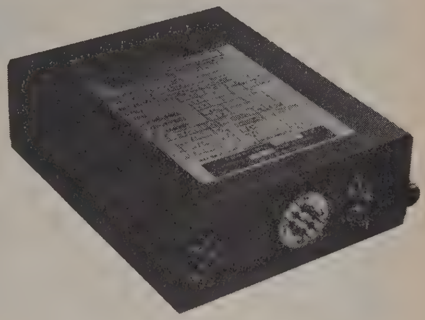
Remote Sensing: Standard on all single output units and main output of triple output units. Compensates for up to 0.5V drop in load leads.

EMI: Units qualified to MIL-STD-461C part 2; CE01, CE03*, CS01, CS02, RE02*, CE07, RS02, RS03 and CS06, for input leads. *Consult nearest sales office for additional data.

Reliability: All MTBF's per MIL-HDBK-217E, 50° C baseplate, highline and full load. See MTBF chart for your requirement.

Environment: Encapsulated and hermetically sealed units meet MIL-STD-810C, altitude, shock, acceleration, and MIL-S-901C, high impact shock conformance.

Hook Up: Via hermetic, solder-type multiple pin header and solder turrets for I/O.



FEATURES

- 60-Watt Single and Triple Output
- High Efficiency, 65% Minimum
- −55° C to +100° C Temperature Range
- Meets MIL-STD-461C, MIL-STD-810C and MIL-STD-704D for Input Transient Protection

Model	Main Output/ Current[1]	Output #2[1]	Output #3[1]	Weight (lbs)	Weight (kgs)

BC60T/5/12D	5V@6A	+15V@1A	−15V@1A	2.16	0.98

1. Single/Main Outputs adjust ±5%, 35 mV resolution
   Auxiliary Output adjust ±0.5V
2. Weight ±5%

OPTIONAL FEATURES

"A" Hermetic Connectors
Replaces solder header/turrets with military connectors:
Input: MS3113H10-6P (Mate Inc.)
Output: MS3113H14-12P (Mate Inc.)
Other hermetic, MIL connectors available on special order.

"E" Severe Shock, Vibration, Acceleration
Extra encapsulent to meet 60g shock, 30g vibration and 50g acceleration.

"L" Remote Enable/Inhibit
Provides for remote turn on/off with TTL logic signal.

"ER" Enhanced Reliability
Provides increased reliability via higher level MIL grade components.

MILITARY POWER SUPPLIES

28 VDC to DC

MODEL C and CC

SPECIFICATIONS

INPUT VOLTAGE RANGE: 24 to 30 VDC. Other input ranges available

LINE REGULATION: 0.1% (0.2% for duals) or 10 mv (whichever is greater) for input change of 24 to 30 VDC with load constant

LOAD REGULATION: 0.1% (0.2% for duals) or 20 mv (whichever is greater) for change from no load to full load with line constant

RIPPLE: 0.02% or 5 mv RMS (whichever is greater) 50 mv peak-to-peak maximum, each output, measured with scope having 25 MHz bandwidth

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in the table by means of an externally accessible screwdriver adjustment potentiometer

TRACKING ACCURACY: The negative output will track the positive output to within 1.0% or 100 mv (whichever is greater) for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment

ISOLATION VOLTAGE: 200 volts DC between input and output, input and case, and output and case

INSULATION RESISTANCE: 50 megohms minimum at 50 volts DC between input and output, input and case, and output and case

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded.

TEMPERATURE RANGE: Operating: −55°C to +100°C maximum at center of mounting base
Storage: −65°C to +125°C

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum

ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810C and MIL-E-5400P, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output automatically restores to normal when the overload is removed

INPUT TRANSIENT PROTECTION: MIL-STD-704A, Fig. 9, Limt 1 (80 VDC for 0.1 sec.).

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 100 microseconds (200 microseconds for duals) after 50% step change in load current

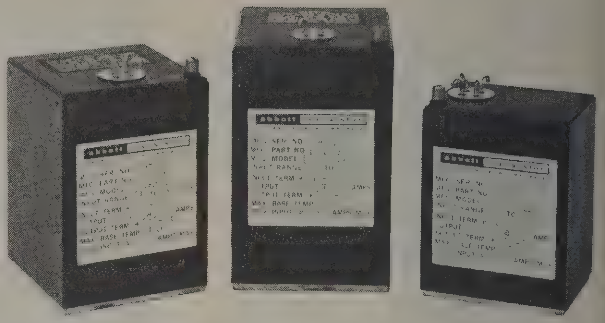
RELIABILITY: MTBF per MIL-HDBK-217D up to 277,200 hrs.

ELECTROMAGNETIC INTERFERENCE: Units meet EMI requirements of MIL-STD 461 conducted and radiated.

OVER-VOLTAGE PROTECTION*: An internal, crowbar type OVP is available. Power supply turns off when output voltage exceeds set-point.

TTL*: Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off.

* Inclusion of these optional features on these models will most likely require that the case size increases slightly. Please consult nearest Abbott sales office for further details.



High Performance

- Operating temperature range: −55°C to +100°C.
- Low Peak-to-Peak Ripple.
- Compact. Power density up to 2 watts per cu. in.
- High reliability. Up to 277,200 hrs. MTBF per MIL-HDBK-217D
- Low EMI. To MIL-STD-461.
- Encapsulated and hermetically sealed to meet MIL-STD-810C and MIL-E-5400P, Class 2.
- 0.1% Line and Load regulation.
- TTL compatibility available.
- Internal OVP optional.

MILITARY POWER SUPPLIES

28 VDC to DC

MODEL B

SPECIFICATIONS

Input Voltage Range
24 to 30 volts DC Other ranges available

Line Regulation
Within 0.4% for input 24 to 30 VDC

Combined Line and Load Regulation
Within 3.0% for input 24 to 30 VDC and from ½ load to full load on Model B's
Within 5.0% for input 24 to 30 VDC and from ½ load to full load on Model BL's

Ripple
0.5 RMS — Model B's
1.0% RMS — Model BL's

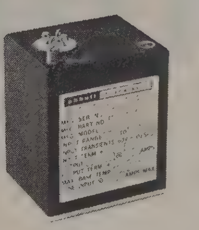
Voltage Adjustment Range
12% by screwdriver adjustment

Input Transient Protection
In accordance with MIL-STD-704A, Fig. 9, Limit 1, (80 VDC for 0.1 sec.)

Environment
+212°F max. at mounting base using adequate heat sink
−65°F min. at mounting surface
Altitude: To vacuum (true hermetic seal).
Vibration, shock, sand, dust, humidity, salt-spray, fungus, sunshine, rain, and explosion to MIL-STD-810C and MIL-E-5400P, Class 2

Output Voltage and Current
See specific models listed
(Outputs and inputs are isolated)

Reliability: MTBF per MIL-HDBK-217C up to 626,400 hrs.



High Reliability

- Operating temperature range −55°C to +100°C.
- Small size.
- High reliability. Up to 626,400 hrs. MTBF per MIL-HDBK-217C.
- Encapsulated and hermetically sealed. Meets MIL-STD-810C and MIL-E-5400P, Class 2.

Abbott
TECHNOLOGIES, INC.

The Powerhouse of Quality™

At Abbott Technologies, we believe that the key to our success is our dependability in providing reliable, cost-effective solutions to our customers power requirements. Our dependability extends to all of our interactions with our customers as well. This commitment has qualified Abbott Technologies as the vendor of choice in a wide range of industrial applications since 1961.

Most of our standard products are **UL** recognized, and we can modify our units to provide features and capabilities normally available only on custom power supplies, usually at a fraction of the cost. This allows us to offer very competitive pricing even in small quantity orders of our modified as well as our standard product. And our quick, responsive service is hard to beat.

Our continual efforts to enhance the quality of our products is augmented by our search for new ways to save our customers time and money in the long-run. The key elements of our approach to providing you with the best possible service include:

-Conservative design philosophy which ensure that product performance will always exceed product specifications

-Commitment to Total Quality Management (**TQM**) to ensure that we continually improve our skills to help you gain the competitive edge

-Computerized production control to ensure our on-time delivery

-Continual cost reduction programs to ensure our price competitiveness

-DIRECT Sales/Service Support

-On-line applications engineering support

-American owned/operated facilities located in the United States

Our many years of experience with power design/ management contribute to us maintaining a very high degree of customer satisfaction.

The following pages list some of our standard products. We would be happy to provide you with more detailed specifications on these and other power products including **ruggedized DC supplies**, **DC to AC inverters**, **transformers**, and other **power magnetics modules**.

Please contact us for a free catalog or a quote on your requirements.

Also see our listing for Transformers in Volume **A**, Pages **A**•2234-**A**•2253, and Inverters in the next section, Pages **D**•2228, 29.

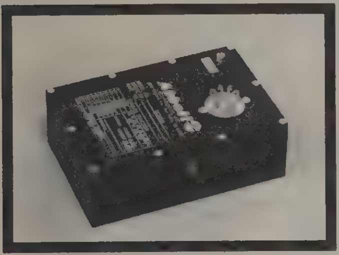
Abbott Ruggedized Switchers

High-Performance 100-120 Watt Switching Power Supply Ruggedized for Extreme Environment Applications



list price: **$499**

size: 6" x 4" x 2.5"

Standard Single Output Models

Voltage	Current (max)	Power	Model
5	20 A	100 W	Z5xR20
6	18 A	108 W	Z6xR18
12	10 A	120 W	Z12xR10
15	8 A	120 W	Z15xR8
18	6.7 A	120 W	Z18xR7
24	5 A	120 W	Z24xR5
28	4.3 A	120 W	Z28xR4
30	4 A	120 W	Z30xR4

GENERAL SPECIFICATIONS:

Input Range: (A): 90-132VAC, 47-440HZ, 124-186 VDC
(B): 180-265VAC,47-400HZ, 248-372 VDC
(C): 20-32 VDC

To indicate preference please place letter designator after nominal voltage in model number: EXAMPLE: Z5AR-20.

Line Regulation: 0.15%
Load Regulation: 0.2%
Ripple: 100 mV peak-to-peak or 0.5% which ever is greater
Construction: Aluminum extruded case, with removable gasket-sealed cover.
Repairability: Non-hermetically sealed construction allows units to be repaired in field (with optional modular field repair kits).
Temperature Range: -40 to +85 degrees C baseplate temperature.

Storage Temperature: -40 to +85 degrees C.
Efficiency: 80% typical, 75% minimum.
Short Circuit Protection
Over Voltage Protection
Remote Error Sensing
EMI: MIL-STD-461A , CEO1, CEO3 (above 2Mhz bandwidth)
Input Transient Protection: MIL-STD-1399, 143.8 VAC for 0.3 seconds.
MIL-STD-704A(CAT. B), 180 VAC for 0.1 seconds.
Reliability: Over 123,000 hrs MTBF per MIL-HDBK 217
Environment: MIL-STD-810D,(environmental portions, including shock, vibration, moisture, altitude, etc.)
Typical Applications: oil exploration, aircraft, shipboard and mobile equipment, field instruments, ground support, etc.
Options: Side-mounted header, mil-type connectors, field repair kits, output configurations, extreme shock encapsulation, component upgrades

ABBOTT WILL MODIFY ANY OF OUR POWER SUPPLIES FOR YOUR PARTICULAR APPLICATION QUICKLY AND FOR A REASONABLE PRICE.

Sample modifications include: input filtering, input/output connector style and location, ruggedization, output voltages and power levels, special functions, custom enclosures, labeling, special testing, sub-assembly integration, remote on/off, and parallel operation.

We regularly modify our power supplies for customers who require optimum power supply performance for their application. We can normally accomodate small runs of modified products at a very nominal NRE fee, and for larger requirements we can do modifications free of charge. All modified units are thoroughly tested and meet the same high quality standards of our standard products.

A modified Abbott power supply can be an attractive low-cost alternative to more costly custom or special purpose units.

Our CAE/CAD , SPC, and CAM systems assure on-time delivery of our modified as well as standard products. We also have a fully qualified environmental test laboratory on-site to quickly test and verify our units complience to various extreme environmental conditions.

Please contact us for more information.

MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

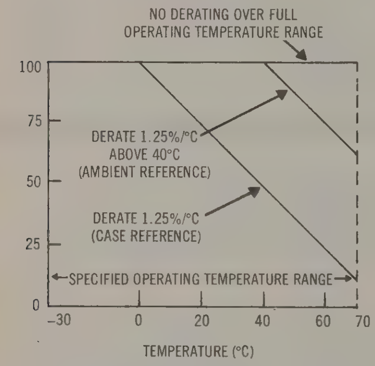

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

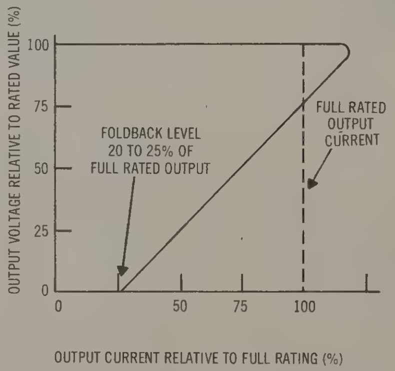

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

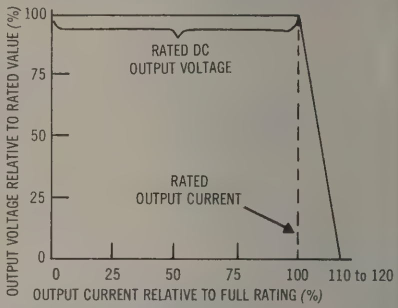

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

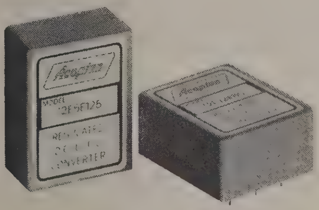
Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

WE SHIP POWER SUPPLIES IN 3 DAYS

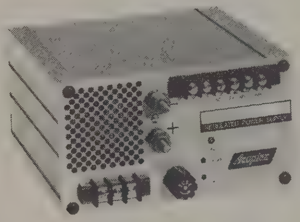
Any time you order Acopian power modules selected from the thousands of models described on the following pages, shipment will be made within 3 days after your purchase order is received. To save more time, telephone your order. We'll ship within 3 days after you've put down the phone.

Miniaturized Single Output 2
Miniaturized Dual Output 4
Miniaturized with Screw Terminals 6
Series A, 0.005% Regulation
Series B, 0.05 to 0.5% Regulation 8
Narrow Profile 12
Wide Output Adjustment 14, 24
Dual Outputs (User Selectable) 16
Dual Tracking Outputs 18
Triple Output 19
Series U Unregulated 20
Rack Mounting 22
Redundant Power Systems 25
Rack-Mountable Assemblies 28
High Voltage (to 30,000 volts) 30

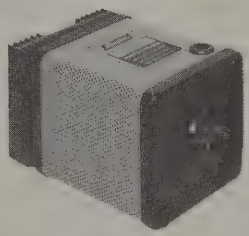
OTHER ACOPIAN PRODUCTS INCLUDE:



DC-DC Converters
For printed circuit boards
or with screw terminals.
Single and dual output.



Switching Power Supplies
Outputs to 48 Vdc,
to 150 A. Small size,
low noise.



Plug-in Power Supplies
Single and dual output.
Regulated and unregulated.

ALL MODELS U.L. RECOGNIZED

Conserve space with mini-modules as small as 2.3″ x 1.8″ x 1.0″. Models with outputs ranging from 1 to 75 volts, and from 30 mA to 2.5 amps are available. All feature excellent regulation and ripple parameters, and are short circuit protected.

Rugged encapsulated construction and generously derated components insure years of reliable operation. Mini-modules are also available with multiple outputs—see pages 4 and 5.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Small, lightweight

SPECIFICATIONS:

Input Voltage: 105-125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See table.

Output Voltage Trim Adjustment: Output is factory preset to ±2% (1 to 9 volt models) or ±1% (10 to 75 volt models) of nominal output voltage. Output may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Output is floating. Either positive or negative terminal may be grounded.

Ambient Operating Temperature: −20 to +71°C. (Model 5E150, 0 to +71°C.) No derating required.

Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 to 75 volts, typical TC is 0.015%/°C; 1 to 8 volts, 0.03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Weight: 7 oz. (Case size ES-10.)
13 oz. (Case size EL-10.)
1 lb. 3 oz. (Case size EL-13.)
1 lb. 15 oz. (Case size EL-20.)

Mounting: May be mounted on printed circuit board or in socket. See page 5.

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "−230" to model number and $10.00 to price.

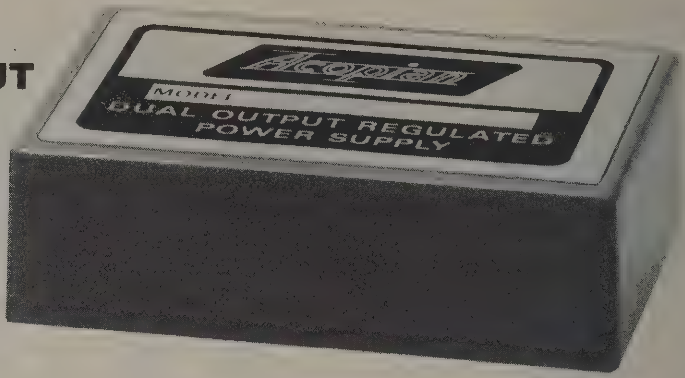
MINIATURIZED DUAL & TRIPLE OUTPUT

PC BOARD MOUNTING
LINEAR REGULATED
AC-DC



Acopian
MODEL
DUAL OUTPUT REGULATED POWER SUPPLY

SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED

These dual and triple output mini-modules are compact and convenient sources of the voltages required to power operational amplifiers and related circuits. They may be mounted directly on printed circuit board assemblies, simplifying system layout and minimizing the connectors and wiring required.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Compact, lightweight

SPECIFICATIONS:

Input Voltage: 105-125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See table.

Output Voltage Setting: Each output is factory preset to ±2% (1 to 9 volt outputs) or ±1% (10 to 28 volt outputs) of the nominal output voltage. Outputs of Case Size END modules, except those marked (*), may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Single output sections may be used in either polarity. Dual output sections, marked (*), are provided with a plus/common/minus output connection configuration.

Ambient Operating Temperature: −20 to +71°C. No derating required.

Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 to 28 volts, typical TC is 0.015%/°C; 1 to 8 volts, 0.03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Weight: 7 oz. (Case size ES-10.)
13 oz. (Case size END.)
13 oz. (Case size EL-10.)
1 lb. 3 oz. (Case size EL-13.)
1 lb. 15 oz. (Case size EL-20.)

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "−230" to model number and $10.00 to price.

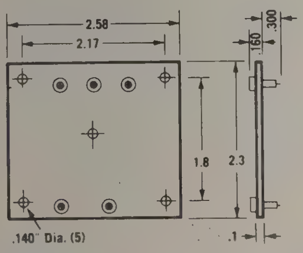
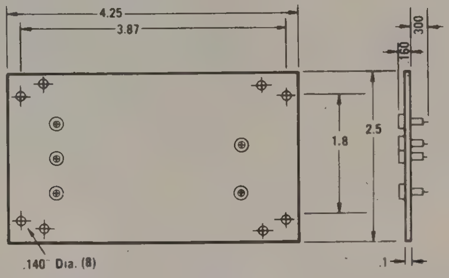
ACCESSORY SOCKETS

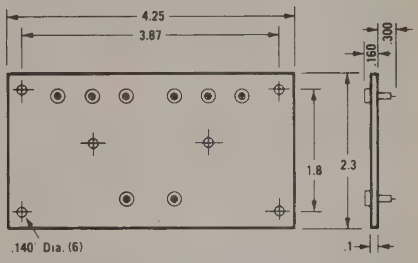
Each of these sockets has a sturdy phenolic base with gold plated teflon-insulated contacts.



Model ES-1 (for case sizes ES-10 and ESC-10) . . . .$15.00 ea.



Model EL-1 (for case sizes EL-10, EL-13, EL-20 and ELC-10) . . . .$15.00 ea.



Model END-1 (for case size END) . . . .$15.00 ea.

DUAL (ISOLATED) & TRIPLE OUTPUT, USER-SELECTED

Any two of the sections listed below, or two of the same section, can be combined into a multiple-output module. The complete model number is the combination of the two section numbers selected. Note that some sections provide two outputs; combination with a single output section results in a triple-output module.

Example: The combination of sections 6E20D and 15E10D is the Model 6E20D-15E10D. Always assign the lower voltage section first. For pricing purposes, add the costs of the sections selected. Example: The price of the Model 6E20D-15E10D is $52.00 plus $45.00, or $97.00 total.

MINIATURIZED
SINGLE & DUAL OUTPUT

WITH SCREW TERMINALS
LINEAR REGULATED
AC-DC

SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED

Although small in size, these mini-modules offer high performance at modest prices. All models, with series regulated outputs ranging from 1 to 75 volts and as high as 2.5 amps, may be mounted in an area only 3.5″ x 2.5″. Dual output models are available with the ratings commonly required for driving op amps and other balanced loads. Terminal strip input/output connections eliminate all need for sockets or soldering. Short circuit protection, encapsulated construction, and conservative design assure long term reliability.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Small, lightweight

SPECIFICATIONS:

Input Voltage: 105-125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See tables.

Output Voltage Trim Adjustment: Outputs factory preset to ±2% (1 to 9 volt models) or ±1% (10 to 75 volt models) of nominal output voltage. Single output models may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Either positive or negative terminal of a single output module may be grounded. Dual output modules have a positive/common/negative output terminal configuration.

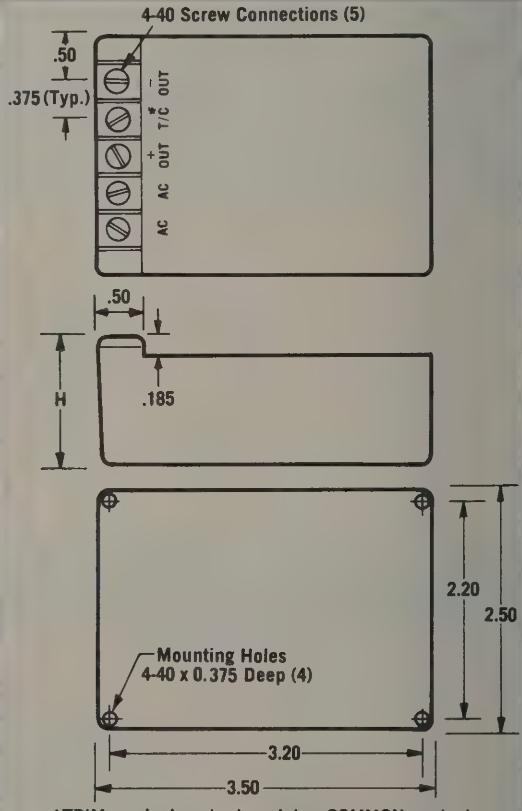
Ambient Operating Temperature: −20 to +71°C. (Model 5EB150, 0 to +71°C.) No derating required.

Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 to 75 volts, typical TC is 0.015%/°C; 1 to 8 volts, 0.03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "−230" to model number and $10.00 to price.



*TRIM on single output modules; COMMON on duals

REGULATED POWER SUPPLY

A broad selection of power supplies offering unusually high performance—many models have regulation of ±0.005%. Electronic current limiting and provision for remote voltage sensing are standard features; overvoltage protection is available as a built-in option. Rugged extruded aluminum cases include threaded mounting holes on bottom, back, and side, permitting mounting in any position.

SERIES A HIGH PERFORMANCE POWER SUPPLIES

STANDARD FEATURES

- Provision for remote sensing and/or external output adjustment
- Short circuit proof with automatic recovery (electronic current limiting)
- Can be mounted on any of three surfaces (case sizes H8, H11 and H16, two surfaces)

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Specifications: See pages 10 and 11. Series A supplies have model numbers beginning with the letter A.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, so that drops in the load line are compensated, is a standard feature.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 volts above ground.

Temperature Coefficient: 0.015%/°C (Typical).

Ambient Operating Temperature: −20 to +71°C.

Storage Temperature: −55 to +85°C.

Response Time: Less than 20 microseconds.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available in models with outputs of 3 volts and higher. To order, add prefix "V" to the model number, and increase standard price as follows:

Outputs of	3-70V	75-150V
All case sizes except H16	$25.00	$35.00
Case size H16	75.00	85.00

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "−230" to model number and $25.00 to price. (For models in case sizes H8, H11 and H16, add $40.00.)

REGULATED POWER SUPPLY
Acopian
REGULATED POWER SUPPLY

These versatile supplies are ideal for powering digital circuitry, test sets, instrument bridges, and process control transmitters. Many models have regulation of ±0.1% or better. All components are generously derated to insure a long and trouble-free life, and they use the same rugged construction as the Series A line. Overvoltage protection and other options are available.

SERIES B GENERAL PURPOSE POWER SUPPLIES

STANDARD FEATURES

- Short circuit proof (electronic current limiting)
- May be mounted on any of three surfaces
- Completely serviceable

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Specifications: See pages 10 and 11. Series B supplies have model numbers beginning with the letter B.

Remote Voltage Adjustment/Sensing: Available as an option. See below.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 volts above ground.

Temperature Coefficient: 0.02%/°C (Typical).

Ambient Operating Temperature: 0 to +71°C.

Storage Temperature: −55 to +85°C.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available in all models with outputs of 3 volts and higher. To order, add prefix "V" to the model number, and add $25.00 to the standard price of models with outputs of 3 to 70 volts; $35.00, for 75 to 200 volt outputs.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, so that drops in the load lines are compensated, is available on all models. (This option also permits the use of an externally located potentiometer to adjust output voltage.) To order, add prefix "R" to the model number. No increase in price.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "−230" to model number and $25.00 to price.

Where only a narrow mounting space is available, Acopian narrow profile power supplies fit when many others cannot. Choose from Series A (high performance) and Series B (general purpose) models with output ratings up to 150 volts, up to 3.5 amps.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Specifications: See table.
- **Series A:** Model numbers begin with the letter A.
- **Series B:** Model numbers begin with the letter B.

Remote Voltage Adjustment/Sensing: Standard in Series A, not available in Series B.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 volts above ground.

Temperature Coefficient:
- **Series A:** 0.015%/°C (Typical).
- **Series B:** 0.02%/°C (Typical).

Ambient Operating Temperature:
- **Series A:** −20 to +71°C.
- **Series B:** 0 to +71°C.

Storage Temperature: −55 to +85°C.

Overload/Short Circuit Protection:
- **Series A:** Foldback current limiting with automatic recovery.
- **Series B:** Input fuse and output current limiting.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available on all models with outputs of 3 volts and higher. To order, add prefix "V" to the model number and add $25.00 to the standard price of models with outputs of 3 to 70 volts; $35.00, for 75 to 150 volt outputs.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "−230" to model number and $25.00 to price.

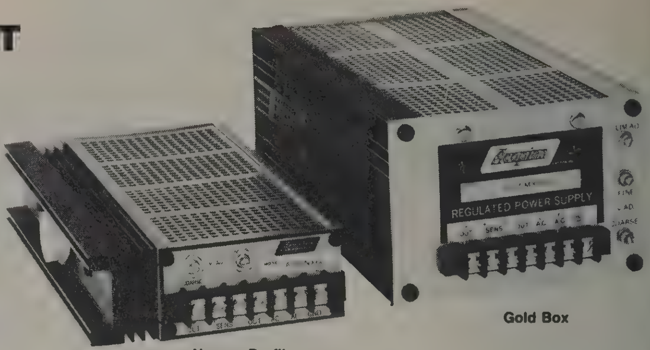
WIDE OUTPUT ADJUSTMENT

FIXED & ADJUSTABLE CURRENT LIMITING LINEAR REGULATED AC-DC



Narrow Profile

Gold Box

SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED

Power supplies with the broad adjustment capability required for analog instrumentation and circuitry, electronic system development; basic research, and similar applications.

For applications requiring a constant current or adjustable current limiting, a power supply with a true constant current characteristic, such as those with model numbers beginning with the letter P, should be used.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Regulation, Ripple (constant voltage operation):
Line Regulation: ±0.005% or 2 mV, whichever is greater.
Load Regulation: ±0.005% or 2 mV, whichever is greater.
Ripple: 0.25 mV rms.

Regulation, Ripple (constant current operation):
Line Regulation: ±0.1% or 2 mA.
Load Regulation: ±0.2% or 5 mA.
Ripple: 0.1% rms.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, to compensate voltage drops in output wiring, is a standard feature.

Remote Voltage Programming: The output voltage of all models may be controlled by means of external resistance connected in series with the −S lead.

Voltage Programming Coefficient: See table. Calibration tolerance, ±2%.

Current Limiting: Models with fixed current limiting have a roll off characteristic with automatic recovery. All others have current limiting with a constant-voltage/constant-current crossover characteristic.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 volts above ground.

Temperature Coefficient: 0.015%/°C (Typical).

Ambient Operating Temperature: −20 to +71°C.

Storage Temperature: −55 to +85°C.

OPTIONS

Remote Current Limiting Adjustment: All models having numbers beginning with the letter P have a built in (front panel) current limit control. Provision for control of the current limit setting by adjustment of an external resistance is available as an option. To order, add the prefix letter "E" to the model number, and add $10.00 to the standard price.

The current limit setting is inversely related to resistance. Use a 200 ohm ½ W potentiometer.

Overvoltage Protection: An internally mounted overvoltage protection circuit, fixed set approximately 20% above the maximum output voltage rating of the supply, is available on all models. To order, add prefix "V" to the model number, and increase standard price as follows:

Maximum output of	**6-60V**	**100-150V**
All case sizes except H16 . .	$25.00	$35.00
Case size H16	75.00	

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "- 230" to model number and $25.00 to price. (For models in case sizes H11 and H16, add $40.00.)

ALL MODELS U.L. RECOGNIZED

Acopian general purpose duals furnish two completely independent outputs, either identical or different, in less space and at less cost than two equivalent single output supplies. Thousands of output voltage/current rating combinations are available. Mounting and system wiring are simplified. Quality components, generously derated, insure long-term reliability.

HOW TO ORDER: Select two sections (from the same table) on page 17. The complete model number is the combination of the two sections selected. Example: The combination of section 5GT20D and section 8GT50D is Model 5GT20D-8GT50D. Always assign the lower voltage section first. For pricing purposes, add the cost of the individual sections selected.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Specifications: See page 17.

Short Circuit Protection: Delivers current surges without damage—built-in fuse protects supply against prolonged overloads and shorts.

Polarity: Outputs are floating. Each output may be independently connected to provide any combination of positive and negative voltages. Outputs may be floated up to 300 volts above ground.

Temperature Coefficient: 0.02%/°C (Typical).

Ambient Operating Temperature: –10 to +71°C. No derating required.

Storage Temperature: –55 to +85°C.

Dimensions and Weight: Case size G5D.

OPTIONS

Overvoltage Protection: Two separate, preset overvoltage protection circuits, one for each output. To order, add prefix "V" to model number and add $30.00 to the standard price for 3 to 70 volt outputs; add $50.00 if either or both outputs are greater than 70 volts. Not available for outputs less than 3 volts.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "–230" to the model number and $25.00 to the standard price.

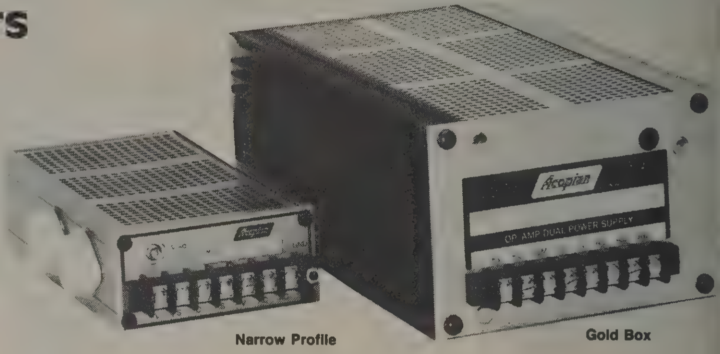
DUAL TRACKING OUTPUTS

LINEAR REGULATED
AC-DC

SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED



Series D dual output power supplies are a convenient source of the tracking voltages required for powering operational amplifiers and related circuits. Their positive/common/negative output terminal configuration minimizes system wiring. Provision for remote sensing permits compensation of load line effects. Although moderately priced, they are sturdily constructed and conservatively rated.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Voltages: Tracking within 1%.
Output Currents:
Output Voltage Adjustment Ranges:
} See tables. Outputs are short circuit protected.

Load Regulation: ±0.1%.

Line Regulation: ±0.1%.

Ripple: 1.5 mV RMS.

Polarity: Positive output, common, and negative output.

Remote Voltage Sensing: Standard.

Temperature Coefficient: 0.02%/°C (Typical).

Ambient Operating Temperature: −10 to +71°C.

Storage Temperature: −55 to +85°C.

OPTIONS

Overvoltage Protection: A built-in preset overvoltage protection circuit is available on all models. If either output fails, both outputs are "crowbarred." To order, add prefix "V" to the model number, and increase standard price by $30.00.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "−230" to model number and $25.00 to price.

EASTON, PA
TRIPLE OUTPUT POWER SUPPLY
FUSE

Triple isolated output power supplies provide the features and characteristics of three supplies in one compact, easy-to-use package. They are available in the voltage combinations most frequently required for driving microprocessors and associated circuitry.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Specifications: See table.

Polarity: Outputs are floating. Each output may be independently connected to provide any combination of positive and negative voltages. Outputs may be floated up to 300 volts above ground.

Temperature Coefficient: 0.02%/°C (Typical).

Ambient Operating Temperature: –10 to +60°C. No derating required.

Storage Temperature: –55 to +85°C.

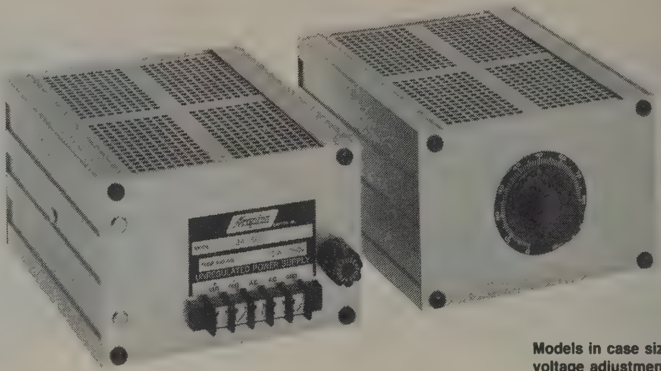
UNREGULATED

FIXED OUTPUT & WIDE OUTPUT ADJUSTMENT
AC-DC
GOLD BOX

SHIPPED IN 3 DAYS

U.L. RECOGNIZED



Models in case size YA have output voltage adjustment on rear panel.

Low-cost DC power suitable for driving loads such as lamps, relays, and small motors is provided by Series U unregulated power supplies. All components are generously derated, insuring a long and trouble-free life; built-in fusing prevents damage due to prolonged overloading or short circuits. Mechanically similar to the regulated supplies shown on pages 8 and 9, they are housed in extruded aluminum cases which can be mounted in any position. Many models are U.L. Recognized.

STANDARD FEATURES

- Capacitive filtering
- Fused input
- May be used in series or parallel
- No derating or heat sinking required
- Completely serviceable

SPECIFICATIONS

Input Voltage: 0-125 VAC, 50-400 Hz, single phase.

Output Voltage:
Output Current: } See table
Ripple:

Output Voltage Adjustment: Adjustable voltage models are provided with a built-in continuously adjustable autotransformer.

Load Regulation: The nominal output voltages of fixed output models, and the maximum rated output voltages for models with adjustable outputs, are based on 115 VAC input with approximately one-half load. At no load, they will increase by approximately 10%. At full load, they will be reduced by approximately 10%.

Line Regulation: Output voltage change due to line change directly proportional to input change.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 volts above ground.

Ambient Operating Temperature: −10 to +65°C. No derating required.

Storage Temperature: −55 to +85°C.

Optional 230 Volt Input
Provision for inputs of 0-250 VAC, 50-400 Hz, replacing the standard of 0-125 VAC input voltage range, is available on most models. Contact factory for information.

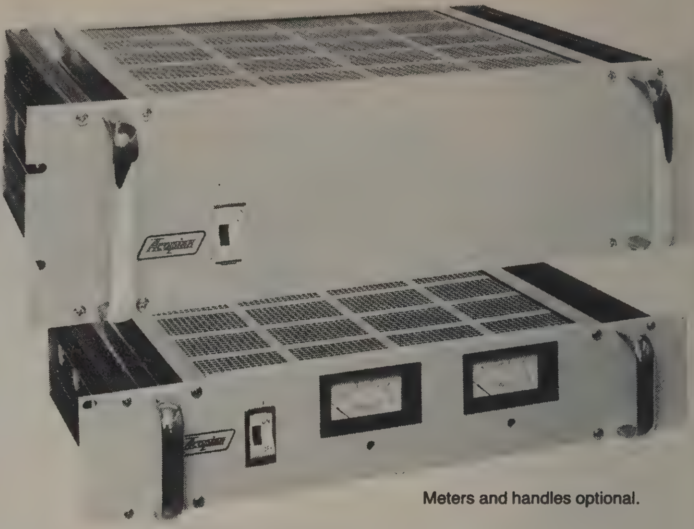
RACK MOUNTING

SINGLE & DUAL OUTPUT LINEAR REGULATED AC-DC

SHIPPED IN 9 DAYS

ALL MODELS U.L. RECOGNIZED



Meters and handles optional.

Acopian rack-mounting power supplies feature excellent regulation and ripple specifications in 101 models with outputs up to 150 volts and 60 amps. Metering and overvoltage protection are available as options. These power supplies are constructed in sturdy extruded aluminum assemblies designed expressly for mounting in standard 19″ wide RETMA cabinet racks. The front panels are finished in light gray enamel.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Specifications: See tables.

Remote Voltage Sensing: Provision for sensing the output voltage across the load is a standard feature.

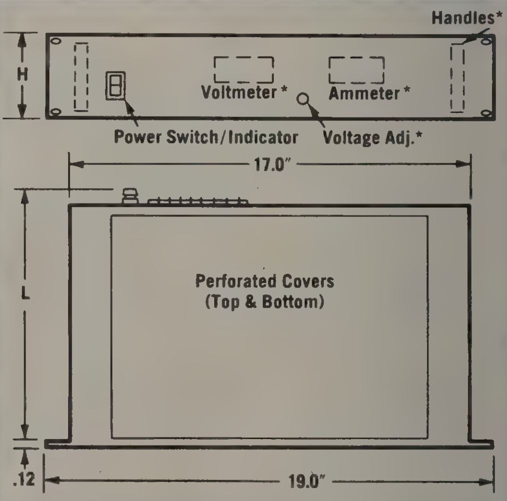
Polarity:
Single Output Models: Output is floating; either positive or negative terminal may be grounded or floated up to 300 volts above ground.
Dual Output Models: Positive output, common, negative output.

Temperature Coefficient:
Single Output Models: 0.015%/°C (Typical).
Dual Output Models: 0.02%/°C (Typical).

Ambient Operating Temperature:
Single Output Models: −20 to +55°C.
Dual Output Models: −10 to +55°C.

Storage Temperature: −55 to +85°C.

Overload/Short Circuit Protection: Foldback current limiting with automatic recovery.



*Optional (Option positions shown are for single output models.)

OPTIONS

EXAMPLE: The Model 5PT20 equipped with all options is designated as the Model V5PT20AFHP-230. (List suffix letters in alphabetical sequence.)

Overvoltage Protection: An internally installed and preset overvoltage protector is available for models with outputs of 3 volts and higher. On dual output models, if either output falls, both outputs are "crowbarred." To order, add prefix "V" to the model number and increase price as follows:

Outputs of	3-70V	Over 70V
Case size 3P11	$25.00	$35.00
Other case sizes	75.00	85.00

Metering (Single Output Models):

Ammeter: Add suffix "A" to model number and $35.00 to price.

Voltmeter: Add suffix "F" to model number and $35.00 to price.

Metering (Dual Output Models):

Ammeters: One for each output. Add suffix "A" to model number and $70.00 to price. "A" and "F" options cannot be combined in one power supply.

Voltmeters: One for each output. Add suffix "F" to model number and $70.00 to price. "A" and "F" options cannot be combined in one power supply.

Voltmeter and Ammeter: Each with switch for selecting output to be monitored. Add suffix "G" to model number and $120.00 to price.

Handles: Add suffix "H" to model number and $25.00 to price.

Front Panel Voltage Adjustment: Standard models have a voltage adjustment located at the rear. A voltage control mounted on the front panel is available as an option. To order, add suffix "P" to the model number and $10.00 to price.

230 Volt Input: For operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "–230" to model number and $40.00 to price.

Acopian

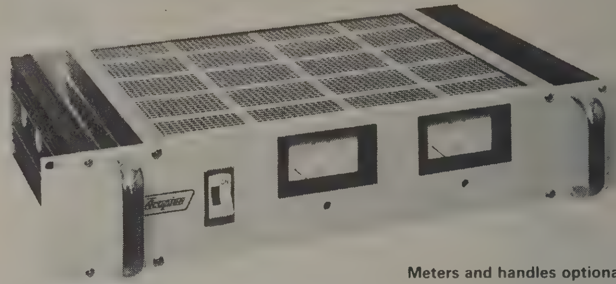
RACK MOUNTING

WIDE OUTPUT ADJUSTMENT
FIXED & ADJUSTABLE CURRENT LIMITING
LINEAR REGULATED
AC-DC

SHIPPED IN 9 DAYS

ALL MODELS U.L. RECOGNIZED

Similar to the rack mounting power supplies listed on pages 22 and 23, but with broadened output voltage ranges. All models may be programmed through their voltage ranges by means of external resistance. Models with adjustable current limiting have a constant-voltage/constant-current crossover characteristic, and so may be used as constant current sources.



Meters and handles optional.

Output Voltage Range	Output Current Amps. at			Voltage Prgmg. Coeff. (Ω/V)	Size	Voltage Programmable Fixed Current Limiting		Voltage Programmable Adjustable Current Limiting	
	40°C	55°C	71°C			Model	Price	Model	Price
0-6	10.0	8.0	6.0	820	3P11	A06PX10	$520	P06PX10	$560

0-50	2.4	1.9	1.5	1000	3P11	A050PX2	520	P050PX2	560
0-50	3.0	2.4	1.8	1000	5P12	A050PX3	640	P050PX3	680

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Regulation, Ripple (constant voltage operation):
Line Regulation: ±0.005% or 2 mV, whichever is greater.
Load Regulation: ±0.005% or 2 mV, whichever is greater.
Ripple: 0.25 mV rms.

Regulation, Ripple (constant current operation):
Line Regulation: ±0.1% or 2 mA.
Load Regulation: ±0.2% or 5 mA.
Ripple: 0.1% rms.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, to compensate voltage drops in output wiring, is a standard feature.

Remote Voltage Programming: The output voltage of all models may be controlled by means of external resistance connected in series with the −S lead.

Voltage Programming Coefficient: See table. Calibration tolerance, ±2%.

Current Limiting/Programming: Models with fixed current limiting have a rolloff characteristic with automatic recovery. All others have current limiting with a constant-voltage/constant-current crossover characteristic.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 volts above ground.

Controls: Coarse and fine voltage adjustments, and the current limit adjustment, are located at the rear of the assembly.

Temperature Coefficient: 0.02%/°C (Typical).

Ambient Operating Temperature: −20 to +71°C.

Storage Temperature: −55 to +85°C.

Input/Output Connections: Barrier strip terminals at the rear (#6 screws for case size 3P11, #8 screws for case size 5P12).

OPTIONS

Overvoltage Protection: An internally installed and preset over-voltage protector is available for all models. To order, add the prefix "V" to the model number and $25.00 to the price.

Remote Current Limit Adjustment: All models having numbers beginning with the letter P have a built in current limit control. Provision for control of the current limit setting by adjustment of an external resistance is available as an option. To order, add the prefix letter "E" to the model number, and add $20.00 to the standard price.

The current limit setting is inversely related to resistance. Use a 200 ohm ½W potentiometer.

Ammeter: Add suffix "A" to model number and $35.00 to price.

Voltmeter: Add suffix "F" to model number and $35.00 to price.

Handles: Add suffix "H" to model number and $25.00 to price.

Front Panel Controls: For voltage controls (coarse and fine) mounted on the front panel, instead of the standard screwdriver-slot adjustments at the rear, add suffix "P" to the model number and $20.00 to price. For a current limit control mounted on the front panel, add suffix "Y" to the model number and $10.00 to price.

230 Volt Input: For operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "−230" to model number and $40.00 to price.

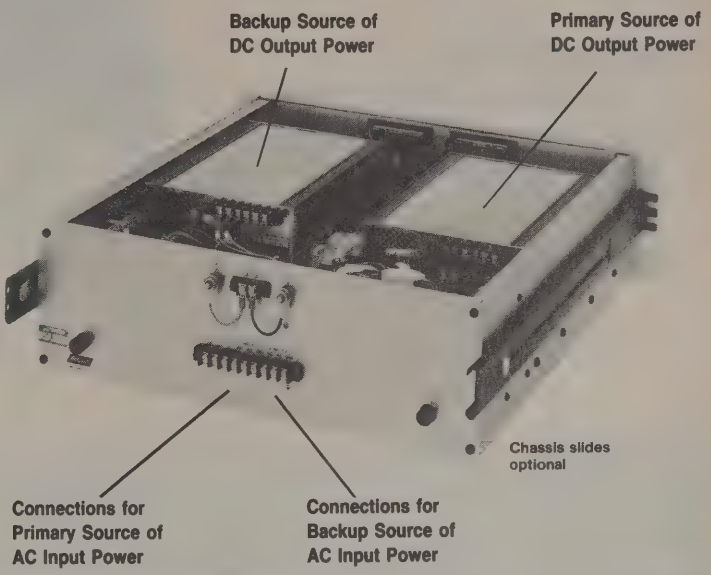
Acopian

REDUNDANT POWER SYSTEMS

LINEAR & SWITCHING

SHIPPED IN 9 DAYS

Use an Acopian Redundant Power System to assure that your load will receive continuous power even if one source of ac input power is interrupted, or if one power module of the redundant pair is either not delivering the correct output voltage or has been removed for calibration, preventative maintenance or repair.



Backup Source of DC Output Power
Primary Source of DC Output Power
Chassis slides optional
Connections for Primary Source of AC Input Power
Connections for Backup Source of AC Input Power

STANDARD FEATURES

- Separate ac input power circuit for each power module, permitting the use of two independent sources of input power for input redundancy.
- Specifically designed to safely permit the rapid changing of a power module while the system continues to furnish uninterrupted power to the load.
- Provision for control of external failure alarms or indicators (standard), or built-in audible alarms (optional).
- Foldback current limiting with automatic recovery.
- Overvoltage protection.

Redundant power systems should be considered for any equipment where the highest attainable reliability is essential, and an unexpected loss of power would be disastrous. Such applications include communications systems (both voice and data types), computer systems (volatile memory systems in particular), process controls, utility and municipal systems, and security/safety alarm systems.

Output Redundancy:
The system contains two identical power modules with their outputs interconnected through a diode switching arrangement that senses an abnormal output, isolates it from the load being driven, and passes only the output of the other module with no interruption of output power during the transition.

Input Redundancy:
All Acopian redundant power systems may be operated with only one ac power source. However, two isolated sets of ac input connections are provided, so that two independant sources of input power may be used, to obtain the additional protection of input redundancy. A battery-backup power source (UPS) and/or a second power line from the power utility can be used to maintain output power without interruption when your primary source of ac power fails.

Operation:
Each system consists of the two power modules installed in a rack-mountable assembly. The assembly contains two voltage monitoring circuits with relays, the contacts of which are available to control external failure alarms or other circuitry. The contact wiring of the two relays is connected in cascade, to simulate a single set of Form C contacts which switches if the output voltage of either power module decreases by more than 2.0 volts (3.0 volts for outputs over 48 volts) from the nominal rating.

The output voltage of the primary module is set approximately 0.2 volt higher than that of the backup module. Under this condition, the backup module's diode is not forward biased; only the primary module delivers current to the load. If the output voltage of the primary module decreases by more than 0.2 volt, the situation is reversed and only the backup module delivers load current. There is no interruption of output power during the transition.

Each power module contains an overvoltage protection circuit, to assure that the output will not significantly exceed the nominal output voltage rating under any condition, including incorrect application and misadjustment.

Serviceability:
Thumbscrew mounting, and insulated connectors in the wiring to each power module, facilitate the rapid and safe installation or removal of a module from the system without the need for tools. All input, output and alarm-contact connections are at the rear of the assembly. The chassis slide and handle options are recommended for applications where it is desired to service the system without removing it from the rack.

Acopian

REDUNDANT POWER SYSTEMS

CONTAINING TWO LINEAR REGULATED POWER SUPPLIES AC-DC

SHIPPED IN 9 DAYS

Ammeters, handles and audible alarms optional.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase. A separate set of ac input terminals is provided for each power supply, so that if two sources of ac input power are available, one may be used for each supply and so reduce the possibility of output dropout due to loss of input power.

Output Voltage:
Normal mode—Nominal voltage shown in table.
Backup mode—0.2 volt less than nominal voltage shown in table.

Output Regulation:
Line—±0.05%.
Load—±0.05% (Dynamic regulation—does not include 0.2 volt shift which occurs during switching to lower-set backup supply.)

Output Ripple: 1 mV rms.

Load Protection: Overvoltage protection.

Overload/Short Circuit Protection: Foldback current limiting with automatic recovery.

Polarity: Output is floating; either positive or negative output terminal may be grounded or floated up to 300 volts above ground.

Voltage Monitor Circuits: One for each power supply. Relay contacts switch when output voltage decreases approximately 2 volts from the nominal rating (approximately 3 volts for outputs over 48 volts), and may be used to control an external failure alarm.

Output Metering: Two voltmeters (standard). Ammeters available; see Options.

Temperature Coefficient: 0.02%/°C (Typical).

Ambient Operating Temperature: −20 to +71°C.

Storage Temperature: −55 to +85°C.

Assembly Size:

3R14	3½" x 19" panel, 14⅛" deep. (15 lbs.)
5R14	5¼" x 19" panel, 14⅛" deep. (23 lbs.)
5R17	5¼" x 19" panel, 17" deep. (53 lbs.)
5R18	5¼" x 19" panel, 17¾" deep. (29 lbs.)
7R18	7" x 19" panel, 18½" deep. (50 lbs.)
7R20	7" x 19" panel, 20½" deep. (64 lbs.)

Front Panel Finish: Light gray baked enamel.

OPTIONS

Add option suffixes in alphabetical order. Example: R5H16AH-230.

Ammeters: One for each output. For models in case size 3R14, two volt/ammeters, each with switch, are substituted for the standard voltmeters. Add suffix letter "A" to model number and $70.00 to system prices, $35.00 to unit prices of parallelable supplies.

Audible Alarms: Piercing whistle alerts personnel to a voltage lower than normal. Front panel mounted, one for each power supply. Systems and supplies with this option do not have provision for control of an external alarm. To order, add suffix "K" to model number and $70.00 to system prices, $35.00 to unit prices of parallelable supplies.

Handles: Add suffix "H" to model number and $25.00 to price.

Slides: For racks having rear mounting rails spaced 20" to 22" behind the front panel. Not available on parallelable supplies. To order, add suffix "S" to model number and $75.00 to price.

230 Volt Input: For operation on inputs of 210-250 Vac, 50-400 Hz. To order, add suffix "−230" to model number and $75.00 to system prices, $40.00 to unit prices of parallelable supplies.

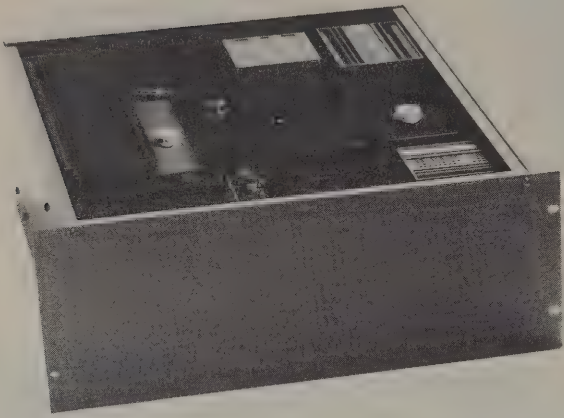
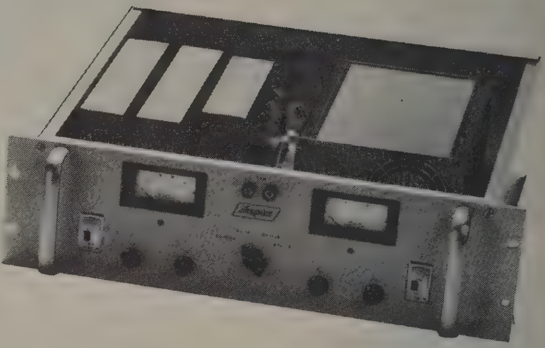
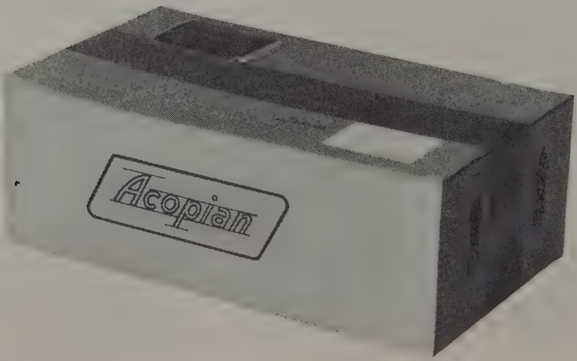
WIRED RACK-MOUNTABLE ASSEMBLIES





CONTAINING ANY POWER MODULES YOU NEED

SHIPPED TO YOU IN JUST 9 DAYS.



How TO ORDER an Acopian Rack Mountable Assembly

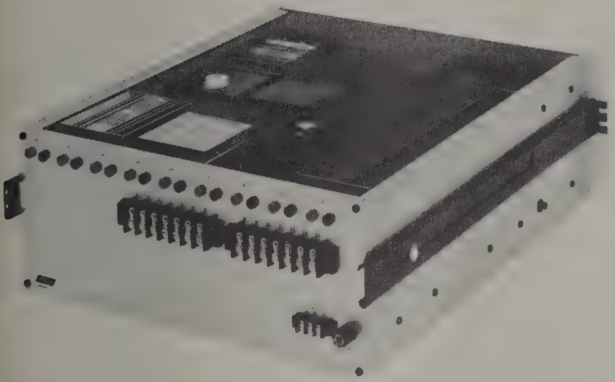
List the DC output ratings you require. Or, select the power modules that you wish to be included. Any module in this catalog can be used.

Also list any assembly features you would like to be included — output controls, meters, test points, switches, handles, chassis slides, etc.

Determine if any size restrictions (assembly height or depth) would be necessary.

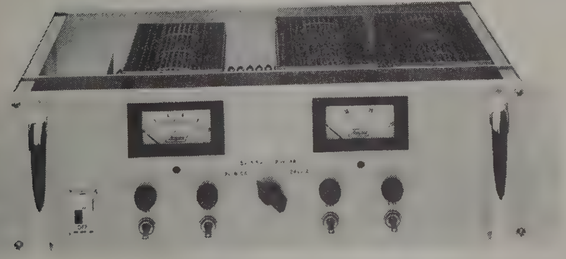
Call Acopian and ask for Department RM5. We will quote a firm price, assign a special model number and ship in only 9 DAYS after your order is received.

Shown are just a few examples of the unlimited variety of assemblies that Acopian can build and ship in 9 DAYS.

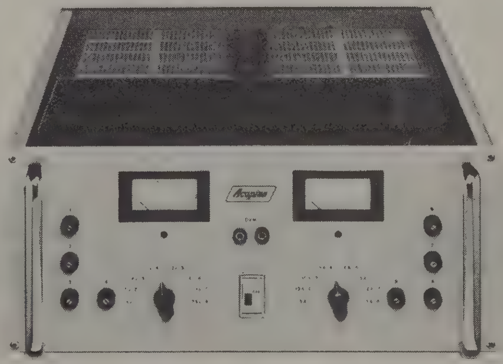


Test points for all outputs, in addition to screw terminals for all input and output connections, are on the rear panel of this 7″ high assembly. Chassis slides permit easy access.

This Acopian power supply assembly, only 3½″ high, furnishes seven regulated DC outputs. Selector switches permit monitoring of the current and voltage of each output.



Four outputs, each separately switched, are provided by this 5¼″ high assembly. The voltmeter and ammeter may be switched to monitor any output.



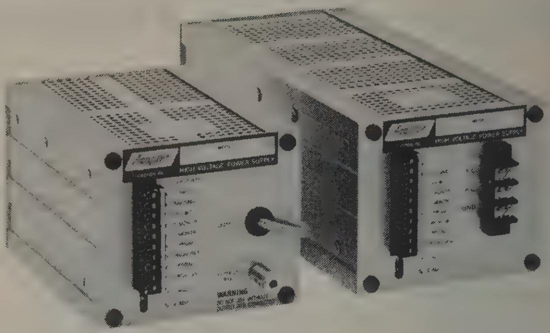
Front panel adjustments, each with a shaft lock to prevent accidental changes, permit easy calibration of the eight outputs provided by this 7″ high assembly.

Acopian

HIGH VOLTAGE

0 TO 30,000 VOLTS
AC-DC & DC-DC

SHIPPED IN 9 DAYS



These modular high voltage supplies may be used as constant voltage or constant current sources. They may be remotely programmed by means of either voltage or resistance, and have provisions for remote monitoring and output inhibiting. All control and monitoring connections are on a pluggable terminal block that functions as a connector, providing wiring convenience and permitting easy and rapid connect/disconnect. Outputs are arc/short circuit protected.

GENERAL SPECIFICATIONS

Output Polarity: Positive output is standard. For negative output, change first letter of model number from P to N.

Regulation (constant voltage operation):
Line: ±0.05%
Load: ±0.05%

Regulation (constant current operation):
Line: ±0.1%
Load: ±0.1% plus 50 μA.

Ripple: 0.05%, peak-to-peak.

Output Controls: Voltage and current may be controlled by means of two 20-turn front panel adjustments, or by using remotely located 1000 ohm potentiometers.

Output Programming: Output voltage and current may be programmed from 0 to full rating by means of control voltage inputs of 0 to +5.1 Vdc.

Voltage Monitor Terminal: Permits monitoring output voltage, stepped down by ratio shown. Accuracy is 2% of maximum rated output voltage.

Current Monitor Terminal: Permits monitoring output current at mV/mA ratio shown. Accuracy is 2% of maximum rated output current.

AC INPUT MODELS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Connections: 24″ flying lead for high side of output and 5-way binding post for return (ground) are at the rear. AC input connections on separate terminal strip. All other connections on pluggable terminal block.

Optional 230 Volt Input: For operation on inputs of 210-250 VAC, 50-400 Hz, single phase. To order, add suffix "–230" to model number and $40.00 to price.

Inhibit Terminal: Grounding inhibits output.

Input Protection: "Soft start" circuit minimizes startup power stresses.

Output Protection: Current regulation circuit protects power supply from short circuits, overload, and arcing.

Efficiency: Greater than 70% at full load.

Response Time: Less than 5 mS for 100 μA load step change.

Stability: 0.05% over eight hours, after 30 minute warmup.

Temperature Coefficient: 200 PPM/°C = 0.02%/°C (Typical).

Ambient Operating Temperature: –10 to +60°C. No derating required.

Storage Temperature: –20 to +85°C.

Humidity: Maximum of 90% relative, non-condensing.

Optional Output Connector: Models with an output of 5000 volts or less can be provided with an MHV connector (and 8′ long detachable output cable with mating MHV connector installed) instead of the flying lead. To order, add suffix letter T to the model number and $50.00 to price.

DC INPUT MODELS

Input Voltage: +21.6 to 32.0 Vdc.

Connections: 24″ flying lead for high side of output and 5-way binding post for return (ground). All other connections on pluggable terminal block.

TO 30,000 VOLTS

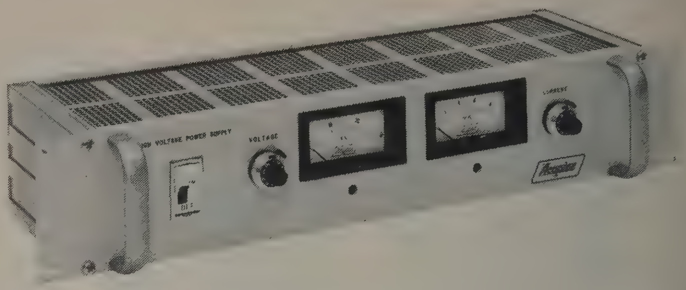
HIGH VOLTAGE

0 TO 30,000 VOLTS
AC-DC & DC-DC

SHIPPED IN 9 DAYS



Ideal for laboratory and instrumentation applications, these rack mounting supplies have the same output ratings and specifications as the modular supplies shown on pages 30 and 31, but additionally feature calibrated ten-turn controls (with locking vernier dials) for precisely setting voltage and current. Voltmeter and ammeter are standard. An 8′ long shielded output cable is included.

GENERAL SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Input Current:
- 30 watt output ratings: 0.6A
- 60 watt output ratings: 1.2A

Output Polarity: Positive output is standard. For negative output, change first letter of model number from P to N.

Regulation (constant voltage operation):
- **Line:** ±0.05%
- **Load:** ±0.05%

Regulation (constant current operation):
- **Line:** ±0.1%
- **Load:** ±0.1% plus 50 µA.

Ripple: 0.05%, peak-to-peak.

Output Controls: Voltage and current may be controlled by means of two 10-turn front panel adjustments with locking vernier dials. Control linearity is 1% of full rated output. Calibration accuracy is 1% of rated output plus 1% of setting. (Remotely located 1000 ohm potentiometers may alternately be used for output control.)

Output Programming: Output voltage and current may be programmed from 0 to full rating by means of control voltage inputs of 0 to +5.1 Vdc, ±2%.

Metering: Voltmeter and ammeter are standard. Accuracy is 2% of full scale.

Voltage Monitor Terminal: Permits remote monitoring of output voltage, stepped down by ratio shown. Accuracy is 2% of maximum rated output voltage.

Current Monitor Terminal: Permits remote monitoring of output current, at mV/mA ratio shown. Accuracy is 2% of maximum rated output current.

Inhibit Terminal: Grounding inhibits output.

Output Protection: Current regulation circuit protects power supply from short circuits, overload, and arcing.

Response Time: Less than 5 mS for 100 µA load step change.

Stability: 0.05% over eight hours, after 30 minute warmup.

Temperature Coefficient: 0.02%/°C (Typical).

Ambient Operating Temperature: −10 to +60°C. No derating required.

Storage Temperature: −20 to +85°C.

Humidity: Maximum of 90% relative, non-condensing.

Connections:

Input, Control and Monitoring: Screw terminals.

Output: High voltage connector (Type varies with model number). An 8′ shielded output cable, with mating connector installed, is provided.

Optional 230 Volt Input: For operation on inputs of 210-250 VAC, 50-400 Hz, single phase. To order, add suffix "-230" to model number and $40.00 to price.

Output Range kVdc	Output Current mA	Output Monitor Ratio		Price	Model (Positive Output)

NOTES:

1. Consult factory for specific model number according to output voltages selected.
2. Total Power with 300 LF/M Air. Derate 20% for convection cooling.

Specifications:

AC Input Range:
90-132 or 180-264VAC 47-440Hz Single Phase.

Inrush Current:
Less than 50A peak thermistor limited for units that have been off for at least 30 minutes.

Undervoltage Protection:
Protected against malfunction due to AC undervoltage operation.

Efficiency:
Typically 75% at nominal line, full load.

Turn-On Time:
400 mS Max.

Hold-Up Time:
20 mS. Typical at nominal line, full load.

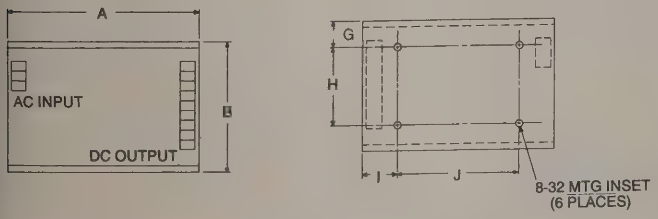
DC Outputs:
All outputs are adjustable, ±5% min. Output 2 is floating.

Output Regulation:
Line ±0.2% over input range, 90-132 or 180-264VAC. at 100% rated load.
Load ±0.5% all outputs

Cross regulation:
Each output independently regulated and effects do not apply.

Dynamic Response:
All outputs will settle to 1% of output within 400µs after a 25% load step change and will deviate no more than ±2%.

Outline Mounting/Interface



Thermal Regulation: ±0.2%/°C

Ripple and Noise:
True differential measurement with a 20MHz scope and a ×1 probe 1% or 100mV peak to peak, whichever is greater.

Overvoltage protection:
Standard. Preset at 6.0—6.5V on 5V main output.
Consult factory for other voltages.

Overload Short Circuit Protection:
CS2401 Output 1, CS2404 Outputs 1 & 2, CS2505 Outputs 1,2, & 3 will shut down power supply in short circuit condition. CS2404 Outputs 3 & 4, CS2405 outputs 4 & 5 will go into current fold back under short circuit condition.

Remote Sense:
On Output 1 - compensates for up to 0.5V lead drop.

Operating Temperature Range:
0—50°C ambient with min. of 300LFM of air directed through power supply lengthwise. Derate linearly to 50% at 70°C
Derate 20% for convection cooling.

Power Fail:
A TTL compatible signal flag raises a minimum of 5mS prior to outputs dropping out of regulation; adjustable to 10mS. minimum at full load, nom. line. TTL low or high is selectable on P.C. board, consult factory.

Standard Chassis Dimensions (Inches)

Model	A	B	C	D	E	F	G	H	I	J

ADTECH POWER

Adtech Power Incorporated
2220 S. Dupont Drive, Anaheim, CA 92806 Tele: (714) 634-9211 FAX (714) 634-0802

LL-SERIES SPECIFICATIONS

AC INPUTS: 90-132/180-264 VAC, user selectable, 47-63 Hz single phase (LL40 has continuous range of 90-264 VAC, 47-63 Hz.)

DC OUTPUTS: See output rating table.

HOLDUP TIME: 20 mS minimum at full load and nominal line input voltage.

OUTPUT REGULATION:
Fully regulated output: ±0.5%
Dual sensed regulated output: ±1.5%
Semi-regulated output: ±4%
Cross regulation factor of ±3% must be added to semi-regulated output where the main output +5V varies ±25%.

MINIMUM LOAD: A minimum load of 10% is required on the main +5V output to maintain proper operation of the other outputs.

OUTPUT NOISE AND RIPPLE: 1% or 100 mV peak to peak maximum (whichever is greater) on all outputs.

TRANSIENT RESPONSE: Main +5V output only. Output return to within 1% in less than 1 millisecond for a 50% load change. Maximum voltage deviation is ±5%.

TEMPERATURE COEFFICIENT: 0.03%/°C for all outputs.

TEMPERATURE RATING: 0 to 50°C at full rated output power, with natural convection cooling in a non-restricted environment. For operation in a restrained space, moving air is recommended. For operation above 50°C, it is important to maintain the heatsinks below 100°C.

SAFETY SPECIFICATIONS: All models are designed to meet the specifications of IEC 601, VDE 0750, UL 544, CSA 22.2 No. 234.

SAFETY LEAKAGE CURRENT: 30 µA maximum.

OVERVOLTAGE PROTECTION: Built-in on +5V output, with crowbar set at 6.2V ± 0.6 VDC.

VOLTAGE ADJUSTMENT: Built-in potentiometer adjusts voltage from 4.5V to overvoltage crowbar point (6.2V nominal.)

EFFICIENCY: 70%±5% depending on model and load distribution. Measured at full load and nominal line.

PEAK POWER LIMIT: Factory set to begin peak power limit under nominal line conditions as following:

LL040: fixed at 45 watts
LL080: 90 watts
LL120: 130 watts

OVERLOAD PROTECTION: Fully protected against output overload and short circuit. Automatic recovery after removal of fault.

REVERSE VOLTAGE PROTECTION: All outputs are protected against inappropriate application of reverse voltage.

OVERSHOOT: No output overshoot during turn on and turn off.

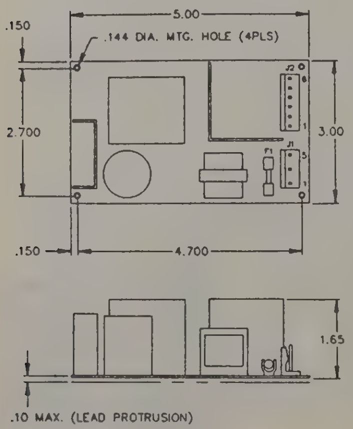
INPUT PROTECTION: Internal AC fuse is provided on all units.

INRUSH CURRENT: Inrush current is limited by an internal thermistor for maximum protection of input Caps and Rectifiers.

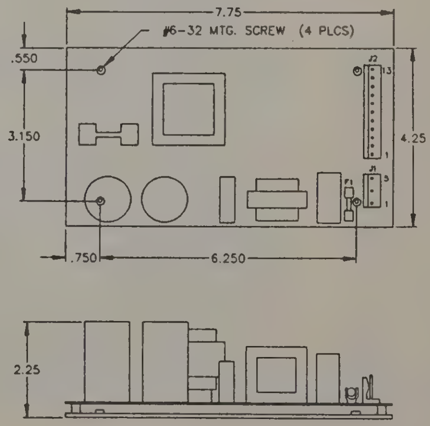
EMI SPECIFICATIONS: All models are designed to meet the conducted emission requirements of FCC and VDE 0871 Class B.

RELIABILITY: 200,000 hours minimum calculated per MIL-HDBK-217E.

LL040 (WT. 0.665 LB.)



LL080 (WT. 1.5 LB.)



LL120 (WT. 2.1 LB.)

2220 S. Dupont Drive, Anaheim, CA 92806 Tele: (714) 634-9211 FAX (714) 634-0802

FOR MEDICAL APPLICATIONS

New Low Leakage Current Switching Power Supplies

LL-Series Features:

- 3 sizes, 3 power levels, 40 to 120 watts
- Multi-output configurations (up to 5 outputs)
- Designed to meet IEC 601, VDE 0750, UL 544 and CSA 22.2 No. 234 Level 3 medical specifications
- Less than 30 µA leakage current
- Meets stringent FCC and VDE 0871 Class B EMI
- Power Fail/Power Good available on 120 watts units
- Worldwide AC input ranges 90-132/180-264 VAC, 47-440 Hz
- Enclosures available on all models
- Easily modifiable for all custom applications
- Adtech SPC program standard on all units
- 24 hour full load burn-in and 2-year warranty
- Industrial standard packages

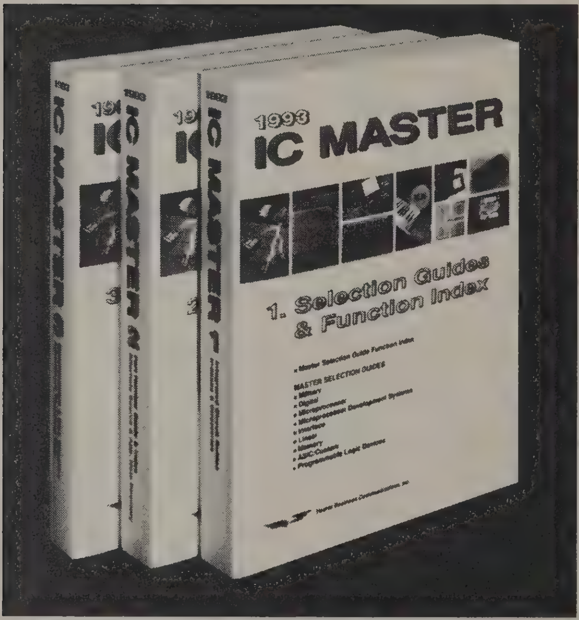
SUPER
TIME
SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your job has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516)227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, FAX Marie at (516)-227-1901. She'll FAX the IC Master subscription form back to you right away.

And, if you tell her you saw it in the 1993/94 EEM, she'll take $10 off the subscription price!

Eout Nom. kV	Iout Max. mA	Model No.	Features, Specifications and Options
200V	15.0	DRF 325	Miniature, fully regulated DC to DC converter with 0.05% line and regulation. Has remote programming capability. 3 watts output. Shielded, RFI decoupled. **Input:** 12, 15, 24, 28 VDC. **Output Adjustment Range:** –30% to +10%, standard (wider: option –04). **Ripple:** 0.1% P-P. **TC:** 100 ppm. **Operating Temperature:** –10°C to +65°C. **Dimensions:** 3.0" x 1.5" x 0.6" (Flange length is 3.625".) **Weight:** 4 oz.
400V	7.5	DRF 335	
600V	5.0	DRF 345	
800V	3.7	DRF 355

1.5	2.0	DRF 375	
2.0	1.5	DRF 385	
3.0	1.0	DRF 405	
200V	30.0	ARM 016	Line operated, 6 watt supply for photomultiplier and similar applications. Units are shielded, serviceable, short circuit proof and light weight. Input and output are RFI decoupled. Standard adjustment range is –30% to +10%. Remote program is standard. **Input:** 117 VAC, 50 to 400 Hz, 28 VDC. **Regulation (L/L):** 0.02%, (better with less than 0 to full load changes). **Ripple and Noise:** 0.02%. **Operating Temperature:** –10°C to +65°C. **Size:** 3.04" x 2.60" x 4.23". **Weight:** 32 oz. **Options:** Negative output (–01), wide adjustment range (–04).
400V	15.0	ARM 026

22	0.7	ARA 196	
±15V	500.0	DUM 1263	Fully regulated High Voltage Module, 15 or 30 watts output. Output adjustment +10%, –30%. Short-circuit proof. HV return may be floated to 500 volts from chassis. Magnetically shielded. Serviceable. **Input:** 12, 15, 24, 28 VDC. **Regulation (L/L):** 0.1%. **Ripple:** 0.1% P-P. **TC:** 100 ppm. **Operating Temperature:** –20°C to +65°C. **Size:** 3.0 x 2.6 x 4.3 (to 5 KV), 3.04 x 3.54 x 4.84 (over 5KV). **Options:** Negative output (–01), wider adjustment range (–04), remote program (–05), 30 watts output power (–19). Units also available with other voltages from 2.2 volts (filament supplies) to 24 KV. Other options. Also available with floating output: DUM series.

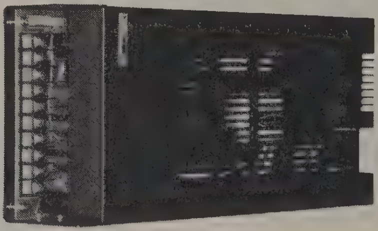
10 To 200 Watt Universal Auto input Range VI Series Switching D.C. Power Supplies



Features:

- Automatically Accommodates Universal AC Sources.
- Designed and Tested to Worldwide EMI/RFI Regulations. Meets VDE and FCC Level "B" Emissions.
- Compact Size. • Overload Protection.
- Overvoltage Protection. • Many Options Available.
- Calculated MTBF Greater Than 100K Hours.
- UL Recognized, CSA Certified, TUV Licensed.

Advanced Power Solutions (APS), a division of M&L Enterprises Inc. both American owned and operated companies. was founded with the goal of providing quality power products at the best possible price. With U.S. and Canadian design teams, mature products are transferred to APS selected sites in Taiwan or Hong Kong for high volume production. The far east facilities are ***BABT APPROVE*** facilities and specialize in the manufacture of distant product families.Total manufacturing area in these 4 facilities is 700,000 square feet. ***Products Offered***-APS offers a wide variety of products. The standard products include Desk top & Wall mount power supplys, Universal AC input Desk Top and Open frame switchers in the Power range of 15 watts to 300 watts. AC input Open frame switchers in power ranges of 10 watts to 1,000 watts. Eurocard & Vme power supplies with Universal AC input and Dc input available. 19" rack supplies are available in "Hot plug in" redundant style or non-redundant style. New for 1993 is the APS "KAM" series, which is a potted Universal AC input module that is PCB mountable. The power range offered is 5W to 60W per module.

Parameter	*Conditions*	*Limits*
AC Input	No load to full load Auto input range without any external changes	90-264 VAC (115 or 230 VAC nominal)
AC Input Frequency	No load to full load	47-63 Hz (Consult factory for 440 Hz operation)
Input Surge Current	Peak (cold start)	20A(115VAC 40A(230VAC)
DC Output		See Voltage/Current Rating Charts
DC Output Adjustment	Main output	+5V(4.5 to ovp trip point)
Centering (initial setting on auxiliary outputs.)	All outputs 50% max rated load. +5V adjusted to 5.0V	+/-5% typical +/-2% (optional)
Hold-up Time	Nominal input voltage and max output power	20msec.
Line Regulation	Within specified AC limits	+/-5% typical
Load Regulation	20% to 100% load change	+/-1.0% main output +/-3.0% for auxiliary output w/o post regulator +/-1.0% for auxiliary output w/post regulator
Cross Regulation	Main output: Change any other output from 50% to 100% max rated load. Aux output: Change +5V output from 50% to 100% max rated load. Change another aux output from 20% to 100% max rated load.	+/-1% max +/-3.5% max +/-1% with post regulator +/-1%
Ripple and Noise	Max load.	50mV Pk-Pk max 5V output(1% max any other output)
Transient Response	50% load change	2% max deviation, returns to initial condition in 1 msec max
Temperature Coefficients of outputs	Main output Auxiliaries	0.02%/°C typical 0.02%/°C typical
Long Term Stability	For 8 hours, after 20 min warm-up.	0.1%
Overshoot	On turn-on, turn-off, or power failure.	No voltage spikes
Ambient Operating Temperature	Continuous duty, full rating Derate linearly to 50% of full rating at + 71°C With 12cfm fan cooling	0° to 50°C 50° to 71°C 0° to 70°C
Storage Temperature	Non operating	-20°C to +80°C
Overvoltage	+5V output only	+6.2V +/-0.4V
Short Circuit Protection	Will withstand a continous short without damage. Will automatically return to regulation upon removal of the short	
Overload Protection	Maximum rated current cannot be drawn from all output at the same time. The overload feature will reduce all output voltages to a safe dissipation level when the total output power exceed 125% of the maximum rated power.	
No Load Operation	No damage to power supply will occur when operating at no load.

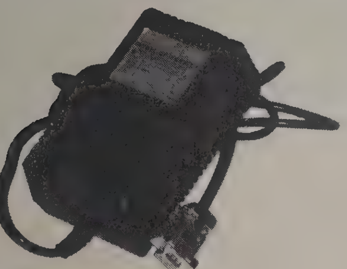
AC DC External Regulated Switching Power Supply



20,40 & 60 Watts Desktop Universal Input APS20-ES, APS40-ES & APS60-ES Series Adapter

Features:

- **Automatically Accommodates Universal ASource**
- **Desktop With IEC 320 Input Connector**
- **Universal Safety Standards**
- **EMI/RFI Meets VDE and FCC Part 15 Level B.**
- **Overvoltage and Overload Protection**

IEC950

FCC IEC380

Specifications

Inputs:

Input Voltage: Typical : 90-260 VAC. Also available:85-265VAC.
Input Frequency: 47-440Hz
Inrush Current: 20A for APS20 & AP40; 25A for APS60
Dielectric Withstand: Meet VDE 0806 for 1 minute 3,750VAC-Output/Input; 1,500VAC-Input/Safety GND; 500VAC-Output SAfety GND
EMI/RFI: Meet VDE 0871-B & FCC Part 15 class B.
Operating Temperature: 0-40°C
Storage Temperature:-20 to+85°C
Cooling: Convention
Efficiency: 65-75%
Hold-Up Time: 20ms at 120VAC. Full load.
Switching Frequency: Approximate 25KHZ. at full load and 90VAC input, higher at increasing input voltage or light load.
Transient Response: Output voltage returns in less than 3ms following a 50% load change.
Case: Impact resistant mold thermoplastic, flame rating 94V-1 for UL, 94V-0 for CSA.
MTBF: Great than 50K hours at typical load at 25°C ambient temperature calculated according to MIL-HDBK-217E..
Temperature Coefficient: 0.04% per degree C on main output.

Outputs:

Output Voltages: See rating charts.
Output Currents: See rating charts.
Load & Cross Regulations:

	Load Regulation	Cross Regulation
At PSU PCB Outputs:		
Main VO1	2.0%	0.2%
AUX. VO2	5.0%	5.0%
AUX. VO3	1.5%	1.5%
At PSU cord connector end:		
Main VO1	5.0%	2.0%
AUX. VO2	5.0%	5.0%
AUX. VO3	1.5%	1.0%

Remark: The exact voltage regulation obtainable depends upon the output cord & connector selected and load current. Upper are for 6 ft.(or 2 meters) cord AWG#18/20 wires with PD-5 connector.

Noise & Ripple: Typical 1% peak to peak.
Over Voltage Protection (OVP): 124% ±8% on main output.
Adjustability: Main output internal adjustable from 4.5V till OVP trip point.
Overload Protection: Max. Current cannot be draw from all out puts simultaneously. The over current protection feature will reduce all output voltage to safe dissipation level when the average power rating exceeds 125%-150% of max. power. The overload feature will also protect against short circuit.

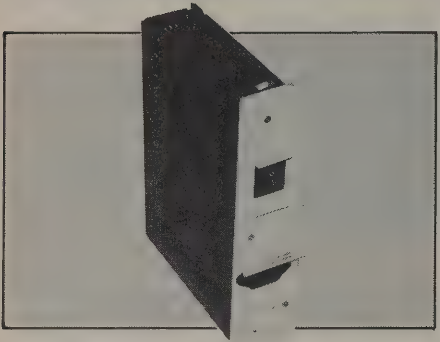
360 WATTS Double Eurocard Power Supply for VMEbus System Model APS360SU AC-DC Switching Power Supply



Features:

- **Incorporates the Latest 100KHZ. Mosfet Switching Power Supply Technology.**
- **Triple Output with Individual Regulation Circuit and Adjustable DC Output.**
- **User-selectable Dual Input (115/230VAC).**
- **OVP and UVP Protections Installed.**
- **Status LED on Front Panel.**
- **Full Hold-up for Missing Half Cycle.**
- **IEC950/EN60 950 Requirement.**
- **EMI Compliance with VDE 0871-B and FCC-B Curve.**
- **VME-bus Double Eurocard Architecture 12TEX6UX160mm.**

Specifications

Inputs:

Input Voltage: 90-120VAC (115VAC nominal)or180-260VAC (230VAC nominal)Dual Input user selectable.

Input Current: 115Vac/6.5A ; 230Vac/3.2A

Input Frequency: 47-63 Hz.

Inrush Current: Less than 80A at cold start.

Input Connector: AC input receptacle IEC 320 located in front panel.

Input Connector: AC input receptacle IEC320 on front panel and controlled by ON/OFF switch.

Earth Leakage Current: 3.5mA Max.

Isolation Voltage (Dielectric Withstand):2,5000VAC Output/ Input;1,500VAC Input/Safety GND;500VAC Output/Safety GND.

EMI: In compliance with FCC 20780 class B & VDE 0871 class B.

Ambient Temperature Range: 0°C to 50°C full rating; 50°C to 70°C derate linearly to 50% full rating;-20°c to 85°C Storage.

Cooling: 360W continuos with at least 60 cubic feet per minute forced air cooling.; 220W continuos at convection cooling.

Efficiency: 70% typical.

Hold-Up Time: 20msec. min. after loss of AC line at full load and nominal Input.

Transient Response: Output voltage returns in less than 3 msec. following a 50% load change.

Power Indicator: Green LED

Power ON/OFF Switch: Located on front panel.

Symbols: ★ OVP Built-in
@ Adjustable
U Under›Voltage Protection
# Remote Senese

Outputs:

Output Voltage: See rating chart

Output Current: See rating chart.

Output Connector: Single DIN 41612 male connector.

Line Regulation: 0.5% typical.

Load Regulation: For 50% to full load change

VO1....................................+/- 2.0%
VO2....................................+/- 2.0%
VO3....................................+/- 2.0%

Output Voltage Adjustment: VO1 from UVP to OVP trip points; VO2 from UVP to OVP trip points: VO3 10% up to OVP trip points.

Ripple: 1% peak-peak typical per output 2% max.

Remote sensing: Installed in V\O1 OUTPUT RAIL ONLY.

Over Voltage and Under Voltage Protections: OVP available at each output typically set at 124 +/-8% output voltage. UVP available at VO1 and VO2.

Overload Protection: The overload feature will protect against short circuit on output.

Mechanical Dimensions:mm(inches)

AJ'S POWER SOURCE, INC.

Power Supply Representative, Distributor and Custom Rack Manufacturer

FAST, EFFECTIVE AND KNOWLEDGEABLE SERVICE
COMPUTERIZED SELECTION FROM OVER 10,000 MODELS
OVERNIGHT DELIVERY, MOST MODELS
COMPLETE CUSTOM RACK FACILITIES
ACCESS TO THE LATEST TECHNOLOGIES & FEATURES
SECOND SOURCING & COST REDUCTION
DESIGN ASSISTANCE — ENGINEERS ON STAFF
CUSTOM & SEMI-CUSTOM DESIGN CONFIGURATIONS

We will track down that one in a million POWER SUPPLY that precisely fits your application.

ALBAR's Power Supplies

Custom fits.

PART OF THE SOLUTION

When you need a solution for your power problems, don't buy one designed for someone else. ALBAR, a leader in power conversion technology, can design and build a superior custom power supply that will fit into your application for optimal performance, and be cost-effective, too.

ALBAR has made it's name as a manufacturer of custom magnetics and power supplies (linear, ferroresonant and switch mode). Since 1979, our products have been specified in diverse fields like communications, health care and entertainment.

AN ENGINEERING STAFF THAT'S UP TO THE CHALLENGE

Our engineers have a wealth of experience, from microwatt to megawatt power ranges. They hold many patents in the field and have published widely in technical journals. You can be sure that they will be able to solve whatever problems your applications present.

ALBAR's customers know that we ship only top quality, 100% tested products from our plant in Lynnwood, Washington. With our advanced manufacturing capabilities, you'll get the best products and get them on time.

Get a solution that works just for you. Talk to ALBAR for the one that fits.

We're here to help.

When you are ready to discuss your application or just ask a question, call ALBAR toll-free at **1-800-822-5227**.

Skynet

SKYNET is specialized in switching mode power supplies for various applications such as PC, facsimiles, printers, disk drive, telecommunication, and test instruments.

Consisting of qualified staffs and exceptional management skills, *SKYNET* adopts the modern facilities, plus the brillant technologies to perform the high quality and cost-effective manufacturing process; Besides, with precious resources, innovative people and a large library of proven designs, we implement not only statistical process control techniques, but in the process of obtaining ISO9000 certification and as of 3/12/93 have recieved BABT Approval number 0686. We have worldwide agents allocated, so, timely delivery of reliable custom-specific products are always one of our prides.

Choosing SKYNET power supplies, you are ensuring quality performance of your products.

Standard Features

- 90 to 264 VAC universal input
- Build-in line filter for FCC B or VDE B
- Custom PWM IC
- LXF low ESR extra long life 105°C capacitor
- High efficiency
- No minimum load required
- Compact and low cost

Visible Difference

1. Build-in EMI line filter for FCC B or VDE B
2. Custom PWM IC make no minimum load and best protection
3. LXF low ESR extra long life 105°C capacitor
4. Wide range universal input
5. Ground Tab
6. Low RDS on high speed MOSFET
7. Custom core and bobbin make low profile
8. Golden heatsink

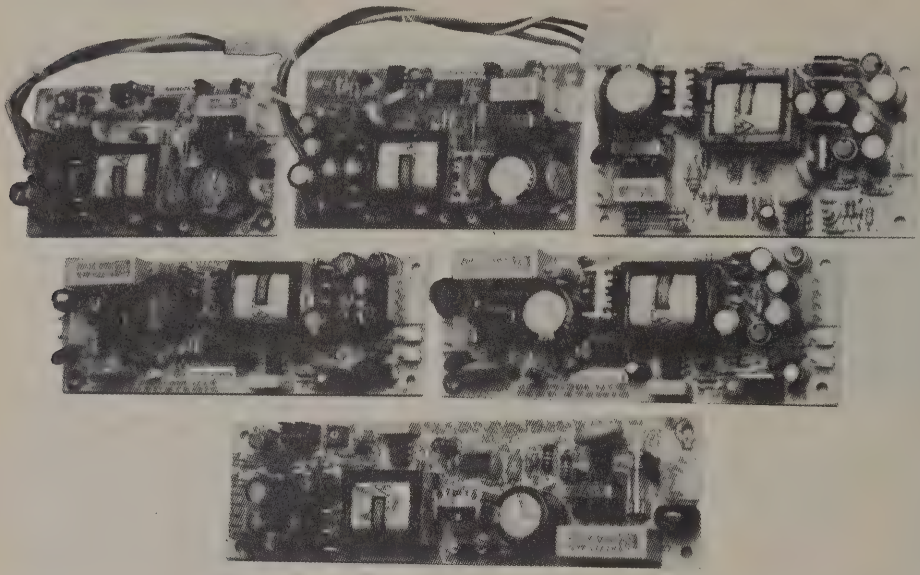
20 Watts for Computer Subsystem

1474 Gladding Court, Milpitas, Ca 95035 • (408) 945-6355 • Fax: (408) 945-6357



Applications

- CD ROM
- Optical drive
- Hard Disk

Features

- LED & fan output
- Tape drive
- Compack
- Variety size choice

SKYNET—with 13 year experience dedicated in handing OEM projects, has been proved as one of the best Switcher expert in the world. Intelligent engineering forces supported by standard circuit block library ensure the shorter throughput time of OEM project.

Normal throughput time is 6 weeks only. In case of urgent need, we can complete a new project within 3 weeks if its potential justified in advance.

Total Capacity 100K sets/month supported by flexible U-shape production line which allow small scale production flexibility and product diversification. SPC management has been fully applied in production process.

Numberless OEM project covering following applications:

DAT, MIDI, FAX machine, Adapter Satellite receiver, Memory subsystem and redundant power supply; have been successfully developed and run into mass production.

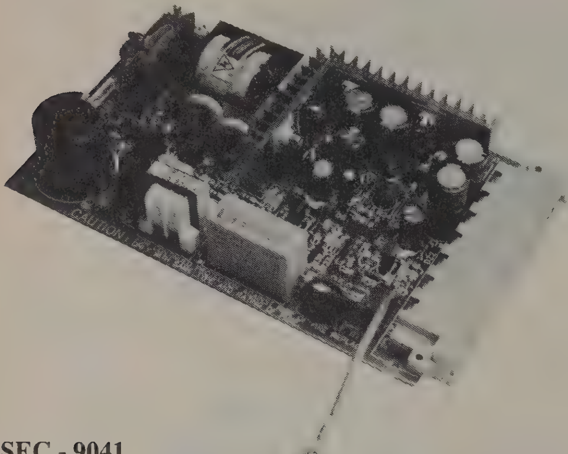
Eurocard Series

1474 Gladding Court, Milpitas, Ca 95035 • (408) 945-6355 • Fax: (408) 945-6357



SEC - 9041

SEC - 9101

Eurocard series are designed to be fitted into 19″—card-frames, with remote sense input, inhibit input and power good/power fail output

- **Single/Dual/Triple outputs are available from all series.**
- **All series can meet VDE B conducted limit.**
- **All series meet IEC 950 or its equivalent.**
- **The additional added +5V/0.5A in normal single output models (+12V and +24V) can offer special advantage for those systems which may need +5V for CPU and logic control circuit.**

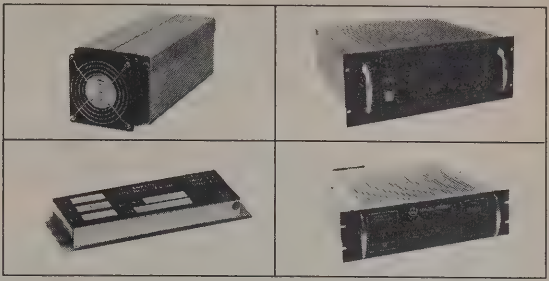
ANALOG MODULES, INC.

Specialists in Analog Electronics and Electro-Optics



Analog Modules, Inc. is a leader in flashlamp/arc lamp power supplies and laser electronics. From capacitor chargers to complete laser power systems, from laser energy monitors to pockels' cell drivers, AMI can provide the high quality, reliability and customer support your investment requires. Call our applications staff today to discuss your power supply/laser electronic requirements.

- **CAPACITOR CHARGING POWER SUPPLIES**
- **CUSTOM PULSE FORMING NETWORKS**
- **CW ARC LAMP POWER SUPPLIES**
- **FLASHLAMP SIMMER SUPPLIES**
- **LASER ELECTRONICS**
- **LAB AND OEM MODELS (MIL Specs Available)**

H.V. POWER SUPPLIES AND CONTROLLERS

Model	Type	Standard Input Voltage (VDC)	Standard Output Voltage (VDC)	Average Output Power (W)	Pkg. Dim. (Inches)	Special Features
521	DC to DC Converters	+12 to +28	0-300/600	210mW	2.05 x 1.0 x 0.61	Photodiode bias applications w/0-5V control, to 1KV available
522		+5	20-250/200-500	350mW	3.15 x 1.58 x 0.39	Photodiode bias applications w/0-2.5V/°C adj. temp. compensation
531		+12 to +28	0-3000	180mW	3.12 x 1.5 x 1.09	H.V., Low noise applications w/0-5V control, MHV output
532		+12 to +16	100-3000	1	2.08 x 1.25 x 0.56	H.V., Low noise applications, miniature, programmable
562/564	Capacitor Charging Power Supplies	+10 to +32	0-1000	6 25	2.0 x 2.0 x 0.74 5.25 x 2.4 x 1.3	Low/medium power, compact, DC-DC converter, suitable for capacitor charging for OEM, medical, industrial applications.
566/568		+18 to +32	0-1500	75/150	3.63 x 3.27 x 2.94	DC-DC capacitor charger suitable for military portable lasers.
576/7/8		+240 to +340[1]	0-2500	250-1.5KW	6.0 x 4.0 x 4.75	Programmable, isolated modules for laser power designed to meet UL544 and CSE/TUV specifications. Field proven high reliability.
882/885		115 or 220VAC or 208VAC 3Ø	0-2500	1KW-5KW	7 x 19 x 17	Complete charging system incorporating 577 modules. Programmable with safety features and 10 years of proven performance.
861A/862A	Flashlamp Simmer Supplies	+24 to +32	1300 striking 300 operation	28 45	5.25 x 2.4 x 1.3 5.78 x 3.68 x 2.03	Includes high energy trigger O/P for Trigger X-former and post flash boost. Can simmer series or difficult lamps.
883-X-1/4	Complete PFN Discharge Power Supplies	115 or 220VAC	0-2500	250-1KW	7 x 19 x 17	Complete laser controller and custom PFN w/internal charger. Ideal for solid state lasers requiring a compact single-chassis. Can be customized to OEM specifications.
883/882 or 885		115 or 220VAC or 208VAC 3Ø	0-2500	1KW-5KW	2ea. 7 x 19 x 17	For higher power applications, can be interfaced with a complete range of AMI electronics. Expandable to >20KW.
883-X-V-2		115 or 220VAC	0-425/1000	500	7 x 19 x 17	Complete controller and variable PFN w/internal charger, adjustable pulsewidth 0.1 to 1.5mS, instantaneous display to 200J, available for high and low K_0 lamps. Modular OEM versions available.
883-X-V/882-V or 885-V		115 or 220VAC or 208VAC 3Ø	0-425/1000	1KW-5KW	2 ea. 7 x 19 x 17	For higher power applications, can be interfaced with a complete range of AMI electronics. Expandable to >20KW.
893-1C/PFC	CW Arc Lamp Modules and Complete Power Supplies	115VAC	100-250	1.4KW (std. outlet)	5.25 x 19 x 17	Complete CW system incl. power module, igniter, and controls. This low-cost turn-key system provides modular flexibility to meet OEM requirements. Various local and remote options are available together with active power factor correction (PFC option). Optional remote control module available in lieu of front panel adjustment.
893-1D/PFC		220VAC	100-250	2KW	5.25 x 19 x 17	
893-2D/PFC		220VAC	100-250	4KW	5.25 x 19 x 17	
893-3D		208-230V 3Ø	100-250	6KW	5.25 x 19 x 17	

1. AMI offers **Model 581** for 115V/230V AC to 300V DC Conversion.

OTHER LASER ELECTRONICS

- Model 811 Laser Energy Monitor, long and short pulse versions, various detectors.
- Model 821 High Voltage switch modules for E-O crystals/Pockels' cells, to 3.3KV, 70nS risetime
- Model 824 Hybrid Q-Switch driver, 50nS risetime, <25µS recovery, output to 3KV
- Model 827 Pockels' Cell Driver, miniature, solid state, built-in power supply, output to 3.2KV
- Model 828 Same as 827 with fast rise and fall time to 2KV, adjustable pulsewidth
- Model 851 Series trigger module adjustable to 20KV, 115VAC input
- Laser diode drivers and laser rangefinder products also available.

For other products, please see our ad in Amplifier Assemblies/Instrumentation and Fiber-Optic Equipment and Accessories.

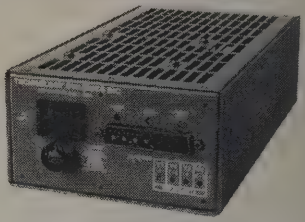
FULL LINE SWITCHING POWER SUPPLIES AND DC-DC CONVERTERS

COMMERCIAL MILITARY MILITARIZED

All Standard Products Can Be Modified and Customized

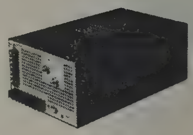
TBC SERIES 150-600W
A family of rugged switches providing up to 4 outputs and capable of battery backup and -30 to +70°C operation range. Remote site applications.

TDL SERIES 500-1000W
The same as the TBC Series except for a higher output power capability.

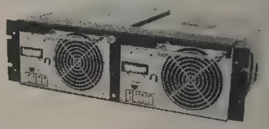


TBC Series 5.5 x 3 x 10"
TDL Series 5.5 x 5 x 11.5

NTDM SERIES 500W-3000W
Industry standard 8 x 5 x 12.5 inch available in single and 3 outputs, and can be optimally ruggedized for -30 to +70°C operation and shock/vibration to MIL-STD-810.

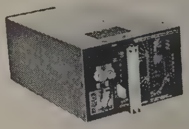


REDUNDANT AND HOT SWAP
(N+1) POWER SUPPLY SYSTEMS, RACK MOUNT.
5.25" Height up to 3000W 8.75" Height up to 4500W



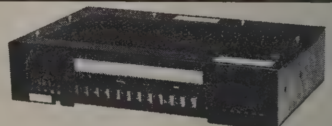
UNINTERRUPTIBLE SWITCHING POWER SUPPLIES WITH BATTERY BACKUP—DC OUTPUTS

NTDM-UPS SERIES **Available with Battery**
Backup Feature, Dual input of 115/230V & 48VDC (or 28VDC) battery. Provide Glitch Free Transfer Up to 1500W. Up to 3 Outputs. Eliminates the Need for UPS Inverters. Capable of Battery charging as well.

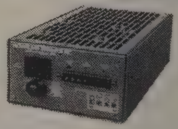


DC-DC CONVERTERS

TDC-150
DC-DC with 24V, 36V, 48V or 120 VDC Inputs, up to 4 Outputs. Slim Line 5.5″ × 9.5″ × 2.2″. Up to 150 Watt. Standard Outputs: 5V, +12V, −12V & 24V. Powerful yet very compact unit.

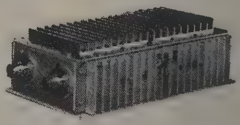


TBDC SERIES 150-500W
A family of rugged DC-DC Converters up to 4 outputs, all tightly regulated. Available optionally with -30 to +70°C temp. range and shock/vibration per MIL-STD-810.



MIL APPROVED AND MILITARIZED POWER SUPPLIES

Custom Full MIL and Militarized power supplies to MIL-STD-2000. Airborne, shipboard and ground support applications meets MIL-STD-461, 810, 901.



17 Years of Design Excellence!

HIGH RELIABILITY STANDARD & CUSTOM POWER SYSTEMS

COMPACT 150-600 WATT SINGLE/MULTIPLE OUTPUT SWITCHERS

TBC and TBCM SERIES

TECHNOLOGY DYNAMICS INC

Features/Options

- Rugged design in 5 x 3 x 10 package
- Available with several options
- Can be made for military environment

Table (1) TBC Series: Single Output

OUTPUT	MAX LOAD	MODEL NO.
5	50	TBC-5-50
12	40	TBC-12-40
24	24	TBC-24-24
28	20	TBC-28-20
48	12	TBC-48-12

TBCM Series: Multiple Output

Use Model TBCM for Multiple Output.
Select first, second, third or fourth output from the tables below.
Second and third output must be equal in voltage and share common ground.
Output four is floating.
Example: P/N TBCM 5-50 A2B2C1-Suffix
+5V 50A, -12V3A, +12V 4A, +5V 2A

LBVD Module (Low battery auto-disconnect)

The LBVD module adds a new dimension to battery charger power supplies. The power supply simultaneously charges the battery and powers the load. If the AC power fails, the battery continues to support the load. However, when the battery voltage drops below a predetermined level, the LBVD module disconnects the battery from the load, thereby protecting the battery from the damaging effects of complete discharge.

Table (2)

OUTPUT #1 (V1)		
VDC	MAX AMP	MODEL
5	50	TBCM-5-50
12	40	TBCM-12-40
24	24	TBCM-24-24
28	20	TBCM-28-20
48	12	TBCM-48-12

Table (3)

OUTPUT #2 (V2)	CODE
VDC @ MAX AMP	
-5V @ 3A	A1
-12V @ 3A	A2
-15V @ 3A	A3
-24V @ 3A	A4

Table (4)

OUTPUT #3 (V3)	CODE
VDC @ MAX AMP	
+5V @ 4A	B1
+12V @ 4A	B2
+15V @ 4A	B3
+24V @ 2A	B4

Table (5)

OUTPUT #4 (V4)	CODE
VDC @ MAX AMP	
5V @ 2A	C1
12V @ 2A	C2
15V @ 2A	C3
24V @ 2A	C4
48 @ 1A	C5

NOTE: Other voltages and currents available, contact the factory. Maximum total output power cannot exceed 600 watts, maximum current per output cannot be exceeded.

Input

Input: 115/230 strappable
Hold up time: 16-20ms typical
Leakage current: 3.5ma maximum
Efficiency: 75% typical
Line Regulation: ±.3%
Load Regulation: ±2%
Ripple: 1% max. peak to peak, not to exceed 100mV
Output Termination: "D" Subminiature connector

Agency Certifications

- Meets FCC Docket 20780, Class A and VDE 0871, Class A
- UL 1950, CSA 22.2-950, CSA 22.2-234 (Pending)

Options

- Battery backup: Suffix BBU
- Auto line select: Suffix ALS
- O Ring diode main output: Suffix ORD
- -30 to +70°C full load operation: Suffix M
- Forced current sharing: Suffix FC

Protections

Overload and short circuit protection all outputs
Overvoltage: Recycle input to reset from latch
Fuse: 20A fuse at input
LED Indicators: Input AC Good
Output DC Good

Environmental

Operating Temperature: 0-55°C Ambient
(derate to 50% at 70°C)
Storage Temperature: -30°C to +80°C
Cooling: Internal fan

Mechanical Features

Size: 10.00" x 5.5" x 3.0"
Weight: 4.5 lbs. (2kg)

HIGH RELIABILITY STANDARD & CUSTOM POWER SYSTEMS

MULTIPLE OUTPUT HIGH POWER SWITCHER

NTDM Series

(with optional features)

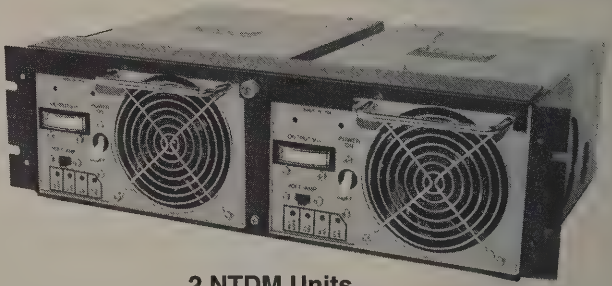
Battery Backup, Power Factor Correction, Universal Input Hot Plug-in, 3 Phase Input and (N + 1) Configuration

500W-2000W

APPLICATIONS: This universal power supply is suitable for uses in data processing, communications, telecom, instrumentation, automation equipment and robotics.

- Rugged construction for high shock and vibration
- Up to 3 powerful outputs
- MTBF exceeding 150,000 hours
- Full overload, overvoltage and overtemperature protection
- Can be supplied with battery backup feature
- Can be supplied with "power factor correction" feature
- Universal input option
- Hot plug-in, rack mounted (N + 1) configuration
- Available in militarized version
- Meters, circuit breaker
- Can be customized to meet customer specifications

Single Unit



2 NTDM Units in a Rack Mount Configuration

OPTIONS

UPS BATTERY BACKUP 48VDC	Applicable to all units: 1-3 outputs, up to 1000W and having no power factor correction option.
	Once placed in the unit, the battery backup module makes this switcher an uninterruptable system. Transfer to battery occur automatically and "glitchlessly". Accepts 48VDC input, and can support up to 1000W of total output. Charges the battery when AC is present.
	For battery backup option, add UPS as a suffix to the part number. Example: NTDM28-18A2B2-UPS.
POWER FACTOR CORRECTION (Accepts input of 90-264VAC)	Applicable to all units: 1-3 outputs, up to 1000W and having 4th output or UPS options.
	The power factor correction module reshapes the input current to a nearly perfect sinosoidal waveshape which has a power factor of .95 - .98.
	For this feature add PF as a suffix to the part number. Example: NTDM5-100A2B2-PF.
REDUNDANCY (N+1) CONFIGURATION HOT PLUGGABLE	Applicable to all units. Consult factory.
	The NTDM units may be optionally equipped with "O Ring" diodes on the outputs, thus enabling these units to be connected in parallel for (N+1) applications. A standard 19" rack mount is available to accomodate up to 3 units in one tray. The units may be removed or plugged into location without power removal.

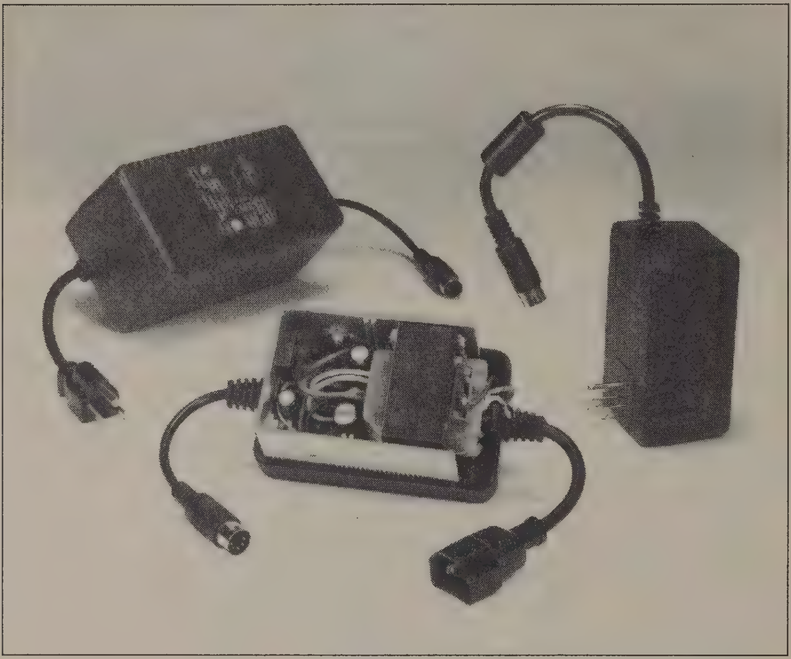
apx TECHNOLOGIES INC.

REGULATED LINEAR EXTERNAL POWER SUPPLIES

Our products are manufactured in the **FAR EAST** and are competitively priced. We can cross reference to standard designs or our engineers will help you select the features which will best fit your application.



Specifications and Available Options:

- Typical Input Voltage Range: 105 To 132 VAC @ 60 Hz
- NEMA 5-15 P Plug with Ground Pin Available
- Single and Multiple Outputs
- Any Combination of Voltages and Currents
- Ripple and Noise: 10 mV P-P Typical
- Output Accuracy: ±5%
- Overvoltage Crowbar Protection Circuits Optional
- RFI/EMI and Transient Protection
- Switchable Input Available
- European IEC/VDE and U.K. BABT Equivalent Designs Available for Certification
- Typical Operating Temperature Range: 0°C—40°C
- Custom Colors: Plastics and Cables
- Custom Tooling and Molding of Enclosures
- All APX Enclosures Are Made of High Impact Plastics Meeting UL 1310/1012 and CSA 22.2-223
- Custom Tooling and Molding of Cables and Connectors
- Typical Breakdown Voltage: 1500 VAC
- Warranty: 1 Year

AC AND DC EXTERNAL POWER SUPPLIES–ADAPTERS

Our products are **engineered** domestically in the **U.S.** and manufactured in the **FAR EAST.** Selection available from a variety of designs which are **UL/CSA** listed or have our engineers help you select a custom design for your special application.

Class II
AC Output: Typical Model Selection Guide

APX Model No.	Typical Output Rating	Size Ref.
APX 6A500	6.0 VAC @ 500 mA	35
APX 8A1500	8.0 VAC @ 1500 mA	48
APX 8.5A1350	8.5 VAC @ 1350 mA	48
APX 9A400	9.0 VAC @ 400 mA	35
APX 9A700	9.0 VAC @ 700 mA	41
APX 9A1000	9.0 VAC @ 1000 mA	48
APX 9A1250	9.0 VAC @ 1250 mA	48
APX 9A1500	9.0 VAC @ 1500 mA	48
APX 12A300	12.0 VAC @ 300 mA	35
APX 12A1200	12.0 VAC @ 1200 mA	48
APX 14A2800	14.0 VAC @ 2800 mA	57
APX 16A1250	16.0 VAC @ 1250 mA	57
APX 18A200	18.0 VAC @ 200 mA	35
APX 18A350	18.0 VAC @ 350 mA	41
APX 19.6A850	19.6 VAC @ 850 mA	57
APX 20A500	20.0 VAC @ 500 mA	48
APX 20A700	20.0 VAC @ 700 mA	48
APX 20A800	20.0 VAC @ 800 mA	57
APX 21A500	21.0 VAC @ 500 mA	48
APX 21A600	21.0 VAC @ 600 mA	48
APX 24A150	24.0 VAC @ 150 mA	35
APX 24A600	24.0 VAC @ 600 mA	57
APX 26A2250	26.0 VAC @ 2250 mA	66

- Models available in wall plug in or desk top configuration depending on output power.

Class II
DC Output: Typical Model Selection Guide

APX Model No.	Typical Output Rating	Size Ref.
APX 6D300	6.0 VDC @ 300 mA	35
APX 9D300	9.0 VDC @ 300 mA	35
APX 9D500	9.0 VDC @ 500 mA	41
APX 9D1000	9.0 VDC @ 1000 mA	48
APX 14D800	14.0 VDC @ 800 mA	48
APX 18D150	18.0 VDC @ 150 mA	35
APX 18D800	18.0 VDC @ 800 mA	57
APX 20D150	20.0 VDC @ 150 mA	41
APX 25D400	25.0 VDC @ 400 mA	48
APX 26D1500	26.0 VDC @ 1500 mA	66
APX 28D400	28.0 VDC @ 400 mA	48

MOST DESIGNS AGENCY APPROVED OR LISTED AS REQUIRED.

Specifications and Available Options:

- Typical Nominal Input: 120 VAC @ 60 Hz
- NEMA 5-15 P Plug with Ground Pin Available
- Switchable Input Voltages Available
- Typical Output Tolerance ±5%
- Typical DC Filtered Models with 1000 mfd Capacitor
- Models with Lower Ripple Available with Larger Value Capacitors
- Center Tap Designs Available on AC Models
- Standard and Custom Output Connectors
- Typical Operating Temperature Range: 0°C—40°C
- RFI/EMI and Transient Protection
- European IEC/VDE and U.K. BABT Equivalents Available
- Special Designs to Medical/Dental UL 544 Standards
- Custom Tooling and Molding Available for Plastics and Connectors
- All APX Enclosures are made of High Impact Plastics Meeting UL 1310/1012 and CSA C22.2 Number 223
- Typical Breakdown Voltage: 1500 VAC

TYPICAL OUTPUT LOAD CURVES for AC adapter nominal 10VAC @ 1 Amp

APX Model No.	Typical Output Rating
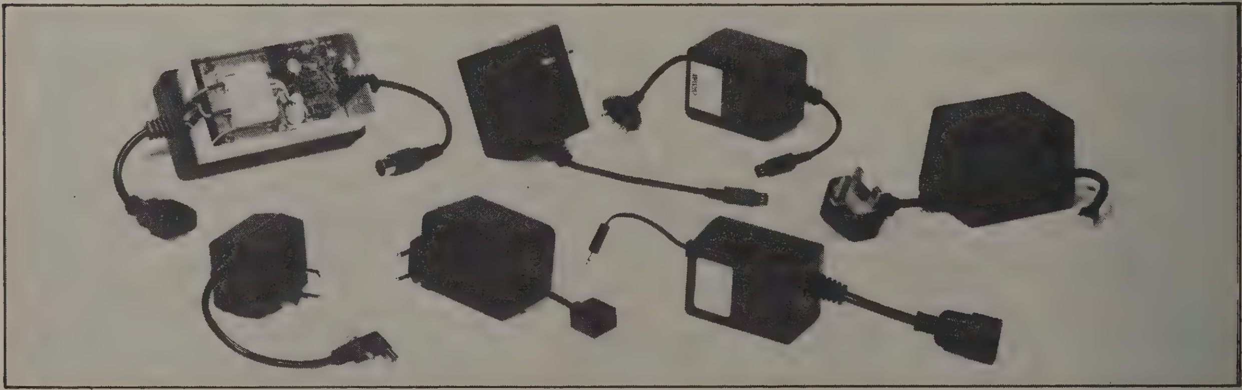
APX 5D500E	5 VDC @ 500 mA
APX 9D600E	9 VDC @ 600 mA
APX 9D1000E	9 VDC @ 1000 mA
APX 12D250E	12 VDC @ 250 mA
APX 12D800E	12 VDC @ 800 mA

Specifications and Available Options:

- Typical Input Voltage: 220-230 and 240 VAC @ 50 Hz
- Switchable Input Availability
- Grounded and Non-grounded Models Available
- Center Tap Designs Available on AC Models
- Any Combination of Output Voltages and Currents
- Overload and Shorted Output Protection
- Overvoltage Crowbar Protection Circuits Available on Regulated Units
- Thermal Protection
- Designed to Comply With IEC, VDE, BSI, BABT, SAA Standards
- Compliant to EN 60950/BS 7002 for EEC 92 STDS Quality Control STD BS 5750
- Typical Breakdown Voltage: 3750 VAC
- Warranty: 1 year

Typical Regulated Output Designs

APX Model No.	Output 1	Output 2	Output 3
APX 5R750E	+5 VDC @ 750 mA		
APX 512R-04E	+5 VDC @ 500 mA	+12 VDC @ 100 mA	
APX 512R-03E	+5 VDC @ 750 mA	+12 VDC @ 700 mA	
APX 51212R-01E	+5 VDC @ 450 mA	+12 VDC @ 100 mA	−12 VDC @ 100 mA
APX 51212R-04E	+5 VDC @ 1.0A	+12 VDC @ 500 mA	−12 VDC @ 500 mA
APX 51212R-03E	+5 VDC @ 1.0A	+12 VDC @ 1.0A	−12 VDC @ 100 mA



SOME MODELS CERTIFIED AS MEETING EEC 1992 STANDARDS.

apx TECHNOLOGIES INC.

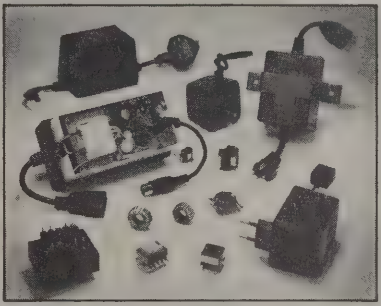
We are a manufacturer of **POWER SUPPLIES** and **MAGNETIC PRODUCTS** with engineering sales offices in the **U.S.** and manufacturing in the **Far East.**

Our Products Include:

- AC and DC External Power Supplies
- Regulated Linear Power Supplies
- Custom Made Specialized Power Supplies
- Battery Chargers
- Power, Pulse and Telecommunication Transformers
- Inductors and Specialized Magnetic Products



Typical Applications:

- Computers
- Telecommunications
- Modems
- Medical Equipment
- Computer Peripherals
- Bar Scanning Equipment
- Microprocessor Control Systems
- ATE and Security Systems

QUALITY — RELIABILITY — SERVICE — RESPONSE — WARRANTY and COMPETITIVE PRICING

Established in 1978 we have successfully worked with engineers, buyers and program managers supporting products and programs with 12 years of:

- **Product Analysis**
- **Design Engineering Support**
- **Custom Tooling and Packaging**
- **Custom Molding**
- **Domestic and International Agency Certifications**
- **BABT Approved Manufacturing Facility**

Battery Chargers:

- Standard and Custom Designs for Nickel Cadmium and Lead Acid Batteries
- Single and Dual Stage Charging Systems
- Standard and Regulated Outputs
- Designs are available to UL/CSA as well as European IEC/VDE Standards
- Designs to Medical/Dental UL544 Standards
- Wall Mount Plug- in and Desk Top Configurations Available
- Custom Enclosures

1993
IC MASTER

Directory of
IC Manufacturers'
Data
Pages

THE FAST AND EASY WAY TO FIND IC MANUFACTURERS' DATA BOOKS!

The 1993 DIRECTORY OF IC MANUFACTURERS' DATA PAGES is a unique index designed to save you time and help you find the manufacturers' precise data book or sheet that you need on any integrated circuit listed in the 1993 IC Master.

Simply look up any IC by base number. The cross-reference will show you the manufacturer's complete device number together with the name and issue date of the applicable manufacturers' data book.

For example: If you wanted the complete manufacturers' data on device number ADOP07. Look up base number 07. Following the base number is the manufacturer's name...Analog Devices, the complete device number ADOP07 and the page number of where the device is described in the IC Master. The listing will then show you that the manufacturer's data book is Analog Devices "Linear Products DataBook" .

Now you can contact Analog Devices by phone or FAX and request the EXACT data book you need. No wasted words, no wasted time.

Plus, where and whom to call for technical information, at any IC manufacturer, is at your fingertips in the complete Manufacturers & Distributors Directory.

A guaranteed time saver, this unique directory is a must for every engineering department!

Don't waste another precious engineering minute.

ORDER THE 1993 DIRECTORY OF IC MANUFACTURERS' DATA PAGES...TODAY!

To order your 1993 Directory of IC Manufacturers' Data Pages,
Contact your local IC MASTER distributor or,
send your purchase order and check for $84.50 plus tax* to:

AC-DC/DC-DC MODULAR MINIATURIZED
SWITCHING POWER SUPPLIES

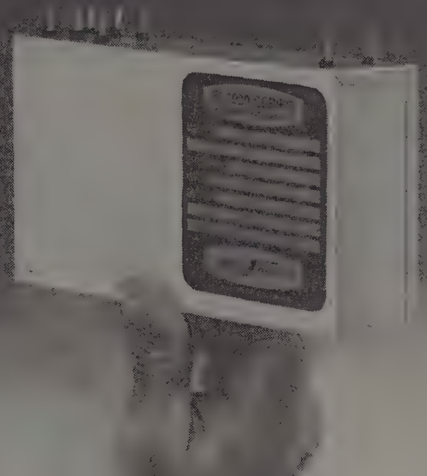
ARNOLD MAGNETICS

INTRODUCING
EXPANDED CAPABILITY

CONFIGURE-YOUR-OWN

MIL SPEC • HIGH RELIABILITY

POWER SUPPLIES



A HIGHER LEVEL OF PERFORMANCE

EL 2000 SERIES

Complete AC to DC and DC to DC multi output systems.

- Rugged high density packaging to 8 watts/in.^{3}
- Efficiencies to 80% +.
- NOW 115/230 VAC strappable 1∅ input.
- NOW 120/208 VAC 3∅/4 wire Wye input.
- NOW 270 VDC input.
- NOW To 110 amps, 300 VDC and 580 watts total output.
- NOW Low noise options available.
- NOW Hermetically sealed parts options available for extended MTBF.
- Mil-Std 704A-D, 1399 and 1275 input surge and spike protection.
- Meets many provisions of Mil-Std-810D, Mil-E-5400T, Mil-E-16400, Mil-T-27, Mil-E-4158E (USAF) and Mil-Std-454J.

ARNOLD MAGNETICS

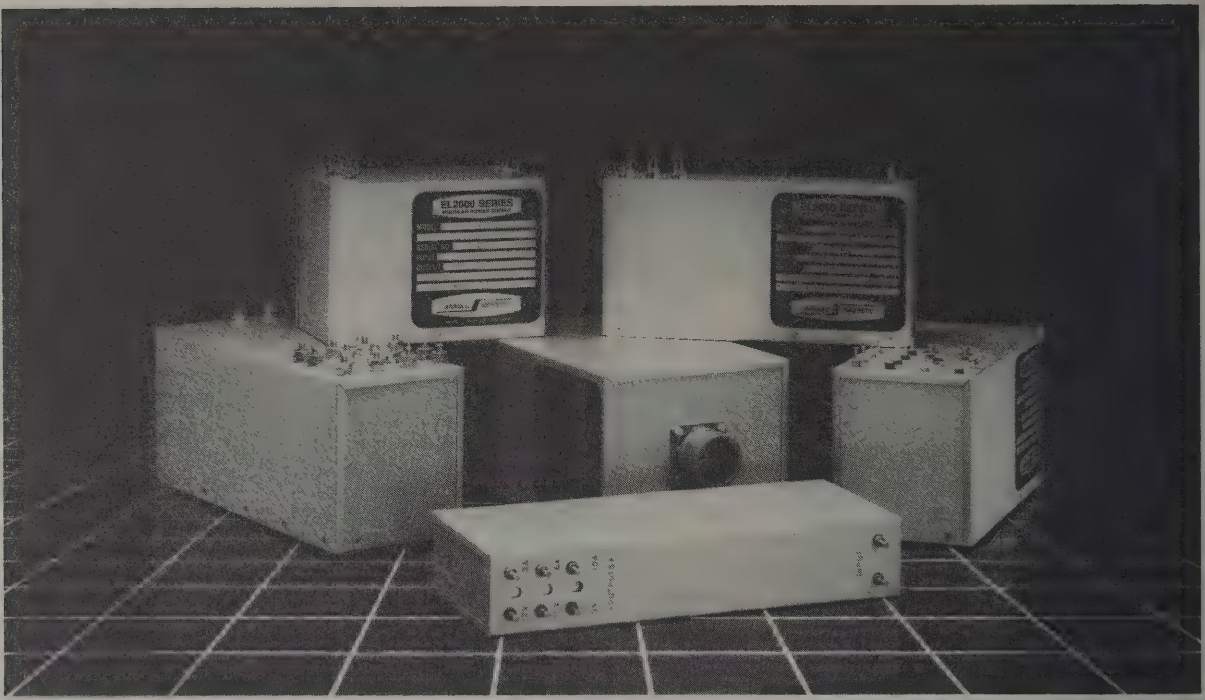
AC-DC/DC-DC MODULAR MINIATURIZED SWITCHING POWER SUPPLIES



WHY CHOOSE ARNOLD MAGNETICS?

SAVE SPACE… MINIATURIZED PACKAGES

Arnold's complete AC-DC and DC-DC Multi Output Systems are 50% to 75% smaller than previous generation power supplies, achieving densities of 5 to 8 watts per cubic inch. Our miniaturized packages, with their unique narrow footprints, provide more power in less space.

SAVE TIME… QUICK DELIVERIES

Arnold's unique design concept allows you to choose inputs and outputs from predesigned standard modules. You configure your own "custom" multi-output power supply system and get delivery in weeks…even with non-standard voltage combinations.

SAVE MONEY… LOWER PROGRAM COSTS

With Arnold, there is no additional charge for unique output voltage combinations. Non-recurring engineering and qualification expenses of custom designs are avoided. In addition, our standard modules provide lower cost for production quantities.

REDUCE RISK… HIGH RELIABILITY DESIGNS

Arnold's standard modules are proven thru thousands of hours of failure-free qualification before ever being shipped to our customers. NAVMAT derating and testing methods, along with standardized modular designs, ensure reliability and reduce the risk of failure inherent in new custom circuits or thermal and mechanical package designs.

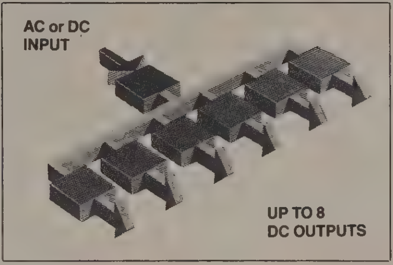
ARNOLD MAGNETICS

CONFIGURE-YOUR-OWN POWER SUPPLY SYSTEM

FROM STANDARD MODULES!

EL 2000 SERIES



1 OUTPUT SELECTION

Every standard output module may be specified to the exact nominal voltage and maximum current you require. The table of output regulators describes the range of voltages and currents available as standards. Please select the nominal voltage required for each output. All outputs are adjustable ±5% from nominal by means of an externally accessible potentiometer. Outputs are isolated and may be connected for positive or negative polarity. Ensure your required load is within the maximum current specified. You may have up to eight outputs per power supply.

OUTPUT REGULATORS

NOMINAL VDC OUTPUT (V)	MAXIMUM CURRENT OUTPUT (A)	EL-2000 MODEL	REGULATOR LENGTH (INCHES)	TYPICAL EFFICIENCY (%)	LINE/LOAD REGULATION (% Eo)[3]	V RMS RIPPLE/NOISE (% Eo)

OPERATING SPECIFICATIONS

- **TEMPERATURE COEFFICIENT:** 0.01%/°C. −55°C to +85°C.
- **OPERATING TEMPERATURE** (Baseplate): −40°C to +85°C (optional −55°C to +85°C)
- **STORAGE TEMPERATURE:** −65°C to +100°C.
- **SHORT CIRCUIT PROTECTION:** All outputs are short circuit protected and feature foldback current limiting. (ERP, ERY straight current limiting).
- **OUTPUT ADJUSTMENT RANGE:** All outputs are adjustable over a plus or minus 5% range.
- **SEMICONDUCTOR JUNCTION TEMPERATURE:** Maximum of 100°C at operating baseplate temperature of +85°C (derating per Navmat P4855-1 and Mil-Std-454J).
- **ISOLATION:** The inputs, case and outputs are isolated (floating) from each other. Output to case isolation test voltage is the greater of 50VDC or 1.3 x E out. Input to case 500VDC on 115VAC units, 50VDC on DC input units (to 30V). Input to output 250VDC on all units.

NOTES

1. M—Denotes Master Channel (max. of one per power supply); —10% minimum load (to 5 amps max.) required.
2. DW—Denotes Double Width design only.
3. Line/Load Regulation Band consists of high line to low line and 1/2 load to full load change.
4. Consult Factory.
5. No additional space required for Inrush/Transient Protection.
6. No additional space required for E & T options.
7. Use with EDC, EDD or EDM Input Sections only.
8. @ −55°C; 8.7 DW.
   For 187-265 V operation only; 7.7DW

2 INPUT SELECTION

Select the input section, AC or DC, with sufficient power to drive the output modules. This is determined from your worksheet calculations. We have provided conservative data for your analysis. The efficiencies shown in the Output Regulators table may vary with options such as wide input or extended temperature. Our factory applications engineers will be happy to assist you in evaluating various alternative configurations.

3 CASE SELECTION

You have a variety of choices when selecting the package that best fits your space. Just add up your modules (Input Section, Regulators and Options) and pick the case that best fits your system needs.

Case Size	Total of Module Lengths (inches)	Base-plate Area	Maximum Case Dimensions (inches)			Mounting Holes (inches)			Final Unit Weight (oz.)	Figure No.
			Length (L)	Width (W)	Height (H)	M	N	Quan.		
ECAA	3.2	4.8 in²	3.5	1.63	3.63	1.125	2.750	4	25	1
ECBA	4.7	7.1 in²	5.0	1.63	3.63	1.125	4.250	4	35	1
ECCA	6.7	10.1 in²	7.0	1.63	3.63	1.125	2.750	6	45	1
ECFA	8.2	12.4 in²	8.5	1.63	3.63	1.125	3.500	6	60	1
ECDA	10.2	15.4 in²	10.5	1.63	3.63	1.125	4.500	6	70	1
"DOUBLE WIDE" Packages below allow modules to be mounted side by side.										
ECAB	2 x 3.2	9.7 in²	3.5	3.13	3.63	2.625	2.750	4	45	2
ECBB	2 x 4.7	14.2 in²	5.0	3.13	3.63	2.625	4.250	4	66	2
ECCB	2 x 6.7	20.2 in²	7.0	3.13	3.63	2.625	2.750	6	82	2
ECFB	2 x 8.2	24.8 in²	8.5	3.13	3.63	2.625	3.500	6	110	2
ECDB	2 x 10.2	30.8 in²	10.5	3.13	3.63	2.625	4.500	6	130	2
"TRIPLE WIDE" Packages below allow modules to be mounted three across.										
ECAC	3 x 3.2	14.4 in²	3.5	4.62	3.63	4.126	2.750	4	63	2
ECBC	3 x 4.7	21.3 in²	5.0	4.62	3.63	4.126	4.250	4	90	2
ECCC	3 x 6.7	30.3 in²	7.0	4.62	3.63	4.126	2 750	6	123	2
ECFC	3 x 8.2	37.2 in²	8.5	4.62	3.63	4.126	3.500	6	150	2
ECDC	3 x 10.2	46.2 in²	10.5	4.62	3.63	4.126	4.500	6	186	2

NOTE: All cases are gold anodized aluminum with turret-style solder terminals and Teflon insulation, 7/16 maximum height, except for ERP and ERY which has 1/4-28 threaded studs with a maximum height of 7/16 standard or 11/16 optional, (select).

Optional Threaded Terminals have maximum height of 1/2 or 5/8, (select).

No. of Outputs
Master List No.

OPTIONS

OPTION LETTER	DESCRIPTION
EA-V	**Output Over-Voltage Protection**—SCR type to 20A. All ERP and ERY use electronic control. 120% ±10% of nominal Eo, available on all Regulators except ERB and ERK. No additional length required for ERP and ERY. For others, please add 0.6" to length of Regulator.
EA-T	**Extended Temperature Operation**— −55°C to +85°C. Contact Factory for other requirements. Temp. range may affect Case Size and maximum output current.
EA-E	**Extended Input Voltage**—92-138 VAC and 18-36 VDC. For other ranges please contact Factory with your requirements. Input range may affect unit efficiency, case size and maximum output current.
EA-TP	**Input Transient Protection**—Conforms to the transient provision of MIL-STD 704A-D as well as MIL-STD 1275 and MIL-STD 1399. For undershoot and dropout contact Factory with specific requirements. Add 0.6" to Input Section length.
EA-R	**Remote Sense**—Maintains specified output voltage at remote load. Compensates for a voltage drop of .25V maximum. Available above 10A. Standard on master channels. Add 0.6" to Regulators, except ERP and ERY.
EA-A	**Remote Voltage Adjustment**—Terminals are provided for external potentiometer. Add 0.6" to Regulators.
EA-TS	**Over-Temperature Shutdown**—Unit will shut off during over-temp and automatically reset within specified range. Add 1.2" to Input Section length.
EA-ST	**Stud-Terminals**—8-32 threaded studs are provided for input and output terminations (maximum height of 5/8"). ERP and ERY regulators come standard with 1/4-28 stud terminals. Maximum torque of retaining nut: 15 inch-pound for 8-32 stud; 25 inch-pound for 1/4-28 stud.
EA-H	**Helicoil Mounting Inserts**—Locking or free running helicoil inserts are provided. Specify 6-32 or 8-32.
EA-LC	**TTL On/Off Control**—Logic signal will turn unit On or Off. Add 0.6" to Input Section length.
EA-D	**Power-Down Signal**—TTL signal warns of input power loss prior to outputs falling out of regulation. Add 0.6" to Input Section length.
EA-I	**Inrush Soft Start**—Unit inrush limited to 2 times steady state current at turn-on (AC only). Add 0.6" to Input Section length.

ENVIRONMENTAL SPECIFICATIONS

- **Temperature Range:** Operating Temperature: −40°C to +85°C Baseplate Temperature. Optional −55°C to +85°C range. Non-Operating Storage Temperature: −65°C to +100°C.
- **High Temperature:** Per MIL-STD-810, Method 501, Procedure II.
- **Low Temperature:** Per MIL-STD-810, Method 502, Procedure I.
- **Temperature-Altitude:** Per MIL-STD-810, Method 504, Procedure I; the following details apply: −40°C to +85°C (and −55°C to +85°C) at Altitude: Sea level to 70,000 ft.
- **Humidity:** Per MIL-STD-810, Method 507, Procedure I.
- **Acceleration:** Per MIL-STD-810, Method 513, Procedure I and II, at a test level of 14 G.
- **Vibration:** Per MIL-STD-810, Method 514, Procedure I, at a test level of 15 G.
- **Shock:** Per MIL-STD-810, Method 516, Procedures I, II, III, V, and VI at a test level of 40 G.

THERMAL INTERFACE

Arnold Magnetics Power Supplies are cooled by conduction. Always use thermal compound during installation. To assure reliability the thermal interface must be designed to maintain specified Baseplate Temperature under worst-case conditions. Heat transfer via forced air or natural convection will be minimal.

Please consult the Factory to discuss heat-sinking considerations.

FEATURES

- **.99 Power Factor Correction:** Active circuitry allows more usable power to be drawn from your source. Added benefits include low harmonic distortion, longer holdup times and simplified EMI filtering.
- **True N+1 Current Sharing:** Single wire connection allows current sharing for loads to kilowatts.
- **Line Isolation & EMI Filtering:** EMI suppression to RTCA Spec. DO-160C as well as Mil-Std-461C (including CE01, CE03, RE02).
- **Surge & Spike Protection:** Per Mil-Std-704D; Mil-Std-1399 Sect. 300A and RTCA Spec. DO-160C.

SINGLE PHASE

ARNOLD MAGNETICS

OPERATING SPECIFICATIONS

LINE REGULATION: .1% E_0.

LOAD REGULATION: .25% E_0, 10% to full load.

TEMPERATURE COEFFICIENT: .01%/°C, –55°C to +85°C.

RIPPLE & NOISE: .15% E_0 RMS
.4% E_0 pk to pk–20 mHz BW with F option.

OPERATING TEMPERATURE RANGE (BASE PLATE): –40°C to +85°C. (Optional –55°C to +85°C–full output current available over entire operating range.)

STORAGE TEMPERATURE: –65°C to +100°C.

EFFICIENCY (TYPICAL): 75% to 80% depending on model and options required.

SHORT CIRCUIT PROTECTION: All outputs are short circuit protected with automatic electronic current limiting to preset value.

OUTPUT ADJUSTMENT RANGE: All outputs are adjustable over a ± 5% range.

SEMICONDUCTOR JUNCTION TEMPERATURE: Maximum of 100°C at operating base plate temperature of +85°C. (Derating per NAVMAT P4855-1A and Mil-Std-454K).

ISOLATION RATING: The inputs, case and outputs are isolated (floating) from each other.
Input to Case: 500 VDC (on 1ø); 1000 VDC (on 3ø)
Output to Case: 50 VDC or 1.3 X E_0, whichever is greater.
Input to Output: 500 VDC (on 1ø); 1000 VDC (on 3ø)

HOLD UP TIME: 20 milliseconds @ full load & nominal line typical.

MTBF: Greater than 350,000 hours as calculated per Mil Handbook 217E (40°C ground benign environment). For extended reliability designs or other environments consult factory.

N+1 CURRENT SHARING: All units have internal circuitry that allows units operated in parallel to share load current. A single control wire is needed between supplies.

INHIBIT: Output inhibit may be achieved by a TTL low signal applied to the control terminal.

TRANSIENT PROTECTION: Input surge & spike protection is provided which meets requirements of Mil-Std-704, Mil-Std-1399, Sect. 300A and RTCA Spec. DO-160C.

ENVIRONMENTAL SPECIFICATIONS

TEMPERATURE RANGE: Operating Temperature: –40°C to +85°C
Baseplate Temperature: Optional –55°C to +85°C range
Non-Operating Storage Temperature: –65°C to +100°C.

HIGH TEMPERATURE: Per Mil-Std-810, Method 501, Procedure II.

LOW TEMPERATURE: Per Mil-Std-810, Method 502, Procedure I.

TEMPERATURE-ALTITUDE: Per Mil-Std-810, Method 504, Procedure I; the following details apply: –40°C to +85°C (and –55°C to +85°C) at Altitude: Sea level to 70,000 ft.

HUMIDITY: Per Mil-Std-810, Method 507, Procedure I.

ACCELERATION: Per Mil-Std-810, Method 513, Procedure I and II, at a test level of 14 G.

VIBRATION: Per Mil-Std-810, Method 514, Procedure I, at a test level of 15 G.

SHOCK: Per Mil-Std-810, Method 516, Procedures I, II, III, V, and VI at a test level of 40 G.

PA/PB SERIES OPTIONS

OPTION LETTER	DESCRIPTION
E	**Extended Input Voltage**–92-138 1ø VAC 92-138/160-265 3ø VAC For other ranges please contact factory with your requirements. Input range may affect unit efficiency and/or maximum output current.
H	**Helicoil Mounting Inserts**–Locking or free running Helicoil inserts are provided (Specify 6-32 or 8-32.)
S	**Stud Terminals**–8-32 threaded studs are provided for input and control terminations–1/4″-28 threaded studs are provided for output terminations. **Note 1:** Units come standard with turret style solder terminals and Teflon insulation on all input & control connections as well as 155V & 270V output connections. Standard 24V, 28V & 48V output connections are 1/4″-28 threaded studs. **Note 2:** Maximum torque of retaining nut–15 inch-pounds for 8-32 studs; 25 inch-pounds for 1/4″-28 studs.
T	**Extended Temperature Range**–-55°C to +85°C. Contact factory for other requirements.
V	**Output Overvoltage Protection**–120% ± 10% of nominal E_0 electronic shutdown type.
F	**Filtering (Standard on PB Series)**–Provides EMI/RFI protection to Mil-Std-461C including CE01, CE03, RE02, CS06 as well as RTCA Spec. DO-160C.
U	**Unity Power Factor Correction (Standard on PB Series)**–Active circuits provide greater than .99 power factor and total harmonic distortion in compliance with IEC-555-2 & Mil-Std-1399 Sec. 300A.
I	**Inrush Soft Start**–Unit limited to 20A peak current at turn-on.
TS	**Thermal Shutdown**–Power Supply will shut off during over-temp condition and automatically reset within specified range.

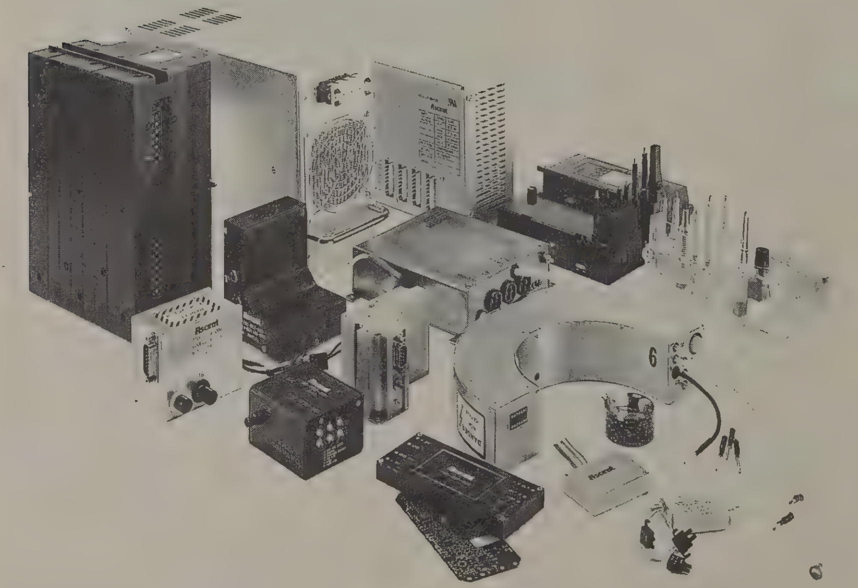
ISO CERTIFIED 9000

INTRODUCTION

With over 20 years of experience in the industry, and over 500 field proven custom power supply products for commercial, medical, military, and aerospace applications, Ascent Power Technology Inc. is the name to know.

Ascent is the proven performer that many of the most demanding Fortune 500 electronics companies turn to for their custom high reliability switching power conversion needs. Working as a strategic partner with your engineers, we can develop a cost effective high reliability product to precisely meet your needs.

Our commitment to quality is evident in our compliance to ISO 9000 standards. Our facility is now fully certified to ISO 9002 and has been approved by all of the major safety/regulatory agencies (UL, CSA, VDE/TUV, BABT).



- Commercial
- Medical
- Industrial
- Military
- Aerospace

For all your custom power switching needs, Ascent Power Technology Inc. is the name to know...

LOW VOLTAGE AC-DC AND DC-DC CONVERTERS

Available Features:

- 1W TO 3KW POWER RANGE
- SURFACE MOUNT/HIGH DENSITY (50W/in^3)
- HIGH MTBF/LOW DPPM
- POWER FACTOR CORRECTION (IEC-555)
- LOW PROFILE (20W TO 200W)
- PARALLEL (N+1) REDUNDANCY
- HOT PLUGGABLE
- PROGRAMMABLE OUTPUTS
- LOW NOISE (<5mV p-p) OUTPUTS
- HIGH EFFICIENCY
- UNIVERSAL AC INPUT
- FCC/VDE LEVEL B EMI COMPLIANCE
- WIDE OPERATING TEMP. RANGE (-55°C TO 85°C)
- SYNCHRONIZATION

Applications:

Commercial
- WORKSTATIONS/DPE EQUIPMENT
- LASER PRINTERS
- PHOTOCOPIERS/FAX

Medical (UL-544/IEC-601)
- X-RAY SYSTEMS
- ULTRASOUND SYSTEMS

Industrial
- TELECOMMUNICATIONS
- INDUSTRIAL CONTROLLERS
- RF/VIDEO AMPLIFIERS
- SCIENTIFIC INSTRUMENTATION

Military
- AVIONICS
- DEFENSE SYSTEMS
- DISTRIBUTED POWER

HIGH VOLTAGE AC-DC AND DC-DC CONVERTERS

Available Features:

- UP TO 100KV
- SURFACE MOUNT AND HIGH DENSITY
- HIGH EFFICIENCY
- HIGH RELIABILITY
- LOW EMI AND RFI
- MULTIPLE OUTPUT VOLTAGES
- LOW NOISE OUTPUTS
- CONSTANT VOLTAGE OR CONSTANT CURRENT OPERATION
- WIDE INPUT RANGE
- WIDE OPERATING TEMP. RANGE (-55°C TO 85°C)
- OVERVOLTAGE PROTECTION
- FOLDBACK CURRENT LIMITING
- REMOTE ENABLE
- SHORT CIRCUIT PROTECTION
- REVERSE POLARITY PROTECTION

Applications:

Commercial
- LASER PRINTERS
- PHOTOCOPIERS/FAX
- HI-RES MONITORS

Medical (UL-544/IEC-601)
- X-RAY/BI-PLANE IMAGING SYSTEMS
- BLOOD ANALYZERS
- DEFIBRILLATORS
- CHROMATOGRAPHY SYSTEMS

Industrial
- LASER ALIGNMENT SYSTEMS
- ELECTRONICS BALLASTS
- AIR PURIFICATION SYSTEMS

Military
- CATHODE RAY TUBES
- AVIONICS COCKPIT DISPLAYS

CUSTOM PLASTIC OR METAL ENCLOSURES AVAILABLE ON ALL PRODUCTS

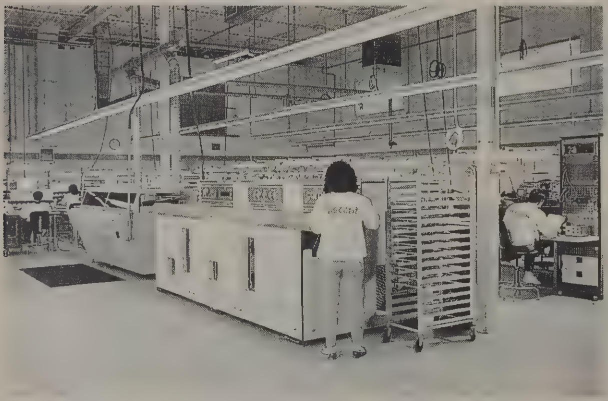
ENGINEERING

CAD/CAE

- PSPICE SIMULATION/CIRCUIT ANALYSIS
- CAD/CAE
- CONTINUED R&D PROGRAMS
- DESIGN FOR MANUFACTURABILITY
- STRINGENT COMPONENT DERATING CRITERIA USING NAVMAT-P-4855 AND BELLCORE GUIDELINES
- MTBF CALCULATIONS (PER MIL-HDBK-217)
- ADVANCED DESIGN TOPOLOGIES
- EXTENSIVE QUALIFICATION TESTING
- **UL**, **CSA**, **VDE**, **BABT** APPROVALS

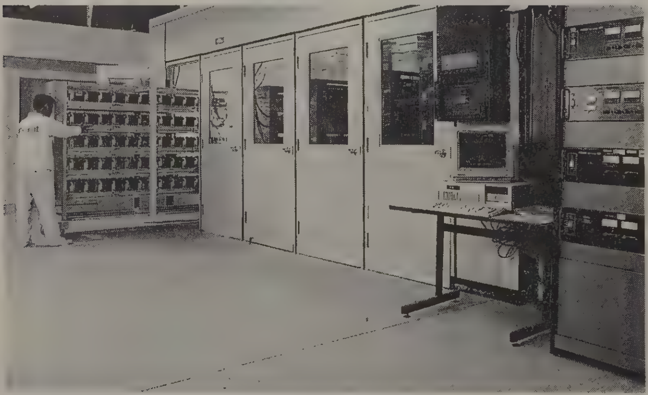
MANUFACTURING



EXTENSIVE PRODUCTION CAPABILITIES

- AUTOMATED LEADED AND SMD ASSEMBLY
- HIGH VOLTAGE ENCAPSULATION
- AUTOMATED MAGNETIC COIL WINDING
- AUTOMATED TEST FOR HIGH/LOW VOLTAGE
- COMPUTER CONTROLLED BURN-IN
- HIGH VOLUME (ISO-9002)
- LOW VOLUME (MIL-STD-2000)
- J.I.T. AND KANBAN DELIVERY

QUALITY



ENVIRONMENTAL STRESS SCREENING

- TOTAL QUALITY CONTROL (TQM)
- STATISTICAL PROCESS CONTROL (SPC)
- ISO 9002 **CERTIFIED** FACILITY
- MIL-I-45208/AQAP 4 (MILITARY) COMPLIANCE
- ADVANCED MRP-II SYSTEM
- EXPERIENCED PROGRAM MANAGERS
- EDI AND E-MAIL
- AUTOMATED TEST FOR HIGH AND LOW VOLTAGE

Quality, Ascent's true power!

MINIGLOSSARY
POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

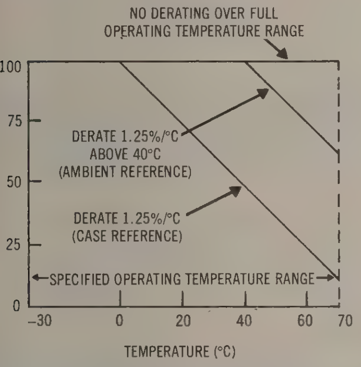


Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

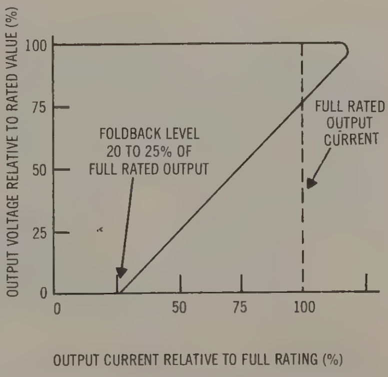

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

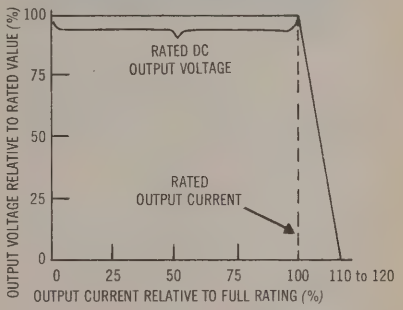

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(–) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

NEW! PUP30 Series Available November 1993

15–150 Watt AC/DC Power Supplies and DC/DC Converters

- Single, Dual, and Triple Outputs
- Compact Size/Light Weight
- 500 VDC Input/Output Isolation
- High Efficiency—80kHz Switcher

- Low Cost
- Fully Enclosed
- 8 Input Ranges

- No Minimum Load
- Same Size AC or DC Input

Series	Output Power
ACA/DCA	15 Watts
ACB/DCB	25 Watts
ACC/DCC	50 Watts
ACE/DCE	100 Watts
ACF/DCF	150 Watts

Input Voltage Ranges
90–132 VAC
180–264 VAC
12 volt nominal (9–16 VDC)
24 volt nominal (19–32 VDC)
48 volt nominal (38–63 VDC)
110 volt nominal (85–140 VDC)

HIGH VOLTAGE POWER SUPPLIES 100V—300kV, 100mW—60kW

HV Modules for High Resolution CRT Displays

836 Series: 30W rating

2836 Series:
Input 24V dc nominal (other ranges available)
Main output + 25kV, 1.2mA (adjustable + 22kV to + 28kV), G2 200 to 800V dc, DF 400V dc, Focus 5.1kV to 8.1kV

787 Series: 10W rating
Main output + 2kV to 5kV, 2mA ➪
+ 10kV to 20kV, 500μA

Features:
- Excellent response to pulsed loads
- Multiple outputs—can be tailored to suit CRT specification
- Dynamic focus available as an option
- Current limit protection
- Protection against tube flashover
- 2836 with UL, CSA, VDE approval

Miniature High Voltage Modules *(regulated output)*

390 Series: 5W rating
1.5V, 3mA ➪ 3.5kV, 1.5mA

590 Series: 5W rating
5kV, 1mA ➪ 10kV, 500μA

2590 Series: 10W rating
1kV, 10mA ➪ 10kV, 1mA

Features:
- Input 12V or 24V DC nominal
- Regulated output
- Positive and negative output versions
- Remote control option (0 to + 10V)
- Flashover protected
- Connections by flying leads
- Suitable for chassis or pcb mounting
- Fully encapsulated
- Metal case—fully screened

HV Modules for Photomultipliers *(regulated output)*

2478 Series: 10W rating
1kV, 10mA ➪ 2kV, 5mA

2479 Series: 7W rating
1.7kV, 4mA ➪ 3.5kV, 2mA

Features:
- Input 24V dc nominal
- Output adjustable 20-100% of nominal
- Remote programming
- Good line and load regulation
- Ripple 5mV pk/pk
- Positive and negative output versions

3478 Series: 1.5W rating
1.5kV, 1mA to 2.5kV, 0.5mA

Features:
- Input 15V dc
- Remote control (0 to + 10V)
- Pins for pcb mounting

3479 Series: 1.7W rating
300V, 2mA ➪ 1.7kV, 1mA

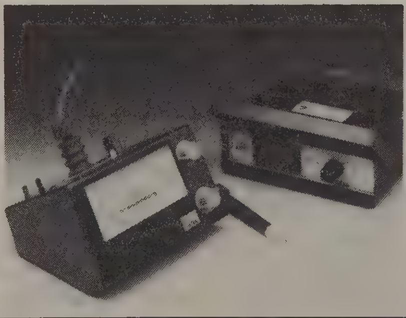
- 12V and 24V dc nominal
- Remote control (0 to + 10V)
- Low ripple and tempco
- Excellent line and load regulation
- Metal cased, for pcb or chassis mounting

High Voltage Meters *(with optional HV probes)*

Model 88:
Analogue DC High Voltage Meter 0-30kV

Model 109:
Analogue DC High Voltage Meter 0-40kV

Features:
- Battery powered
- Positive or negative reading (switched)
- Drain from test circuit < 1μA
- Accuracy better than 1% of f.s.d..
- Precision recorder output



Model 139:
Digital DC High Voltage Meter, dual range 0-20kV, 0-40kV

Features:
- Battery powered
- Switched ranges 0-20kV, 0-40kV
- Auto polarity
- Drain from test circuit < 2μA
- Resolution 10V (20kV), 20V (40kV)
- Accuracy 0.3% at 20kV
- Precision recorder output

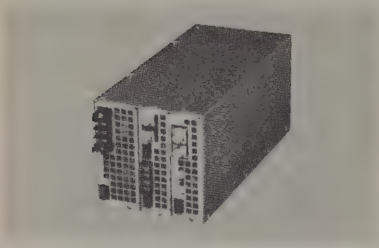
HIGH POWER

SPECTRUM SERIES

500 to 2000 WATTS SINGLE/MULTIPLE OUTPUTS



Spectrum is the first full-featured high power product with a PFC front end as a standard input. It is available in both single and multiple output versions and offers a very compact footprint. The 1200 watt package measures 5″×5″×11″, and the 2000 watt package measures 5″×8″×11″.

FEATURES

- Power factor correction
- IEC 555-2 compliance
- Current share on all outputs
- Remote sense on all outputs
- Overload protect on all outputs
- Voltage adjustment on all outputs
- Margining on all outputs
- Power fail signal
- Global DC output good
- DC Good signal and status indicator LED on all outputs
- Global and individual module inhibits
- Level B EMI filtering
- 3 year warranty

FEATURES
- 2000 watts in 5″×8″×10″
- Three phase power factor correction to .9
- Three input models: three phase, single phase, DC
- Single wire paralleling
- Current monitor
- Internal EMI filter available: FCC and VDE “A”
- Phase loss protection
- Superior DC output interconnect
- UL/CSA/TUV

FEATURES
- Proven design
- One to four outputs from 2V to 28V
- Overvoltage protection
- Remote sense
- Inhibit function (logic ‘1’)
- Automatic thermal overload protection
- Overload protection
- Brownout protection
- Two year warranty
- 100% computer tested

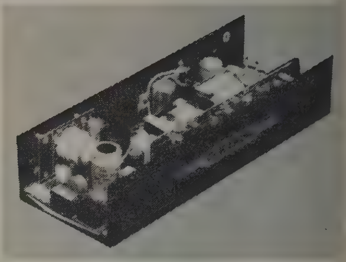
Output #1 is main output

POWERTEC 225 TO 300 WATTS

Series 29D



FEATURES

Series 29D

- 5 to 24 VDC outputs
- VDE, IEC, CSA, UL Safety Specs
- Isolated and Floating Outputs
- Automatic Current-Sharing*
- Internal Isolation Diodes* (option)
- Field Switchable 115/230 VAC
- Over Voltage Protection*
- Remote Sense*
- Five D.C. Outputs
- Automatic Thermal Shut-Down
- Remote Inhibit* – Logic High or Low
- Alarm Circuitry for "Input Power Fail" and "Output Good" Signals
- N+1 Redundancy
- Automatic Pre-Load (option)
- 100% Dynamic Burn-in: AC Cycled On and Off, Full Load to No Load to Short Circuit Cycling

*Provided on fully regulated outputs #1-#4

PowerSystems Enclosures

- Hot Plug-In/Replacement
- Holds up to Six 29D supplies
- Up to 1800 Watts
- User Configurable Backplane

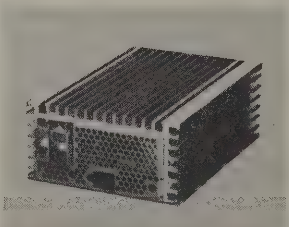
ASTEC 300-350 WATTS

Single/multiple output Switch mode power supplies "Lightning" ALS Series

NEW



FEATURES

- Universal input
- >75% efficiency
- >3.3 Watts per inch³
- 200% self-protecting peak loading on two aux channels
- 20 ms full load holdover storage
- All outputs fully floating
- Overvoltage protection
- Overload protection
- Remote sensing
- Inhibit function
- Power fail signal
- Margining on main output
- Thermal overload protection
- Soft start circuitry
- Repositionable mounting holes

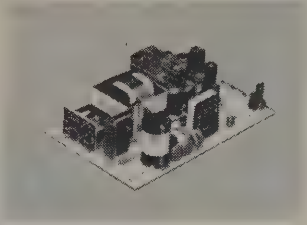
LOW/MEDIUM POWER RACKS

ACDC 40 TO 200 WATTS

RB SERIES



FEATURES

- Universal input
- 0° to 50°C full power operation
- 1 year warranty
- 100% computer final tested. Test data sheet furnished with each unit
- Installation and specification data included with each unit
- EMI filter
- Remote sense
- Short circuit protection
- Overvoltage protection
- UL, CSA, IEC certification

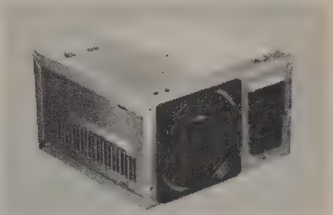
ASTEC PC SERIES 85 TO 300 WATTS

MULTIPLE OUTPUT SWITCH MODE POWER SUPPLIES



FEATURES

- High efficiency
- Built-in EMI filter
- UL, CSA, VDE approvals
- 100% burn-in
- Vacuum impregnated transformers
- Overvoltage protection
- Short circuit protection
- Dual input voltage (115/230 VAC)
- Compatible with PC applications
- Built-in fan, power switch, voltage select switch, cable harness or edge connector, AC receptacle, and convenience outlet
- Universal input on some models

HOT PLUG RACKS

HIGH POWER

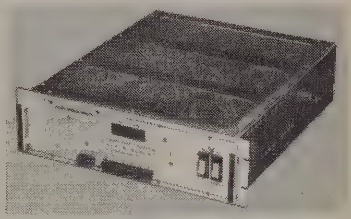
FEATURES

- Fault tolerant system
- No system down time
- Internal paralleling of outputs
- Automatic current sharing
- Internal isolation diodes
- Front panel status LED's
- Adjustment pots
- TTL alarm circuitry
- Easy connect/disconnect
- Remote sense on all outputs
- 500 to 1000 watts per module
- AC input with P.F.C.
- Up to six isolated outputs
- 48 Vdc input available
- Output meters available

Hot Plug Racks (HPR) from Astec offer high power hot plug capability for critical systems. Each HPR provides up to 3000 watts total. Three separate plug-in modules are internally paralleled and will automatically current share for load distribution. This system is designed for easy installation and maintenance. Defective modules can be replaced with no system down time. Each module can provide 500 to 1000 watts of power, which allows for cost effective system upgrades.

RACKS

RPS SERIES



The Astec RPS (Rack Power System) Series incorporates standard power supplies into RETMA enclosures to create custom power systems. Three standard RETMA configurations are available: 1) 5¼″×19″×21″, 2) 5¼″×19″×14″, and 3) 7″×19″×21″. Customized enclosures are also available to meet unique specifications. A wide range of standard options offers the benefit of maximum design flexibility. Astec provides full mechanical and electrical assembly system testing.

SPECIFICATIONS

Each Rack Power System (RPS) can provide up to twelve individual outputs from Astec's broad line of linear and switching power supplies. Your specific connectors and terminations can be incorporated into a custom rack design. Engineering support is available to assist you in specifying your RPS requirements.

BASIC RACK ASSEMBLY

RPS1-P3-115-XXX
- 5¼″×19″×14″ Rack
- Front panel with a lighted circuit breaker and handles
- The suffix 'XXX' denotes all customized features in your Rack Power System. Contact the factory for assistance.

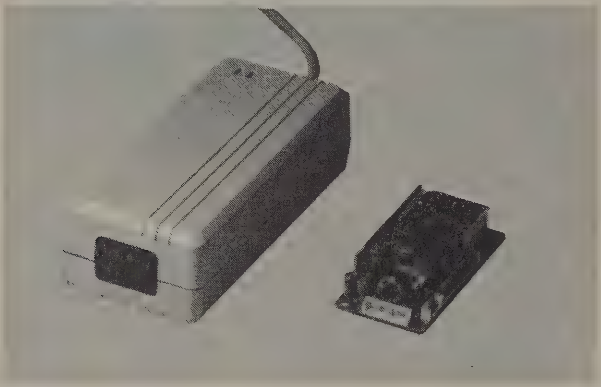
LAPTOP/NOTEBOOK SERIES

NOTEBOOK AND LAPTOP SERIES

The latest power suppy systems for today's smallest portable computers and instruments are now available through Astec Standard Power!

The Notebook and Laptop Series produce flexible, reliable power by combining an ultra-compact, versatile AC adapter with advanced DC/DC conversion technology.

NOTEBOOK SERIES



FEATURES

- High efficiency
- Ultra small size
- DC/DC conversion with 5V, 12V, –26V, CCFT outputs
- Multi-level battery charger
- Level B EMI filter
- Fully protected for overload and short circuit
- Wide-range AC input
- Fully regulated AC input
- Many status and control signals

DISTRIBUTED POWER/LINEARS

AMPSS

AM80 Series
200 Watt Modules

The AMPSS AM80 Series of DC/DC modular power supplies is a family of highly efficient and fully featured modules with high power density operating at a 1 MHz fixed frequency.

This series offers high performance DC/DC power supplies in a low profile module with multiple safety isolated low-voltage secondary-side control and status functions. The series is aimed at a wide range of power system applications such as distributed power including N+1 redundant systems and modular power supplies.

The integration of a user-friendly linear programming technique, located on the safety isolated low-voltage secondary-side, greatly simplifies the interfacing of control, monitoring, and status signals involving applications such as multi-paralleled modules in distributed power systems.

FEATURES

- 1 MHz fixed frequency
- 11 safety isolated low voltage secondary-side control and status functions
- High efficiency −84% typical
- 100°C maximum baseplate temperature at full power without current derating
- No load operation; no minimum load or pre-loading required
- Unique ALP (Astec Linear Programming) control which is linear with external programming resistance or voltage
- Programmable output voltage
- Programmable current limit
- Programmable OVP margin automatically tracks output voltage setting
- Module to module current sharing with single wire connection
- TTL compatible enable-inhibit control
- Module output current monitor signal
- Module internal temperature monitor signal
- Remote sense • Floating output
- Output ripple and noise <1% typical
- Operating temperature −20°C to +100°C
- Multiple paralleled output pins for enhanced connection reliability

ACDC 15 TO 150 WATTS

SINGLE/MULTIPLE OUTPUT LINEAR POWER SUPPLIES ECV/ETV SERIES

FEATURES

- 100% Vacuum varnish impregnated transformers
- Cross references with all manufacturers
- Installation instructions/specification sheet with each unit
- World wide voltage taps. AC input nominal, 100/117/220/230/240VAC field selectable
- Remote sense
- Overload protection
- Overvoltage protection
- 0° to 50°C operating temperature
- Cooling – natural convection
- UL, CSA certification

Board-Mounted Power Modules

AT&T
FE150A
DC-DC Power Module
48V 3.7A IN
MADE IN USA

AT&T's FE Series Board-Mounted Power Modules are a new and fast-growing family of dc-dc converters manufactured at AT&T's one million-square-foot facility in Dallas, Texas.

AT&T Power Range 0.5 W to 200 W

AT&T board-mounted power modules offer low-profile, high-power-density, off-the-shelf, dc-dc power conversion in module sizes of 0.5 W to 200 W. Known for reliability, AT&T board-mounted power modules feature a variety of design options with typical power efficiencies in excess of 80%.

Distributed Power Architecture for the '90s

Developed by AT&T Bell Laboratories to reduce the high first-cost of providing power and ensuring system reliability, distributed power architecture allows you to partition your system load into separate and distinct service groups, each with its own power conversion unit. Power modules are placed precisely where power conversion is needed. Distributed power architecture eliminates the need for both a large, multioutput power supply and power supply redundancy to gain system reliability. AT&T board-mounted power modules allow your computer and telecommunications applications to keep pace with power conversion trends throughout the '90s.

Features

- Electronic on/off
- Remote sensing
- Overcurrent protection
- Overvoltage protection
- Parallel operation with forced load sharing
- Isolated and nonisolated models
- Input/output filtering
- External synchronization
- Well-regulated output voltage
- Wide operating temperature ranges
- Three-year warranty

Applications

- Telecommunications
- Data processing systems
- Industrial electronics
- Test and measurement systems
- Uninterruptible power systems
- Aeronautics
- Robotics

Data Sheets Fast!

Full technical details on all products are available in data sheet and catalog form via mail or fax.

High-Power Product Matrix (50 W to 150 W)

Features

- UL recognized (some models in submittal stage)
- Within FCC Class A
- Operating case temperature up to 90 °C
- Calculated MTBF of over 1 million hours
- Parallel for load sharing or true N+1 redundancy
- Hot insertion/extraction
- 33 W per cubic inch
- Remote sense
- Remote ON/OFF
- Current limit, overvoltage protection
- Output voltage adjust

Input: 90-130 VAC/47 to 63 Hz or 90-264 VAC/47 to 63 Hz

Operating Temperature: 0° to +50°C

Transient Response: 500 microseconds for 50% load change typical.

Protection: Overcurrent and short circuit protected, 5V overvoltage crowbar, automatic resetting from overcurrent.

EMI: Meets FCC Docket 20780 Class B and VDE 0871 Class B.

Enclosure: High impact resistant molded lexan plastic.

Weight: 13–20 oz.

Hold-up Time: 20–120 MS

Storage Temperature: −30 to +85°C

Safety Agencies: UL, CSA, TUV, B.S.I., IEC950

Warranty: 1 or 2 years

Short Circuit Protection: Indefinite at 50°C

Relative Humidity: 5% to 80% non-condensing

External transformers, battery chargers, linear and switching power supplies provide several advantages over conventional built in power sources as listed below:

FEATURES

- Wall plug-in and desktop styles
- Single and multiple output models available
- UL Listed safety agency approved
- Impact resistant Lexan thermoplastic enclosure
- AC blades zinc plated solid brass with tapered tip
- Available with input and/or output cord(s) and connector
- One or two year Warranty
- Sealed construction
- Private label hot stamping available
- Some available with 230V/50 Hz input for European use

BENEFITS

- Eliminate UL considerations because hazardous voltages are kept out of your product
- Increase space for other components in your product
- Increase aesthetic appearance and portability by reducing the size and weight of your product
- Keep power source heat out of your product for increased life
- Tamperproof power source
- Reduce design time for your product
- International uniformity of your product

BATTERY CHARGERS

Battery chargers for Gel-Cel and Sealed Lead Acid batteries are available in 6, 12 and 24 volt charge models for fixed voltage (float) and automatic fast charge applications. NiCd chargers also available.

FLOAT STYLE

PLASTIC ADAPTER POWER SUPPLIES

FEATURES

- 90-260 VAC UNIVERSAL INPUT
- DPDT ON/OFF SWITCH (VDE APPROVED)
- UL LISTED, CSA CERTIFIED, TUV LICENSED
- CHOICE OF AC & DC CABLE (AC optional)
- SAFETY AGENCY APPROVALS

All models except LIN20-5120 have the following agency approvals:

UL CSA GS

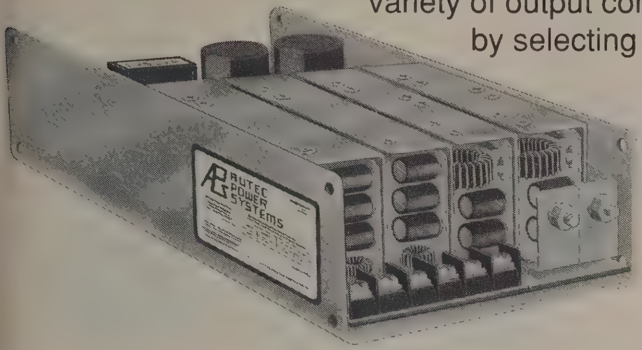
MPS MID-POWER SERIES

250 WATT 350 WATT 450 WATT

The MPS Series of Mid-Power Power Supplies is a modular power system which can be custom configured by inserting up to 4 DC output modules into a main chassis. A wide variety of output combinations, from 1 to 8 outputs, is available by selecting the appropriate combination of modules.



SYSTEM FEATURES INCLUDE:

- Universal Input
- UL CSA TUV
- FCC/VDE Level B EMI
- Inrush Limiting
- Remote Sense
- Adjustable Output Voltage
- Isolated Outputs
- Paralleling
- Output Inhibit
- Overvoltage/Overcurrent Protection

All models require forced air cooling for full power operation. Fan-In-Cover option available.

MPS 450

450 WATTS CONTINUOUS OUTPUT POWER

OUTPUT MODULES AVAILABLE FOR MPS 450:

OUTPUT VOLTAGE	OUTPUT CURRENT CONTINUOUS/PEAK	NUMBER OF SLOTS OCCUPIED
2V	25A / 35A	1
2V	70A / 90A	3
3.3V	25A / 35A	1
3.3V	70A / 90A	3
5V	25A / 35A	1
5V	70A / 90A	3
12V	10A / 16A	1
15V	8A / 14A	1
24V	5A / 8A	1
30V	4A / 6A	1
±5V (Dual)	3A (Each Output)	1
±12V (Dual)	3A (Each Output)	1
±15V (Dual)	3A (Each Output)	1
±24V (Dual)	2A (Each Output)	1

MPS 350

350 WATTS CONTINUOUS OUTPUT POWER

OUTPUT MODULES AVAILABLE FOR MPS 350:

OUTPUT VOLTAGE	OUTPUT CURRENT CONTINUOUS/PEAK	NUMBER OF SLOTS OCCUPIED
2V	25A / 35A	1
2V	50A / 70A	2
3.3V	25A / 35A	1
3.3V	50A / 70A	2
5V	25A / 35A	1
5V	50A / 70A	2
12V	8A / 12A	1
15V	6A / 10A	1
24V	4A / 6A	1
30V	3A / 5A	1
±5V (Dual)	3A (Each Output)	1
±12V (Dual)	3A (Each Output)	1
±15V (Dual)	3A (Each Output)	1
±24V (Dual)	2A (Each Output)	1

MPS 250

250 WATTS CONTINUOUS OUTPUT POWER

OUTPUT MODULES AVAILABLE FOR MPS 250:

OUTPUT VOLTAGE	OUTPUT CURRENT CONTINUOUS/PEAK	NUMBER OF SLOTS OCCUPIED
2V	15A / 20A	1
2V	30A / 40A	2
3.3V	15A / 20A	1
3.3V	30A / 40A	2
5V	15A / 20A	1
5V	30A / 40A	2
12V	5A / 8A	1
15V	4A / 6A	1
24V	2.5A / 4A	1
30V	2A / 3A	1
±5V (Dual)	1.5A (Each Output)	1
±12V (Dual)	1.5A (Each Output)	1
±15V (Dual)	1.5A (Each Output)	1
±24V (Dual)	1.5A (Each Output)	1

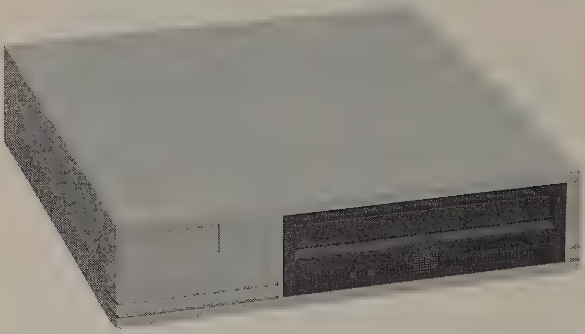
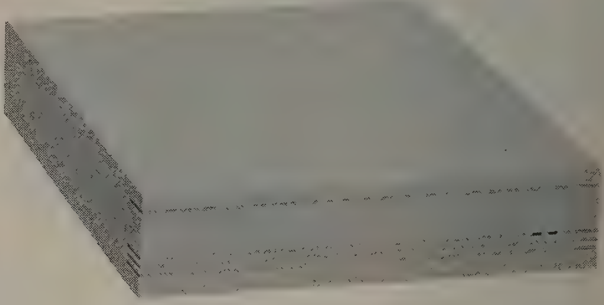
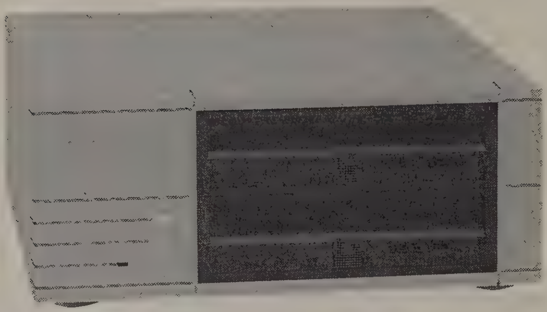
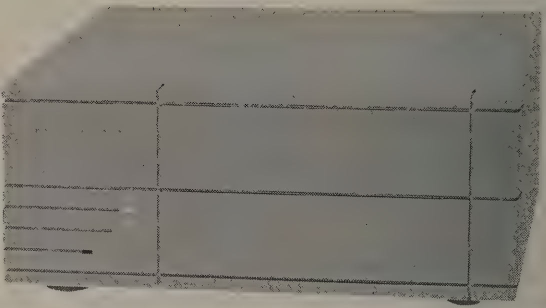
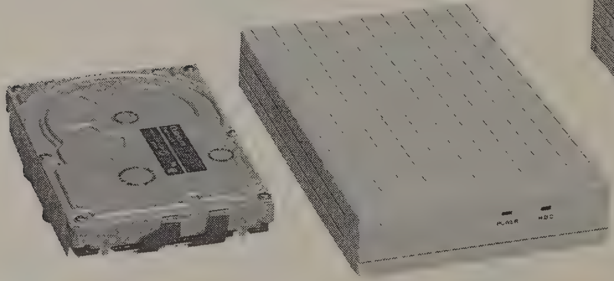
AUTEC'S ENCLOSURE PRODUCTS

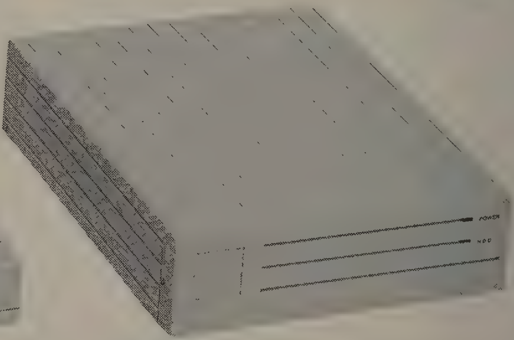












DESCRIPTION

AUTEC manufactures a wide assortment of external drive enclosures. All enclosures come complete with all internal cabling (*AC, DC, SCSI cables*). On/Off switch, AC input filtering, SCSI address ID switch, universal input power supply, LED's and mounting hardware. Removable media (*e.g. tape drives*) are accomodated by simply ordering an open front bezel. As an option, numerous standard external SCSI cables are available (*25:50, 50:50, 25:25 & SCSI II*). Custom sheet-metal, bezels and cables can also be quoted.

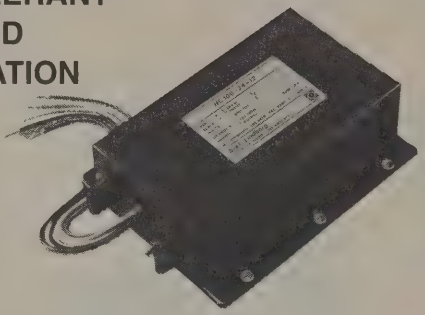
DC TO DC CONVERTERS...ASK AVEL

RUGGED CONSTRUCTION
MOISTURE RESISTANT
VIBRATION TOLERANT
FULLY ISOLATED
EASY INSTALLATION
VERY LOW RFI



Avel's HC range of fully isolated power supplies were designed specifically for the mobile market. A high quality unit that will tolerate harsh environmental conditions including marine applications. Suitable for any equipment requiring a well regulated 12V dc or 24V dc supply and/or where radio frequency emission needs to be kept to a negligible minimum.

Two basic versions are available - the HC100 giving up to 140 watts of power and - the HC 250 for up to 250 watts of power. Both types are available with either 13.8V dc or 24.0V dc outputs.

All units are supplied with a remote low power switch, which eliminates the need for a high current switch or a relay.

TYPE HC100	HC100/24/12	HC100/24/24	HC100/48/12	HC100/48/24	HC100/110/12	HC100/110/24

SWITCHING POWER SUPPLIES FROM Basler Electric

The Electronic Product Group of Basler Electric designs and manufactures multi-output AC/DC Switching Power Supplies ranging from 200-1000 watts. Standards, modified standards, and customs are available to meet your power supply needs. Basler Electric power supplies emphasize quality, reliability, and high performance.

Power Factor Corrected Power Supplies Meeting IEC555-2

New! 300 Watts

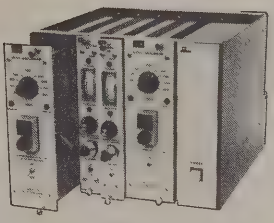
NOTES:
1. Model 362/5 is a dual output unit having one 0 to ±2,000V output and one 0 to ±5,000V output.
2. Output polarity: P=both positive, N=both negative, X=one positive, one negative.
3. 342A, 345A: Double output current is available with increased input.

Size: D: Double width:
2.7″W×8.7″H×9.7″D (69×221×246mm)
S: Single width:
1.35″W×8.7″H×9.7″D (34×221×246mm)

CV/CL: Constant Voltage Current Unit
CV/CC: Constant Voltage Constant Current

• Standard
A - Analog
D - Digital

SPECIFICATIONS ALL MODELS	
Regulation	0.001% line, 0.002% load
Stability	0.01%/hr., 0.02%/8 hrs.
Temp. Coeff	50ppm/ºC, 0 to +50ºC



- Models for all Detector Types
- Single and Dual Output Units
- Reversible Polarity
- High Stability
- ac Line Powered & dc Bin Powered

Bertan offers a complete line of high voltage power supplies in NIM configuration. Modules are available in single or dual width, single or dual output, and with ac or dc input. All models have reversible polarity (except 10 kV units), remote programming, arc and short circuit protection.

The Series MWPC supplies are designed specifically for multiwire proportional counter applications and include sensitive monitors, precision voltage control, fast and slow overcurrent detection.

Bertan also provides NIM mini-bin enclosures for convenient benchtop mounting of single or dual width NIM modules requiring ac or dc power.

- **Constant Voltage/Constant Current**
- **Auto Crossover**
- **Reversible Polarity**
- **IEEE-488 Interface**

These precision switch mode power supplies have output voltages ranging from 1 to 75 kV. They feature constant voltage and constant current with automatic crossover. For safety and reliability, all models include remote interlock, slow start and power interrupt as well as arc, short and open circuit protection. Remote programming of the power supply output voltage and output current can be accomplished with a remote analog voltage, remote resistance or with an optional IEEE-488 interface (Model 105-C488).

For dedicated remote applications, units are available without front panel controls, digital metering and operating mode indicator lights (Series 106).

Input: 115/230 Vac, 50-60 Hz • **Voltage Regulation:** ±0.02% for ±10% line change, ±0.04% for NL/FL or FL/NL • **Ripple:** 0.1% of setting +0.1% of max. peak to peak • **Current Regulation:** ±0.1% for ±10% line change, ±0.2% for NL/FL or FL/NL • **Temperature Coefficient:** ±100 ppm for constant voltage, ±200 ppm for constant current • **Size:** 19″ x 5.2″ x 17″ (483 x 133 x 432mm) • **Weight:** 45.1 lbs. - **Low Ripple and Noise**

The Series 230 is a family of regulated, compact, precision high voltage power supplies, available with outputs up to 30 kV. Output polarity of all models is reversible. A 3$\frac{1}{2}$ digit LCD meter displays voltage or current (switch selectable). Automatic current limiting and arc protection assure safe, reliable operation.

REM option provides remote output voltage and current monitoring, remote interlock, and increased current limit sensitivity (25% of maximum rated output).

Input: 115/230 Vac, 50-60 Hz • **Line Regulation:** ±0.002% for ±10% line change • **Load Regulation:** ±0.01% for NL/FL or FL/NL • **Temperature Coefficient:** 100ppm per °C. • **Size:** 7.6″ x 7.5″ x 5.2″ (194 x 191 x 128mm) • **Weight:** 10.1 lbs. (4.5kg)

- **Compact high performance models up to 75 kV**
- **Constant voltage/constant current-auto crossover**
- **High efficiency switch-mode technology**
- **Remote programming and monitoring**
- **Custom designs available**

The Series 815, Series 825 and Series 835 are three families of regulated, fixed output polarity, modular, switch mode, high voltage power supplies. Output voltages from 1 to 75 kV are available at up to 100 Watts for the Series 815, up to 200 Watts for the Series 825 and up to 300 Watts for the Series 835.

The user may configure the power supply for internal control or remote operation. Remote features include voltage and current programming, voltage and current monitoring, enable/trip control and operating mode indicator.

All models require 115/230 Vac, 50-60 Hz line power input. Appropriate mating connectors for line power, remote control, remote monitor and the high voltage output are provided.

Line Regulation: 0.02% • **Temperature Coefficient:** less than 100ppm/deg C. • **Ripple:** 0.05% pk-pk for the Series 810 and 0.2% pk-pk for the Series 835. • **Size:** 5 x 5½ x 11″ (127 x 140 x 280mm) for the Series 810 and 5 x 17 x 15″ (127 x 432 x 381mm) for the Series 830.

- ac or dc Powered
- Internal Control/Remote Programming
- Voltage and Current Monitoring

The Series 602C, 603C, 605C and 606C are four families of regulated, fixed output polarity modular high voltage power supplies.

The Series 602C and 603C require a standard line input of 115/230Vac (switch selectable), 50-60Hz. The Series 605C and 606C require a +24Vdc input (+28Vdc optionally-available). The units are fully enclosed and designed to satisfy system or bench top operation.

The output voltage is controlled internally by a multi-turn potentiometer. Remote analog voltage or resistance programming is included in all models. Analog monitor outputs are also included for remote monitoring of both the high voltage output and the output current. Remote control capability includes a remote ON/OFF logic input.

Line Regulation: ±0.001% for ±10% input line change. • **Load Regulation:** ±0.002% for 0 to maximum rated output current change. • **Temperature Coefficient (0 to 50°C):** 50ppm of maximum per °C. • **Stability (after ½ hr warm-up):** 0.01% per hour; 0.02% per 8 hours. • **Local Control:** Internal multi-turn potentiometer for 0 to maximum output voltage (±0.2%). • **Remote Programming:** 0 to +5 Volt dc analog input signal. • **Voltage Monitor:** 0 to +5 Volts proportional to 0 maximum output high voltage. • **Current Monitor:** 0 to +5 Volts proportional to 0 to maximum output current. • **Current Limit:** Short circuit current limiting to less than 110% of the maximum rated output current. • **Protection:** Arc and short circuit protected, self-restoring. The input ac line is fused.

MODEL	SIZE	WEIGHTS

PRECISION HIGH VOLTAGE POWER SUPPLY MODULES

SERIES 612 20W

Model	OUTPUT		
	Voltage	Current	Ripple*
612C-200P,N	0 to 20kV	0 to 1mA	200mV
612C-300P,N	0 to 30kV	0 to 0.5mA	300mV
612C-500P,N	0 to 50kV	0 to 0.3mA	800mV

**Measured peak to peak at maximum output.*

- **High Stability**
- **Low Ripple and Noise**
- **Internal and Remote Control**
- **Voltage and Current Monitoring**

The Series 612C is a family of regulated, fixed output polarity, modular high voltage power supplies. They provide exceptional performance and are ideally suited to many specialized requirements such as CRTs, imaging, ion beam and electron beam applications.

The Series 612C require a standard line voltage of 115/230 Vac (internally selectable), 50-60Hz. The units are fully enclosed and designed for system or bench top operation. Models are available from 20kV up to 50kV.

The output voltage is controlled locally by an internal multi-turn potentiometer. Provision for remote analog voltage or resistance programming is included in all models. Analog monitor outputs are also included for remote monitoring of both the high voltage and current outputs. All units are short circuit current limited and arc protected.

Input: 115 Vac ±10% @ 1A, 50-60 Hz., 230 Vac ±10% @ 0.5A, 50-60 Hz. • **Line Regulation:** ±0.001% of max. for ±10% line change • **Load Regulation:** ±0.002% of max. for 0 to max. rated output current change • **Temperature Coefficient:** 50 ppm of max. per °C • **Stability:** 0.01% per hour; 0.02% per 8 hours • **Local Control:** Internal multi-turn potentiometer for 0 to 102% of max. output voltage • **Remote Programming:** 0 to -5 Vdc analog input signal proportional to 0 to 102% of max. rated output. The programming input impedance is greater than 10 megohms • **Size:** 4.88″ x 8.38″ x 9.75″ (124 x 213 x 248mm) • **Weight:** 9 lbs. (4.1kg)

BERTAN™
THE HIGH VOLTAGE PEOPLE™

E-BEAM, I-BEAM, X-RAY, CRT AND OEM CUSTOM POWER SUPPLIES

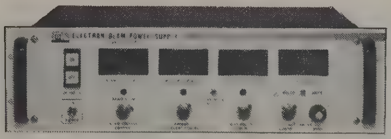
SERIES EB/IB

Model	Beam Power Supply		*Bias Power Supply	
	Voltage	Current	Voltage	Current
EB-30A	0 to −30kV	0 to 500μA	0 to −1000V	0 to 50μA
EB-50A	0 to −50kV	0 to 250μA	0 to −2000V	0 to 50μA
EB-100A	0 to −100kV	0 to 100μA	0 to −2000V	0 to 50μA
IB-30A	0 to +30kV	0 to 500μA	0 to +2000V	0 to 50μA
IB-50A	0 to +50kV	0 to 250μA	0 to +2000V	0 to 50μA
IB-100A	0 to +100kV	0 to 100μA	0 to +2000V	0 to 50μA

Series EB and Series IB are triple output high voltage power supply systems specifically developed for precision electron beam and ion beam applications. Each model contains three independently adjustable power supplies for beam acceleration, bias, and filament. The isolated bias and filament power outputs "float" on the high voltage acceleration output.

In addition to the standard models, custom designed units are available to meet specific requirements.

An IEEE-488 interface is available to provide full control and monitoring capability.



GENERAL SPECIFICATIONS	
*Filament	Voltage: 0 to 5Vdc Current: 0 to 5Adc
Input	115/230V ± 10%, 2A, 50-60Hz
Size	19″ x 5.25″ x 17″ (483 x 133 x 432mm)
Weight	55 lbs. (25kg)

**Bias and Filament "float" at Beam high voltage.*

SERIES XR

Model	TARGET	
	Voltage	Current
XR-20B	0 to 20kV	0 to 15mA
XR-30B	0 to 30kV	0 to 10mA
XR-50B	0 to 50kV	0 to 6 mA
XR-75B	0 to 75kV	0 to 4 mA

Specify target output voltage polarity when ordering.

- **Target Voltage/Current Control**
- **Front Panel/Remote Control**
- **IEEE-488 Interface Available**

The BERTAN Series XR is designed for the operation and control of filamentary X-RAY sources. All units include a regulated high voltage target power supply, an appropriately isolated filament power supply and the intelligent control circuitry to provide adjustable constant target current operation.

Custom designed units can be provided to meet specialized system, test or laboratory applications.

Input: 115/230V ± 10%, 8/4A, 50/60Hz • **Filament:** 0 to 3V @ 0 to 3A • **Size:** 19″ x 5.25″ x 18″ (483 x 133 x 457mm) • **Weight:** 48 lbs (22kg)

SERIES CRT 30/50

Model	OUTPUT		
	Voltage	Current	Ripple* pk-pk

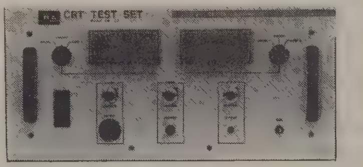
CRT-30	0 to +30kV	0 to 2mA	3V
CRT-50	0 to +50kV	0 to 1.5mA	5V
Focus	0 to +10kV	0 to 1mA	1V
G2	0 to +1kV	0 to 1mA	100mV

**Measured peak to peak at maximum output.*

- **CRT Test System**
- **IEEE-488 Interface Available**

The BERTAN CRT-30 and CRT-50 are three output high voltage power supply systems configured for versatile laboratory, CRT test, or system applications. Calibrated controls and digital displays provide independent control and monitoring of the anode, focus, and G2 voltages and currents. A wide range of options are available, including auxiliary outputs, dynamic focus, digital programming, and a comprehensive IEEE-488 Talker/Listener interface. Custom units can be provided to meet individualized system applications.



GENERAL SPECIFICATIONS	
Input	115/230V ± 10% 50-60 Hz
Regulation	.01% line, .01% load
Temp. Coeff.	100ppm/ºC, 0 to +50ºC
Accuracy	.25% +.2% of maximum
Size:	19″ x 8.75″ x 15″ (483 x 222 x 381mm)

SERIES OEM

- **Outputs up to 100kV, 1kW**
- **ac to dc, dc to dc**
- **Single or Multiple Output**
- **Microprocessor Control**
- **Analog and Digital Programming including IEEE-488**
- **Custom Interfacing**
- **UL/CSA/VDE APPROVALS**

BERTAN specializes in designing and producing custom and OEM systems with unique electrical and mechanical features. Our experienced engineering staff, equipped with the most advanced design and analytical tools, including CAD/CAM, enables us to provide cost effective, timely solutions to your particular power supply problems. Our modern 40,000 sq. ft. manufacturing facility is staffed and organized to satisfy both large and small quantity production requirements.

Complete in-house quality control accompanies each custom product. From the determination of specifications and configurations through full production and delivery, the utmost attention is given to optimizing quality and reliability while minimizing cost. Each power supply is fully burned in and tested to ensure that it meets or exceeds all performance requirements.

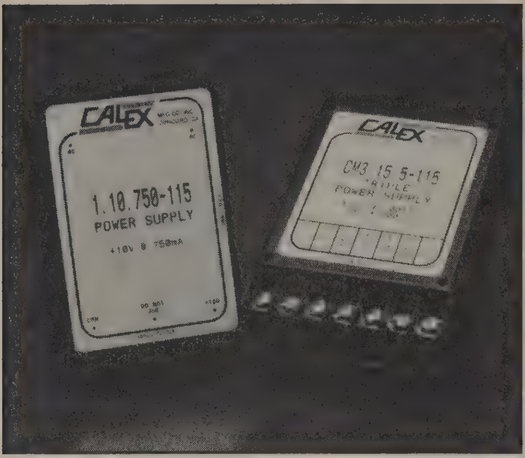
CALEX Encapsulated AC/DC Linear Power Supplies



All CALEX linear power supplies are built for excellent performance in even the most rugged environments. Their industry standard pin configurations make them ideal for use with most operational amplifiers, function modules and data conversion circuits.

COMMON SPECIFICATIONS

Input Voltage	100 ±10 VAC (add "-100" to model number) 115 ±10 VAC (add "-115" to model number) 220 ±20 VAC (add "-220" to model number) 230 ±20 VAC (add "-230" to model number) 240 ±20 VAC (add "-240" to model number)
Input Frequency Range	50 to 60 Hz
Input to Output Isolation	1000-2500 VRMS, depending on model
Input to Output Resistance	50 Megohms minimum
Capacitance	50-250 pF, depending on model
Overvoltage Protection	Standard on all 5 Volt singles except models 21-30 and 7009
Temperature Coefficient	+0.01%/°C typical
Storage Temperature	-25° to +85°C
Case Operating Temperature with No Derating	-25°C to +50°C
Short Circuit Protection	Foldback current limiting on all except models 21-12, 21-30 and 22-40, which have constant current limiting
Mounting Kits	Available for the PC board mountable cases

5 YEAR WARRANTY

SWITCHING POWER SUPPLIES

FEATURES/BENEFITS

- All products are warranted to be free of defects in materials and workmanship for a period of one year
- Custom and standard products
- Many models are available off-the-shelf for immediate delivery
- Engineering and manufacturing capacity to support major OEM programs
- 0°-70° operating ambient
- 75% efficiency typical
- All outputs are rated for nominal and peak current
- All models are rated for convection and forced air cooling
- Accommodates high peak drive requirements
- AC input provisions
  - —Power Factor Correction
  - —90-132/180-264 VAC, 37-440 Hz
  - —Jumper relocation for VAC range selection
  - —Input surge current limited
  - —Brown out protected
  - —Autoranging
- DC output provisions
  - —Complete overload protection
  - —Overvoltage protected
  - —Reverse voltage protected
  - —Low noise outputs
  - —High hold-up time
  - —Current sharing

CHEROKEE INTERNATIONAL, INC.
SWITCHING POWER SUPPLIES

OPTIONS

- A) Remote On/Off
- B) Power Fail
- C) Thermal Shut Down
- D) EMI/Safety Cover
- E) Not Standard (Special per Series)*
- F) Wire for 230 VAC
- G) 115/230 VAC Remote Selection
- H) "L" Chassis Substitution for "U" Chassis
- J) AC Input in Same Side as DC Output
- K) ¼-20 Studs in lieu of Terminal Block on Output 1 (QX5 and QX6 only)
- L) ¼-20 Studs are not Applicable on Output 1 (QS3 and QS4 only)
- M) Internal VAC range Selection (QC3, QX9, QX10)
- N) Fan Output (QX5, QX6, QX9, QX10)
- P) Under Voltage Protection (QX9)
- R) Reverse Remote On/Off
- S) Reverse Power Fail
- T) Horizontal Output Studs (QS5-6)
- U) Fan at end, not top (QS6)

NOTES

1) UL Recognized, CSA Certified
2) TUV Approved
3) Fully compliant with FCC and VDE (Level A) standards for EMI
4) All EMI standards met with economical external filter
5) Increased output power can be obtained by appropriate heat sink mounting

SWITCHING POWER SUPPLIES

INTRODUCING! THE QD FAMILY/ HIGH FREQUENCY SWITCHERS

- **Power Factor Corrected**
- **Proprietary "Cascode" Technology combines the advantages of MOSFET speed and BiPolar reliability.**
- **Mag Amp auxiliaries for efficient, well regulated, high current outputs**
- **All outputs can be paralleled for load sharing or N+1 redundancy.**
- **Autoranging (115-230 VAC Selection) is available on all models.**
- **UL, CSA and TUV approvals in place for most models. Other models are pending. Consult factory for status.**
- **Cherokee's most efficient products: 80% typical.**

NEW STAND ALONE POWER FACTOR CORRECTION UNITS

Power Output: 1000 Watts Continuous
1300 Watts 10 Seconds **"PF-1"**

1500 Watts Continuous
1700 Watts 10 Seconds **"PF-2"**

Input Line Voltage: 90-264 VRMS. Single Phase
Line Frequency: 47-63Hz
Power Factor:
20% to 50% Rated Load Greater Than or Equal To 0.92
50% to 100% Rated Load Greater Than or Equal To 0.96
Line Current Harmonics: Per IEC555-2 Limits
DC Output Voltage: 375 ±5% Vdc
Efficiency @ 50% To 100% Load:
Greater Than Or Equal To 90% at 115V Input
Greater Than or Equal To 94% @ 230V Input
Ambient Temperature: 0-50°C
Cooling: Internal Fan
Physical Dimensions: 5″ × 11″ × 3″
EMI: Conducted. FCC Class "A"
Radiated. FCC Class "A"

Protection:
Over Voltage:
- Over Voltage Circuitry Will Shut Down The Converter Between 400 and 420 VDC.

Over Temperature:
- Supply Will Shut Down If Over Temperature Is Reached; It Will Restart Automatically After Cool Down.

Connectors:
- AC Input Connector:
6-32 Screw Terminal Barrier Block.
- DC-Output Connector:
6-32 Screw Terminal Barrier Block.

Safety:
Designed To Meet UL1950; CSA 1402C, C22.2 and IEC 950.

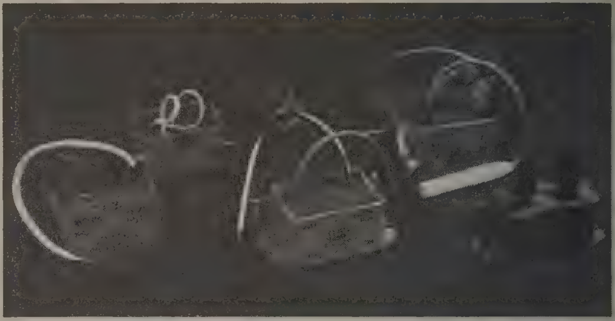
High Voltage Power Supplies, Multipliers, Diode-Rectifier Assy. and Low Voltage Modules

Collmer Semiconductor's high-volume production capacity assures high quality on-time delivery for both standard products or those customized to meet your special requirements.



ELECTRONIC HIGH VOLTAGE POWER SUPPLIES

Model	Input Voltage	Output Voltage Range	Current Range	Typical Power	Applications
Unregulated					
CS2132	120/240 VAC	6-18 kV	1-5μA	60mW	• Laser Triggers • Ionizers • EOS/ESD • Ozonators • Electrostatic Speakers • Copiers • Duplicators • Home & Office Air Cleaners
CS2112	9-24VDC	3-20 kV	5-100μA	.5-1W	
CS2120	120/240 VAC	3kV-10kV*	1-10μA	100mW	
CS2091	120/240 VAC	6-30 kV	25-600μA	1-5W	
CS2095	120/240 VAC	5-15 kV	.8-1.5mA	5-10W	
Regulated					
CS2096	120/240 VAC	5-15 kV	1.0-2.5mA	10-20W	• Industrial Air Cleaners Light to Heavy Duty • Arc & Plasma Cutters/Welders • Laser Power Supplies
CS2094	120/240 VAC	5-15 kV	2.0-5.0mA	15-70W	
CS2097	120/240 VAC	1-5 kV	5.0-15.0mA	5-120W	
CS2100	120/240 VAC	5-15 kV	3.0-10.0mA	50-120W	
CS2098	120/240 VAC	10-20 kV	30-40mA	200-600W	

* Dual Output (Both Positive and Negative); grounded or ungrounded

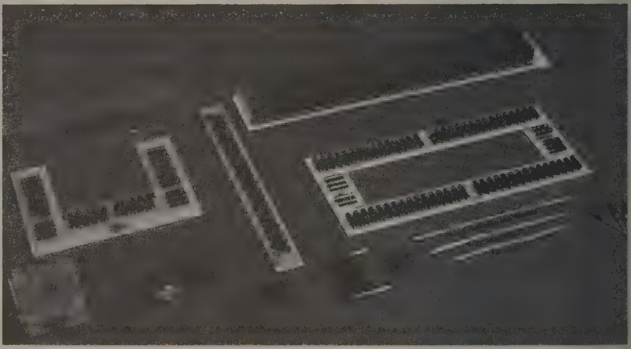
Custom variations are available on request. LED displays, bleeders, voltage clamps and output voltage adjustable controls can be included.

CUSTOM ENCAPSULATED MODULES (VersaMod)

Circuits	Applications
• MOV Assemblies 1Ø, 3Ø • Snubbers (C, RC, RCD, ZC) • Capacitors (EMI) Filters • Resistor(s) and/or Networks • Customer Designed Circuits	• UPS Systems • Welding Equipment • Motor Drives • Severe Vibration • Harsh Environments

HIGH VOLTAGE MULTIPLIERS

Custom designed to meet your requirements 5kV to 120kV DC output.	
Circuits	**Applications**
• Multi-stage Series or Parallel W or W/O Bleeder Resistors • Sensing Resistor Networks • Custom Designs From Multiple Wave Forms	• CRT • Copiers • X-Ray Equipment • Ionizers • Electrostatic Sprayers • HV Power Supplies



HIGH VOLTAGE DIODE/RECTIFIER ASSEMBLIES

Series Type	Repetitive Peak Reverse Voltage V_{RRM} (kV)	Average Forward Current I_O	Reverse Recovery Time t_{rr}	Applications
CS4500	4-16	15mA	<100 nsec	• High Voltage Power Supplies X-Ray (Medical & Industrial) Welding (Arc & Plasma) Laser • CRT Display • Electrostatic Equipment • Electron Beam Equipment
CS451	7-50	15mA	<100 nsec	
CS458	8-15	275-650mA	75nsec-2.5μs	
XRay	to 350	to 380mA	Std.	
High Power	to 200	to 1.5A	75nsec-2.5μs	
Bridges	All	to 3.0A	Any

POWER CONVERSION
Bringing Power to World Class

AC/DC POWER SUPPLIES

NFS/NFN Universal Input Open Frame Switchers • Input Voltage: 90VAC to 240VAC

Ranging in output power from 25 to 350 watts, Computer Products' NFS series of switching power supplies incorporate advanced circuit topologies which allow them to accept universal inputs while simultaneously meeting required FCC and VDE conducted EMI specifications. All supplies are UL, CSA and VDE approved and have as standard features overvoltage and short circuit protection, resulting in a family of switchers that are globally accepted and second to none.

Medical versions of the NFS40, NFS50 and NFS110 series are UL544 and IEC601 approved, offering the reduced ground leakage current required in non-critical medical applications. These supplies provide all the size, weight and efficiency advantages of their non-medical NFS equivalents without the need for an expensive 60Hz isolation transformer.

Overall, the high quality and cost competitiveness of Computer Products switching power supplies have made them industry standards by which other supplies are judged.

AC/DC POWER SUPPLIES

NFS/NFN Universal Input Open Frame Switchers • Input Voltage: 90VAC to 240VAC

NFS/NFN Features:

- ▼ Universal AC input voltage range
- ▼ 120V-370V DC input voltage range
- ▼ 5V, 12V, 15V, and 24V outputs available
- ▼ Adjustable output voltage on selected models
- ▼ UL, CSA, VDE and BABT/BSI safety approvals
- ▼ Medical versions available on selected models
- ▼ Overvoltage and overcurrent protection
- ▼ Short circuit protection and auto-recovery

NOTES

1. The NFN Series are advanced, low-noise designs that reduce line-conducted noise to below FCC and VDE Limit B. **2.** The NFS 79XX Series are especially designed for medical applications with super-low leakage current. They are approved to UL544 and IEC601/VDE0750 medical supply standards. **3.** A floating output, adjustable from 4.5V to 16.5V @ 4.0A. **4.** A floating output adjustable from 15V to 30V @ 4.0A **5.** The higher power rating requires forced air cooling as follows: NFS/NFN 25-110 (20 CFM); NFS200 (30 CFM); NFS350 (350 LFM). **6.** Floating output which may be referenced as either positive or negative. **7.** Meets VDE B line-conducted noise limit. ▼ Linear regulated output using a 3-terminal regulator. † Magamp regulated output. * Output regulated by auxilliary switching regulator. ✲ Regulated output.

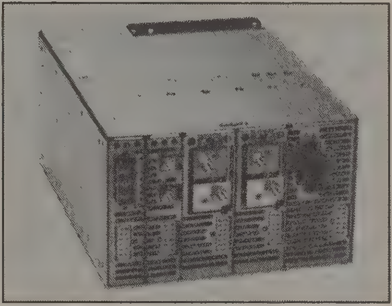
MPS SERIES • AC/DC MODULAR POWER SUPPLY

Autorangeing Input, Power Factor Corrected



MPS Series Features

- Meets IEC-555.2 line harmonic limits
- Modular construction: Up to 12 floating outputs from 6 plug-in slots
- 25 available modules
- Battery backup option
- Choice of VDE A/B input filter
- Parallelable outputs

COMPUTER PRODUCTS CUSTOM POWER SUPPLY DESIGN

Computer products' capability in custom product offerings represents a sophisticated approach to applications requiring unique power supply design. Our global engineering and manufacturing capabilities provide our customers with the flexibility necessary to address demanding power system requirements while ensuring the most cost-effective solution.

With hundreds of custom product designs successfully executed, Computer Products is uniquely qualified to address virtually any technical requirements. These designs satisfy demanding power system specifications in data processing, industrial process control, telecommunications, instrumentation, transportation, and medical equipment applications.

Our ISO9001 approved facilities ensure our customers of the high level of quality and consistency that they have come to expect. Conservative design techniques, including extensive design verification testing, ensures the highest reliability for years of continuous service. Full documentation, engineering controls, and environmental stress screening complement the total quality and statistical control policies that we have adopted to ensure superior performance.

The Computer Products' custom power supply design approach begins with an in-depth review of the customer's technical specifications. Field support personnel maintain a continuous dialog with customer engineers to ensure successful implementation of the design. Over twenty-five years of experience allow us to select the most suitable power supply topology and architecture to meet a particular requirement. Whether the application demands a forward converter, flyback, push-pull, half-bridge, or resonant circuit, our expertise enables us to quickly respond with proposed solutions Whether the requirement is for a centralized, modular or distributed power architecture, Computer Products' capability includes a collection of existing power solutions. Our design capability spans a broad range of AC/DC and DC/DC products from less than 1 watt to 1500 watts, from single to multiple outputs operating from any input voltage in the world.

A broad range of chassis configurations, features, interconnection options, and status circuitry are available to customer specification. Modification of existing standard product designs is an alternative to a total custom design.

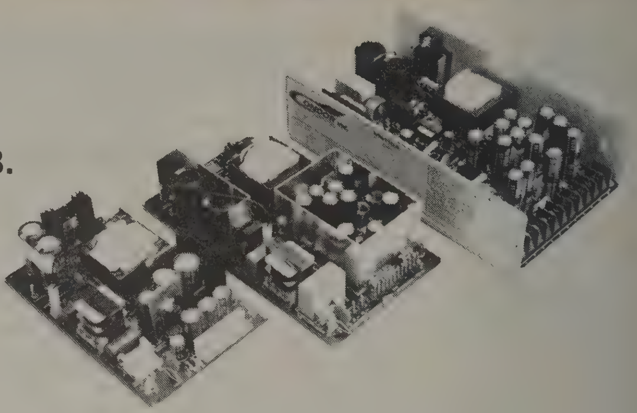
WORLD CLASS MEDICAL

Condor's international medical multi-output switchers — designed to meet UL 544/IEC 601/CSA 1402-3.



Condor's medical switchers are designed to meet full international specifications, as well as European EMI specifications.

Medical switcher features:

- 16 models, 5 power levels, 30 to 110 watts
- Multi-output (up to 5 outputs)
- AC input: 90-132 VAC/180-264 VAC, 47-63 Hz
- Designed to meet toughest domestic and international medical safety specifications
- Proprietary low leakage — high attenuation EMI filter (patent pending)
- Less than 30μA leakage current
- Meets stringent FCC and VDE 0871 Class B EMI specs
- Power fail available on 110-watt units
- Versatile output configurations for wide variety of applications
- Industry standard packages
- 24-hour full load burn-in and 2-year warranty
- Covers available for all units

MED 1 QUALITY PROGRAM

The MED 1 Quality Program is standard on all M-Series medical power supplies. It provides additional controls and testing which produces the extra level of quality that medical applications require. MED 1 is based in part on MIL-I-45208A, and includes the following procedures and tests in addition to the normal Condor quality assurance program.

1. **Lot Traceability:** Condor recordkeeping will include lot numbers, date of manufacture, test results and failure history. Each supply will be marked with a lot number and revision level.
2. **Extended Burn-In:** Burn-in duration is 24 hours for switching supplies and 8 hours for linear supplies. Test conditions are: full-rated load, room ambient temperature, and AC input power cycling.
3. **Safety Testing:** All units will be subjected to hipot and leakage current tests after burn-in. These tests are designed to identify potential failures that constitute the greatest risk of shock hazard in D.C. power supplies.
4. **Certificate of Conformance:** All power supplies shipped under the MED 1 program will be delivered with certificates of conformance to published specifications and the MED 1 Quality Program.

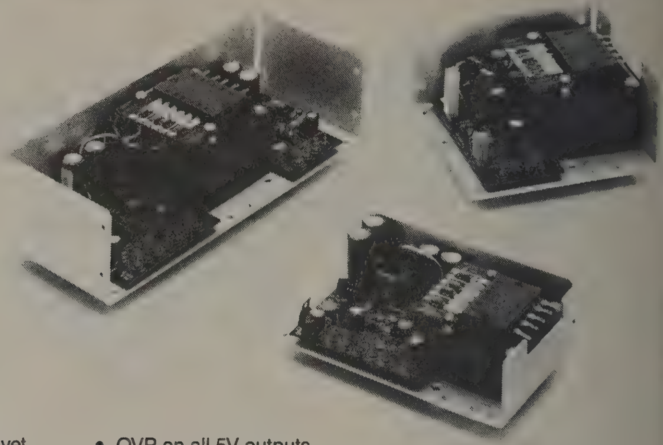
WORLD CLASS MEDICAL



Condor's international medical linears, designed to meet UL 544/IEC 601/CSA 1402-3.

Condor's medical linear power supplies offer innovative yet cost-effective design solutions for both high- and low-volume users.

Medical linear features:

- 38 models (single, dual & triple output)
- 3 power levels (5 to 92 watts)
- AC input: 110/120/220/240 VAC, 47-63 Hz
- OVP on all 5V outputs
- Meets EMI per FCC/VDE B
- Hermetically sealed power transistors and IC's
- MTBF 200,000+ hours per Mil Handbook 217D
- 8-hour burn-in with cycling
- Full 3-year warranty

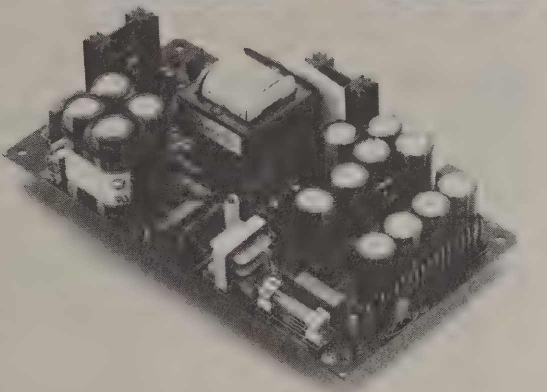
WORLD CLASS

Condor's "V" Series — agency-approved power supplies with high peak power for starting loads.

Our "V" Series multiple output switching power supplies meet the toughest domestic and international safety requirements, and are UL, CSA and TUV/VDE certified. "V" Series units give you the performance you need, too, with peak power levels for starting loads ranging from 125 to 140 percent of full rated power.

"V" Series features:

- Low cost
- 6 power levels — 30 to 125 watts
- 26 models — 2 to 5 outputs
- AC input: 90-132/180-264 VAC, 47-63 Hz
- Clean, low-cost, open-frame design
- Fully-protected — adjustable current limit, built-in OVP and reverse voltage protection
- Full load burn-in and 2-year warranty
- High peak current disk drive outputs plus closely regulated 3-terminal-type outputs



- Extremely versatile output configurations for tough applications
- Very high value for your purchasing dollar
- Isolated outputs can be used for positive or negative sources or in series with other outputs
- Pass vibration and shock per MIL-STD 810D

For high performance and world-class value in switching power supplies, call Condor!

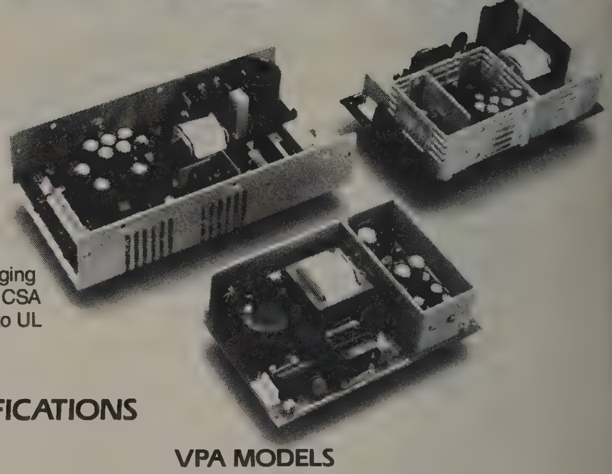
WORLD CLASS



NEW FROM CONDOR!
Global Performance switching power supplies with the agency approvals you need.

Our new Global Performance Series switchers feature full-input autoranging (84-264V) and are approved to UL 1950, VDE level B EMI, IEC 950 and CSA TUV. All models also are available in medical configurations, approved to UL 544 and IEC 601.

SPECIFICATIONS

	GP MODELS	VPA MODELS
AC INPUT:	85-264 VAC, 47-63 Hz single phase.	90-132 VAC or 180-264 VAC, user selectable. 47-63 Hz single phase. (For optional or autoswitcher add "-AS" to model number).
DC OUTPUTS:	See output rating chart.	See output rating chart.
HOLD-UP TIME:	20 mS minimum @ full load and nominal line (115 VAC).	20 mS minimum at full load and nominal input voltage.
OVERLOAD PROTECTION:	Fully protected against short-circuit and output overload on all outputs. Short circuit protection is cycling type on most outputs; foldback on outputs with 3-terminal regulator post regulation. Overload protection recovery after removal of fault is automatic.	Fully protected against short-circuit and output overload with cycling-type overload protection. Automatic recovery after removal of fault.
MINIMUM LOAD:	Normal Operation: Output #1 and/or 2 combined load current must exceed 20% of total output power. Also, Output #1 must meet the minimums listed below for proper regulation of other outputs. See Output Ratings Chart for additional notes or conditions. GPx40 0.4A GPx55 0.7A GPx80 1.0A GPx130 3.0A GPx200 4.0A All single output models Not required	An 8-amp minimum load is required on output #1. A 20% minimum load is required on quasi-regulated outputs.
OUTPUT NOISE AND RIPPLE:	0.5% RMS, 1.5% PK-PK maximum on all outputs.	0.5% RMS, 1.5% PK-PK maximum on all outputs.
TRANSIENT RESPONSE:	+5V main output; 500 μS typical response time for a 50 to 100% or 100 to 50% load change. Maximum voltage deviation: 5.0%.	+5V main output; 500 μS typical response time for a 50 to 100% or 100 to 50% load change.
OVERVOLTAGE:	Built-in on +5 output with a firing point set at 6.2V ±0.6V.	Built-in on + output with a firing point set at 6.2V ±0.6V.
VOLTAGE ADJUSTMENT:	Built-in potentiometer adjusts voltage from 4.5V to OVP trip point (6.2V nominal) on main +5V output. A separate potentiometer adjusts output #2 ±5% minimum.	Built-in potentiometer adjusts voltage from 4.5V to OVP trip point (6.2V nominal) on main +5V output.
REVERSE VOLTAGE PROTECTION:	All outputs protected against inadvertent application of reverse voltage up to 1 times the rated current of the reversed output.	All outputs protected against inadvertent application of reverse voltage.
OVERSHOOT:	No output overshoot on turn on or turn off.	No output overshoot on turn on or turn off.
INPUT PROTECTION:	Internal A.C. fuse provided on all units. This fuse only blows if a catastrophic failure occurs in the unit; it does not blow on overload or short circuit. A.C. input protected from line transients by metal oxide varistors on all medical units.	Internal A.C. fuse provided on all units. This fuse only blows if a catastrophic failure occurs in the unit; it does not blow on overload or short circuit. A.C. input protected from line transients by metal oxide varistors.
TEMPERATURE COEFFICIENT:	0.03% per °C typical for all outputs.	0.03% per °C typical for all outputs.
TEMPERATURE RATING:	0 to 50 °C at full rated output power with natural convection cooling in a non-restricted environment. For operation in a confined space, moving air may be required. For operation above 50 °C, it is important that the cooling vs. load profile is such that the heatsinks do not operate above 90 °C for extended periods.	0 to 50 °C at full rated power with 26 FCM forced air cooling. Cooling air should be ducted directly over the unit. For less air, derate output power by 1% per CFM of air. For convection cooling @ 296 watts, unit must be installed if non-restrictive environment.
EMI SPECIFICATIONS:	All models include built-in EMI filters to meet or exceed the conducted emissions requirements of FCC 20870 Class B and VDE 0871 Class B.	All VPA models are designed with built-in EMI filters to meet or exceed the conducted emissions requirements of FCC 20870 Class B and VDE 0871 Class B.
SAFETY SPECIFICATIONS:	All commercial models are designed to meet UL 1950, CSA 22.2 Level 3, IEC 950 and VDE EN60950. All medical models are designed to meet UL 544, IEC 601-1 and VDE 0750.	All VPA models are designed to meet UL 1950, UL 508, CSA Bulletin 1402C Level 5, IEC 950.

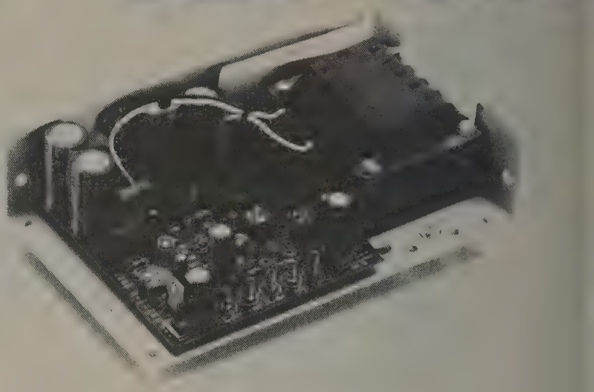
WORLD CLASS

Condor's International Plus Series linear power supplies — price, performance and the approvals you need.



Condor's *International Plus Series* D.C. power supplies virtually eliminate primary-secondary shorting because each coil uses a separate bobbin surrounded by two layers of glass-impregnated nylon, giving complete mechanical and electrical isolation.

The best low-noise 723 regulator chips are used throughout the line, together with proven, reliable semiconductors. TO3-cased pass elements are hermetically sealed, and the latest high-density, high-ripple current rating capacitors from proven, high-quality vendors ensure long life and reliability.

International Plus Series features:

- 9 power levels — 3 to 288W
- 75 models (single, dual & triple output)
- AC input: 100 / 120 / 220 / 230 / 240 VAC, 47-63 Hz
- OVP on all 5V outputs
- Meets EMI per FCC/VDE B (most units)
- Approved to IEC 950 and UL1950 with no D3 deviation.
- Hermetically sealed power transistors
- MTBF 200,000 + hours per Mil Hndbk 217D
- 2-hour burn-in with cycling
- Full 3-year warranty

Sixty-five *International Plus Series* models are approved to UL1950; UL478, CSA C22.2 and TUV certified to VDE 0806 and IEC 950.

WORLD CLASS

Condor's SDS and SDM Series power supplies meet FCC/VDE Level B and have agency safety approvals!

Every tough, versatile Condor single (SDS) or multiple (SDM) switching power supply meets the toughest domestic and international safety requirements, and is UL, CSA and TUV/VDE certified. All units also meet FCC 20870 Level B and VDE 0871 Class B above 150KHz.

SDS/SDM Series features:

- 5 power levels — 45 to 200 watts
- 20 single and 29 multiple-output models (up to 5 outputs)
- AC input: 90-132 VAC/180-264 VAC, 47-63 Hz
- Clean, low-cost, open-frame design
- Fully-protected — adjustable current limit, built-in OVP and reverse voltage protection
- LED "on" indicator
- Full load burn-in and 2-year warranty
- Powerfail signal and logic inhibit on 140 and 200W levels
- High peak current disk drive outputs plus closely regulated 3-terminal-type outputs
- Extremely versatile output configurations for tough applications
- Very high value for your purchasing dollar
- Isolated outputs can be used for positive or negative sources or in series with other outputs
- Pass vibration and shock per MIL-STD 810D

Condor SDS and SDM power supplies can meet your most demanding design requirements!

CONVERTER CONCEPTS INC

PROVEN UNIVERSAL INPUT EXPERTISE

Converter Concepts invented universal input technology more than a decade ago. Although many power supply manufacturers have recently introduced products that imitat our performance, none can match our level of proven field

FEATURES:	Features the application of surface mount technology in a low-cost PC board construction. Designed for high-volume applications requiring safety approvals and rigid EMI specifications. *VL Products feature a 1 year warranty.			Features the application of surface mount technology in an open frame switcher. The WI product line offers the user a flexible mounting scheme that provides excellent heat conduction to the mounting surface. *WI Products feature a 1 year warranty.			The versatile product easily modified to meet unique customer specifications. DC to DC models available in addition to Converter Concepts' universal AC input models. Rugged packaging in either open frame or enclosed package gives the VT/VX series maximum performance with a demonstrated MTBF in excess of 150,000 hrs. Many options available.					Features include a UPS (fail safe) system that allows operation from an AC power source or a DC power source. The VF also includes an integral battery charger. The VF product is a must if information retention is important during brown out of power line failures.

reliability. No wonder we can back our designs with an exclusive two-year warranty.*

Converter Concepts' in-house surface mount capabilities created a totally integrated manufacturing environment.

The result is greater reliability and total Made-In-America quality at a competitive price.

The standard power supplies listed below meet the demands of most design parameters. In applications that have specific performance requirements, Converter Concepts' engineers can design a power supply to meet your exact needs.

For more information, call (800) 253-5227.

Features UL 544 Recognition for use in medical applications, very flexible product with many options available.	Features output power capability up to 150 watts. Many output models available with many options possible. Excellent mounting scheme for either open frame or enclosed package.	Features an optional cable assembly, PC board construction and is designed for low power computer peripheral applications. *CP Products feature a 1 year warranty.	External, ultra-small design delivers improved line and load regulation, overcurrent/overvoltage protection plus surface mount technology. *XT Products feature a 1 year warranty.	Offers an automatic degausser circuit and is designed for high-resolution color monitors and gas discharge displays.

SPECIFICATIONS:

INPUT VOLTAGE: – 120 V, 60 Hz, single phase
– Unit will operate with ± 10% change in input voltage.

Output Voltage: – Continuously variable from zero to the maximum voltage indicated in above table.

Output Current: – Zero to maximum indicated in above table.
– Current is limited to approximately 10% greater than this, even on a short circuit.

Line Regulation: – If the input line voltage changes ± 10% from its nominal 120 V, the output voltage will change no more than ± 0.03% or ± 15 mV, whichever is greater (at any load current within rating).

Load Regulation: – For changes in load current from zero to rated maximum, the output voltage will change no more than 0.15% or 50 mV, whichever is greater (at any line voltage within rating).

Ripple: – The rms value of the ripple voltage will be no greater than 0.05% or 20 mV, whichever is greater (at any line voltage or load current within rating).

Short Circuit: Proof – Output may be shorted continuously without damage to the unit. Power supply recovers automatically to normal when short is removed.

For more information on power supplies with higher outputs please contact:

eem/electronic engineers master

4,400 PAGES OF TECHNICAL DATA AT YOUR FINGERTIPS!

If you don't have your own EEM/ELECTRONIC ENGINEERS MASTER catalog, you can obtain you own copy by ordering now. Write for your copy or order by telephone as described below.

EEM is the world's most comprehensive and authoritative catalog of electronic products. With over 4,400 pages of technical data from nearly 1,000 manufacturers, you can find the product you need, when you need it, with a minimum of time and effort.

Organized in four separate and "stand alone" volumes, EEM can save you countless hours of search time and - like no other reference in the industry - insure that you find the right product for the job.

THE 1993/94 4 VOLUME SET CONTAINS:

VOLUME A - Electronic Components

VOLUME B - Electromechanical, Electro-optical, & Military Components

VOLUME C - Interconnections, Packaging, & Hardware

VOLUME D - Power Sources, Instrumentation, Computer Products, & Equipment

IT'S EASY TO ORDER...

- You can order the 1993/94 EEM simply by charging it to your VISA or MasterCard. To place your credit card order call now: 1-800-833-7138.

- Or mail your purchase order and check for $95.00* plus sales tax to :

CUSTOM POWER CONVERSION SYSTEMS

DEL leads the way in designing standard and custom HV power conversion equipment for laboratory, military and industrial OEM applications. Some further examples of our custom capabilities are listed below:

Capacitor Charging Power Supplies (Multiplier PFN's)

Features

- Fast Acting Current Source
- Start/Stop Command and Charge Status
- Local and Remote Monitor Capabilities
- External and Internal Interlocks
- Automatic Crowbar Circuit
- Peak HV Memory Read Out

Specifications

Charge Rate: 1kJ/S - 10kJ/S
Output Voltage: 2kV - 40kV, adjustable
Regulation: ±1.0% standard
±.01% available
Efficiency: 85% min.at FL
Size: 19" rack mount, 7" high
17" - 32" deep

HIGH VOLTAGE CRT POWER SUPPLIES

DANGER
FOCUS
BRIGHT

A new series of military grade switching power supplies featuring high reliability and superior performance is now available from DEL Electronics.
DEL combines 37 years of high voltage design and manufacturing expertise to produce equipment utilizing state-of-the-art circuitry and packaging. These units have been developed for, and sold to, leading OEM display manufacturers.

Features

- Outputs To 40W
- Color & Monochrome Applications
- Dynamic Focus
- TTL Enable/Disable
- Arc & Short Circuit Protected
- MTBF Exceeds 40,000 Hrs.

Other Typical Applications:

- Airport X-ray Inspection Equipment
- Electrostatics for Spray Painting
- Electron Beam Welding
- Laser Surgery
- Laser Guidance Systems
- Medical CT Scanners
- Military CRT Displays
- Oil Exploration
- Photomultiplier Tube
- Radar Systems: Airborne, Shipboard and Ground
- Traveling Wave Tubes
- Air Precipitators
- Industrial X-ray Machines
- Electrophoresis
- Ion Pumps
- Flocking
- Scanning Electron Microscopes
- Non-Impact Printers
- CRT Testing
- Spot Knocking

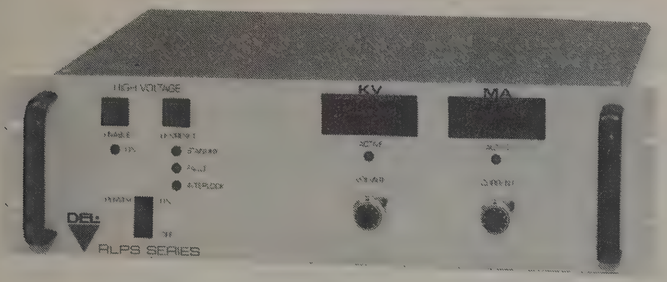
RESONANT SINE WAVE POWER CONVERTERS



RLPS SERIES
RHVS SERIES
60-5000 WATTS

Regulated HV Power Supplies

Features

- Uses the most advanced resonant sine wave switching technology
- Voltage regulation better than 0.005% for load and line
- 0.05% RMS Ripple
- Low stored energy
- Provides high efficiency and stability
- Standard 19" Rack
- Available in 300, 500 and 1000 Watt models up to 125 kilovolts

Remote Capabilities

Remote Programming
Voltage and Current: 0 to 10 VDC, analog
Remote Monitor Output:
Voltage and Current: 0 to 10 VDC, analog, 1% accuracy
Remote Enable/Disable:
TTL compatible
External Interlock:
Dry contact closure
External Reference: 10.4 volts

Performance Specifications

Input: Selectable 115 or 220 VAC 50 or 60Hz
Output: Continuously adjustable from 0 to maximum rate output via local or remote controls. See chart below.
Voltage Regulation:
Line: ± 0.005% for a ± 10% line change
Load: ± 0.005% N.L. to full load change
Current Regulation:
Line: ± 0.05%
Load: ± 0.2%, 10% to full load
Ripple: 0.05% RMS at max. output
Stability: 0.01%/hr., 0.05%/8hrs after 1/2 hour
Temperature Range:
Operating: -20°C to 55°C
Storage: -40°C to 85°C
Temperature Co-efficient: 0.01°C
Output Protection: Overvoltage, arc and adjustable short circuit
Slow Start: 3 seconds (zero to max. output)

Physical Specifications

Front Panel Controls and Metering

1. HV ON push button with light
2. HV OFF/Reset push button with light
3. Voltage and current control by 10 turn potentiometers (0.1% Resolution)
4. 31/2 Digit LED Digital Panel Meters for both voltage and current, 1% accuracy
5. Voltage and current mode lights

Dimensions

RLPS and RHVS are 19" rack mountable units. The 60 - 500 Watt models are 5 1/4" high. 1 x W models are 10 1/3" high. Typical depth is 16".

Output Configurations

	OUTPUT POWER	OUTPUT VOLTAGE
RLPS SERIES	60 - 150 Watts	1 - 125kV
RHVS SERIES	300 - 5,000 Watts	1 - 125kV

PMS SERIES

Photomultiplier Power Supplies

FEATURES

- Output isolated from Input
- Output proportional to Input
- Output momentary short circuit protected
- Reversible Polarity
- Temperature range O° to 60°C
- Small
- Lightweight
- Shielded

Description:

The DEL PMS Series is a family of highly reliable, compact, DC to DC proportional converters for use as power sources for photomultiplier and other tube applications. The series utilizes high frequency technology with low energy storage and arc protection.

Insulated, 8" - long, output high voltage leads are floating and fully isolated from the input leads and the case.

Shielding is provided by a steel case, except for the PC board mountable unit PMS 1-7-7 and PMS 1-23.

Specifications

Model	Input DC	Output Voltage	Output Current	Output Min. Load (Meg. OHMS)	Ripple P to P	Size L x W x H or Diameter x L	Mounting
PMS1-1	3-15V	300-1500V	1 mA	1.5	1.5V	1 x 2-1/4	Loop Clamp
PMS1-7-7	3-15V	300-1500V	1 mA	1.5	6.0V	2.4 x 1.5 x .81	P.C. Board
PMS1-23	3-15V	300-1500V	1 mA	1.0	6.0V	1.5 x 1.5 x .6	P.C. Board

MODULAR HV DC TO DC CONVERTERS

MLP SERIES
MHP SERIES
10-60 WATTS

Regulated Power Supplies

Applications

- **Image Intensifiers**
- **Mass Spectrometers**
- **Photomultipliers**
- **CRT's**
- **Electrophoresis**
- **Electrostatics**
- **Laboratory R & D**

Description

The MLP/MHP series are compact DC to DC converters that offers a versatile, highly regulated HV source for various laboratory and OEM applications. All units provide remote analog programming, test points and (TTL) enable. Units 3kV and below are sufficiently isolated from case, enabling the outputs to float or to be grounded in either direction, for easy polarity reversal. MLP's are immune to overload, sustained short circuits and arc over conditions.

Performance Specifications

Input: 24 to 32 Volts DC @ 1.0 amp max.
Output: Adjustable voltage from 0 to maximum rating via remote analog program.

Line Regulation:
±0.02% for a ±10% line change.
Load Regulation:
0.05% NL to FL (MLP)
0.02% NL to FL (MHP)
Ripple: 0.01% Pk to Pk (MLP)
Stability: 0.01%/hr after 1/2 hr. warm up, 0.02%/8 hrs.
Temperature Coefficient: 100ppm°C
Temperature:
A) Operating: – 20°C to 55°C
B) Storage: – 40°C to 85°C

Note: Specifications are held from 10% to maximum rated outputs.

Remote Interface:

Programming:
Voltage: 0 to 10V Analog, Ground Referenced

Test Points:
Voltage: 0 to 10V Analog, 5% accuracy

Current: 0 to 10V Analog, 15% accuracy on 3kV and below 1% accuracy on 6kV and above.

Enable: TTL low is active

Connections:
Output: 24" Flying Lead
Input: "Mini D" connector

Dimensions:
MLP - 3.75 x 2.625 x 1.75 or
5.69 x 5.63 x 2.06

MHP - 8 x 5.56 x 3.5

	OUTPUT VOLTAGE	OUTPUT POWER
MLP SERIES	1 - 30kV	10 - 30 Watts
MHP SERIES	1 - 60kV	40 - 60 Watts

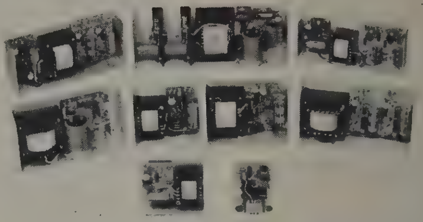
Features:

- Low Cost
- 115,220,230 and 240 VAC, 47-63Hz/Input
- Overvoltage Protection for All 5V Outputs
- Transformer - 2500V Isolation with Primary to Secondary Shield
- Two Hour "burn-in" on all units.
- RFI/EMI Free Operation
- U.L. Recognized and CSA Approved
- 2 Year Warranty, Factory Repair Service
- Quantity-Volume Discounts

OVP-12 Overvoltage Protector	
1-24	$7.95



The Q Series line of open frame power supplies, introduced in 1980, supersede the previous open frame models that have been in production since 1971.

SPECIFICATIONS:

A.C Input	115. 220. 230. 240 volts ± 10% 50-400Hz. Load rating should be reduced by 10% when used at 50Hz
D.C. Output	5 volts to 24 volts (See tables)
Output Adjustment.	Minimum of ± 5%
Line Regulation:	< ± 0.05% for 10% line change
Load Regulation:	< ± 0 05% for 50% load change
Ripple & Noise:	Units up to 15 volts — < 1mV R M S Above 15 volts —< 3m R M S
Transient Response.	< 30p Secs for 50% load change
Overload Protection	Automatic Re-entrant current limit
Overvoltage Protection	Built into all 5v outputs Set at 6 2v ± 0 4 volts Other voltages optional "add-on" packages are available
Output Isolation.	All outputs isolated from each other Isolation output to frame. 30 megohms min . at 500 VDC
Remote Sensing:	All Models
Stability:	≤± 0.3% for 24 hours after warm up
Operating Temperature:	0°C to +50° full rating then linear derating to 40% at 70°C
Storage Temperature:	.55°C to + 85°C
Temperature Coefficient	± 0.03% °C
Efficiency:	5v units 45% 12 - 15v units 55% 24v units 60%
Vibration	Per MIL-STD-801B, Method 514 Procedure 1. curve AB (to 50Hz)
Shock:	Per MIL-STD-801B, Method 516 Procedure V
Burn-in:	Each unit undergoes a 2 hour burn-in and is fully re-tested before shipment
Packaging	All units individually boxed and labeled

WALL PLUG-IN, DESK TOP, AND WALL MOUNT UNITS

AC/AC, AC/DC, and AC/DC Regulated

AC/AC ADAPTERS

Up to 14 case sizes are offered with a variety of output cord and connector configurations to meet your specific requirement. Units can be custom designed to meet your input and output ratings. Plug types for many different countries are available. Several standard models with UL, CSA and other approvals are offered.

Centertapped or multi-secondary versions with three or four conductor output cords are availalbe. Screw terminal outputs are also offered on some case sizes.

Wall plug-in units for North American receptacles.

AC/DC ADAPTERS

These adapters are unregulated, filtered, DC output units offered in up to 14 case sizes with a wide variety of output cord and connector configuation. Dual or triple DC outputs with three or four conductor output cords are available. Input plug types of many different countries are offered.

UL and CSA approved standard models are available. Units designed to meet VDE, TUV, and others are also offered.

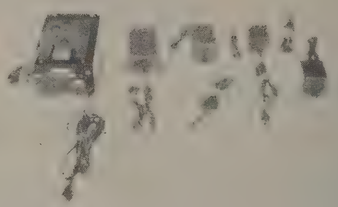
Wall plug-in units for various International receptacles.

LINEAR REGULATED POWER SUPPLIES

The larger case sizes are used for the linear regulated DC power supply units. Some of the larger cases are of the wall plug-in type mainly for North American receptacles. Most of the larger cases are of the desktop (or wall mount) style.

Single or multiple regulated outputs are offered with 2, 3, 4, or 5 conductor output cords available. Input cords for most countries are available in the desk top or wall mount units.

Custom designs can be made to meet your specific requirements.



Desktop and wall mount units with input cords for North American receptacles or various International receptacles.

SWITCHING POWER SUPPLIES

the switching regulated power supplies are offered primarily in the larger case sizes. Some versions are available in wall plug-in type cases but most offerings are in desk top units. Units are designed to meet EMI requirements per FCC Docket 20780 Class B. Wide input voltage ranges of 90--130 and 180-260 VAC are standard.

Custom designs can be made to meet your specific requirements.

- Low prices
- High quality.

- Custom designs to meet your exact requirements.
- Standard designs available with UL and CSA approvals.
- UL, CSA, and VDE submittals upon request.
- Quick delivery on preproduction units (made in USA)
- Plugs for Continental Europe, UK, Australia, North America, and others.

BATTERY CHARGERS

Ni-Cad – Gell Cell – Sealed Lead Acid – Others

NI-CAD CHARGERS*

Float Type - The least costly float charger design, with the C/10 charge rate usually recommended, require 14 to 16 hours for the batteries to charge from a full discharge. Specify the ampere-hour rating and the voltage rating of your nic-cad battery when ordering your low cost C/10 float charger. Float types with quick charge rates (4 to 5 hours) with C/3.33 or other charge rates are also available. Dual mode units for a combination of quick or fast charge and float charge are described below.

2-mode, time controlled, type - The chargers with time-controlled dual mode provide quick charge (C/3.33) for 4 hours and then revert to float charge (C/10, C/30, or C/50) continuously are availalbe. Internal timer is reset with external switch on charger unit to set charge at "quick rate" for fixed time period. The above time-controlled dual mode can also be applied to have C/10 float charge rates run for 16 hours and then revert to a C/30 or C/50 smaller float charge rate.

2-mode, temperature controlled types - The chargers with temperature controlled dual mode to provide fast charge (C/1) until battery temperature high limit is reached and then revert to float charge (C/10, C/30 or C/50) continuously are available. The temperature sensor must be assembled with the battery pack and connected with separate conductor of the output cord of the charger unit.

Custom Types - Contact us to design battery chargers to meet your requirements.

GELL CELL CHARGERS**

Float Type - These chargers with a single fixed voltage provide optimum battery life in standby type applications and will maintain a battery in the fully charged condition at the float voltage of 2.28 to 2.30 volts per cell. The float type charger delivers a constant potential to the battery and is current limited to 20% or less of the 20 hr capacity of the battery. This type is used for products that activate in the event of a power failure and for applications where the charger is always connected to the battery. These chargers can be simultaneously used as a power supply and a charger.

Cyclic (2-mode) Type - These chargers are designed to quickly recharge batteries without danger of overcharging and are suited for applications where batteries are repeatedly being discharged and recharged. The dual modes consist of (1) fast charge constant potential of about 2.50 volts per cell with current limit to 40% or less of the rated 20 hr capacity of the battery and (2) float charge constant potential of about 2.29 volts per cell with current limit to 20% or less of the rated 20 hr capacity of the battery. The automatic switchover from fast charge to float charge is initiated by sensing the charge current and switching to "Float" at a set point of about C/100 under the fast charge constant potential condition.

* Contact Sales Office for button cell chargers.

** Also starved electrolyte lead acid chargers.

NOTES:

1) Select one (1) of these voltages when ordering: 100, 117, 220, 230, or 240 VAC (only 100 or 117 for wall plug in). Maximum charge current will be derated by 15% for 220, 230, and 240 VAC inputs and 50Hz inputs.
2) The suffixes xxxx are used to designate 1) Input plug type, 2) Input voltage level, 3) Output connector, 4) Output cord wire gauge, respectively. Only USA 2-prong and 3-prong plugs offered on wall plug- in models.
3) Same as (2) above except all types of input plugs and voltages are offered on desktop models.
4) Special models can be offered for any number of cells not listed under this heading.
5) Special models with slightly lower (or higher) maximum voltages if your battery requires.
6) Values of maximum currents are maximum for the case size. Lower limits can be provided if the maximum shown is too large for your battery.
7) Derate at 3% per °C above 35°C. Specify required maximum ambient temperature when ordering.

Other Specifications:

Input voltage ranges: ± 10%
Ambient Temperature: 0 to 35°C (Note 7)
Dielectric Withstand: 1500 volts on 100 and 117 VAC inputs
3750 Volts on 220, 230, and 240 VAC inputs.

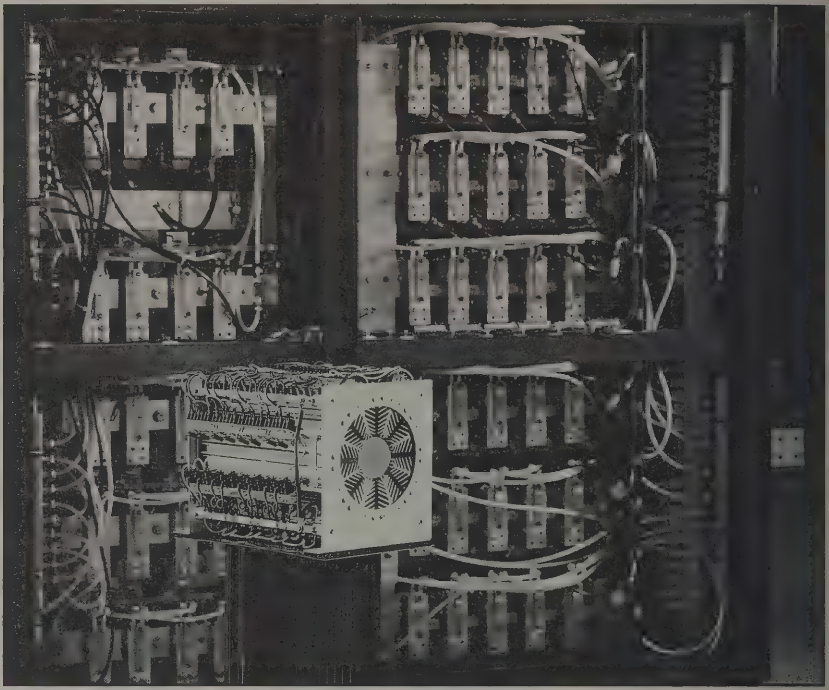
The Precision Decision...



Our Laboratory Systems

Features

- Regulated Voltage
- Regulated Current
- Remote Current Programming
- Remote Voltage Programming
- Overvoltage Protection
- Constant Current Control
- Constant Voltage Control
- Automatic Crossover
- Step Start System
- Phase Loss Indication
- Overtemperature Protection
- Digital Meters
- 10 Turn Potentiometers

Operational Ranges

Output:

- Up to 30,000 A
- Up to 1,000 V
- Up to 1,000 kW systems

Input:

- 115-600 VAC
- Phase: 1 or 3
- 50 or 60 Hz
- Special inputs up to 25 kV

Operation

- Single Quadrant
- Bipolar
- Two Quadrant
- Four Quadrant
- Parallel
- Series

Specifications

Control

SCR– Primary or secondary SCR regulated units are available. These units feature dependable, reliable heavy duty construction.

SCR with transistor voltage bucker filter – Ultra low ripple with fast response time is achievable using an SCR supply followed by an active voltage bucker filter.

Transistor – Full series pass transistor regulators are available up to 10 kW. Also available in almost an unlimited range are full series pass transistor regulators with either SCR or variable autotransformer pre-regulators.

Regulation Range

Voltage Regulator (line effect)
.1% – .01% of rating
Voltage Regulator (load effect)
.1% – .01% of rating
Current Regulator (line effect)
.1% – .001% of rating
Current Regulator (load effect)
.1% – .001% of rating
Stability
.1% – .001%
Tempco better than 3 ppm per °C

Programming

Digital programming is achievable through IEEE 488, RS 232, RS 422 and RS 485 or custom designed interfaces. Programming is achievable with up to 18 bit resolution for current, voltage or both.

Systems

Dynapower has engineered and installed entire precision power systems for laboratories and research facilities around the world. This includes power supply design, system programming and on-site installation. Dynapower ensures that the power supply is capable of operating with a floating ground. All systems use ultra-stable components to ensure overall system stability. We welcome opportunities where special design and engineering are required.

Cooling

Forced Air

Special care is taken in the design of air-cooled rectifiers. Totally enclosed ball bearing motors are used to drive shrouded fan blades and deliver a maximum volume of air over the semiconductors and transformers. Electronic components are separated from the hot air flow by internal panels. This electronic and thermal isolation increases the life of the electronics and eases maintenance.

Liquid Cooling

Dynapower has led the industry in the development of liquid cooling. Only electrolytically pure copper components are used for heat sinks and busing. Dynapower manufactures all of its own copper heat sinks to ensure their reliability and long-term performance. Strict attention is given to design and construction to ensure that the maximum amount of heat is removed from each component.

Industrial Strength

Our Industrial Systems

Features

- Constant Current Control
- Constant Voltage Control
- Automatic Crossover
- Soft Start
- Remote Control Station
- Electrolytically Pure Copper Busing
- Electrolytically Pure Copper Transformers
- Heavy Duty Industrial Grade Construction
- Custom Designs Available

Operational Ranges

Output:
- Up to 75,000 A
- Up to 800 V
- Up to 5,000$^+$ kW systems

Input:
- 220/440 or high voltage
- 3 Phase
- 50/60 Hz
- Special input available

Protection Features

- Electronic Short Circuit Detection
- I^2T Current Limiting Fuses
- Electronic Phase Imbalance Detector
- Thermal Overload Relays
- Diode Overtemperature Detection
- Thyristor Overtemperature Detection
- Transformer Overtemperature Detection
- Electronic DC Overload Detection
- Liquid-Cooled Units Only:
  Liquid Flow Detector
  Liquid Leak Detector

DYNAPOWER
CORPORATION

Regulator Specifications

Low Voltage

Low voltage industrial rectifiers use primary thyristors for regulation. These thyristors are placed on the low current, high voltage primary side of the transformer. Each pair of devices is protected against voltage transients by a resistor capacitor snubber network.

High Voltage

High voltage industrial rectifiers use a number of parallel thyristors on the secondary side of the transformer. The thyristors are used at a minimum safety factor of 250% and are matched for similar current carrying characteristics. These techniques ensure efficiency and reliability.

Ripple

The DC output will contain a 5% RMS ripple when operated at rated voltage and rated current. Ripple filters are available to reduce output ripple.

Rating

All components are rated for 100% continuous full load service at 40°C ambient.

Power Factor

All units have a 90% power factor at rated output.

Cooling

Forced Air

Harsh industrial conditions require that special care is taken in the design of air-cooled rectifiers. A maximum volume of air is delivered by totally enclosed ball bearing motors that are used to drive shrouded blades. Semiconductors and transformers are cooled by this forced passage of air. Internal panels separate the electronic components from the flow of hot air. Thermal and electronic parts are isolated for easier maintenance and increased life of the system.

Liquid Cooling

A leader in the development of liquid cooling, Dynapower uses only the highest quality materials in its manufacturing. All heat sinks and busing are made of electrolytically pure copper components to give dependable long-term performance. The design and construction are critical to secure the removal of the maximum amount of heat from each component.

Heat Exchangers

The availability of clean, low conductivity water is a problem in some locations. A closed-loop heat exchanger can be used to ensure the integrity of the unit. Using either an air-to-liquid or liquid-to-liquid heat exchanger, the proper cooling for the unit is available while guaranteeing the circulation of clean, low conductivity cooling throughout the unit.

MINIGLOSSARY
POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

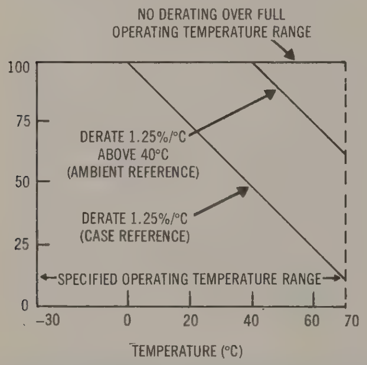

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

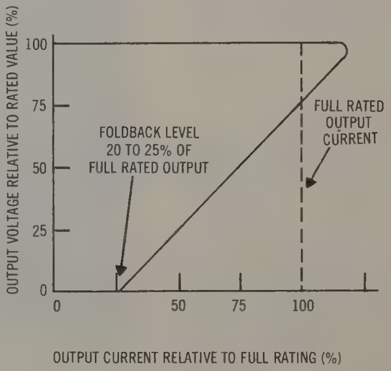

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

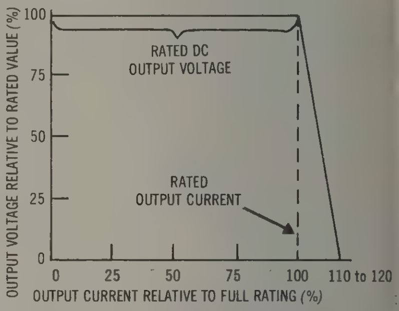

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(–) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

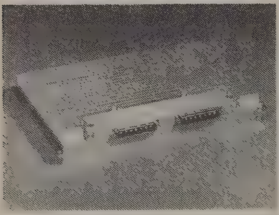
Look to these pages for an introduction to our engineering/manufacturing solutions through a few specific product examples.

VME POWER SUPPLY

Model Number 2-21300 and 2-21350



Input: 270 VDC
Outputs: 5 VDC @ 100 A or
5 VDC @ 20 A
18 VDC @ 11.2 A
18 VDC @ 11.2 A
24 VDC @ 4 A
Size: 7" x 12" x 1.6"
Weight: 7.5 pounds
Air cooled up to 750 Watts.
EMI filtering.

HIGH ALTITUDE MISSILE POWER SUPPLY

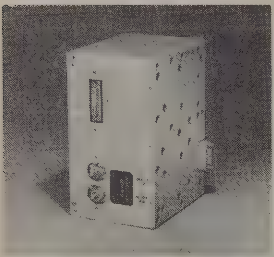
Model Number 2-22700

Input: 28 VDC w/ 10 ms hold-up
Outputs: 5 VDC @ 24 A
5 VDC @ 5.2 A
2 VDC @ 2 A
15 VDC @ 2.2 A
15 VDC @ .3 A
Size: 4" x 6" x 2" (maximum)
Weight: 1.6 pounds

Low noise and ripple outputs.
EMI filtering.

SPACE FLIGHT ELECTRONICS POWER SUPPLY

Model Number PB3535

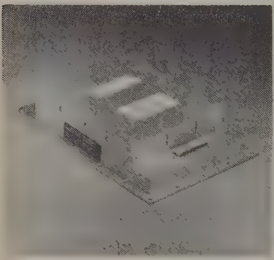


Input: 28 VDC
Outputs: 5 VDC @ 44 A
15 VDC @ 0.24 A
15 VDC @ 0.22 A
Size: 8.8" x 7.3" x 5"
Weight: 9 pounds

Meets traceability and S - level parts requirements.

RADIATION HARDENED AIRBORNE POWER SUPPLY

Model Number 2-18800



Input: 28 VDC
Outputs: 5 VDC @ 15 A
15 VDC @ 0.5 A
15 VDC @ 0.5 A
5.15 VDC @ 0.4 A
12.5 VDC @ 0.18 A
Environment: MIL-E-5400
Size: 10" x 7.6" x 2.7"
Weight: 7 pounds
Vibration: 10.7 GRMS random
MTBF: 201,000 hours @ 60°C, Aic
Nuclear hardened.

SEM–E AIRBORNE POWER SUPPLY

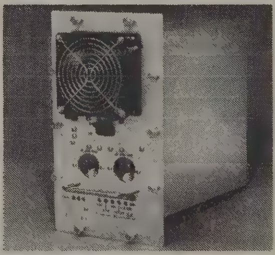
Model Number 2-22800 (Other models available)

Input: 28 VDC, MIL-STD-704A
Outputs: 5 VDC @ 30 A
15 VDC @ 1.5 A
15 VDC @ 1.5A
Size: .58" Width SEM–E
Weight: 1.5 pounds

Active, low-frequency, Tempest filtering.
EMI filtering.

FEDERAL AVIATION ADMINISTRATION (FAA) POWER SUPPLY

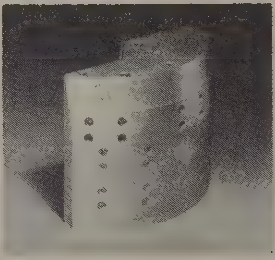
Model Number PB3562 and PB3561 (not shown)



Input: Redundant 208 single phase inputs
Outputs: 5 VDC @ 13 A
15 VDC @ 1.5 A
15 VDC @ 1.5 A
13.75 VDC @ 3 A
24 VDC @ 8 A
Weight: 15 pounds
Harmonic input currents limited to 5 percent of fundamental on both inputs. Features "hot" replacement packaging for redundant system applications.

BRILLIANT MUNITION POWER SUPPLY

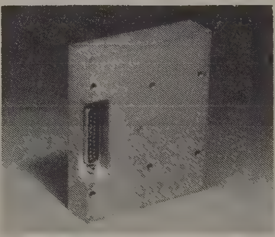
Model Number 13285590



Input Voltage: 56 VDC
Outputs: 5 VDC @ 7 A
15 VDC @ 0.5 A
15 VDC @ 0.5 A
5 VDC @ 1 A
5 VDC @ 3.5 A
15 VDC @ 2 A
15 VDC @ 0.6 A
Weight: 1.6 pounds
Vibration: 39.6 GRMS
High-volume, low cost, Surface Mount Technology production. Utilizes Application Specific Integrated Circuits (ASIC's).

RADIATION HARDENED ARMORED VEHICLE POWER SUPPLY

Model Number 2-21150 and 2-21115



Input: 28 VDC
Outputs: 5 VDC @ 15 A
or
15 VDC @ 2 A
15 VDC @ 2 A
10 VDC @ 1.2 A
Cooling: Conduction
Size: 4.66" x 3.68" x .94"
Qualified to ballistic and gunfire shock.

Operating Baseplate Temperature Range:
-55°C to +85°C

Efficiency (rated load):
80% minimum all outputs

Reliability Prediction: (single output configuration @ 100W, MIL HDBK 217E)
82,000 hours MTBF, 65°C baseplate, AUF
175,000 hours MTBF, 65°C baseplate, GM
315,000 hours MTBF, 65°C baseplate, NS
2,589,000 hours MTBF, 25°C baseplate, GB

Note: Consult factory for complete specification details for your application.

Electromech

POWER SUPPLIES

WALL PLUG-IN/DESK TOP POWER SOURCES • TAILORED TO YOUR EXACT NEEDS

ELECTROMECH, INC
POWER SUPPLY

- **FULL ISOLATION**
- **AC/AC**
- **AC/DC (unreg)**
- **AC/DC (reg)**
- **BATTERY CHARGERS**
- **LINEAR SUPPLIES**

FEATURES

Power—.1VA to 40VA (WALL PLUG-IN)
.1VA to 1KVA (DESK TOP)

Input—100VAC to 240VAC

Freq.—47Hz to 400Hz

Output—.1V to 200V (WALL PLUG-IN)
.1V to 1KV (DESK TOP)

Current—.01A to 5A (WALL PLUG-IN)
.01A to 400A (DESK TOP)

Termination—CONNECTORS, SCREW TERM.
ETC.

SERVICES

- DESIGNED TO YOUR SPECIFICATIONS
- DESIGNED TO UL/CSA/VDE/IEC
- FIRST ARTICLE ENGINEERING SAMPLE WITHIN ONE (1) WEEK
- NO MINIMUM ORDER QUANTITY
- NO ENGINEERING CHARGE
- 100% Q.A.

Electromech — **THE LAST WORD IN POWER SUPPLIES**

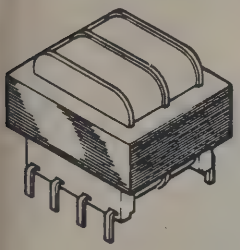
ELECTRO-MECH CO.

POWER CONVERSION SPECIALISTS FOR OVER 20 YEARS!

Open Frame:
PC or Chassis Mount



A COMPLETE DESIGN RANGE OF BATTERY CHARGERS, POWER SUPPLIES AND TRANSFORMERS

- **WITH ELECTRO-MECH CO. you are free to choose from a wide selection of STANDARD POWER SUPPLIES, BATTERY CHARGERS, and TRANSFORMERS. But our specialty is CUSTOMIZING transformer units to match your exacting specifications. Whether you require multiple outputs, special output voltages, state of charge indicators, PC mounts or customized case colors and imprints, we will design and build them exactly to your requirements.**

- **WITH ELECTRO-MECH CO., you not only get what you want, you get it when you want it. Our facilities at Colorado Springs and at Chihuahua, Mexico both employ automated and semi-automated instrumentation, resulting in high volume-production capacity.**

- **ENGINEERING DESIGN AND SUPPORT.**

- **DESIGNED AND CONSTRUCTED TO MEET OR EXCEED UL AND CSA REQUIREMENTS.**

- **It is the bottom line that must be kept in mind. ELECTRO-MECH CO. knows that, and is COMPETITIVELY PRICED while continuing to provide a QUALITY PRODUCT. The economics are simple...get the most for your money.**

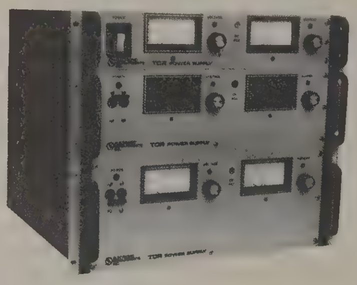
SCR-REGULATED DC POWER SUPPLIES

TCR SERIES SINGLE-PHASE MODELS



MAJOR SPECIFICATIONS

AC input voltage:
105-130V, 47-63 Hz (600, 1000 and 1800W Models)
190-253V, 47-63 Hz (2800W Model) 190-253V
Input options available on 600, 1000, and 1800W Models.

DC output:
Zero to value shown in model designation (volts-phase-amps). See chart. Regulation 0.1%.

Options:
Over voltage protection available on all units at additional cost. Digital panel meters available at no additional cost.

Sizes:
600 and 1000 watt: 3½″ High, 19″ rack by 18½″ Deep
1800 watt: 5¼″ High, 19″ rack by 18½″ Deep
2800 watt: 7″ High, 19″ rack by 18½″ Deep

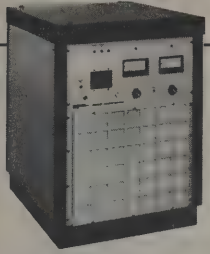
EMHP SERIES THREE-PHASE MODELS 20, 30, 60 KILOWATTS



APPLICATIONS

- Electromagnets
- Magnetic beam bending
- Cryogenic magnets
- Precision electroplating
- DC motor power
- Large relay systems
- Inverter power source
- High energy electronic systems
- Electrochemical processes
- High-power illumination systems
- Thermodynamic and thermonuclear research
- Battery charging
- Industrial DC power

FEATURES

- Low cost
- Quick delivery time
- High efficiency
- High performance

MAJOR SPECIFICATIONS

AC Input Voltage: 460 VAC ±10%, 60 Hz. Optional inputs available.

DC Output: regulation, 0.1%; stability, 0.05%.

ATR SERIES LINEAR POWER SUPPLIES

ATR-100

ATR-250

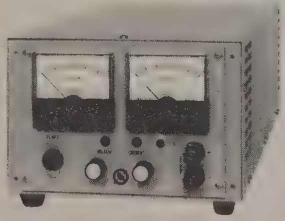
FEATURES:

ATR-100 and ATR-250 are 100 and 250 watt, wide range, linear, DC power supplies. Through a unique switching circuit these units produce essentially a constant power output capability so that as the output voltage requirement is lower the available current output is higher. The units are fully metered, programmable and have a self contained OVP circuit.

MODEL	OUTPUT RANGES		
ATR 100	0-8V 0-10A	8-18V 0-5A	18-32V 0-3A
ATR 100B	0-16V 0-5A	16-36V 0-2.5A	36-64V 0-1.5A
ATR 100C	0-32V 0-2.5A	32-64V 0-1.3A	64-128V 0-0.75A
ATR 250	0-8V 0-25A	8-18V 0-13A	18-32V 0-7A
ATR 250B	0-16V 0-12A	16-36V 0-6A	36-64V 0-3.5A
ATR 250C	0-32V 0-6A	32-64V 0-3.0A	64-128V 0-1.75A

Operating Temp: 0°C to +40°C at full rating
Storage Temp: −40°C to +85°C
Over Voltage Protection: Adjustable from 2.5V to 128V
Cooling: Fan cooled, thermostatically-protected
Weight: 18 lbs. (ATR-100); 32 lbs. (ATR-250)
Size: 4″Wx5″H × 18″D (ATR-100); 8″W × 5″H × 18″D (ATR-250)
Rack adapter systems available.

HCR SERIES DC MODELS - 250 WATTS



MAJOR SPECIFICATIONS

AC Input Voltage: 105-130V, 47-63 Hz or 190-253 V, 47-63 Hz. Optional inputs available.

DC Output: Regulation, voltage mode — ±0.1%; regulation, current mode - ±0.25%, 8 hours; temperature coefficient —0.02%/°C.

Weight: 45 lbs.

Size: 5″H × 7⅝″W × 18½″D

Rack Adaptors: Available for 1 & 2 units.

A Bipolar Operational Source/Sink power supply that provides a dozen functions in addition to delivering DC voltage and current.

More than a dozen functions

- DC power supply
- Electronic load
- Voltage source
- Power-pulse generator
- Current source
- Power-function generator
- Direct-coupled amplifier
- Variable-gain amplifier
- Fast-slewing power supply
- DC amplifier
- AC power supply
- Differential amplifier
- Signal-inverting amplifier

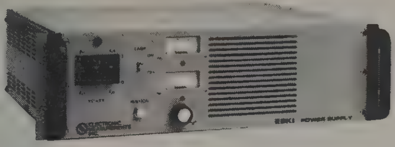
YAG DRIVE 6KW - 8KW -10KW SWITCHING POWER SUPPLY



ESKI SERIES

The ESKI series of power supplies is designed to power solid state Yag lasers. Utilizing a 20K HZ pulse-width-modulation technology the ESKI's provide a regulated current with a continuously variable output. Stable output and long lamp life is ensured as the output current is regulated to within 0.1% regardless of line fluctuations. Ripple is a maximum of 0.3% peak-to-peak, and with optical feedback, ripple can be further reduced by a factor of 3:1. The use of IGBT's as regulating elements provides high reliability, high efficiency, high packaging density and very light weight.

This power supply also provides the boost, or open circuit voltage required for lamp start, and incorporates a built-in, high voltage igniter assembly which is either pulsed automatically when the power supply is turned on or by customer control.

The power supply is of the non-line isolated type which reduces cost and weight but does require both lamp terminals to be insulated from ground. All controls, input programming and readbacks are, however, line isolated. Supply circuitry is highly isolated from chassis so that leakage currents are within medical application limits.

ESKI Series 6 kW, 8 kW and 10 kW Switching Power Supplies for Krypton Arc Lamps.

- Built-in Igniter
- 0.3% Light Ripple p-p
- 92% Efficiency
- Remote Programmable
- Leakage per U/L544/U/L1012
- 5.25″H x 19″W x 15″D
- Single Phase & Three Phase

XENON OR KRYPTON ARC LAMP REGULATED CURRENT SOURCES

EMKI SERIES

The EMKI series power supply is a completely solid-state regulated current source with a continuously variable output, designated particularly for supplying power to xeon or krypton arc lamps. Stable light output and long lamp life are ensured since the lamp current is regulated to within 1% regardless of line functions and the ripple current is less than 2%. The semiconductor circuitry allows instant start-up and the use of silicon controlled rectifiers as regulating elements provides high reliablity and high efficiency in a very compact unit.

This power supply also provides the boost or "open circuit" voltage required for starting arc lamps. In addition, it can pulse any standard igniter to permit a completely automated starting sequence, locally or remotely controlled.

The EMKI series power supply incorporates a built-in high-voltage igniter assembly which is pulsed automatically when the power supply is turned on.

☑ **Switch Mode Power Supplies**
for use with Mercury/Mercury Xenon lamps—35 W to 1000 W

☑ **Switch Mode Power Supplies**
for use with Krypton arc lamps — 6 kW, 8 kW & 10 kW

☑ **SCR**
primary control, 10 to 2500 W 30, 2500 W to 10,000 W for Mercury or Xenon arc lamps

☑ **Secondary Phase Control**
current sources, variable output from 120 V DC to 240 V DC with self-contained igniter and boost for Krypton lamps

5-YEAR WARRANTY!

SPECIFICATIONS

Input
Single-phase standard, 3-phase optional.
MK750 and MK1000 units
120 VAC (+ 10% -25%), 47-63 Hz standard.
240 VAC (+ 10% -25%), 47-63 Hz optional.
120/240 VAC Switch Option available.
MK1500 units
240 VAC (+ 10% -25%), 47-63 Hz standard.
120 VAC optional.

Efficiency
Up to 85% depending upon model.

Protection
Voltage: Overvoltage shutdown standard, crowbar overvoltage optional.
Current: Automatic current limit/foldback.
Thermal: Automatic shutdown when internal heat sink temperature exceeds safe limit. Automatic restarting when temperature returns to normal.
Reverse Voltage: Supply is protected from damage due to reverse polarity voltage across DC output terminals.

Cooling
Integral fan provides forced air cooling.

Operating Temperature
0° TO 71°C ambient; full output to 50°C.
Derate 2% per °C to 71°C.

Mechanical
5 x 8 x 11″

Convenience Functions
Inhibit/Remote Shutdown
Margin Check
Power fall/output good signal

Agency Approvals
U.L. Recognized
C.S.A. Certified
TUV Approved (Specify MKA)

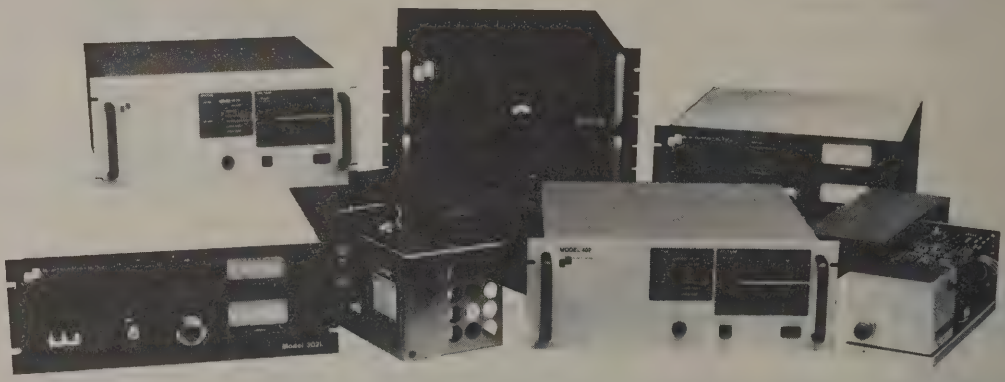
a.l.e. systems

HIGH VOLTAGE POWER SUPPLIES

A.L.E. is a leader in the design and manufacture of advanced switchmode power conversion systems for high power, high voltage applications. Our broad experience solving complex high voltage problems for the OEM and laboratory environments include power supplies for dye, excimer, TEA, vapor, Yag, CO_2, lasers and other pulsed power applications world wide.

Capacitor Charging Supplies: The A.L.E. Series of high voltage capacitor charging supplies is available with power outputs of 500 to 15,000 Joules per second. All units are available with full scale voltages to 50kV. Most models are available in both fully instrumented and OEM versions. All types are highly resistant to external electromagnetic interference.



Supplies for CO_2 Lasers: A.L.E.'s patented converter topology produces a controlled high voltage current source for operating CW CO_2 lasers. Available with output powers of 250W and 500W and operating voltages of 4.5kV to 24kV, these units allow ballastless operation of negative impedance discharges. A.L.E.'s CO_2 supplies provide strike potentials up to 40kV and can be operated in parallel for greater output.

High Voltage D.C. Supplies: A.L.E. also has the capability of producing high power D.C. supplies on a custom basis. Providing outputs of 2kW to 30kW and voltages to 80kV, A.L.E.'s converter capabilities encompass a broad range. Our proprietary high voltage conversion stages use a minimal number of multiplication stages resulting in very low levels of stored energy.

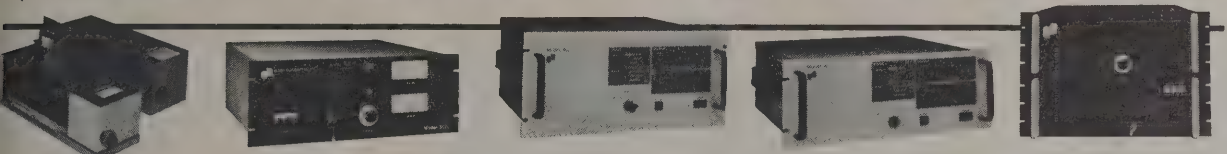
HIGH VOLTAGE POWER SUPPLIES



Model	Average Power J/sec	Peak Charge Rate J/sec.	Size	Input Voltage
501	500	650	6 x 6 x 15	115/230
102	1000	1200	6 x 6 x 15	115/230
152	1500	2000	6 x 6 x 15	190-260
202	2000	2500	6 x 8 x 15	190-260
302	3000	4000	7 x 19 x 17	190-260
402	4000	5000	7 x 19 x 17	190-260 380-415
802	8000	9000	8.75 x 19 x 17	190-260 380-415
153	15000	20000	12.25 x 19 x 22	190-260
203	20000	25000	12.25 x 19 x 22	340-460
303	30000	37500	12.25 x 19 x 22	432-528

Most units are available with full scale output voltages of 1, 2, 4, 5, 10, 20, 30, 40, 50kV. Other voltages are available on request.

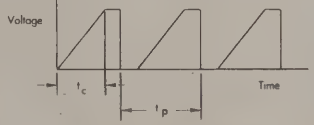
Capacitor Charging Power Supplies

500 J/s to 30kJ/S with IGBT Technology

Advanced high voltage current sources specifically designed to charge capacitors in discharge driven applications.

Capacitor charging supplies are rated in Joules per second. To determine the required supply capacity, multiply the energy storage ($CV^2/2$) by the pulse repetition frequency. For example a 90nF capacitor operating at 40kV and a 50Hz rate would require a 3600J/sec. supply.

All A.L.E. capacitor charging supplies are rated in both average and peak charge rate. The peak rating assures that the full average power of the unit is available when the requirement for transfer switch recovery time is taken into account.



$$\text{Peak charge rate} = \frac{1/2\,CV^2}{t_c}$$

$$\text{Average charge rate} = \frac{1/2\,CV^2}{t_p}$$

CW Arc Lamp Supplies

4, 6 and 8kW output

17 x 8.5 x 10.5

Active power factor correction available in the 4kW and 6kW PC models

The YAG Drive Series of switching power supplies are designed for Nd: YAG and other solid-state laser systems. Advanced IGBT technology, combined with high quality construction, yield an exceptionally small and reliable power supply. With integral igniter and boost circuitry, the YAG Drive provides a complete power system for krypton arc lamps. Short circuit, open circuit and arc lamp failures will not damage the power supply.

Output Power:
YD4-SC 150V, 35A, 4kW max.
YD4-PC 250V, 35A, 4kW max.
YD6-SC 150V, 50A, 6kW max.
YD6-PC 250V, 50A, 6kW max.
YD8-SC 250V, 50A, 8kW max.

Input Power Requirements
Voltage:
1 Phase 180-264VAC, 50/60Hz
3 Phase 180-264VAC, 50/60Hz

Current:
YD4-SC 1 Phase, 40A max.
3 Phase, 20A max.
YD4-PC 1 Phase, 40A max.
3 Phase, 20A max.
YD6-SC 3 Phase, 30A max.
YD6-PC 1 Phase, 40A max.
3 Phase, 25A max.
YD8-SC 3 Phase, 35A max.

Regulation
±1.0% over full line and load range

Ripple
DC to 1kHz: 750ma pk-pk max.
1kHz to 20MHz: 10% of Iout, pk-pk max.

Igniter
25kV

Boost
1kV

Efficiency
SC Models: 87%
PC Models: 85%

Inrush Current
Limited to below full power level

Pulsing
Up to 1kHz, 300 usec rise and fall times, 75% modulation

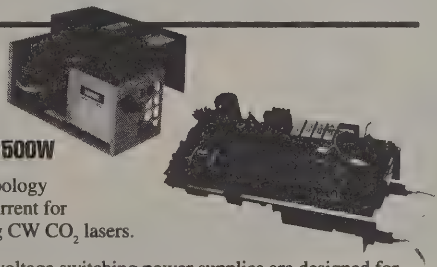
Precision High Power HVDC

Custom supplies from 2kW to 30kW

Highly regulated supplies for ion implantation, X-ray and other demanding high power applications. Basic voltage transformation to 40kV allows for a minimal number of multiplication stages and hence extremely low levels of stored energy.

CO_2

Ballastless CO2 Supplies 250W and 500W



Patented converter topology provides controlled current for striking and sustaining CW CO_2 lasers.

The CO2 Series high voltage switching power supplies are designed for medical and industrial CO2 laser systems. The advanced "ballastless" design can increase laser system efficiency by 20%. Configured as either open-frame or enclosed chassis, the CO2 power supply is compact enough to be designed right into the laser head. Designed for continuous use, these air-cooled power supplies provide an average power of 250 Watts or 500 Watts, and status monitoring are easily accomplished with thestandard remote interface.

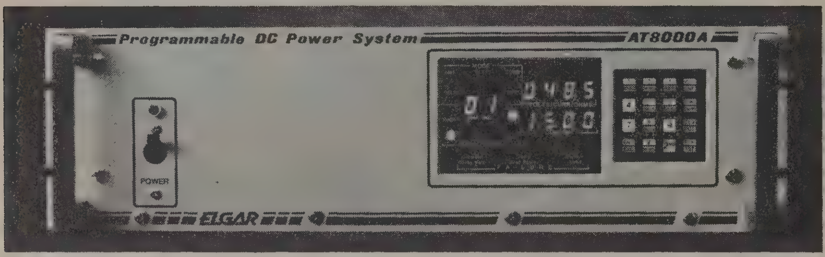
Programmable DC Power Systems

AT8000A Programmable DC Power System



- 16 channels, up to 19,200W at a single bus address
- 6 channels, up to 1200W, in a single 5.25" drawer
- Parallel programming
- Sub-modular construction
- Programmer, keyboard/display
- Confidence test on command
- Fault isolation to replaceable module level
- Qualifiable to MATE guidelines
- Programmable shut-down sequence

Elgar's AT8000A Programmable DC Power System holds from 1 to 6 totally independent channels of DC power in a 5.25" rack-mount chassis. By using expansion chassis, it can be expanded to 16 output channels controlled by an internal master programmer, either from the front-panel keyboard or remotely via IEEE-488 GPIB using one selectable bus address. It integrates programmer, power and load modules, built-in test equipment and all signal/load interfaces into the most compact and powerful package available.

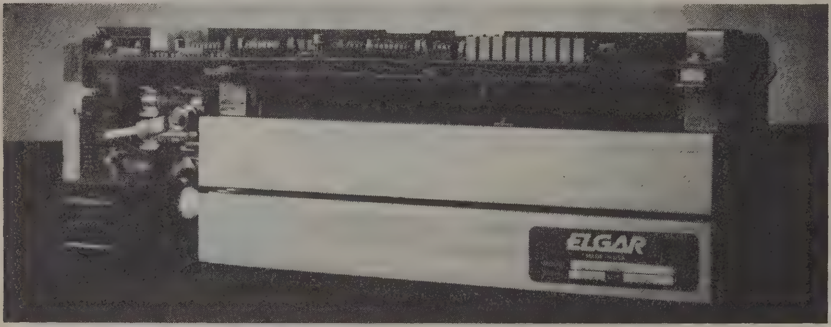
Using 200W modules, a single-chassis system can deliver up to 1,200W. Adding additional modules and chassis can raise total power to 19,200W at a single bus address. Programmable paralleling can provide any combination of 200W increments up to 1,200W per channel.

Front-panel Keyboard/Display includes a 16 pad, multilevel keyboard with increment/decrement keys plus an LED display to speed and simplify programming. The system can show programmed values or, with the built-in test option, actual measured values, as well as channel number, voltage and current. It allows complete local/ manual control of most functions, alerts the operator to identified system malfunctions and prompts the operator for ease of programming and operation.

Internal Programmer can employ either user-friendly ABLE (Atlas Based Language Extension) or optional CIIL (Control Interface Intermediate Language) for complete voltage, current and general system control.

DC Power Modules employ a high efficiency linear design for fast response and low noise. Eight standard output voltage ranges are available: 0 to 7, 10, 20, 32, 40, 80, 160 and 320 VDC — and the design makes modification to accommodate special voltage application requirements quick and easy. Outputs are completely isolated and all operate in programmable voltage or constant current mode. There's over current sensing and over voltage protection with SCR crowbar shutdown. Load isolation (confidence) relays are standard and polarity switching relays are optional.

NEW Electronic DC Load Modules



Elgar's versatile new 300W Electronic DC Load Modules can be installed in the AT8000A Programmable DC Power Systems to simulate all real-world characteristics for testing, evaluation and burn-in of DC power supplies, batteries, capacitors and other power components.

The DC load modes of operation are: constant current, constant voltage, constant resistance, short circuit, and transient operations.

Programmable slew rates automatically duplicate the dynamic behavior of real-world load conditions, while analog modulation with external input accurately duplicates complex load waveforms. Remote sensing capabilities increase flexibility while maximizing programming and readback accuracy.

Auxiliary Drive Module (ADM)

Elgar's Auxiliary Drive Module (ADM) is a digital-to-analog converter which adds two versatile functions to AT8000A Systems. It can act as:

- Two programmable analog signals to drive external AC or DC power sources or other electronic equipment.
- A programmable connect/disconnect relay driver for controlling an external power relay.

With an ADM, a non-Elgar external bulk supply can take on the same personality as an AT8000A DC module—extending the AT8000A's normal power-per-module from 200W. ADM's occupy a single AT8000A slot and are addressed as a single channel from the front panel keyboard or over the IEEE-488 bus. The ADM has 2 separate isolated outputs (one each for programming voltage and current) plus two programmable relays which can serve as contact closures to activate external high-power disconnect/isolation relays or serve as status indicators. Optional Built-In Test (BIT) for readback of voltage and current measurement of the external device is also available.

60LO1
Maximum power 300W continuous
Voltage range 3-60V
Current ranges 0-6A, 0-60A
Resistance range 0.1-100 ohm
Modes of operation Constant current, constant voltage, constant resistance, short circuit and transient operations

120LO1
Maximum power 300W continuous
Voltage range 3-120V
Current ranges 0-3A, 0-30A
Resistance range 0.1-1.0K ohm
Modes of operation Constant current, constant voltage, constant resistance, short circuit and transient operations

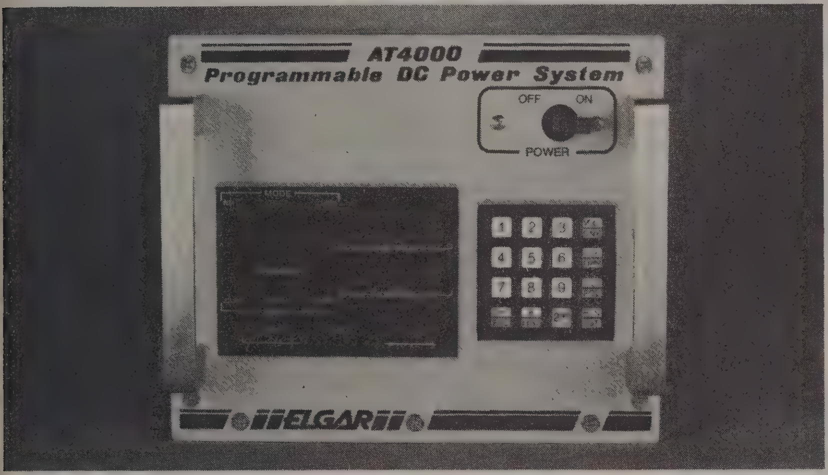
Programmable DC Power Systems

AT4000 Programmable DC Power System



Elgar's AT4000 Programmable DC Power System is a half-rack version of the AT8000A. It holds from 1 to 3 "instrument-on-a-card" DC power supplies in a 7" chassis. Each chassis can provide up to three 150W channels — for a maximum of 450W per chassis. As in the 6-channel AT8000A, it is controlled from either the front-panel keyboard or remotely via the IEEE-488 BUS using one selectable bus address.

SPECIFICATIONS:

Configuration 1 to 3 output channels per 7" high, half rack chassis

Full rated output power Up to 150W per channel

Other specifications See AT8000A section

The AT4000 integrates programmer, power modules, built-in test equipment and all interfaces into a compact, powerful package. Software can be developed in the laboratory with the AT4000 and then be transferred to AT8000A production systems with no modifications.

By adding virtually the same powerful capabilities offered by the AT8000A at a reduced size, the AT4000 can support requirements for smaller manual bench-top DC power supplies, programmable bench-top power sources, ATE production test systems and verification test systems.

ELGAR

Elgar's VXP3000 Programmable Power System is the state-of-the-art solution for test systems where high power density, small size and flexibility are the key priorities.

The unique chassis design employs 1.8 inch wide slots which accept one controller module and up to eight power modules or three 750VA AC modules. The ability to provide both AC and DC power in one chassis and at one GPIB address is further enhanced by an Auxiliary Drive Module (ADM). This module allows the VXP controller to program external bulk or high power DC power supplies as if they were standard VXP power modules.

CONTROLLERS

IEEE-488 controller With ABLE or CIIL (MATE) syntax

Slave controller for use with expansion chassis or as an interface to a VXP1000 power programmer located in a VXI chassis

DC POWER MODULES

Output voltage range 0-7, 10, 14, 20, 32, 40, 60, 100 and 200 VDC; 1.8" standard width (up to 8 modules per chassis)

Full rated output power 200W for 10, 14, 20, 32, 40, 60, 100 and 200 VDC modules; 140W for 7 VDC module; 1.5 KW, 4-wide module available at 100 VDC

Parallelable For load sharing (available for 140W and 200W modules)

Series connectable Up to 400 VDC

AC POWER MODULES

Full rated output power 750 VA

Output voltage range 0-135 VAC, 3.6" double-wide size

Frequency range 350-999.9 Hz (45-350 Hz with reduced specifications)

Configurable For up to 2250 VAC single-phase or up to 6750 VA three-phase

Parallelable For higher power requirements by using the special plug-in VXP-LSM module

Auxiliary output A 0-26 VAC/2A output proportional to the main output voltages provided. An optional 5 VAC/5A auxiliary output is available.

Fast current limit protection Against short circuits

Efficiency Over 80%

High Voltage Power Supplies

DC to DC Converters up to 75W

Applications

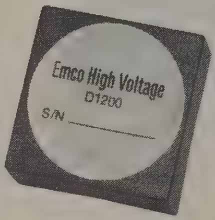
CRT,Photomultiplier,X-Ray, Spectroscopy, Ion Spectrometry, Analytical Spectrometers, Shadow Mask, Laser Interferometers, Color Graphics, Image Intensifiers/Analyzers, Capacitor Charging

Capabilities

INPUT VOLTAGE: 4 to 150 Volts DC
OUTPUT VOLTAGE: Up to 30,000 Volts DC
OFF THE SHELF PRICING AND DELIVERY FOR STANDARD MODELS. CUSTOM DESIGNS FOR YOUR SPECIFIC REQUIREMENT. ONE YEAR WARRANTY. FULL TECHNICAL SERVICE

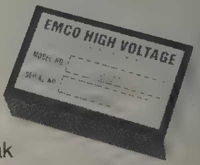
Miniature Converter "D" Series

Input Voltage:	10 Volts DC
Output Voltage:	Up to 2,400 Volts DC
Output Current:	50 to 250 µA
Regulation:	Output follows input
Ripple:	0.5% Peak to Peak
Package Size:	1.5" x 1.5" x .63"



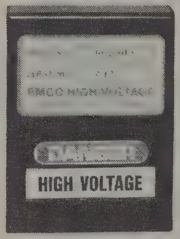
Proportional PC Module "E" Series

Input Voltage:	4 to 12 Volts DC
Output Voltage:	Up to 10,000 Volts DC
Output Current:	0.2 to 10 mA
Regulation:	Output follows input
Ripple:	.01% to 1% Peak to Peak
Package Size:	1.5" x 2.5" x .85"



PC Mount PMT Supply "PC" Series

Input Voltage:	15 Volts DC
Output Voltage:	Adj. up to 2,500 Volts DC
Output Current:	0.5 to 1 mA
Regulation:	0.004%
Ripple:	0.001%
Package Size:	2.6" x 3.5" x 1.0"



HeNe Laser Power Supply "LP" Series

Input Voltage:	12 Volts DC
Output Voltage:	Up to 2,500 Volts DC
Output Current:	2.5 to 7.0 mA
Regulation:	0.5%
Ripple:	3% RMS
Package Size:	1.5" x 3.75" x 1.0"

HIGH VOLTAGE

Precision PMT Supply "PD" Series

Input Voltage:	24 to 30 Volts DC
Output Voltage:	Up to 3,000 Volts DC
Output Current:	3 to 10 mA
Regulation:	0.001%
Ripple:	0.0002%
Package Size:	5.1" x 4.1" x 1.5"

HIGH VOLTAGE

Regulated CRT Supply "6000"Series

Input Voltage:	24 Volts DC
Output Voltage:	Up to 18,000 Volts DC
Output Current:	0.55 to 1.25 mA
Regulation:	0.1%
Ripple:	0.033%
Package Size:	4.1" x 3.1" x 1.4"

HIGH VOLTAGE

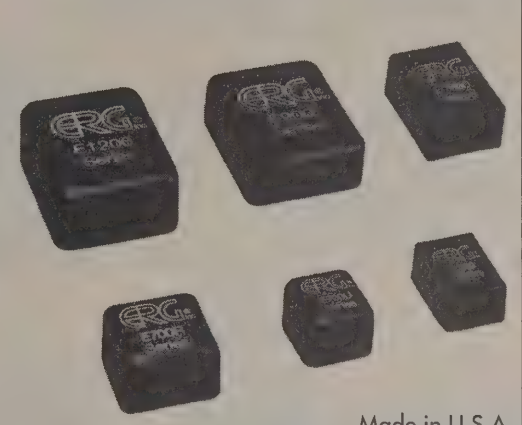
DC-DC CONVERTERS

DC-DC Converters for Gas Discharge Displays up to 25W

Convert low DC line voltage to the higher voltage levels required to activate multi-segment plasma gas dicharge displays (including bar graphs). ERG Converters eliminate the need for 200-250 vdc line.



Made in U.S.A.

Contact Factory for Voltage Requirements:

- Custom Design Variations for multi-segment, bar graph and dot matrix gas discharge and vacuum flourescent displays
- Inputs from 5 vdc to 28 vdc
- Outputs from 5 vdc to 1,500 DC
- Single and dual outputs (up to 25W total)
- Regulated and unregulated
- Center Tap (voltages)

General Specifications

Converter Series	Input	Output	Size	Weight	Package
E700U	5, 9, 12, 15 vdc	Up to 3W unregulated (i.e. 200 vdc @ 15 ma)	1.1" (27.94 mm)X 1.2" (30.48 mm)X .91" (23.11 mm) max. high	30 gms.	Plastic
E700R (Regulated)	5, 9, 12, 15 vdc	Up to 3W unregulated (i.e. 200 vdc @ 15 ma)	1.43" (36.32 mm)X 1.5" (38.10 mm)X 1.03" (26.16 mm) max. high	40 gms.	Plastic
E500*	5, 9, 12, 15 vdc	Up to 3W unregulated (i.e. 200 vdc @ 15 ma)	1.00" (25.40 mm)X 1.38" (35.05 mm)X 0.70" (17.78 mm) high	20 gms.	Plastic
E1600	5, 9, 12, 15 vdc	Up to 6W unregulated (i.e. 200 vdc @ 24 ma)	1.30" (33.02 mm)X 1.88" (63.50 mm)X 0.82" (24.9 mm) high	44 gms.	Plastic
E900	5, 9, 12, 15 vdc	Up to 12W total, with single or dual outputs, unregulated; (i.e. Single: 250 vd: @ 30 ma Dual: 250 vdc @ 30 ma and -16 vdc @ up to 200 ma to power the drive electronics in many applications.	2" (50.80 mm)X 2.5" (63.50 mm)X .98" (24.9 mm) high	122 gms.	Aluminum
E1200	12, 15 vdc standard (others to your spec)	Up to 25W unregulated (i.e. 250 vdc @ 100 ma)	2" (50.80 mm)X 2.5" (63.50 mm)X 1.19" (30.23 mm) high	185 gms.	Aluminum

* For high-volume requirements, E500 delivers same performance as E700 at significantly lower unit cost!

Mounting: P.C. board standard
Encapsulation: All ERG converters are fully encapsulated
Isolation (in/out): 600V RMS (60 Hz. breakdown for 1 min.) standard
Temperature: 0-70°C standard. Wider ranges available. 85°C case max.

REGULATED & SEMI-REGULATED POWER SUPPLIES

Ruggedly-constructed, low voltage D.C. power supplies for use in design, development, testing of transistor circuitry . . . for servicing and operating auto, aircraft, marine-craft radio, electronic equipment . . . for production line testing, industrial and educational laboratory work and many other applications.

Precision made and engineered to give unequalled performance life per dollar. Features include: Voltage regulation, AC ripple filtering, adjustable output voltage, large easy-to-read meters, isolated output terminals, 1-year warranty.

INPUT—*Regulated Models:* 105-125 V. AC. 60 Hz *Industrial and General Purpose Models:* 117 V. AC 60 Hz. Models available to fit W.E. and EIA racks. Custom-design or modification of standard units to your specs.

INVERTER — Transistorized. Converts 12 V. DC to 117 V. AC, 60 Hz to operate equipment from car, truck or boat battery, or other 12 V. DC source for camping, traveling, boating. Reverse polarity and short circuit protection.

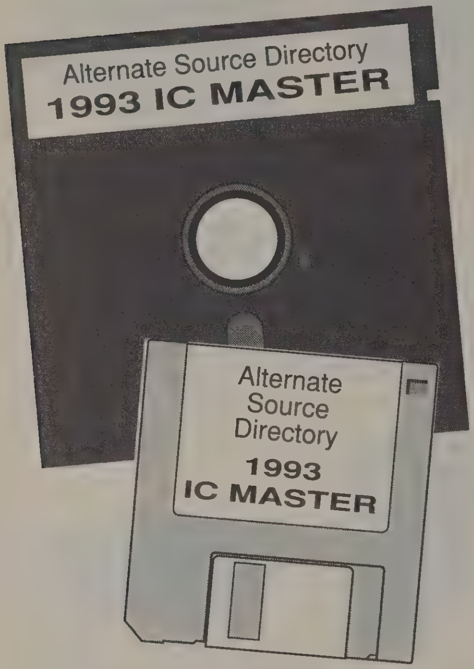
ICMASD
Alternate Source Directory



The all new 1993 ICMASD-IC Alternate Source Directory on Disk is identical to the Alternate Source Directory Section contained in Volume Two of the printed version of the 1993 IC Master. All you need is an IBM XT/AT or 100% compatible personal computer with hard drive.

ICMASD is the most comprehensive and reliable guide available to all ICs known to have a realistic replacement or alternative. The 1993 version contains over 106,000 listings to help you find the functional equivalents for both current and discontinued parts.

The electronic ICMASD is fast, convenient...and can be customized for your specific needs!

ENHANCED FLEXIBILITY

ICMASD is organized in a similar fashion to the printed version in the IC MASTER. The database is arranged by manufacturer, showing the manufacturer's original basic part number. All known replacements for that part are listed in alphanumeric order.

The enhanced flexibility of the electronic ICMASD allows you to add comments, up to 19 digits long, to any device listing in the system. These comments can be part numbers, project notes, prices, or any information unique to your application.

USER FRIENDLY

ICMASD is very user friendly. There are no tricky commands to learn. The software is completely menu driven. ICMASD comes complete with documentation that is brief and to the point. It can be ordered on five 51/4" double-sided, double-density disks OR on one 51/4" high-density disk OR on one 31/2" high-density disk.

Published annually in March

FAST AND CONVENIENT

ICMASD includes a complete Manufacturers & Distributors Directory listing the addresses and phone numbers of every manufacturer in the IC industry. With this complete directory any manufacturer or distributor is just a phone call away.

To order your 1993 ICMASD,
contact your local IC MASTER distributor or, send your purchase order and check for $179.50 plus tax* to:

Marie Botta
Hearst Business Publishing
645 Stewart Avenue
Garden City, NY 11530
(516) 227-1300 • FAX (516) 227-1901

*Please add sales tax in NY,MA,IL, CA, or GST tax in Canada
For delivery outside the USA, please add $20 per ICMASD.

Ericsson is an international leader in telecommunications, recognized for its advanced systems and products for wired and mobile communications in public and private networks. Ericsson is also a leading supplier of electronic defense systems.

Ericsson Components provides energy systems, mainly for telecommunications, as well as advanced microelectronics, cables and distribution of components.

The Energy Systems Division provides a full range of power products and systems, as well as cooling and energy management systems. Ericsson has designed, manufactured and marketed power products for more than 100 years, and the Energy Systems Division is active in some 90 countries.

- **DC/DC Converters for Distributed Power Architectures**
- **Manufactured by World Class Automation Process**
- **Operations Certified in Accordance with ISO 9001**

Ericsson Components, Energy Systems

– The Power in Telecommunications –

Ericsson Components' Energy Systems Division has been in the forefront of electronic power supply development for over four decades. Ericsson Components, which includes activities for power, microelectronics and fibre optical circuits and modules, is a strategically important company within the internationally renowned Ericsson group.

Throughout the group's history, which dates back to 1876, Ericsson has been involved in the challenging and fast moving field of telecommunications. It's a sector which demands a combination of innovation, high reliability and commercially competitive business practice in order for companies to survive and grow. The group's success in this area is clearly demonstrated by its current position in world markets – sales of $7 billion, activities in 100 countries and 66,000 employees (1992).

Ericsson Components' manufacturing is carried out in Sweden so in order to provide local sales and technical support around the world, Ericsson has established sales offices, distributors and agents throughout Europe, North America and the Far East.

Each one is able to provide a high level of technical and applications advice to customers, as well as affording a local point of contact for sales enquiries and orders.

As a major part of Ericssons power supplies is exported, the company is geared to providing an efficient and rapid service to customers, wherever they may be located.

Innovative design, quality of products and dedication to service are the hallmarks of Ericsson Components Energy Systems.

ERICSSON

DC/DC Converters 25–40 W
PKE 4000-Series

- *No derating of output power within –45 °C to +85 °C ambient temperature range*
- *10.7 mm (0.42") height allows 0.8" board spacing*
- *1 500 Vdc In/Out isolation conforming to EN 41003 and UL 1459*
- *MTBF > 2,000,000 hours at +45 °C per MIL-HDBK 217E*
- *Efficiency 83–85%*
- *Complete, no extra filters or heatsinks required*

(UL 1950)

Low Profile Power Modules for non-controlled environments

The 25–40 watts PKE 4000 series hybrid DC/DC Power Modules are especially designed for decentralized 48/60 Vdc power distribution systems with distributed on-board DC/DC converters in applications with extra high temperature and isolation requirements. Their low profile allows very narrow board pitches and slim designs. By using a thickfilm technology, which provides a high degree of integration as well as an efficient thermal management and by utilizing a 300 kHz switching frequency technology based on proprietary drive & control chips, these highly reliable products conform to standard telecom and datacom requirements in non-controlled environment applications. Input to output isolation is 1,500 Vdc to meet increasing demands on isolation voltages in accordance with EN 41003 and UL 1459. The mechanical ruggedness – in conformance with IEC 68-2 – is close to the requirements for discrete components. The converters can operate with full output power in ambient temperatures from –45 to +85 °C making the products ideal in most demanding applications. To meet generic requirements for power supplies, the products are also UL recognized and CSA certified.

The PKE 4000 Power Modules are manufactured in highly automated production lines, using all SMD mount, laser trimming and an 100% burn-in and ATE final inspection.

Ericsson Components AB is an ISO 9001 certified supplier since 1991.

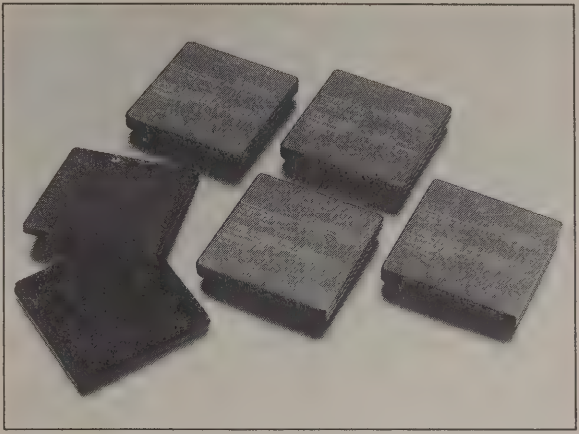
DC/DC Converters 25–30 W
PKE 4000E-Series

- *No derating of output power within −10 °C to +70 °C ambient temperature range*
- *10.7 mm (0.42") height allows 0.8" board spacing*
- *500 Vdc In/Out isolation*
- *MTBF > 2,000,000 hours at +45 °C ambient and full load – equal to +75°C baseplate temp*
- *Efficiency typically 85% at full load. No extra heat-sink needed at +70 °C free convection – max. baseplate temperature +100 °C*



Low Profile Power Modules for controlled environments

The 25–30 watts PKE 4000E series hybrid DC/DC Power Modules are especially designed for decentralized 48/60 Vdc power distribution systems with distributed on-board DC/DC converters in applications with standard temperature and isolation requirements. Their low profile allows very narrow board pitches and slim designs. By using a thickfilm technology, which provides a high degree of integration as well as an efficient thermal management and by utilizing a 300 kHz switching frequency technology based on proprietary drive & control chips, these highly reliable products conform to standard telecom and datacom requirements in controlled environment applications. Input to output isolation is 500 Vdc and mechanical ruggedness – in conformance with IEC 68-2 – is close to the requirements for discrete components. The converters can operate with full output power in ambient temperatures from −10 to +70 °C making the products ideal for normal temperature requirements in most applications.

The PKE 4000E Power Modules are manufactured in highly automated production lines, using all SMD mount, laser trimming and an 100% burn-in and ATE final inspection.

Ericsson Components AB is an ISO 9001 certified supplier since 1991.

Note! – For increased temperature range and input/output isolation, UL recognition and CSA certification please refer to PKE 4000 data sheet.

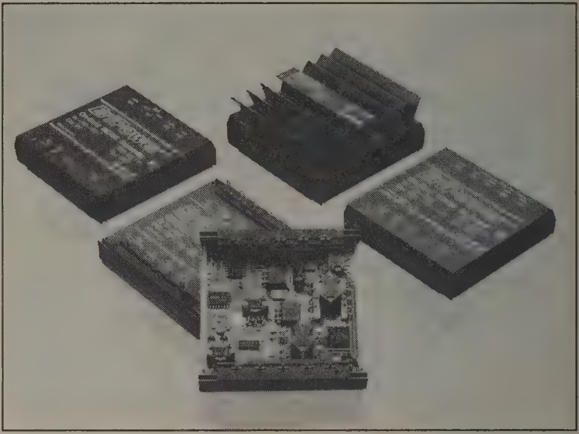
ERICSSON

DC/DC Converters 25–40 W
PKA-Series

- *No derating of output power within –45 °C to +85 °C ambient temperature range*
- *+115 °C max. case temperature*
- *MTBF >2,000,000 hours at +45 °C per MIL-HDBK 217E*
- *Efficiency 80–85%*
- *500 Vdc isolated or non-isolated models*
- *Complete, no extra filters or heatsinks required*
- *Compact, 3" × 3" × 0.7"*



Compact On/Off-Card hybrid power modules

The PKA-series of DC/DC converters consists of 45 models, available in non-isolated or 500 Vdc input/output isolated versions. The single, dual and triple output converters with input ratings of 19–35 Vdc or 39–64 Vdc and with an output power of 25–40 W, are recognized as the industry standard for miniaturized On-Card converters. The ambient temperature range is –45 °C to +85 °C without derating. Low profile 40 W models with an additional height of only 2 mm (compared to the 25–30 W models) have a temperature range of –45 °C to +65 °C. Using thickfilm hybrid technology, very efficient thermal management combined with a 300 kHz switching frequency has made it possible to achieve a verified MTBF of >200 years. Two transistor topologies based upon proprietary drive and control circuits have facilitated the use of only highly reliable ceramic capacitors instead of electrolytics (one of the keys to the MTBF-figures). The reliability makes them ideal in Telecom, Datacom and Medical applications. Their low weight and height in addition to their electrical and mechanical ruggedness offer possibilities for use as distributed power sources directly on PCB:s (On-Card) or Chassis (Off-Card) mounted in Industrial, Airborne and other demanding applications. Special design care has been taken regarding the mechanical performance. Consequently, the vibration, shock and bump specifications normally associated with components such as resistors and capacitors. Output characteristics together with accurate laser trimming of output voltages in the highly automated production line makes it possible to parallel the PKA:s in great numbers.

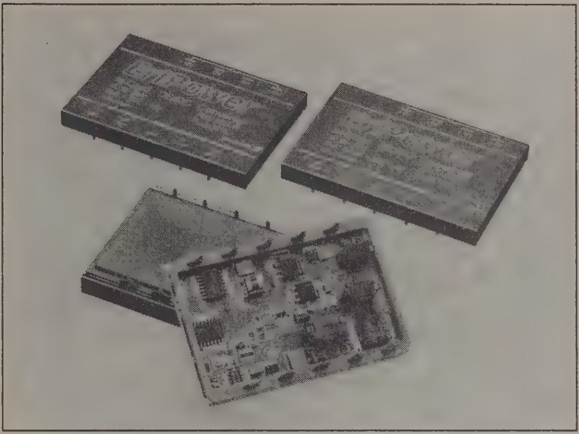
ERICSSON

DC/DC Converters 15–18 W
PKC-Series

- *No derating of output power within –45 °C to +85 °C ambient temperature range*
- *+115 °C max. case temperature*
- *MTBF >2,000,000 hours at +45 °C per MIL-HDBK 217E*
- *Efficiency 80–87%*
- *500 Vdc isolation*
- *Complete, no extra filters or heatsinks required*
- *Compact, 2.16" × 3.15" × 0.42"*



Compact On/In-Card hybrid power modules

The PKC-series of DC/DC converters consists of 14 models with input ratings of 18–36 Vdc or 36–72 Vdc and with an output power of 15–18 W. They are specifically designed for distributed power supply requirements and their outputs can easily be paralleled for power upgrading or redundancy. The ambient temperature range is –45 °C to +85 °C without derating. The converters can either be mounted as In-Card with a maximum height over the PCB of 10.7 mm/0.42" or as In-Card, i.e. into a punched hole in the PCB, with a height over the board of 8.5 mm/0.33" thus allowing 3TE/0.6" board spacing in a rack. The PKC-series converters has up to three well regulated outputs which will stay within 3% of their nominal voltage for all specified load, line and temperature ranges.

The PKC-series of DC/DC converters does normally not require external components even when used in sensitive applications. Conducted RFI is within the VDE 0871 curve A and FCC 20780 class A. The mechanical design conforms to the IEC 68-2 specifications, normally applicable to discrete components such as resistors and capacitors.

Surface mount hybrid technology provides excellent thermal management and with the 300 kHz switching frequency it has been possible to use ceramic capacitors only within the design, thus achieving an MTBF >200 years. Together with the low weight (50 g/1.76 ozs.) this makes them ideal for Telecom, Datacom, Airborne Industrial and Medical applications.

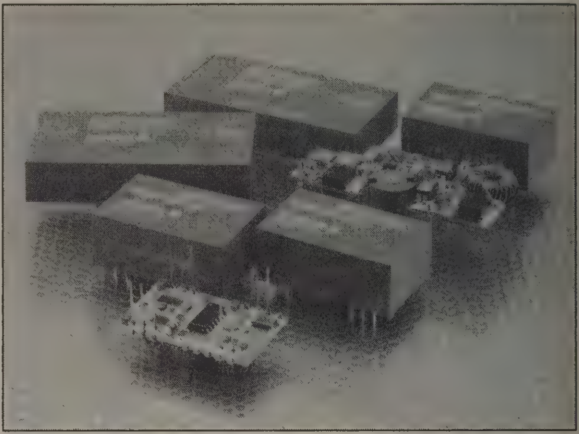
ERICSSON

DC/DC Converters 0.3–9 W
PI/PKV-Series

- *MTBF >200,000 hours at +30 °C*
- *Thickfilm hybrid or SMD*
- *Isolation voltage 500–1 000 Vdc*
- *High power density and low heat dissipation*
- *Input filters and short circuit protection*
- *Wide input and high efficiency models*
- *Operating temperature −25 °C to +70 °C (−40 °C for 2PKV/7PKV)*



Miniature DC/DC power modules

PI/PKV are the product names of a range of DC/DC converters in thickfilm hybrid or SMD technology meeting the growing demand for PCB voltage conversion or circuit isolation in high quality telecom and industrial circuits.
High switching frequencies and an efficient thermal management bring high power densities. All types (except 1PIN) are designed with high attenuation input filters. There is short circuit protection with foldback characteristics for all types except 1PIN for which the protection is limited to 10 s.
2PKV and 7PKV are very high efficiency and wide input range converters with excellent line regulation and a very low No Load input current.
The converters are encapsulated with an epoxy filled plastic box. The encapsulation is self-extinguishing meeting UL requirements.

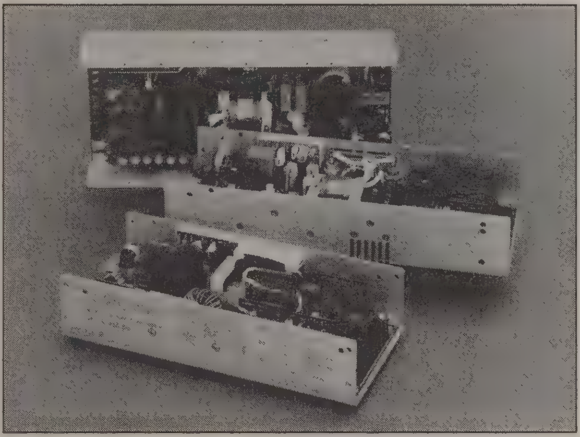
ERICSSON

AC/DC Switching Power Supplies 150–400 W
PLY-Series

- *Quad independent regulated and adjustable outputs*
- *1.5 ×rated current for disc drives start-up surge current*
- *Designed to CSA 22.2, UL 478, UL 1012 and VDE 0806 plus IEC 380/950*
- *RFI suppression in conformance to FCC subpart 15J and VDE 0871 curve B*
- *Protected against: Overload, Over-voltage, Overcurrent, Overheating, No Load, Reverse Voltage, Short Circuit and Brownouts*



Quad Output Switchers in standard footprint

The PLY series of regulated quad output switchers constitutes a series of versatile standard open frame power supplies. Standard footprints and a very wide range for adjusting the outputs, make them ideal not only for substituting an existing power supply but also for applications requiring “odd” voltages. Combining and adjusting the outputs makes possible to meet almost every voltage needed.

High frequency MOSFET switching, surface mounting and a compact design contribute to the attractively small dimensions. Output 2–4 are post regulated and floating, giving possibilities for series connections of selected outputs. The voltages can be adjusted within a wide range and for one of the outputs as much as from 11.5 Vdc to 26 Vdc. An attractive feature is the outputs possibility for surge current (1.5 times max. continuous) which allows start-up of disc drives.

The products are approved from major safety agencies, offering a security to the user in his application for such safety approval of the complete equipment. The PLY 47 have universal input voltage, making it possible to connect them either to 115 V ac or 230 V ac without selecting the input while the PLY 48/49 are user selectable by means of a strap.

A power OK signal is available as well as the possibility for remote control and remote sense.

An MTBF figure of 150.000 hours makes these switchers ideal for applications within computers, communications and industrial systems.

ERICSSON

MINIGLOSSARY
OPTO SEMICONDUCTORS

Avalanche Photodiode: A photodiode that takes advantage of avalanche multiplication of photocurrent. It is particularly suited to low noise and/or high speed applications.

Contrast: A noticeable difference in color, brightness, or other characteristics in a side-by-side comparison.

Chrominance Contrast: The color contrast between two adjacent surfaces of identical area, shape, texture, and luminance. The human eye is more sensitive to differences in color than it is to differences in brightness.

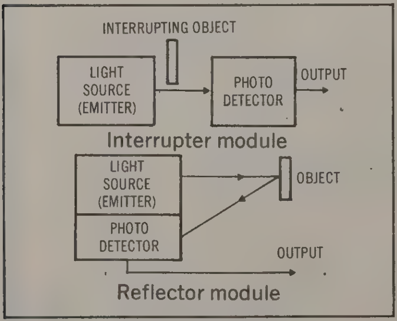
Current Transfer Ratio: The ratio of an optocoupler's output current to input current at a specified bias.

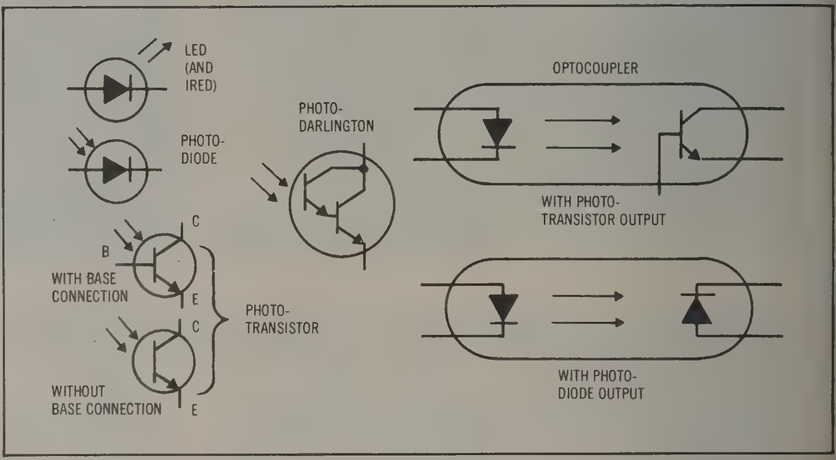
Dark Current: The leakage current of a photodetector with no incident light.

Dominant Wavelength: The wavelength that is a quantitative measure of apparent color of light as perceived by the human eye.

Infrared Radiation: The electromagnetic wavelength region between approximately 0.75 and 100 micrometers longer than the wavelength of visible light.

Interrupter (module): A device that produces an electrical output signal when an object breaks the light (visible or invisible) between a light source and a photodetector.





IRED: An infrared-emitting diode. See light-emitting diode.

Light Current: The current that flows through a photodetector when it is exposed to radiant energy.

Light-Emitting Diode (LED): A semiconductor diode that emits incoherent light at its PN junction when forward biased. The light can be in the visible or invisible (infrared) wavelength region.

Luminance Contrast: The observed brightness of a light-emitting element compared to the brightness of the "surround," an integral part of the device and inseparable from it.

Optocoupler: A device that transmits electrical signals, without electrical connection, between a light source (input) and the receiver (output). The input is generally an LED; the output might be a photodiode, phototransistor, a photo–Darlington, etc. Sometimes referred to as optoisolator.

Peak Wavelength: The wavelength at the peak of the radiated spectrum of an emitter.

Photo–Darlington: A light-sensitive Darlington-connected transistor pair. The photo–Darlington has a very high sensitivity to illumination or radiation.

Photodetector: A device that provides an electrical output signal when subjected to radiation in the visible, infrared, or ultraviolet regions of the electromagnetic spectrum. Photodiodes, phototransistors, and photo–Darlingtons are the most common type of photodetectors.

Photodiode: A junction diode that is responsive to radiant energy. Photodiodes have a high degree of linearity between the input radiation and the output current, and faster switching speeds than phototransistors.

Photothyristor: A thyristor whose switching action is controlled by light applied to the thyristor gate.

Phototransistor: A light-sensitive transister that delivers an electrical output proportional to the light intensity at its input. The low-level photocurrent that is generated is amplified by the current gain of the transistor. The base region (or gate in a FET) may or may not be brought out as an external terminal.

Point Source: A source with a maximum dimension less than one-tenth the distance between sources and detector.

Reflector (module): A device containing a light source and a photodetector that detects any object that reflects light produced by the source back to the detector.

Multi-output Switch Mode Power Supplies 30-1500 Watts

The Company

Farnell Advance Power is a division of Farnell Instruments Ltd., with over 20 years of experience in producing quality power supplies.

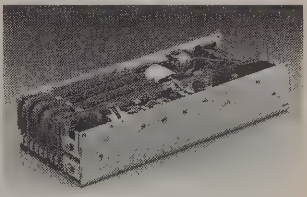
Product Line

Farnell products include open frame and enclosed switch mode power supplies with single and multiple outputs ranging up to 2500 watts, linear power supplies, and a wide range of telecommunications products. Farnell power supplies are manufactured in the UK; designed and, in many cases, listed to international standards including BS, UL, VDE, CSA, IEC, BT and BABT.

Availability

Inventories of Farnell power supplies are maintained in the U.S.A. for prompt shipment. For complete specifications and the name of your nearest Farnell Advance sales representative, contact Farnell Advance, 32111 Aurora Road, Solon, Ohio 44139. **PHONE (216) 349-0755. FAX (216) 349-0142.**

NEW. Compact U-shape 350-watt switcher with universal input, multiple outputs.



Compact 2-1/2" x 5" x 12" U-shape chassis simplifies cost, design and service problems. New AF/AR series offers up to nine outputs per unit, current share N+1 redundancy, and automatic adjustment to all A.C. inputs from 90 to 264 volts, 45 to 440 hz. Built-in cooling optional. Call today.

FARNELL ADVANCE POWER

(216) 349-0755 **FAX (216) 349-0142**

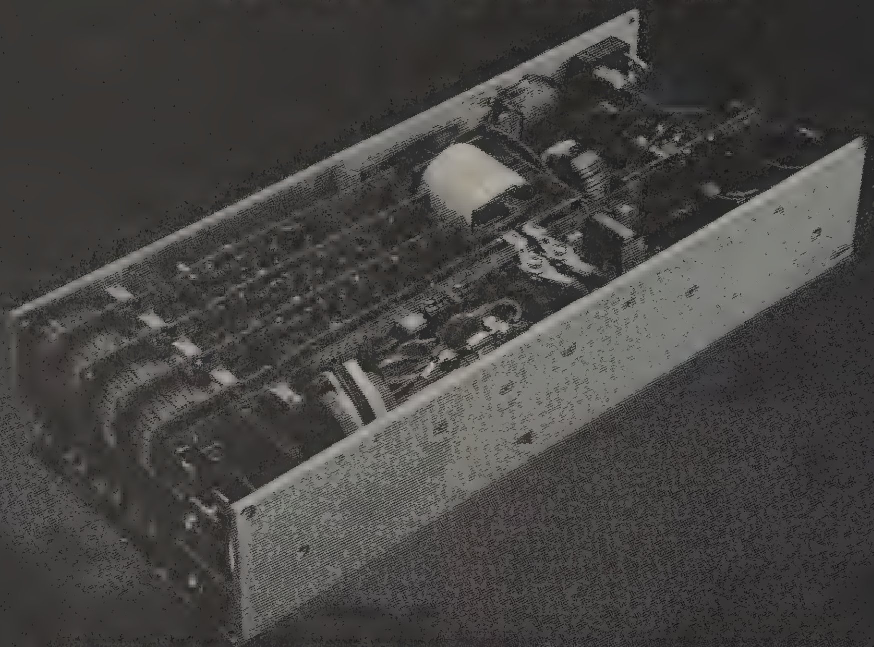
Multi-output & Single-output Switch Mode Power Supplies

Calm, Cool and Corrected.



Farnell Advance switching power supplies with power factor correction

Quality switch mode power supplies from Farnell Advance produce dependable, regulated DC power with low heat losses, minimal noise and ripple and power factor corrections as high as .99.

This broad line of single- and multiple-output, high-density power supplies ranges up to 2700 watts. Multiple units may be connected for higher voltages or used in current share mode for n+1 redundancy.

Units feature universal input, making them ideal for use with the worldwide range of line voltages and frequencies. International approvals received or pending include UL, CSA, VDE, IEC, BSI and BABT.

Convection or integral fan-cooled units are ideal for computers, peripherals, telcom and other applications requiring high efficiency and dependable power.

Multiple-output, modular power supplies have a standard footprint and offer a broad range of output cards, allowing custom configurations.

For more information, contact Farnell Advance Power, Inc., 32111 Aurora Road, Solon, OH 44139.

Phone (216) 349-0755. Fax (216) 349-0142.

HIGH VOLTAGE POWER SUPPLIES

REGULATED CONSTANT VOLTAGE CONSTANT CURRENT

1KV to 400KV
30 WATTS to 3000 WATTS

NEW

SERIES RR

FEATURES

LOW STORED ENERGY: The use of high frequency (>20KHz), high voltage power supply techniques allows stored energy to be minimized thus insuring maximum safety to operating personnel and sensitive loads.

PROGRAMMING OUTPUT VOLTAGE & OUTPUT CURRENT: This feature allows output voltage or output current to be remotely programmed from either an external voltage source or with external potentiometers from the internal reference voltage. A zero to +5V voltage source is required for full scale programming. Internal circuitry insures that the output voltage and output current cannot be externally programmed beyond the maximum settings of the front panel controls.

CONSTANT VOLTAGE/CONSTANT CURRENT WITH AUTOMATIC CROSSOVER: Dual control loops allow either voltage or current to be precisely regulated. Each parameter is controlled and limited by a ten-turn potentiometer on the front panel. The constant voltage/constant current automatic crossover feature allows the power supply to be used as a voltage regulated current limited system or as a current regulated voltage limited system. Thus, both output voltage and output current are totally under operator control under all load conditions, including overload and arc-over conditions.

OVERLOAD, ARC-OVER & SHORT CICRUIT PROTECTION: Full protection against any overload condition is inherent in the constant voltage/constant current design concept. This is augmented by the liberal use of surge limiting resistors and reactive limiting. On 600W, 1KW and 3KW units customer may select either constant current or a variable overload trip by means of a front panel mounted switch.

VOLTAGE REGULATION: Line and load regulation is better than 0.005%. Note: On 1000 watt and 3000 watt units load regulation is better than 0.01%.

CURRENT REGULATION: Current regulation is better than 75uA.

RIPPLE: At 150 watts ripple of 0.02%. At 300, 600 and 1000 watts ripple of 0.05%. At 3000 watts ripple of 0.1%.

EFFICIENCY: Efficiency is typically greater than 75% at full load.

EXTERNAL POLARITY REVERSAL (Reversible Units Only): A reversing switch mechanism located at the rear of the power supply facilitates polarity reversal.

EXTERNAL INTERLOCK/OUTPUT INHIBIT: Circuitry is provided so that the user can, if desired, inhibit output voltage. External contact closure located on the rear terminal strip will enable the power supply. Open contacts will inhibit the power supply.

FLOATING GROUND: This feature allows the low end return of the power supply to be isolated with respect to chassis ground. Consult factory.

REMOTE OUTPUT VOTAGE & CURRENT MONITORING: Voltage monitoring and true output current conitoring signals are provided at the rear terminal strip.

MODULAR CONSTRUCTION: Modular construction techniques are used throughout this design thus reducing downtime in critical applications.

OPTIONS

ZERO VOLTAGE START INTERLOCK (ZVS): To prevent accidental damage to loads, the output voltage control must be set to zero before the high voltage can be applied.

VARIABLE OVERVOLTAGE PROTECTION (VOV): This option causes the power supply to shut down when the output voltage exceeds the setting of the overvoltage control potentiometer located at the rear of the power supply. (adjustable from 20% to 110% of maximum rated output voltage.)

VARIABLE OVERLOAD TRIPOUT (VOL): This option causes the power supply to shut down when the output current equals the setting of the front panel current control (adjustable from 20% to 110% of maximum output current of the power supply.) Standard feature on 600W, 1000W and 3000W units. Front panel control allows user to activate this feature when desired.

DIGITAL PANEL METER: SINGLE METER (SDPM) — TWO METERS (DDPM): A Single 3½ digit meter reading both voltage and current is available. This meter replaces the two analog meters normally provided. Two 3½ digit meters can also be provided in place of the two analog meters normally provided.

SLOW START (SS): The slow start option enables the output voltage of the power supply to ramp to its maximum output voltage setting at a linear rate. This rate can be factory set from one to fifteen seconds.

SLAVED BI-POLAR OPERATION (SBP): Any two power supplies of the same voltage rating may be operated as a Bi-Polar pair. One power supply acting as the master controller will control both power supplies from zero to maximum rated output voltage. The output voltages of both supplies will track each other within 2% from 10% to maximum rated output voltage. Each power supply is also capable of operating independently.

TTL (TTL): Compatible "enable" line.

AUXILIARY OUTUT/FOCUS TAP (FT): This option provides an independent auxiliary output which is variable from zero to maximum rated voltage up to 15KV to 300uA maximum. Control is achieved via front panel mounted potentiometer. For other voltages and power levels consult factory. Multiple auxiliary outputs are also available. Consult factory.

REMOTE CONTROL PANEL (RCP): Any standard model can be supplied with a control panel remote from the basic power supply. 20 feet of appropriately shielded interconnection is provided. This remote control panel replaces the front panel normally provided on standard units.

220 VOLT INPUT — 50/60 Hz (220): 220 volt, 50/60 Hz. Input is available.

BENCH CABINET (BC): A deluxe style cabinet is available for all models.

HIGH VOLTAGE POWER SUPPLIES

NEW

1KV to 400KV
30 WATTS to 3000 WATTS

REGULATED CONSTANT VOLTAGE
CONSTANT CURRENT

SERIES RR TO 300 WATTS

SPECIFICATIONS

INPUT VOLTAGE: 105-125V RMS at 5 Amps maximum (50-60 Hz)

OUTPUT VOLTAGE: Continuously adjustable from zero to maximum output voltage ratings of power supply. See Model selection guide.

***VOLTAGE REGULATION:** Line: Better than ±0.005% over specified input range.
Load: 0.005% for full load change.

***CURRENT REGULATION:** Line: Better than ±0.005% over specified input range.
Load: Better than 75uA for a 75% change in compliance voltage.

‡RIPPLE: 60 and 150 Watt units: 0.02%
300 Watt units: 0.05%

***TEMPERATURE COEFFICIENT:** 100ppm/°C over the range of 0 to 60°C.

***STABILITY:** 0.01%/hour. 0.03%/8 hours.

CONTROLS:
1. Power (HV ON)
2. Output Voltage (10-turn potentiometer)
3. Output Current (10-turn potentiometer)

INDICATORS:
1. Power (HV ON)
2. Output Voltage (meter ±2% of full scale)
3. Output Current (meter ±2% of full scale)

CONNECTORS:
1. High Voltage: All models are provided with 6 feet of shielded high voltage cable. The cables are fitted with bushings to mate with a re-entrant receptacle.
2. Input: 3-wire line cord.
3. Low Voltage. Rear mounted barrier terminal block for:
   a) External Interlock
   b) Voltage Programming
   c) Current Programming
   d) V/I Monitors

HIGH VOLTAGE POWER SUPPLIES MODULAR

SERIES MC

9 Models Covering the Range of 50VDC to 15,000VDC

ELECTRICAL CHARACTERISTICS:

Input Voltage:	1.75 to 12VDC
Input Current:	400mA
Output Voltage:	Proportional to Input (see table)
Output Current:	3 Watts maximum (see table)
Load Regulation:	5% (½ load to full load)
Ripple:	1% p-p (typical)
Insulation Strength:	5000V Input/Output

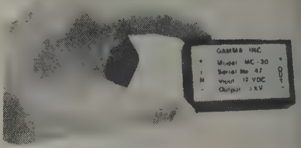
PHYSICAL CHARACTERISTICS:

Dimensions:	1.5" x 2.5" x 0.75" (up to 5KV) 1.5" x 2.5" x 1.5" (10KV & 15KV)
Volume:	2.8 cu. in. (up to 5KV) 5.6 cu. in. (10KV & 15KV)
Weight:	4 oz.
Packaging:	Solid encapsulation
Terminations:	4 PC pins (.043 dia holes) (up to 5KV) 3 PC pins (.043 dia holes) (10KV & 15KV)

ENVIRONMENTAL CHARACTERISTICS:

Temperature Range: −20°C to +60°C

MINIATURE HIGH VOLTAGE POWER SUPPLIES



ELECTRICAL SPECIFICATIONS:

OUTPUT MODEL	OUTPUT VOLTAGE RANGE	OUTPUT POLARITY	CURRENT
MC-5	50VDC to 500VDC	Reversible	6mA
MC-15	150VDC to 1500VDC	Reversible	2mA
MC-30	300VDC to 3000VDC	Reversible	1mA
MC-50R	500VDC to 5000VDC	Reversible	200µA
MC-100P	1000VDC to 10,000VDC	Positive	100µA
MC-100N	1000VDC to 10,000VDC	Negative	100µA
* MC-100R	1000VDC to 10,000VDC	Reversible	100µA

SERIES RC

7 Models Covering the range of 0-3KV to 0-30KV at 10 Watts

ELECTRICAL CHARACTERISTICS:

Input Voltage:	+28VDC ±10%
Output Voltage:	Programmable from zero to maximum rated voltage from either an external 5K ohm potentiometer or a zero to +10 volt low voltage ground referenced source
Output Current:	10 Watts maximum
Line Regulation:	0.01% maximum
Load Regulation:	0.01% maximum
Ripple:	0.05% maximum
Temp. Coefficient:	0.01%°C
Stability:	0.01%/8 hours
Monitor Outputs:	1) Voltage Monitor (Optional) 2) Current Monitor (Optional)
Programming:	
Method 1.	Resistance: External 5K ohm potentiometer
Method 2.	Voltage: Zero to +10 Volts

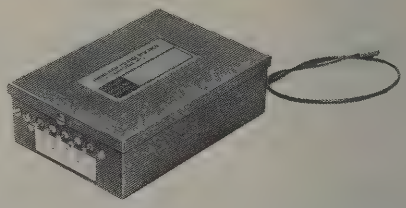
PHYSICAL CHARACTERISTICS:

Dimensions:	3½" x 5⅛" x 1 9/16" (up to 15KV) 3¾" x 6" x 2¾" (20 & 30KV)
Weight:	2½ lbs (up to 15KV) 3½ lbs (20 & 30KV)
Packaging:	Solid encapsulation, metal case with metal inserts in base
Input Connector:	Terminal strip
Output Termination:	12" flying lead

ENVIRONMENTAL CHARACTERISTICS:

Temperature Range: 0 to 50°C

REGULATED DC/DC HIGH VOLTAGE POWER SUPPLIES



MODEL GUIDE:

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT
RC10-3	0-3KV	3.3mA
RC10-5	0-5KV	2.0mA
RC10-10	0-10KV	1.0mA
RC10-15	0-15KV	0.66mA
RC10-20	0-20KV	0.5mA
RC10-25	0-25KV	0.4mA
RC10-30	0-30KV	0.33mA

All units are available in positive or negative polarity. Add P or N as suffix to Model Number to indicate polarity desired.

SERIES UC

7 Models Covering the range of 0-3KV to 0-30K at 5 Watts

ELECTRICAL CHARACTERISTICS:

Input Voltage:	+24VDC ±10%
Input Current:	400mA maximum
Output Voltage:	Adjustable from zero to rated voltage by adjustment of DC input voltage
Output Current:	5 Watts maximum (see table)
Load Regulation:	20% maximum (½ load to full load)
Ripple:	0.1% per watt

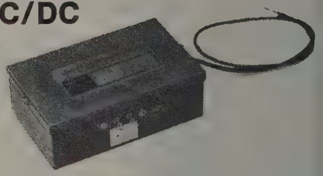
PHYSICAL CHARACTERISTICS:

Dimensions:	2¾" x 4½" x 1 9/16" (up to 15KV) 3½" x 5⅛" x 1 9/16" (20, 25 & 30KV)
Weight:	1½ lbs. (up to 15KV) 2½ lbs. (20, 25 & 30KV)
Packaging:	Solid encapsulation, metal case with metal inserts in base
Terminations:	Two terminals for DC input. 12" flying lead for H.V. output

ENVIRONMENTAL CHARACTERISTICS:

Temperature Range: 0 to 50°C

PROPORTIONAL DC/DC HIGH VOLTAGE POWER SUPPLIES



MODEL GUIDE:

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT
UC5-3	0-3KV*	1.6mA
UC5-5	0-5KV*	1.0mA
UC5-10	0-10KV*	0.5mA
UC5-15	0-15KV	0.33mA
UC5-20	0-20KV	0.25mA
UC5-25	0-25KV	0.2mA
UC5-30	0-30KV	0.166mA

All Models available in positive or negative polarity. Add P or N as suffix to Model Number to indicate polarity desired. *3KV, 5KV and 10KV Models can be provided with reversible polarity (consult factory).

HIGH VOLTAGE POWER SUPPLIES MODULAR

SERIES PMT

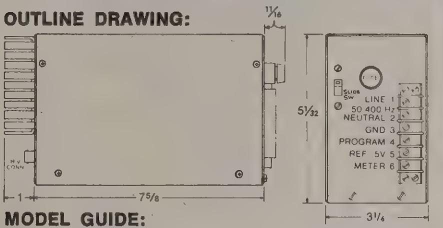
10 Models Covering the range of 0-1.5KV to 0-10KV

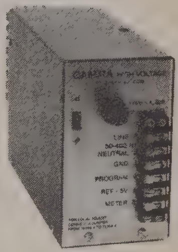
ELECTRICAL CHARACTERISTICS:

Input Voltage:	115/230 VAC±10% 50 to 400 Hz
Output Voltage:	Continuously adjustable from zero to maximum output rating
Output Current:	See ratings of individual models
Regulation:	0.001% for ±10% line change 0.002% for NL-FL or FL-NL
Ripple:	0.001% peak-to-peak
Stability:	0.01%/hour, 0.02%/8 hours
Temp. Coefficient:	50ppm/°C over, the range of 0 to 50°C
Monitor Output:	0 to 5V/100µA for zero to maximum output voltage
Control:	Local: 20 turn potentiometer for zero to maximum output voltage Remote: Voltage (0 to –5V) or resistance for full range
Connections:	Input line, programming and metering via Terminal Block. Alternate connectors available
Output Connector:	Up to 5KV: MHV type connector 10KV: Alden type
Size:	5-1/32" H x 3-1/16" W x 8-5/8" L

PHOTOMULTIPLIER TUBE HIGH VOLTAGE POWER SUPPLIES

OUTLINE DRAWING:





MODEL GUIDE:

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT
PMT 1.5-10	0-1.5KV	10mA
PMT 2-5	0-2KV	5mA
PMT 3-5	0-3KV	5mA
PMT 5-2	0-5KV	2mA
PMT 10-1	0-10KV	1mA

All units are available in Positive or Negative polarity. Add P or N as suffix to Model number to indicate polarity desired.

SERIES XRM 10 Models covering the range of 0-1.5KV to 0-60KV up to 60 Watts

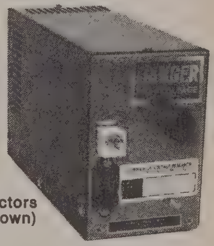
ELECTRICAL CHARACTERISTICS:

Input Voltage:	105-125 VAC 50 to 400 Hz
Output Voltage:	Continuously adjustable from zero to max output volt
Output Current:	See ratings of individual models
Voltage Regulation:	Line: ±0.005% over specified input range Load: ±0.01% for full load change
Current Regulation:	Better than ±0.005% over specified input range
Load Regulation:	Better than 50µA for a 75% change in compliance volt
Ripple:	0.05%
Temp. Coefficient:	100ppm/°C over the range of 0 to 60°C
Stability:	0.01%/hour; 0.03%/8 hours
Programming Output Voltage and Output Current:	The output voltage or output current can be remotely programmed from either an external volt source or external potentiometers from the internal reference volt. A zero to +5 source is required to full scale programming.

PHYSICAL CHARACTERISTIC:

Dimensions:	6″ H x 4″ x W x 10″ L
Weight:	10 lbs.
Packaging:	Modular construction with high voltage section encapsulated in a silicone elastomer
Input Connector:	D-Subminiature 25 pin connector
Output Termination:	Re-entrant type bushing is standard, with mating output cable provided Customer specified output connectors can be provided

REGULATED, LINE OPERATED MODULAR HIGH VOLTAGE POWER SUPPLIES



(Non-Standard Connectors on Unit shown)

MODEL GUIDE:

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT
XRM1.5	0-1.5KV	33.0mA
XRM3	0-3KV	15.0mA
XRM5	0.5KV	10.0mA
XRM10	0-10KV	5.0mA
XRM15	0-15KV	3.5mA
XRM20	0-20KV	2.5mA
XRM30	0-30KV	2.0mA
XRM40	0-40KV	1.5mA
XRM50	0-50KV	1.0mA
XRM60	0-60KV	1.0mA

All units are available in positive or negative polarity. Add P or N as suffix to Model Number to indicate polarity desired.

HIGH VOLTAGE DIVIDER

SERIES HVD

MODEL HVD-100 SPECIFICATIONS:

Input Voltage:	100KVDC maximum
Input Impedance:	200 megohms
Output Impedance:	20,000 ohms
Output Taps·	1 volt/100KV
Temp. Coefficient:	75 ppm
Accuracy:	0.2%
Size:	17½″ high (maximum). Termination 10″ toroid
Output Connector:	BNC

MODEL HVD-100-S SPECIFICATIONS:

Model HVD-100-S is identical to Model HVD-100 with the exception of accuracy which is 0.1% and temperature coefficient which is 25ppm.

MODEL HVD-200 SPECIFICATIONS:

Input Voltage:	200KVDC maximum
Input Impedance:	4000 megohms
Output Impedance:	40,000 ohms
Output Taps:	2V 1 (volt/100KV)
Temp. Coefficient:	75ppm
Accuracy:	0.2%
Size:	30″ high (maximum). Termination 12″ toroid
Output Connector:	BNC

MODEL HVD-200-S SPECIFICATIONS:

Model HVD-200-S is identical to Model HVD-200 with the exception of accuracy which is 0.1% and temperature coefficient which is 25ppm.

HVD-100

HIGH FREQUENCY DIVIDER NEW

MODEL HFD-60

Capability of measuring pulses wtih rise time of less than 20nS at voltages to 60KV.

SI UNITS

RELATIVE QUANTITY SYMBOLS

$\neq$	not equal to
$\approx$	approximately equal to
$\propto$	proportional to
$<$	smaller than
$\leq$	smaller than or equal to
$\ll$	much smaller than

Glassman High Voltage DC Power Supplies ...

Since its inception in 1977, Glassman High Voltage has been committed to producing superior DC high voltage power supplies at an affordable price. That goal has been met by a careful choice of innovative design technology and manufacturing flexibility. Glassman pioneered in the use of air as the primary dielectric medium, avoiding the weight and serviceability problems associated with other dielectrics. Pulse-width modulation using off-the-line switching techniques and full-wave/symmetrical cascade high voltage multipliers, with surge limiting resistors, contribute to high efficiency and reliability. Extensive use of interchangeable modules reduces production costs and allows the rapid assembly and shipment of a wide range of models.

Glassman High Voltage supplies find applications across many different fields of interest. A few examples include analytical, biochemical, CRT displays, E-beam, electro-optical, medical, power generation and transmission, semiconductor, and X-ray applications.

This catalog details 15 different series of regulated high voltage power supplies, with many models within each series covering various voltage ranges. In total, voltage ranges extend from 0 to 1 kV through 0 to 500 kV with available output power from 15 W to 15 kW. All supplies have a number of common features ...lowest possible stored energy for safety and automatic crossover from constant-voltage regulation to constant-current regulation for overload protection. All, except the EL Series, offer local and remote operation, external voltage/current monitoring, TTL enable/disable, and safety interlock terminals. Many are available with a choice of front panels ... dual analog voltage and current meters, dual digital meters, or blank panels for OEM/system applications. Most Glassman supplies provide significant size and weight advantages over competing units.

In addition to this broad base of standard models, we welcome the opportunity to discuss your requirements for special OEM designs or modifications of standard models to meet specific applications.

Warranty

Glassman High Voltage, Inc. warrants standard power supplies to be free from defects in materials and workmanship for three years from date of shipment. OEM and modified standard power supplies are warranted for one year from date of shipment. The Company agrees to replace or repair any power supply that fails to perform as specified within the warranty period. A formal warranty is available.

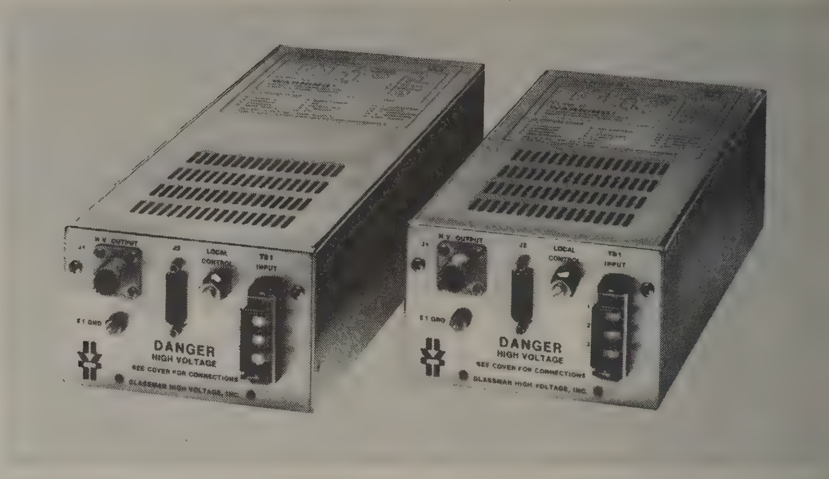
* For EW and WK Series, simultaneous voltage and current limited to 500 W maximum.

** For LX Series, simultaneous voltage and current limited to 1000 W maximum.

MJ Series 15 Watt Regulated High Voltage DC Modules

Premium Performance... Small Size and Weight... Low Cost



The MJ Series provides premium 15 W performance at low cost in a small and lightweight package. This series, with air insulation for easy serviceability, should not be confused with competitive encapsulated units that must be discarded if faulty. Voltage ranges, depending on model, are from 0 to 3 kV through 0 to 30 kV.

Specifications

INPUT:
105-125 V RMS standard, single-phase, 48-420 Hz, <0.25 A. 3-position terminal block with cover.

OUTPUT:
Continuous, stable adjustment from 0 to rated voltage/current by external 0 to +10 V signal, external potentiometer, or case-mounted 10-turn potentiometer with 0.05% resolution. Accuracy, 1% rated +1% setting. Repeatability better than 0.1% fs.

STORED ENERGY:
<200 millijoules, 15 kV model; <400 millijoules, 30 kV model.

VOLTAGE REGULATION:
Better than 0.005% from no-load to full load and over specified input range.

RIPPLE:
<0.05% RMS of rated voltage at full load. Ripple proportional to load, decreasing to approximately 0.01% at no load.

CURRENT REGULATION:
Better than 0.05% from short circuit to rated voltage at any load condition.

VOLTAGE MONITOR:
0 to +10 V equivalent to 0 to rated voltage. Accuracy, 1% reading +1% rated.

CURRENT MONITOR:
0 to +10 V equivalent to 0 to rated current. Accuracy, 1% reading + 0.05% rated.

STABILITY:
0.01% per hour after 1/2 hour warmup, 0.05% per 8 hours.

VOLTAGE RISE/DECAY TIME CONSTANT:
50 ms typical (100 ms max.) with a 50% resistive load using either TTL on/off or remote control.

TEMPERATURE COEFFICIENT:
0.01% per degree C.

AMBIENT TEMPERATURE:
-20 to +60 degree C, operating; -40 to +85 degree C, storage.

POLARITY:
Available either positive or negative with respect to chassis ground.

PROTECTION:
Automatic current regulation protects against all overloads, including arcs and shorts. Fuses, surge-limiting resistors, and low energy components provide ultimate protection.

REMOTE CONTROLS:
DB15S D-subminiature with mating plug is provided for all remote functions, including common, +10 V reference, interlock, voltage and current program/monitor, TTL, ground, and local control.

EXTERNAL INTERLOCK:
Open off, closed on.

TTL ENABLE/DISABLE:
0-1.5 V off, 2.5-15 V on.

Models

Positive Polarity	Negative Polarity	Output Voltage	Output Current	Output Cable	Case Size

MK Series 75 Watt Regulated High Voltage DC Modules

High Power... Premium Performance... Low Cost

The MK Series offers premium 75 W performance at low cost. Like their lower power brothers, the MJ Series, they are air-insulated and should not be compared with "throw-away" supplies. MK Series feature easy serviceability. Voltage ranges, depending on model, are from 0 to 1 kV through 0 to 60 kV.

Specifications

INPUT:
105-125 V RMS standard, single-phase, 48-420 Hz, <1.5 A. Connector per IEC 320/C14 with mating line cord.

EFFICIENCY:
Better than 75% at full load.

OUTPUT:
Continuous, stable adjustment from 0 to rated voltage/current by external 0 to +10 V signal, external potentiometer, or case-mounted 10-turn potentiometer with 0.05% resolution. Accuracy, 1% rated + 1% setting. Repeatability better than 0.1% fs.

STORED ENERGY:
200 millijoules, 10 kV model; 1 Joule, 50 kV model.

VOLTAGE REGULATION:
Better than 0.005% RMS +1 mV/mA from no-load to full load and over specified input range.

RIPPLE:
<0.03% RMS of rated voltage + 0.5 V at full load.

CURRENT REGULATION:
Better than 0.05% from short circuit to rated voltage at any load condition.

VOLTAGE MONITOR:
0 to +10 V equivalent to 0 to rated voltage. Accuracy, 1% reading + 1% rated.

CURRENT MONITOR:
0 to +10 V equivalent to 0 to rated current. Accuracy, 1% reading + 0.05% rated.

STABILITY:
0.01% per hour after 1/2 hour warmup, 0.05% per 8 hours.

MR Series 300 Watt Regulated High Voltage DC Modules

Complies With IEC & CSA 950 And UL 1950 Standards As A Power Supply Component

The MR Series, with outputs from 0 to 1 kV through 0 to 5 kV, is designed to meet international safety approvals. It is packaged as a space-saving module that avoids the cost of expensive panels and displays. However, no compromises in performance and operating features have been made. The result is a power supply that offers outstanding value for a wide range of demanding applications.

Specifications

INPUT:
103 -132 V RMS standard, single-phase, 48-63 Hz, <6 A. Connector per IEC 320/V1 with mating line cord.

EFFICIENCY:
Typically 85% at full load.

OUTPUT:
Continuous, stable adjustment from 0 to rated voltage and current through a combination of mounted 10-turn potentiometer, external 0 to 10 V, or external potentiometers. Repeatability, <0.1% fs. Accuracy, 0.25% of rated + 1% of setting. Resolution is a function of programming method.

STORED ENERGY:
<0.5 joules.

VOLTAGE REGULATION:
<0.005% for line variations. For load variations, add 1 mV/mA.

RIPPLE:
<0.02% RMS of rated voltage + 300 mV RMS

CURRENT REGULATION:
<0.1% of rated current from short circuit to rated voltage at any set current.

VOLTAGE MONITOR:
0 to 10 V for zero rated voltage. Accuracy, 1% reading + 0.25% of rated voltage.

GLASSMAN HIGH VOLTAGE INC. SERIES MR

Modules are 3.38" H x 7.25" W x 16" D, weight less than 11 lbs. SHV version shown on left, Alden connector on right

CURRENT MONITOR:
0 to 10 V for zero to rated current. Accuracy, 1% reading + 0.05% of rated current.

STABILITY:
0.01% per hour after 1/2 hour warmup, 0.05% per 8 hours.

OUTPUT VOLTAGE TIME CONSTANT:
Typically 50 ms rise or decay time constant using TTL on/off or remote voltage control with a minimum of 15% resistive load.

TEMPERATURE COEFFICIENT:
0.01% per degree C.

AMBIENT TEMPERATURE:
-20 to +40 degree C, operating; -40 to +85 degree C, storage.

POLARITY:
Available either positive or negative with respect to chassis ground.

PROTECTION:
User-selected automatic current regulation or current trip protects against all overloads, including arcs and short circuits. Fuses, surge-limiting resistors, and low-energy components provide ultimate protection.

ACCESSORIES:
Detatchable 8-foot HV cable (see Models chart for choice of output connector and wire type) and 6-foot detachable line cord provided.

REMOTE CONNECTIONS:
Common, +10 V reference, interlock, current program, current monitor, voltage program, voltage monitor, TTL HV enable, current regulation/trip, and chassis ground.

EXTERNAL INTERLOCK:
Open off, closed on.

TTL ENABLE/DISABLE:
0-1.5 V off, 2.5-15 V on.

EL Series 40/45 Watt Regulated High Voltage DC Power Supplies

Laboratory Performance... Economical Price

The EL Series provides laboratory performance at the lowest possible price. Voltage ranges are from 0 to 3 kV through 0 to 60 kV. Unlike other Glassman supplies, no remote monitoring or control capability is provided. This series is available with positive, negative, or reversible polarity. Panel height is 3.5 inches and maximum weight is 12 lbs.

POWER
SERIES EL
GLASSMAN HIGH VOLTAGE, INC.
VOLTAGE

Specifications

INPUT:
105-125 V RMS standard, single-phase, 48-420 Hz, <1 A. Connector per IEC 320/C14 with mating line cord.

EFFICIENCY:
Better than 75% at full load.

OUTPUT:
Continuous, stable adjustment from 0 to rated voltage by a front panel 10-turn potentiometer with locking vernier. Accuracy, 1% rated + 1% setting. Repeatability better than 0.1% fs. Dual analog meters display voltage and current to an accuracy of 2% fs.

STORED ENERGY:
200 millijoules, 10 kV model; 1 Joule, 50 kV model.

VOLTAGE REGULATION:
Better than 0.005% +1 mV/mA from no-load to full load and over specified input range.

RIPPLE:
<0.03% RMS of rated voltage + 0.5 V at full load.

STABILITY:
0.01% per hour after 1/2 hour warmup, 0.05% per 8 hours.

TEMPERATURE COEFFICIENT:
0.01% per degree C.

AMBIENT TEMPERATURE:
-20 to +60 degree C, operating; -40 to +85 degree C, storage.

POLARITY:
Available either positive, negative, or reversible polarity with respect to chassis ground.

PROTECTION:
Automatic current limiting protects against all overloads, including arcs and shorts. Fuses, surge-limiting resistors, and low energy components provide ultimate protection.

GLASSMAN HIGH VOLTAGE, INC.

The EW Series is a 500 watt regulated high voltage DC power supply with an important difference ... maximum current ratings are equivalent to a 600 W supply! This maximum current, which is available for all output voltages up to 84% of rated voltage, should be of significant interest for many applications. Voltage ranges are 0 to 1 kV through 0 to 60 kV. Series EW is offered with dual analog voltage and current meters or, optionally, with dual digital meters or with a blank panel for OEM/systems applications. Maximum weight is 18 lbs.

Specifications

INPUT:
102-132 V RMS standard, single-phase, 48-63 Hz, <10 A. Connector per IEC 320/C14 with mating line cord, terminated with NEMA 5-15 plug.

EFFICIENCY:
Typically 85% at full load.

OUTPUT:
Continuous, stable adjustment from 0 to rated voltage/current by external 0 to +10 V signal, external potentiometers, or panel-mounted 10-turn potentiometers with 0.05% resolution. Accuracy, 1% rated + 1% setting. Repeatability better than 0.1% fs.

STORED ENERGY:
<1.5 Joules, 20 kV; <4 Joules, 60 kV.

VOLTAGE REGULATION:
Better than 0.005% for specified line variations and 0.005% + 1 mV/mA for load variations.

RIPPLE:
<0.02% of rated voltage + 0.5 V RMS at full load.

CURRENT REGULATION:
Better than 0.05% from short circuit to rated voltage at any load condition.

VOLTAGE MONITOR:
0 to +10 V equivalent to 0 to rated voltage. Accuracy, 1% reading + 1% rated.

CURRENT MONITOR:
0 to +10 V equivalent to 0 to rated current. Accuracy, 1% reading + 0.05% rated for single polarity, 1% reading + 0.1% rated for reversible polarity.

STABILITY:
0.01% per hour after 1/2 hour warmup, 0.05% per 8 hours.

VOLTAGE RISE/DECAY TIME CONSTANT:
50 ms typical with a 30% resistive load using either TTL on/off or remote programming control.

TEMPERATURE COEFFICIENT:
0.01% per degree C.

AMBIENT TEMPERATURE:
-20 to +40 degree C, operating; -40 to +85 degree C, storage.

POLARITY:
Available either positive, negative, or reversible with respect to chassis ground.

PROTECTION:
Automatic current regulation protects against all overloads, including arcs and shorts. Fuses, surge-limiting resistors, and low energy components provide ultimate protection.

REMOTE CONTROLS:
Terminal block provided for all remote functions, including common, +10 V reference, interlock, voltage and current program/monitor, TTL, ground, and local control.

EXTERNAL INTERLOCK:
Open off, closed on. Normally latching except for blank panel version where it is non-latching.

TTL ENABLE/DISABLE:

Specifications

INPUT:
105-125 V RMS, 48-63 Hz single phase, <10 A. Connector per IEC 320/VI with mating line cord and NEMA 5-15 plug.

EFFICIENCY:
Typically 83% at full load.

OUTPUT:
Continuous, stable adjustment from zero to rated voltage and current via 10-turn potentiometers, external 0 to 10 V, or external potentiometers. Linearity, <1% fs. Repeatability, <0.1% fs. Accuracy, 0.25% of rated + 1% of setting. Resolution is a function of programming method.

STORED ENERGY:
9 J, 80 kV; 11 J, 100 kV; 14.5 J, 125 kV.

VOLTAGE REGULATION:
<0.005%, line or load.

RIPPLE:
<0.1% RMS of rated voltage at full load.

CURRENT REGULATION:
<0.1% of full scale (rated voltage) from short circuit to rated voltage.

VOLTAGE MONITOR:
0 to +10 V DC for zero to rated voltage. Accuracy, 1% of reading + 1% of rated voltage.

CURRENT MONITOR:
0 to +10 V DC for zero to rated current. Accuracy, 1% of reading + 0.05% (0.1% for reversible model) of rated current.

STABILITY:
0.01% per hour after 1/2 hour warmup. 0.05% per 8 hours.

OUTPUT VOLTAGE TIME CONSTANT:
Typically 400 ms rise or decay time constant for 125 kV model, using TTL on/off or remote voltage control, with 15% resistive load.

TEMPERATURE COEFFICIENT:
0.01%/degree C.

AMBIENT TEMPERATURE:
-20 to +40 degrees C, operating; -40 to +85 degrees C, storage.

POLARITY:
Positive, negative, or reversible with respect to chassis ground.

PROTECTION:
Automatic current regulation protects against all overloads, including arcs and shorts. Fuses, surge-limiting resistors, and low-energy components provide ultimate protection.

ACCESSORIES:
Detachable 8-foot shielded HV coaxial cable (see Model Chart for cable type) and 6-foot detachable line cord provided.

REMOTE CONTROLS:
Terminal block provided for all remote functions, including common, +10 V reference, interlock, voltage and current program/monitor, TTL, ground, and local control.

EXTERNAL INTERLOCK:
Open off, closed on. Normally latching except on blank panel version where it is non-latching.

TTL ENABLE/DISABLE:
0-1.5 V off, 2.5-15 V on.

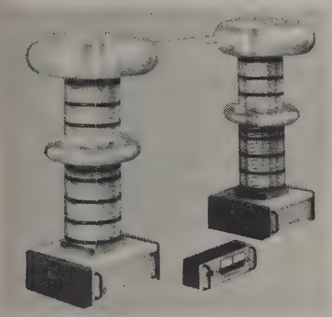
PG Series 500/1000 Watt Regulated High Voltage DC Power Supplies

PG-LR Series 250/500 Watt Low Ripple Regulated High Voltage DC Power Supplies

100 kV to 400 kV...



The PG Series is available in two configurations ... as a standard PG Series or as an ultra-low ripple PG-LR Series for demanding applications, such as particle accelerators. Shown is the dual-stack PG-LR Series with remote control unit. One stack serves as a high voltage multiplier while the second stack provides an additional lowpass ripple filter. The standard PG Series is supplied with only the multiplier stack and remote control unit.

Specifications

INPUT:
105-125 V RMS, single-phase, 48-63 Hz, <15 A. *Series PG-LR: 208 V RMS +/- 10%, 3-phase, 48-63 Hz, <5 A.*

EFFICIENCY:
Typically 75% at full load.

OUTPUT:
Continuous, stable adjustment from 0 to rated voltage and current by means of front panel 10-turn potentiometers, external zero to +10 V signals, or external potentiometers. Linearity to within 1% of full scale.

VOLTAGE REGULATION:
Better than 0.005% + 1 V, line or load.

RIPPLE:
Better than 0.1% of rated voltage at full load. *Series PG-LR: See models chart.*

CURRENT REGULATION:
Better than 100 μA from short circuit to rated voltage for any load condition; 0.005% + 1 μA for line variations.

VOLTAGE/CURRENT MONITOR:
Zero to +10 V signal for zero to rated voltage/current.

STABILITY:
0.01% + 1 V per hour after 1/2 hour warmup, 0.05% + 2 V per 8 hours.

TEMPERATURE COEFFICIENT:
0.01% per degree C + 1 V.

AMBIENT TEMPERATURE:
-20 to +60 degree C, operating; -40 to +85 degree C, non-operating.

POLARITY:
Available with either positive, negative, or reversible (PG only) polarity with respect to chassis ground.

PROTECTION:
Automatic current regulation protects the power supply against all overload conditions, including arcs and short circuits. Fuses, surge-limiting resistors, and low energy components provide the ultimate protection.

EXTERNAL INTERLOCK:
Open off, closed on.

WX Series 1000 Watt Regulated High Voltage DC Power Supplies

Up to 75 kV, 5.25 Inch Panel Height... Laboratory Performance... Enhanced Features

The WX Series provides 1000 watts of output power with voltage ranges from 0 to 1 kV through 0 to 75 kV in a rack-panel height of only 5.25 inches. Standard models have dual analog voltage and current meters. As an option, WX is available with dual digital meters or with a blank panel for OEM/system applications. Local front panel and full remote controls are standard. Maximum weight is 30 lbs.

Specifications

INPUT:
198-242 V RMS standard, single-phase, 48-63 Hz, <9.5 A. Connector per IEC 320/C14 with mating line cord, terminated with NEMA 6-15 plug.

EFFICIENCY:
Typically 83% at full load.

OUTPUT:
Continuous, stable adjustment from 0 to rated voltage/current by external 0 to +10 V signal, external potentiometers, or panel-mounted 10-turn potentiometers with 0.05% resolution. Accuracy, 1% rated + 1% setting. Repeatability better than 0.1% fs.

STORED ENERGY:
6 Joules, maximum, up to 50 kV; 9 Joules, maximum, 60 and 75 kV.

VOLTAGE REGULATION:
Better than 0.005% for specified line variations and 0.01% + 1 mV/mA for load variations.

RIPPLE:
<0.05% of rated voltage + 0.5 V RMS at full load.

CURRENT REGULATION:
Better than 0.05% from short circuit to rated voltage at any load condition.

VOLTAGE MONITOR:
0 to +10 V equivalent to 0 to rated voltage. Accuracy, 1% reading + 1% rated.

ON

GLASSMAN HIGH VOLTAGE, INC.

CURRENT MONITOR:
0 to +10 V equivalent to 0 to rated current. Accuracy, 1% reading + 0.05% rated.

STABILITY:
0.01% per hour after 1/2 hour warmup, 0.05% per 8 hour.

VOLTAGE RISE/DECAY TIME CONSTANT:
50 ms typical with a 50% resistive load using either TTL on/off or remote programming control.

TEMPERATURE COEFFICIENT:
0.01% per degree C.

AMBIENT TEMPERATURE:
-20 to +50 degree C, operating; -40 to +85 degree C, storage.

POLARITY:
Available either positive, negative, or reversible with respect to chassis ground.

PROTECTION:
Automatic current regulation protects against all overloads. including arcs and shorts. Fuses, surge-limiting resistors, and low energy components provide ultimate protection.

REMOTE CONTROLS:
Terminal blocks provided for all remote functions, including common, +10 V reference, interlock, voltage and current program/monitor, TTL, ground, and local control.

EXTERNAL INTERLOCK:
Open off, closed on. Normally latching except for blank panel version where it is non-latching.

TTL ENABLE/DISABLE:
0-1.5 V off, 2.5-15 V on.

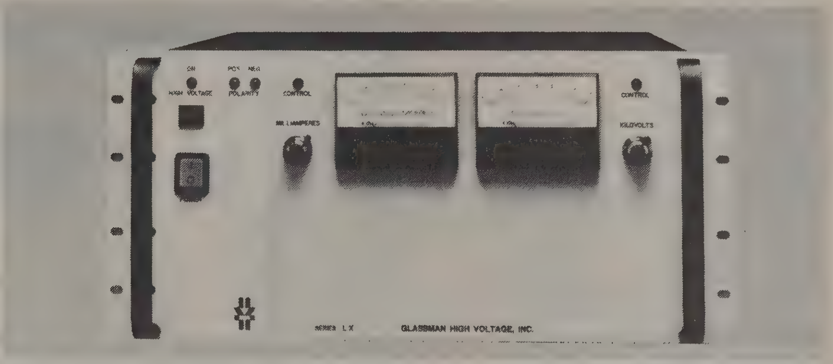
LX Series Extended Currrent 1000 Watt Regulated High Voltage DC Power Supplies

Up To 150 kV... 8.75 Inch Panel Height



The LX Series is a 1000 watt regulated high voltage DC power supply with an important difference ... maximum current ratings are equivalent to a 2000 W supply! This maximum current, which is available for all output voltages up to 50% of rated voltage, should be of significant interest for many applications.

Specifications
(from 5 to 100% of rated voltage)

INPUT:
102-132 V RMS standard, single-phase, 48-63 Hz, <20 A. 3-position terminal block with protective cover.

EFFICIENCY:
Typically 85% at full load.

OUTPUT:
Continuous, stable adjustment from 0 to rated voltage/current by external 0 to +10 V signal, external potentiometers, or panel-mounted 10-turn potentiometers with 0.05% resolution. Accuracy, 1% rated + 1% setting. Repeatability better than 0.1% fs.

STORED ENERGY:
<15 Joules, 60 kV; <30 Joules, 125 kV.

VOLTAGE REGULATION:
Better than 0.005% for specified line variations and 0.005% + 1 mV/mA for load variations.

RIPPLE:
<0.03% of rated voltage + 1 V RMS at full load, 0.1% (150 kV).

CURRENT REGULATION:
Better than 0.05% from short circuit to rated voltage at any load condition.

VOLTAGE MONITOR:
0 to +10 V equivalent to 0 to rated voltage. Accuracy, 1% reading + 1% rated.

CURRENT MONITOR:
0 to +10 V equivalent to 0 to rated current. Accuracy, 1% reading + 0.05% rated for single polarity, 1% reading + 0.1% rated for reversible polarity.

STABILITY:
0.01% per hour after 1/2 hour warmup, 0.05% per 8 hours.

VOLTAGE RISE/DECAY TIME CONSTANT:
50 ms typical to 60 kV (400 ms for higher voltages) with a 30% resistive load using either TTL on/off or remote programming control.

TEMPERATURE COEFFICIENT:
0.01% per degree C.

AMBIENT TEMPERATURE:
-20 to +40 degree C, operating; -40 to +85 degree C, storage.

POLARITY:
Available with either positive, negative, or reversible polarity with respect to chassis ground.

PROTECTION:
Automatic current regulation protects against all overloads, including arcs and shorts. Fuses, surge-limiting resistors, and low energy components provide ultimate protection.

REMOTE CONTROLS:
Terminal block is provided for all remote functions, including common, +10 V reference, interlock, voltage and current program/monitor, TTL, ground, and local control.

EXTERNAL INTERLOCK:
Open off, closed on. Normally latching except for blank panel version where it is non-latching.

TTL ENABLE/DISABLE:
0-1.5 V off, 2.5-15 V on.

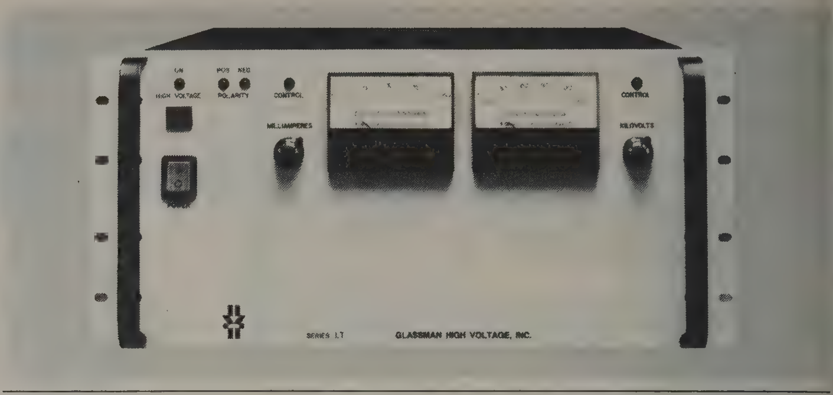
LT Series 2000 Watt Regulated High Voltage DC Power Supplies



Up To 150 kV...
8.75 Inch Panel Height
Laboratory Performance
Enhanced Features

The LT Series is a 2000 watt regulated high voltage DC power supply with voltage ranges from 0 to 1 kV through 0 to 150 kV. Rack-panel height is only 8.75 inches. The LT is offered with dual analog voltage and current meters or, optionally, with dual digital meters or a blank panel for OEM/systems applications.

Specifications
(from 5 to 100% rated voltage)

INPUT:
198-264 V RMS standard, single-phase, 48-63 Hz, <20 A. 3-position terminal block with protective cover.

EFFICIENCY:
Typically 85% at full load.

OUTPUT:
Continuous, stable adjustment from 0 to rated voltage/current by external 0 to +10 V signal, external potentiometers, or panel-mounted 10-turn potentiometers with 0.05% resolution. Accuracy, 1% rated + 1% setting. Repeatability better than 0.1% fs.

STORED ENERGY:
<15 Joules, 60 kV; <30 Joules, 125 kV.

VOLTAGE REGULATION:
Better than 0.005% for specified line variations and 0.005% + 1 mV/mA for load variations.

RIPPLE:
<0.03% of rated voltage + 1 V RMS at full load, 0.1% (150 kV).

CURRENT REGULATION:
Better than 0.05% from short circuit to rated voltage at any load condition.

VOLTAGE MONITOR:
0 to +10 V equivalent to 0 to rated voltage. Accuracy, 1% reading + 1% rated.

CURRENT MONITOR:
0 to +10 V equivalent to 0 to rated current.

Accuracy, 1% reading + 0.05% rated for single polarity, 1% reading + 0.1% rated for reversible polarity.

STABILITY:
0.01% per hour after 1/2 hour warmup, 0.05% per 8 hours.

VOLTAGE RISE/DECAY TIME CONSTANT:
50 ms typical to 60 kV (400 ms for higher voltages) with a 30% resistive load using either TTL on/off or remote programming control.

TEMPERATURE COEFFICIENT:
0.01% per degree C.

AMBIENT TEMPERATURE:
-20 to +40 degree C, operating; -40 to +85 degree C, storage.

POLARITY:
Available with either positive, negative, or reversible polarity with respect to chassis ground.

PROTECTION:
Automatic current regulation protects against all overloads, including arcs and shorts. Fuses, surge-limiting resistors, and low energy components provide ultimate protection.

REMOTE CONTROLS:
Terminal block is provided for all remote functions, including common, +10 V reference, interlock, voltage and current program/monitor, TTL, ground, and local control.

EXTERNAL INTERLOCK:
Open off, closed on. Normally latching except for blank panel version where it is non-latching.

TTL ENABLE/DISABLE:
0-1.5 V off, 2.5-15 V on.

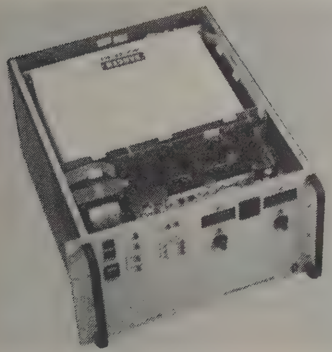
PKCP Series 2/4/6/8 kW Regulated DC High Voltage Power Supplies

PKCP Series, with CP denoting Constant Power, are similar to the PK Series and are available with the same range of output voltages but a reduced power of 2/4/6/and 8 kW. From 0 to 50% of rated voltage they behave the same as the PK Series. From 50 to 100% of rated voltage the maximum available current is reduced producing, in effect, a region of constant power.

Specifications

INPUT:
198-250 V, single-phase, 48-63 Hz.

OTHER SPECIFICATIONS:
Identical to the PK Series, see page 17.



Internal Construction Features Easy Accessibility.

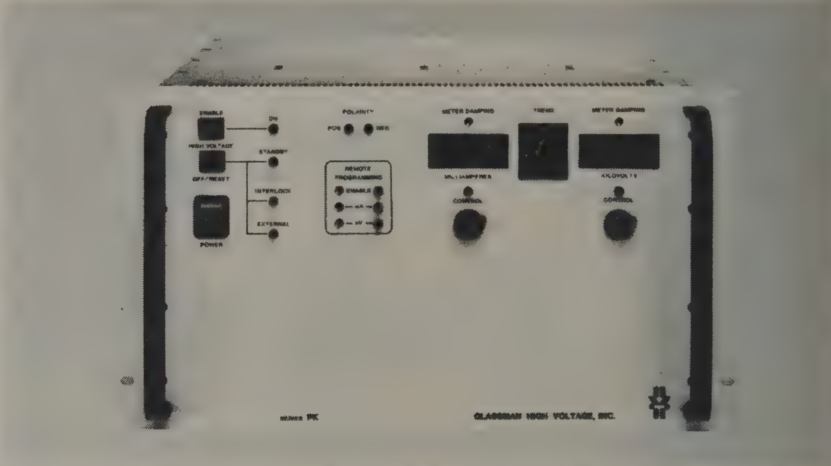
Maximum weight is 200 lbs.

PK Series 4/8/12/15 kW Regulated DC High Voltage Power Supplies

Models 8 kW and higher are obtained by paralleling 4 kW models in a "master/slave" configuration. Slave panels have separate AC power inputs and switches, and annunciators for power on, tracking, overvoltage, and bias. Models from 0 to 3 kV through 0 to 500 kV.



Specifications.

AC INPUT:
4, 8, and 12 kW models; 3-phase, 208 V RMS +/- 10%, 48-63 Hz. Output power derated for line unbalance > 2%. 5-position terminal block (1 position not used) with protective cover. Fused for 20 A, phase or line. 8 kW and higher models have an additional terminal block for each slave unit.

DC OUTPUT:
Continuous, stable adjustment from zero to rated voltage and current by means of separate 10-turn front panel controls, with locking vernier dials, or external (switch selected) 0 to +10 V signals. Panel controls have resolution and readability better than 500 ppm, linear to 1%, repeatable to 0.1% fs. Accuracy, 1% of rated + 1% of setting.

VOLTAGE/CURRENT OUTPUT METERS:
Dual 3-1/2 digit LCDs with on/off damping, accuracy 1% fs + 1% rdg.; dual 10-segment bar-graphs.

VOLTAGE REGULATION:
Load, better than +/- 0.01% + 0.5 mV/mA for full load variation; line, better than +/- 0.01% over specified input range.

RIPPLE:
Better than 0.1% RMS of rated voltage at full load for models to 125 kV, better than 0.05% for models 150 kV and higher.

CURRENT REGULATION:
Load, better than +/- 0.1% + 100 µA from short circuit to rated voltage at any rated load condition; line, better than +/- 0.01% over specified input range.

STABILITY:
0.01% per hour after 1/2 hour warmup; 0.05% per 8 hours.

TEMPERATURE COEFFICIENT:
0.01% per degree C.

AMBIENT TEMPERATURE:
-20 to +50 degrees C, operating; -40 to +85 degrees C, storage.

PROTECTION:
Automatic current regulation protection reduces output voltage as required for all arc, overload, and short circuit conditions. Fuses, surge-limiting resistors, and low stored energy provide the ultimate protection.

ACCESSORIES:
Detachable 8-foot shielded high voltage coaxial cable provided for models up to 125 kV (See models chart for cable type.) 8 kW and higher models, up to 125 kV, are provided with an additional coaxial cable for each slave unit. Harness and/or interconnection cables supplied for multi-chassis supplies. 25-pin D-subminiature connector provided for customer interface.

ANALOG MONITORS:
Current and voltage, 0 to 10 V, directly proportional, 10 k ohms +/-1% source impedance.

DIGITAL MONITOR SIGNALS:
4 functions; Milliampere Control, Kilovolt Control, High Voltage Enable, and No Fault. High active, TTL or 5 V CMOS compatible. Source, 1.0 mA at 2.5 V; sink, 2.6 mA at 0.4 V.

PK125P30	PK125N30	PK125R30	0-125 kV	0-30 mA	DS2121	15.75 in.

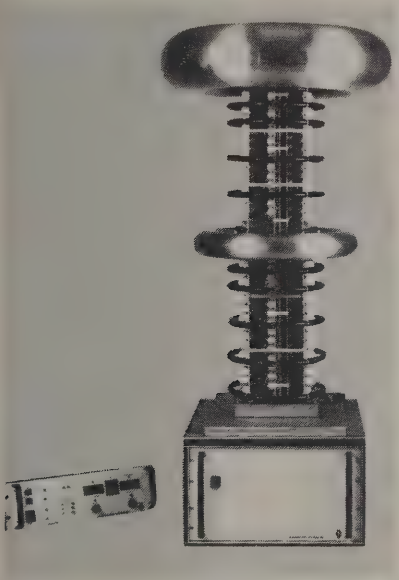
Maximum weight is 62 lbs.to 75 kV, 85 lbs. to 125 kV.

Specifications... *continued*

OPTO-ISOLATED OUTPUT:
Opto-isolated NPN transistor output, controlled by any one of the digital monitor signals. Not to be used for high voltage isolation.

DIGITAL HV ON/OFF CONTROL:
2 inputs; Enable, to activate high voltage, switch selected, high on, low off and External, to disable high voltage, overrides local or remote enable, high for disable. External has 2 programmable modes, level-controlled interrupt or edge-triggered shutdown.
Both inputs are TTL or 5 V CMOS compatible. Input active with 2-15 V signal. Impedance, 100 k ohms at 0-5 V, 10 k ohms at 15 V, approximate.

INTERLOCK:
Open off, closed on.



Typical Open Stack Configuration
for Series PKCP and Series PK.

GLOBTEK RELEASES FULL LINE OF AUTO-RANGING INPUT, SWITCH-MODE STAND ALONE LOW WATTAGE POWER SUPPLIES WITH TRIPLE SAFETY APPROVALS FOR NORTH AMERICA AND EUROPE.

ISO-9000 Certified Factory

GlobTek, Inc.
CAUTION

Features
- Universal Input 90-260V 50/60Hz.
- UL, CSA, TUV Certified.
- Low Minimum Load.
- High Efficiency.
- Output Short Circuit Protection.
- Over Voltage Protection.
- 30 KHz Minimum Switching Frequency.

Applications
- Industrial Equipment.
- Instrumentation.
- Hard Disk Subsystems.
- External Floppy Disk Systems.
- External Tape Backup Units.
- Laptop or Notebook Computer.

- **Also Available In 30/60 Watt Open Frame Versions For Internal Applications.**
- **Custom Designs And Applications Welcomed.**
- **Wall Plug In Models Also Available**

MINIGLOSSARY ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

Encapsulated: Imbedded in a suitable potting compound.

Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.

INCREASING V OR I
DECREASING V OR I
0
TIME

Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.

OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

Fig. 2. Typical time vs. current (non-inductive load)

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

Chatter: See bounce.

Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.

Linear Regulated External (Wall Plug-In & Desk-Top) Power Supplies

- **Input Voltage:** 120VAC ± 10%, 60Hz
- **Input Connection:** (1) Wall Plug-In—2 prong or 3-prong (2) Desk-Top—6 FT cord with 2-prong or 3-prong plug
- **Line Regulation:** ±3% Max.
- **Load Regulation:** ±5% Max.
- **Storage Temperature:** 20°C ~ +85°C
- **Operating Temperature:** 0°C ~ +50°C
- **Safety Agency:** Meet or exceed UL1012 & CSA 22.2 standards, see table below for individual approvals.
- **Housing:** Black impact-resistant thermoplastic, see table below for types and sizes.
- **Storage Humidity:** 10 ~ 90% RH, non-condensing
- **Operating Humidity:** 10-75% RH, non-condensing
- **Applications:** Computer, data communication, telecommunication, industrial controls, battery chargers, consumer products.
- **Output Tolerance:** ±5% full load 120V input
- **Output Connection:** (1) Single output—PL01 ~ PL-06 (2) Multiple outputs—PL08 ~ PL10
- **Ripple & Noise:** 50 mV p-p Maximum
- **Transient Response:** 50% ~ 100% load change, recovery time 500 µS, overshoot 2% Max.

Universal Input Switching Power Supply

GENERAL SPECIFICATIONS

Input voltage	100VAC to 250VAC
Input frequency	50 Hz to 60 Hz
Inrush current	15A at 110VAC 30A at 230VAC
Operating temperature	0°C to 40°C
Storage temperature	–30°C to +75°C
Temperature coefficient	+/– 0.02% C
Efficiency	73% Min.
Cooling	Free air convection

Hold up time	20mS
Overvoltage protection type	Crowbar
At main rated output	+15%
Overcurrent protection	Hiccup at 150% load
Safety standard	UL 1012 CSA C22.2 NO 950/14020 VDE EN60950
EMI	Meets FCC 15 class "B" VDE 0871 class "B"
MTBF	Greater than 40,000 hours

Detachable IEC Input cord

SINGLE OUTPUT (*25W UNIT)

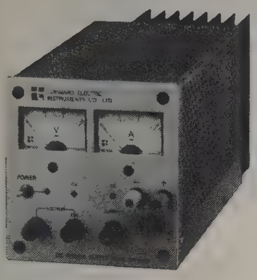
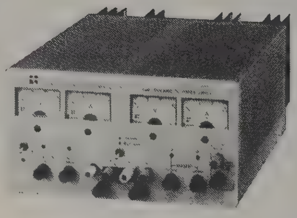
LABORATORY DC POWER SUPPLIES—TPS2000/4000 SERIES

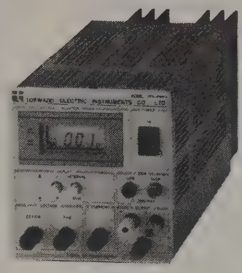
TPS-2000



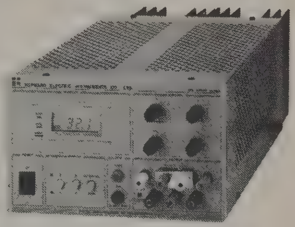
TPS-4000



TPS-2000D



TPS-4000D



SPECIFICATIONS FOR ALL MODELS

	TPS-2000 SERIES	TPS-4000 SERIES
Ripple & Noise	CV 0.5mVms or 4mVp-p CC 0.5mArms or 4mAp-p	
Line Regulation	CV 0.02% + 2mV CC 0.2% + 250µA	
Load Regulation	CV 0.2% + 2mV CC 0.02% + 500µA	
Output Impedance	5mΩ + 2µH	
Tracking Error—Dual Output Model Only		±(0.2% + 5mV)
5V/3A Output—Triple Output Model Only		
Output Voltage		5V + 5% (Fixed)
Output Current		3A (Max.)
Ripple & Noise		<2mVms
Regulation		0.1% + 5mV
Dimension	125(W) x 140(H) x 300(D)mm	250(W) x 140(H) x 363(D)mm
Weight	4.1Kg(TPS-2303)	8.9Kg(TPS-4303)
Power	115V/230V ± 10%, 50/60Hz	
Accessory	ACS-002 x 1, Banana-Clip	ACS-002 x 2, Banana-Clip

FEATURES FOR ALL MODELS

- Constant Voltage, Constant Current Mode Operation
- Short Circuit Protection Standard
- Compact aluminum case for excellent heat dissipation
- Built in separate Voltage and Current meters for analog modules
- 3 1/2 digit auto Ranging Panel Meters for Voltage or Current display in digital models
- Single, Dual, Triple Models, available
- Fully Variable Voltage and current set point control
- Excellent Ripple and Noise, Line/Load Regulations
- Unsurpassed Price/Performance Ratio
- Immediate Delivery

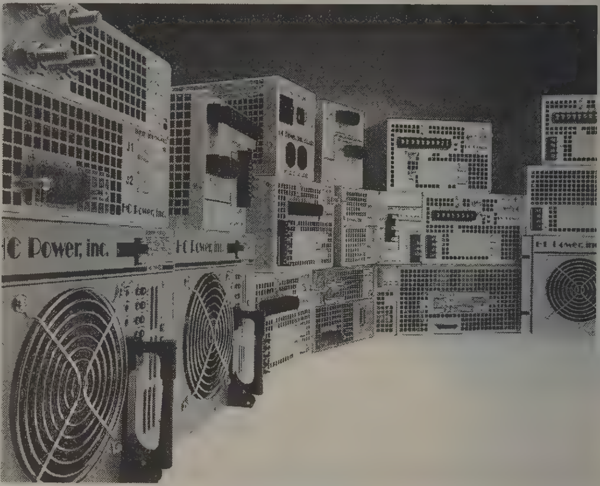
HC—For World Class Power. . .

500 to 4000W HiRel MOSFET Switchers; Meet IEC 555-2 Performance Standards



- **Absolute Current Sharing of Parallel Outputs with No Minimum Load**
- **.99 Power Factor Correction Eliminates Line Harmonics and Improves Performance**
- **Meets All Applicable Safety and Emissions Standards**
- **Provides Complete Protection from Over Voltage, Over Current, Over Temperature and Reverse Polarity.**

Selling your products in a world market requires a switch mode power supply with world-class performance and reliability, *including* compliance with the stringent new safety and performance standards imposed by the European Community.

HC Power offers you the widest selection of catalog standard, high power switchers *in the world.* We offer you thoughtfully-engineered solutions to real-world operating problems, ranging from our exclusive HotSwap™ redundant power systems to new answers for power conditioning and power factor correction.

Specifications

INPUT SPECIFICATIONS

AC Input Range: 90-264 VAC, 47-63 Hz, single phase. 400 Hz available.

Inrush current: ≤nominal full load running current at 115 VAC.

DC Input Range: 120 to 370 VDC.

Fusing: All units are fused internally.

Line Transient: Meets ANSI C62.41 (Formerly IEEE-587-1980)

Line Filtering: Complies with Level A of Docket 20780 and VDE 0871.

Power Factor: ≥.99 at full load.

Total Harmonic Distortion: <5%.

OUTPUT SPECIFICATIONS

Voltage Adjust Range: ±10%.

Line Regulation: 0.2% over entire AC input range.

Load Regulation: ±0.2% no load to full load.

Cross Regulation: 0.1% maximum.

Ripple and Noise: (PARD) 1% or 50 mV, whichever is greater.

Turn On Delay: Under full load conditions all outputs will be in regulation in less than 1 second at 115 VAC line input.

Output Polarity: All outputs are floating.

Minimum Load: *No* minimum load is required on any output.

LOGIC AND CONTROL

Remote Sense.

Guaranteed 250,000 Hr. MTBF

New ECT Series Switchers Accept Both European & US Three-Phase Inputs; Delivers .92 Power Factor Correction

- **Eliminates Need for Step-Down Transformer**
- **Eliminates Need for Rewiring for Single-Phase 240 VAC Operation on European Systems**
- **Accepts Either 380/415 VAC (European) or 208 VAC (USA) Three-Phase Delta Inputs**
- **No Neutral Required**
- **Outputs Range from 2V @ 400A to 48V @ 42A (Standard)**

Available in both 1500 and 2000 watt versions which incorporate the unique HC Power MOSFET design, this new line solves a major problem faced by companies selling systems both domestically and in the European Community obtaining: a universally adaptable power source for *both* markets.

Every supply in the ECT Series may be externally strapped for operation on either US 208VAC or European 380/415VAC three-phase delta inputs, and *problems associated with neutral are totally eliminated.*

ECT Series Single Output Switchers

4.5 @ 300	4.5 @ 400
5 @ 300	5 @ 400
5.2 @ 280	5.2 @ 380
12 @ 125	12 @ 167
15 @ 100	15 @ 137
18 @ 83	18 @ 111
24 @ 63	24 @ 84
28 @ 54	28 @ 72
36 @ 42	36 @ 56
48 @ 31	48 @ 42

New HCT Series Offers Economical Three-Phase Input and Power Factor Correction for Domestic Applications

This new line features a power MOSFET design with current control mode and a unique two-stage current limit that allows for momentary overloads but will shut down prior to damage to costly backplanes and wiring. Available in 1500 and 2000W Series.

These new switch mode supplies operate on 180-264 VAC, 47-63Hz three phase input, while offering .92 (typical) power factor correction.

Choose from one to four outputs in the HTC 15 Series and single output only in the HCT21 Series. Contact applications engineering.

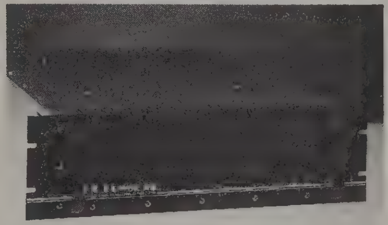
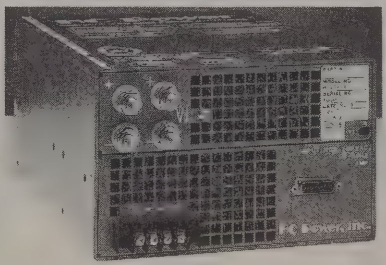
SPECIALTY POWER PRODUCTS
Custom Rack Assemblies

These rack-mounted custom power assemblies can be economically packaged to satisfy your specific power requirements, while enhancing systems reliability and reducing total power system cost. Each custom rack assembly is fully tested, and is designed to achieve higher power densities while maintaining long-term reliability. Select from any standard power modules. Consult Applications Engineering for full details.



MG Series Quasi-MIL Power Supplies

Available in 500, 1000, 1500 and 2000 watt configurations, these single- and multiple-output power supplies meet the environmental specifications of MIL-STD-810D. Derived from a proven line of switch mode power supplies with a field-demonstrated MTBF of more than 250,000 hours, the MG Series has been environmentally-enhanced to provide reliable operation under the most demanding conditions, at a cost substantially less than a full MIL-Spec supply.



ECT/HTC Specifications

INPUT SPECIFICATIONS

AC Input Range: HCT - 180-264 VAC, 47-63 Hz, three phase delta. **ETC** - 180-264 VAC, or 360-500 VAC, 47-63 Hz, three phase delta. Externally selectable.

Power Factor: .92 typical. (.90 minimum at 1/2 load or greater.)

Inrush current: Limited to 40A RMS maximum for 20 milliseconds.

Fusing: All units are fused internally.

Line Transient: Meets ANSI C62.41 (formerly IEEE-587-1980)

OUTPUT SPECIFICATIONS

Voltage Adjust Range: ± 10%

Load Regulation: 0.2% no load to full load.

Line Regulation: 0.2% over full input range.

Ripple and Noise: 1% or 50 mV, whichever is greater, when measured at the power supply terminals with a 20 MHz scope.

Turn On Delay: Under full load conditions the output will be in regulation in less than 500 milliseconds.

Output Polarity: The output is floating and may be referenced as desired by the user.

Minimum Load: *No* minimum loading is required.

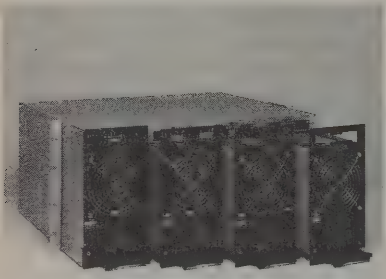
PowerMiser™ .98 Power Factor Corrector Eliminates Harmonic Distortion

- **Meets IEC 555-2 & DOD-STD-1399**
- **Output Power Range from 500-4000W**
- **AC In/AC Out Stand-Alone Devices**
- **Ideal for Switcher-Powered Systems Operating on Line Voltage**
- **Complies with UL & IEC Safety Standards**

These versatile, stand-alone power factor correctors permit you to add .98 PF to an existing power system. This new concept assures safe, reliable operation of computers, business and medical equipment while reducing AC input by 30%.

PowerMiser converts the AC input current pulse typical of switching regulated power supplies to a wave form which closely approximates a sine wave. This enables *your* power system to be classified and tested as a Class A device under IEC-555-2, rather than the more restrictive Class D limits.

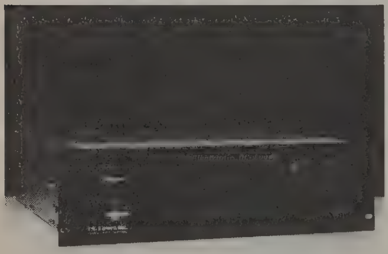


High Current Battery Charger System Uses 100 Amp Modules

- **Space-Saving Modular Design Combines High Performance with Light Weight**
- **Shelf-Mounted, Totally-Pluggable Switch Mode Rectifiers.**
- **Active Power Factor Correction**
- **Absolute Current Sharing between Modules and Power Shelves; Infinitely Expandable**
- **Choose from +24VDC or −48VDC**

The totally-modular design of these shelf-mounted rectifiers make them an ideal choice for battery charging systems. They are completely factory-assembled, wired and tested. Modules can be easily replaced while the system is in operation. System complies with IEC 555-2.

Automatic low voltage disconnect is available.



2500 Watt High Power DC Electronic Load for Bench, Burn-In and ATE Testing of Power Supplies

- **2500 Watts Capability**
- **1.75 Volt to 75 Volt Range; 500 Amps Maximum Current**
- **True Parallel Operation for Even Higher Current Requirements**
- **High Performance at Lowest Possible Cost**

HCL Series Electronic Loads have been specifically designed so they can be used for bench testing, intalled within 50°C burn-in chambers, or used in ATE systems. Load current can be adjusted by a manual control on the front panel or remotely by use of a D to A converter. These low cost, electronic loads will test power supplies with output voltages between 1.7 volts and 75 volts and with output currents up to 500 amps!

Only 5-1/4″ (3U) high they can be easily stacked in a 19″ rack. Depth is 21″ plus terminations. Front panel load connections, a manual current control, a digital panel meter, and an AC input switch with indicator light are all standard.

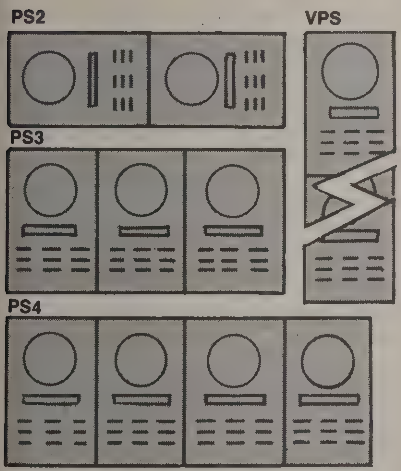
Glitch-Free Power Supply Replacement in Seconds!

- **500 to 40,000 Watts in Standard Racks; Custom Configurations Available.**
- **Wide Selection of Single and Multiple Output Power Modules, with Absolute Current Sharing.**
- **AC or DC Inputs**
- **1.2V to 48V Outputs**
- **19″, 24″ and Space-Saving Vertical Rack Mounting Systems**
- **Proven Reliability and .99 Power Factor Correction**

The HC Power HotSwap™ concept lets you replace power supplies quickly and easily, *without* shutting down your system. Select from literally hundreds of *standard,* high reliability HC power modules. We'll help you configure them in a standard, turn-key assembly—completely wired internally—that will satisfy your most demanding redundant power requirement.

The HotSwap system assures absolute current sharing between modules, while enhancing systems reliability. They have been field-proven by some of America's leading manufacturers of communications, process control and computer systems.

Best of all, the price of a HotSwap redundant power system is surprisingly low. Call today for details.



STANDARD HC POWER SHELVES

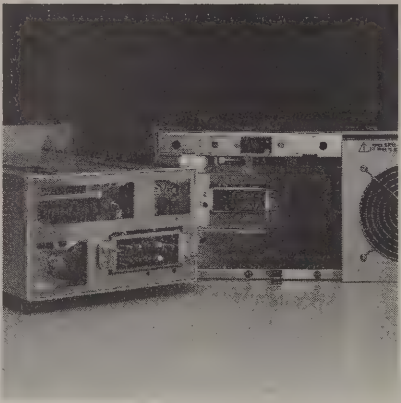
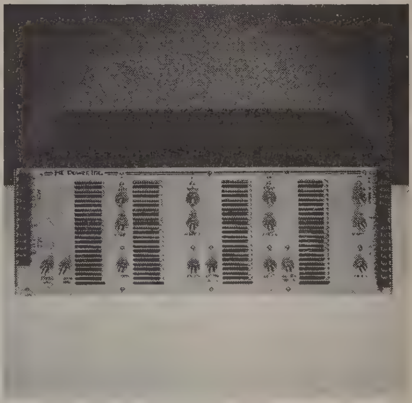
HotSwap™ Redundant Power Supplier

HC Power, inc.
HC Power, inc.





PS Series—The Fault Tolerant Solution

This technically-advanced line of redundant power systems has been thoughfully designed for exceptional safety, error-free replacement in just seconds and the highest levels of systems reliability. No special adjustments or tools are required. The proprietary HC Power design eliminates *any* chance of wiring errors.

HOW TO ORDER

Select your required power supply module from the HC Power Switcher Selection Guide on the preceding page. Power modules from 500 to 2000 watts can be used in the PS2, PS3, PS4 and VP5 power shelves. 3000 and 4000 watt moduels can be used in the special HPS power shelf (Consult factory).

For Power Module Selection See Preceding Two Page Spread

Standard HotSwap Features

- **Input Power Breaker**
- **Voltage Adjustment Potentiometer—Each Output**
- **Voltage Test Points—Each Output**
- **Input & DC-OK Indicator Lights**
- **Heavy-Duty Barrier Strip or Studs for Input Power**
- **Studs for Hi-Current DC Outputs**
- **Barrier Strips for Auxiliary Output Voltage and Interface Signals**

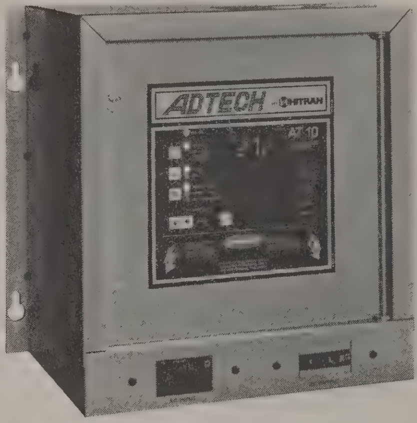
AT10 SERIES STATIONARY FLOAT BATTERY CHARGERS

***AT10 SERIES** chargers and rectifiers are self-contained, constant potential, DC power supplies designed for floating and charging stationary batteries and/or supplying power to utility, communication and industrial type loads.*

***AT** means **Advanced Technology** microprocessor control.*



Design Features:

- Modular Construction – Rectifier, microprocessor control, input/output, power transformer, filter and alarm assemblies are all modular and easily replaceable.
- Long Life – All units are engineered for 30 years life with a MTBF of 60,000 hours (6.85 years)
- Field Serviceable – For fast service, enclosure and instrument panel are easily removable without disturbing chassis or installed conduit. Schematic and diagnostic information plates are mounted on enclosure. Modular construction and self diagnostics result in an MTTR of less than 60 minutes.
- Installation & Field Adjustment – Units are easily wall mounted. Control, alarm and operating level set points are adjusted digitally from the front panel while on-line, without the need to vary loads or external conditions.
- Safety – Units are designed and tested to Underwriter's Laboratory Standard UL-1564 and are UL listed.

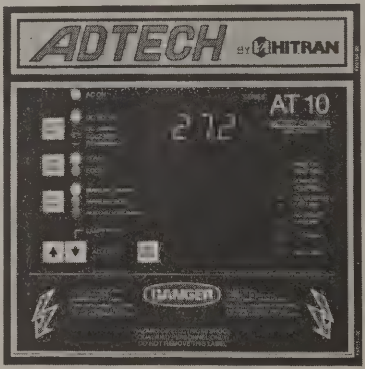
Specifications:

AC Input

- Voltage:120/208/240Volts +10%, -12%, single phase, 60Hz ±5%
- Power Factor: 0.80 typical at full load
- Efficiency: 85–90% (typical at 130Vdc) at 50–100% load

DC Output

- Voltage Ratings: 12, 24, 48, or 130Vdc nominal
- Current Ratings: 6, 12, 16, 20 or 25Adc
- Voltage Regulation: ±0.25% for line, load and temperature variations
- Current Limit: Adjustable from 50% to 110% of rated output current. Factory set to 110%
- Continuous Rating: 110% output at maximum equalize volts and at 50°C
- Electrical Noise: 30mVrms/32dBrnC weighted maximum on filtered units
- Surge Withstand Capability: Meets IEEE-472/ANSI C37.90a



All modes, operating level set points, and alarms can be set through front panel switches while on-line. LEDs and digital display show status at all times.

Models With Higher Ratings:

- SCR/SCRF series models are available with single or three phase AC input ratings up to 600V and DC output ratings to 800Adc at 12, 24, 48, 130 or 260Vdc nominal. Ask for detailed literature and specifications.

Standard Features:

- 1% Digital LED display meter for Vdc, Adc, timer hours and alarm levels
- AC input and DC output circuit breakers
- Float/Equalize selector switch with indicator lights
- Manual equalize timer (0–255 hr.) with indicator light
- AC line failure automatic equalize timer (0–255 hr.) with indicator light
- Local or remote voltage sense
- High DC voltage shut-down
- Reverse polarity protection
- Front panel controls can be disabled for security
- MOV surge supressors
- I/O compression lugs
- Switchboard wire, UL VW-1
- Membrane front panel
- ANSI 61 gray baked epoxy finish

Options/Accessories:

- Output filter for 30mVrms ripple
- Battery eliminator filter
- Alarm assembly with local LED's and summary relay contact for AC failure, DC failure, High Vdc, Low Vdc, Positive and Negative ground fault
- Alarm contacts for each alarm
- 480 Volt single phase, 60Hz input
- 50Hz input
- Input lightning arrestor
- Medium/High AIC circuit breakers
- Temperature compensation via remote probe
- Ground pad with #4 AWG lug
- Fungus proofing (Tropicalization)
- Floor stand or rack mounting
- Drip shield
- Cabinet heater
- NEMA 4 or NEMA 12 enclosures
- Provision for locking front panel

Enclosure Size (inches):

- 12V:6 to 25A; 24V: 6 to 25A; 48V: 6 to 12A; and 130V: 6A models:

  15.5 H x 16.25 W x 10.75 D
- 48V: 16 to 25A; and 130V: 12 to 25A models:

  17.75 H x 19.5 W x 13.25 D

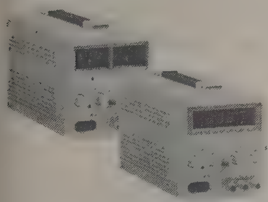
ELECTRONIC TEST INSTRUMENTS

DC Power Supply



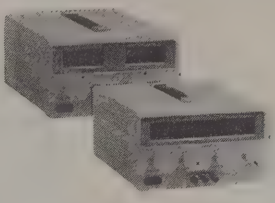
PS- Small Series (Analog/Digital)

• External programmable and remote control • Continuous or Dynamic load for internal selectable • Low ripple and noise • 0.01% high regulation • Overload and Reverse polarity protection • Series or Parallel operation function • Light and compact design • Constant voltage and constant current modes • 3 ½ Digits 0.5" LED display (Digital type only)

SPECIFICATIONS

CONSTANT VOLTAGE MODE:
Regulation: Line regulation ≤0.01% + 3mV. Load regulation ≤0.01% + 3mV (rating current >3A). ≤0.01% + 5mV (rating current >3A). **Ripple & Noise:** ≤0.5mVrms 5Hz~1MHz (rating current ≤3A). **Recovery Time:** ≤100us (50% load change, minimum load 0.5A). **Temp. Coefficient:** ≤300PPM/°C. **Output Range:** 0 to rating voltage continuously adjustable.
CONSTANT CURRENT MODE:
Regulation: Line regulation ≤0.2% + 3mA. Load regulation ≤0.2% + 3mA.. **Ripple Current:** ≤3mA rms. **Output Range:** 0 to rating current continuously adjustable.
METER:
Analog: Voltmeter and Ammeter each one pc. 2.5 class. Dimensions 50 x 50mm. **Digital:** 3 1/2 Digits 0.5" LED display (voltage and current switchable). Accuracy ±(0.5% of rdg + 2 digits).
INSULATION:
Chassis and Terminal: 20mΩ or above (DC 500V). **Chassis and AC Cord:** 30mΩ or above (DC 500V).
POWER SOURCE:
AC 100V, 120V, 220V, 240V ±10% 50/60Hz (External switchable).

DC Power Supply



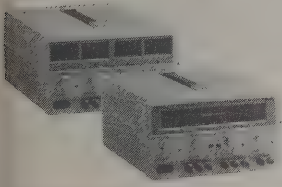
PR-Middle Series (Analog/Digital)

• Continuous or Dynamic load for internal selectable • Low ripple and noise • 0.01% high regulation • Overload and Reverse polarity protection • Constant voltage and constant current modes • 3½ Digits 0.5" LED display (Digital type only)

SPECIFICATIONS

CONSTANT VOLTAGE MODE:
Regulation: Line regulation ≤0.01% + 3mV. Load regulation ≤0.01% + 5mV (<10A). ≤0.02% + 5mV (≥10A). **Ripple & Noise:** ≤1mVrms, 5Hz~1MHz. **Recovery Time:** 100μs (50% load change, minimum load 0.5A). **Output Range:** 0 to rating volts continuously adjustable.
CONSTANT CURRENT MODE:
Regulation: Line regulation ≤0.2% + 3mA. Load regulation ≤0.2% + 3mA.. **Ripple Current:** ≤3mA rms. **Output Range:** 0 to rating current continuously adjustable.
METER:
Analog: Voltmeter and Ammeter each one. 2.5 class. Dimensions 60 x 80mm. **Digital:** 3 ½ Digits 0.5" LED display. Accuracy ±(0.5% of rdg + 2 digits).
INSULATION:
Chassis and Terminal: 20mΩ or above (DC 500V). **Chassis and AC Cord:** 30mΩ or above (DC 500V).
POWER SOURCE:
AC 100V, 120V, 220V, 240V ±10% 50/60Hz. (External switchable).
ACCESSORIES:
Test Lead GTL-105 x 1 or GTL-104 x 1 (>3A). Instruction manual x 1.

Triple-Output Power Supply



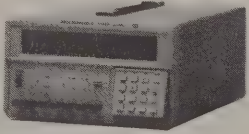
PC-3030/PC-3030D (Analog/Digital)

• Auto tracking • Auto series and parallel operation • Continuous or Dynamic load for internal selectable • Low ripple and noise • Overload and Reverse polarity protection • Constant voltage and constant current modes • Two digital pannel meters (PC-3030D) • Four analog meters (PC-3030)

SPECIFICATIONS

OPERATION MODE:
Independent: Two independent outputs and 5V fixed output. Output from 0 to rating volts and 0 to rating amperes. **Series:** Output from 0 to ± rating volts at rating amperes each. Output from 0 to double rating volts at rating amperes. **Parallel:** Output from 0 to double rating amperes at rating volts.
CONSTANT VOLTAGE MODE:
Regulation: Line regulation ≤0.01% + 3mV. Load regulation ≤0.01% + 3mV. **Ripple & Noise:** ≤1mVrms, 5Hz~1MHz. **Recovery Time:** ≤100μs (50% load change, minimum load 0.5A)
CONSTANT CURRENT MODE:
Regulation: Line regulation ≤0.2% + 3mA. Load regulation ≤0.2% + 3mA.. **Ripple Current:** ≤3mA rms.
TRACKING OPERATION:
Tracking Error: ≤0.5% + 10mV of the master. **Series Regulation:** ≤300mV.
METER:
Analog: Voltmeter and Ammeter each two pc. 2.5 class. Dimensions 50 x 50 mm. **Digital:** 3 1/2 Digits panel meter x 2. 0.5" LED display. Accuracy ±(0.5% of rdg + 2 digits).

Programmable Power Supplies



PPT-3615

- **Easy Operation,with UP/DOWN key**
- **High Stability, Low`Drift • High Resolution: 10mV, 1 mA • 4 Digit Display • Over Voltage Protection, Over Current Protection**
- **Memory Store and recall 100 points for PPS-3635. 50 points for PPT-3615**
- **Self Test, Confirm Performance**
- **FRONT/REAR switch select (output)**
- **Triple Output (for PPT-3615 only)**
- **Auto Tracking (for PPT-3615 only)**
- **Auto Series and Parallel Operation (for PPT-3615 only) • Every STEP with a timer • IEEE-488.2 (Option)**

SPECIFICATIONS:
Independent Mode: 3 independent outputs
Outputs from: (0-36V, 0-1.5A) x 2
0-8V, 0-3A
Series output: 0-±72V, 0-1.5A
Parallel output: 0-36V, 0-3A
Constant Voltage Mode:
Line Regulation: ≤ 3mV
Load Regulation: ≤ 3mV
Ripple & Noise:
Voltage: 1mVrms/3mVp-p
Noise: 2mVrms/30mVp-p
Current: ≤ 3mArms

Read back resolution:
V=10Mv,C=≤.2%+10mA
Readback Voltage ACC:
V=≤.05%+25mV, C=≤.2%+10mA
Response Time:
Voltage up: ≤100 ms
No Load: ≤100ms
Voltage down: Full load ≤150ms
Light load ≤150ms
Memory: PPT 3615=50 points;
PPS3635=100 points
Timer: 1sec.-255min., Resolution: 1sec.
Function: output loop, **Meter:** 4 digit display

With over fifteen years of manufacturing experience - **INSTEK** offers a complete family of test instruments which are manufactured under the compliance of the new *ISO9000 Regulations*.

These instruments range from: **Hand Held Multimeters** (5 different models) to bench top **DMM's** (from 3½ to 5½ digits with IEEE); **Oscilloscopes** from 20MHz to 100MHz (with and without Cursors and Readouts); **Function Generators** (some with built-in Frequency Counters); **Frequency Counters** from 0.01Hz to 1.3GHz; **DC Power Supplies** (from Single Outputs to Triple Outputs - voltages from DC to 1000V available with Currents from 0 to 100 Amps; **HI-POT TESTERS:** AC/DC capabilities in one box, from manual to automatics; Ground Continuity Testers as well.

THERMAL CONDUCTIVITY OF DIELECTRICS AT ROOM TEMPERATURE

Material	Thermal Conductivity, J/ (m.K)
Diamond	658
BeO	167
Graphite	117-200
Bonded SiC	42
MgO	42
Al_2O_3	33
TiC	33
BN	28
Mullite	6.3
Titania	3.3-4.2
Porcelain	1.7
Fused silica glass	1.5
Soda-lime glass	0.8
Cast epoxies	0.17-1.3
Wood	0.5-2.5
Melamines	0.3-0.7
Mica	0.3-0.7
Phenolics (molded)	0.17-0.67

Additional combinations available, please consult factory

Models 001 and 002 recognized UL544, certified CSA 22.2 No. 234 and TUV certified to IEC 601 and VDE 0750 TI / 5.82

Remaining models pending approvals.

MED-250 SERIES FEATURES:

☐ Universal Input ☐ Low Leakage Current ☐ Input Transient Protection
☐ Level "B" EMI Filter ☐ Three or Four Outputs ☐ All Outputs Regulated
☐ Short Circuit Protected ☐ Over Voltage Protected ☐ Thermal Protection
☐ Remote Sense ☐ Remote On/Off ☐ High Efficiency

IPD INTEGRATED POWER DESIGNS

Reserve your evaluation units or get additional information on our ready-to-ship universal input switchers.

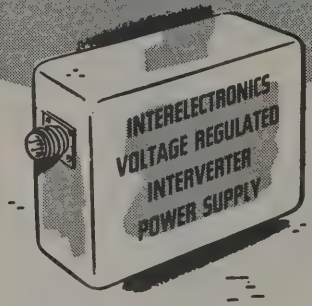
PROVEN RELIABILITY–

DC-DC, DC-AC, SOLID-STATE POWER INVERTERS

over 260,000 logged hours– voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now–



Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magnetic components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.

Ultra-reliable in operation (over 260,000 logged hours), no moving parts, unharmed by shorting output or reversing input polarity. High conversion efficiency (to 92%, including voltage regulation by Interelectronics patented reflex high-efficiency magnetic amplifier circuitry).

Wide input voltage range (1 to 250 volts DC). Wide input voltage regulation (output voltage maintained with variations up to 50% in input voltage).

Light weight (to 6 watts/oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excellent voltage regulation (to 0.1%), precise frequency control (to 0.2%) with Interelectronics extreme environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards.

Complies with MIL specs. for shock (100G 11 misc.), acceleration (100G 15 min.), vibration (100G 5 to 5,000 cps.), temperature (to 150 degrees C), RF noise (I-26600).

AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver up to ten times rated line current into a short circuit to actuate MIL type magnetic circuit breakers or fuses, will start gyros and motors with starting current surges up to ten times normal operating line current.

Now in use in major missiles, powering telemeter transmitters, radar beacons, electronic equipment. Single and polyphase units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics—first and most experienced in the solid-state power supply field produces its own all-silicon solid-state gating elements, all high flux density magnetic components, high temperature ultra-reliable film capacitors and components, has complete facilities and know how—has designed and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today, or call (914) EL 8-8000 in Congers.

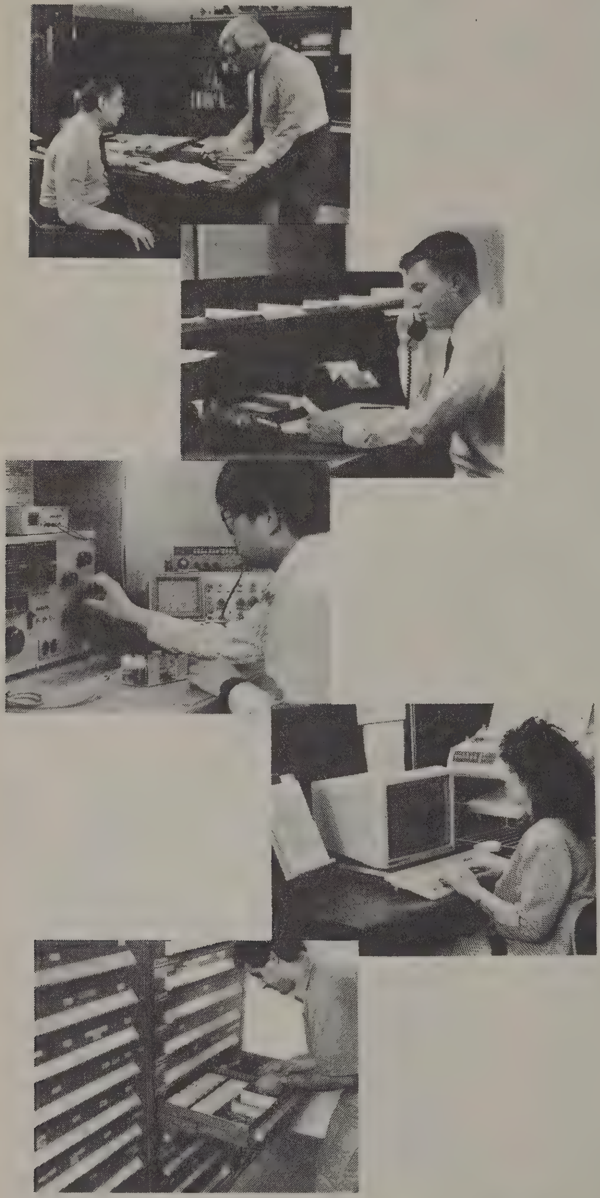
JEROME INDUSTRIES CORPORATION

POWER SUPPLIES/BATTERY CHARGERS/TRANSFORMERS

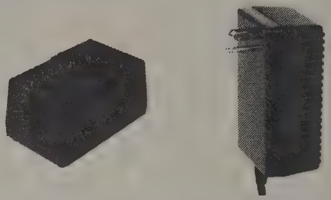
EXTERNALLY MOUNTED — WALL PLUG-IN/DESKTOP

Made in the USA
DESIGNED
FOR THE WORLD



JEROME INDUSTRIES WORLD CLASS MANUFACTURER OF CUSTOM DESIGNED

- LINEAR POWER SUPPLIES
- SWITCHMODE TECHNOLOGY POWER SUPPLIES
  - UNIVERSAL WIDE RANGE INPUT
  - DC TO DC CONVERTERS
- FAST-CHARGE BATTERY CHARGERS
  - NI-CAD CELLS
  - NICKEL-METAL HYDRIDE CELLS
- DUAL STEP LEAD ACID/GEL CELL CHARGERS
- FLOAT MODE LEAD ACID/GEL CELL CHARGERS
- TRANSFORMERS



WE ARE EXPERTS IN ENGINEERING POWER SOURCES FOR:

- Data Communications
- Medical
- Computers
- Industrial Controls
- Telecommunications
- Instrumentations
- Electronics

WHY INVEST IN JEROME...

- We've been a USA Manufacturer for over 25 years!
- Engineering, Production, and Customer Service are all located in same facility.
- Custom Designs
- In-House Engineering
- On-Time Delivery
- Deal Direct With Us

CALL OR FAX US FOR A QUICK QUOTATION ON YOUR REQUIREMENTS.

See page D•1760 for Cords, Plugs, and Case Styles

INDUSTRIES
CORPORATION

CUSTOM DESIGN FEATURES - SWITCHMODE AND LINEAR REGULATED POWER SUPPLIES

- International input configurations: 100 VAC 50 HZ, 120 VAC 50 HZ, 120 VAC 50/60 HZ, 220 VAC 50 HZ, 240 VAC 50 HZ, 90-260 VAC, 47-63 HZ.
- Switchable Inputs: 120/240 VAC 50/60 HZ or any other configuration • Power ON switch available.
- Input Surge Protection option.
- Input Noise Filter option.
- Ground available to core and/or output.
- Dielectric Withstand Voltage: up to 4000 VAC RMS
- Single and Multiple Output designs.
- Output Voltage: Up to 120 VDC.
- Output Power: 120 watts max.
- Operating temperature: 0° to 60°C.
- Output Ripple: 2 MV RMS max each output.
- Combined Regulation: 5% standard 1% available.
- Short Circuit and Overload protection.

SWITCHMODE POWER SUPPLIES

- UNIVERSAL WIDE RANGE INPUT
- DC TO DC CONVERTERS
- LAPTOP POWER SUPPLIES

STANDARD FEATURES

Input:

- Voltage: 90-130 VAC, 47-63 HZ.
- Ground available.

Output:

- Operating temperature: 0° to 40°C.
- Continuous Duty.
- Combined Regulation: 5% Max.
- No minimum load required for regulation.
- Output Ripple: 50 MV P-P max.
- Transient Response: 100 microseconds for 50% loadchange typical.
- Overcurrent and Short Circuit protected.
- Auto reset from overcurrent.
- Holdup Time: 32 MSec min at 120 VAC.
- Conducted EMI: meets FCC Class B. Radiated EMI: designed to FCC Class B.

REGULATED LINEAR POWER SUPPLIES

STANDARD FEATURES

Input

- Voltage: 105-130 VAC, 60HZ.
- Ground available to core and/or output.
- Dielectric Withstand Voltage: 1500 VAC RMS

Output

- Operating Temperature: 0°C to 40°C
- Continuous Duty
- Output Ripple: 10 MV RMS MAX
- Combined Regulation: 5% Max.
- Thermal Current Limit or Foldback Limit
- Short Circuit and Overload Protection
- No Minimum Load Required For Regulation

POWER SUPPLIES/BATTERY CHARGERS/TRANSFORMERS

EXTERNALLY MOUNTED — WALL PLUG-IN/DESKTOP

Made in the USA
DESIGNED
FOR THE WORLD

UNREGULATED POWER SUPPLIES

SPECIFICATION

Input:
- 120 VAC 60 Hz
- 120 VAC 50/60 HZ
- 240 VAC-50/60 HZ
- 120-240 VAC-50/60 HZ
- Switchable

Output:
- Voltage: 90 VDC max.
- Power: 160 watts max.
- Operating temperature: 0° to 40°C.
- Continuous Duty.

FAST-CHARGE BATTERY CHARGERS

NICKEL-CADMIUM (NI-CAD) NICKEL-METAL HYDRIDE CELLS

- **DELTA-V**
- **DELTA-T**
- **TIMER CIRCUIT**

STANDARD FEATURES

- Voltage 120VAC 60 HZ
- Ground available to core and/or output
- Dielectric withstand Voltage 1500VAC RMS
- Power: 90 Watts Max.
- Operating Temperature: 0-40 Degrees Celsuis
- Continuous Duty
- C/1 to C/4 charge rates Depending on number of cells to be charged

CUSTOM DESIGN FEATURES

- Internal input configurations… 100VAC 50HZ, 120VAC 50HZ, 120VAC 50/60HZ, 220VAC 50HZ, 240VAC 50HZ
- LED to indicate High Charge
- LED to indicate Full Charge

RAPID CHARGE TYPES - Δ V (Partial Listing - Others available)

LEAD ACID/GEL CELL CHARGERS

CUSTOM DESIGN FEATURES ALL BATTERY CHARGERS

- International input configurations: 100VAC 50 HZ, 120 VAC 50 HZ, 120 VAC 50/60 HZ, 220 VAC 50 HZ, 240 VAC 50 HZ.
- Switchable Inputs: 120/240 VAC 50/60 HZ or any other configuration.
- Power ON switch available.
- Power ON indicator LED option.
- Output Voltage: Ratings available for 4V, 6V, 8V, 12V, 18V, and 24V batteries.
- Output Power: 24 watts max.
- Operating temperature: 0° to 50°C.
- Continuous Duty.
- Dual rate charging design available.
- END OF CHARGE indicator LED option.
- Regulated constant current charging available in addition to the standard regulated end of charge voltage.
- Ground available to core and/or output.
- Dielectric Withstand Voltage: up to 4000 VAC RMS.

STANDARD FEATURES

Input:
- Voltage: 120 VAC, 60 HZ.
- Ground available to core and/or output.
- Dielectric Withstand Voltage: 1500 VAC RMS.

Output:
- Voltage: For batteries rated 4V, 6V, 8V, 12V, 18V, and 24V.
- Power : 24 watts max.
- Operating temperature: 0° to 40°C.
- Continuous Duty.
- Output Voltage Tolerance: ±1%.

MINIGLOSSARY
SERVO COMPONENTS

SPECIFICATIONS

Excitation: The input voltage and frequency.

Transformation Ratio: The ratio of the output voltage, at maximum coupling, to the input voltage.

Phase Shift: The lead or lag of the output voltage with respect to the input voltage. For most synchros and resolvers, the phase shift can be approximated by the angle whose tangent is the ratio of the primary winding's DC resistance to its reactive component.

Impedance: Specified as R + jX, where R is the AC resistive component and X is the reactive component. Important impedances are: (a) Z_{po} (or Z_{ro} for rotor primary units), which is the impedance of the primary winding with the secondary open; (b) Z_{so}, which is the impedance of the secondary winding with the primary open; and (c) Z_{ss}, which is the impedance of the secondary with the primry shorted (essentially when driven by a low impedance).

Null Voltage: The voltage remaining when the unit is at electrical zero or in the minimum coupling position.

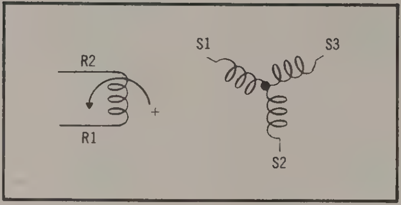
Accuracy: The error of the position of the rotor with respect to the electrical angle. It is defined as the output voltage driven by the "speed" (pole pairs) of the unit, referenced to the starting point of the calibration (usually the electrical zero position). Error is commonly expressed in minutes of arc (1/60 of a degree) or in seconds of arc.

Loads: For a transmitting unit, the impedance that the output voltage signal faces. This can be a receiver, a differential with its load, a control transformer, an A/D converter, etc.

Operation Temperature: The ambient temperature range over which the unit performs its primary function.

FUNCTIONS

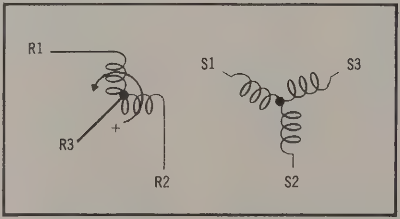
Transmitter: A unit with a Y-connected stator that outputs a signal proportional to the position of its single-phase excited rotor. High power units, called "torque transmitters," are used to drive one or more receivers. Low power transmitters are used to drive control transformers.



Receiver: A unit with a three-phase stator excited by the input, usually from a torque transmitter, and a single-phase rotor that follows the resulting stator field. Usually used to drive a position pointer.

Control Transformer: A unit with a three-phase stator excited by the input from a transmitter and a single-phase rotor mechanically driven to the null position by an external motor or other device.

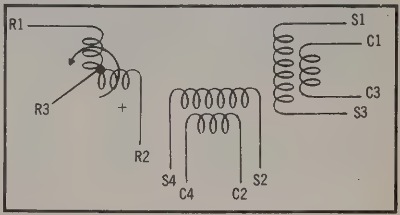
Differential: A unit with a three-phase stator and a three-phase rotor. It is usually connected between a transmitter, which excites its stator, and a receiver or control transformer. It can be used to "dial in" correction factors for the synchro chain.



Transolver: A unit with a three-phase stator and a two-phase rotor that can be used either as a control transmitter (with one rotor phase excited and the other shorted), or as a control transformer with the signal obtained from one phase of the rotor—making sure the other phase is equally loaded to prevent unbalances.

Differential Resolver: A unit with a two-phase stator and a three-phase rotor that is used as a transolver with the advantage that when connected as a control transformer, the signal does not travel through slip rings.

Resolver: A unit with a two-phase rotor and a two-phase stator that is used to create or receive SIN-COS signals such as vector resolutions for solving inertial platform coordinate transformations, unknowns of right triangles, etc. Resolvers can also be used as transmitting, differential, or receiving elements by proper choice of impedances. It is also possible to use resolvers as phase shifters where, in one mode, one rotor phase is excited and the two stator windings are feeding an appropriate RC network and indicating a phase shift, referred to the input, that corresponds to the rotor position.



Compensated Resolver: A unit with a "2×2" phase stator and a two-phase rotor used as a resolver with the added benefit of feedback windings in parallel with the stator windings that increase the useful accuracy over a wide range of environmental operating conditions.

Linear Transformer: A unit with a single-phase stator and single-phase rotor designed to provide a linear output voltage that is directly proportional to the rotor input angle. It operates over a range of less than ±90°, and is analogous to a potentiometer providing infinite resolution, but without contact between the elements. It can be used only with AC voltages.

Brushless Synchro: Available in two types—hairspring and bobbin. Hairspring synchros use spiral wound conductor springs to pick off the rotor signal, and are generally limited to a ±165° rotation. Most have mechanical stops to prevent damage due to overrotation. Bobbin synchros pick off the rotor signal with rotary transformers inside the unit, allowing the rotor unlimited motion.

Pancake Unit: A name derived from the physical dimensions of the unit, which has a diameter that exceeds axial length. Sizes range from under 1" to 20" or more. The unit is frequently used as a gimbal pickoff element and is designed to fit a particular application envelope. It can be supplied as a rotor and stator only.

JETA

HIGH CURRENT POWER SUPPLIES to 3KW

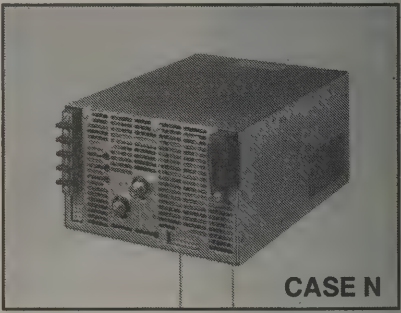
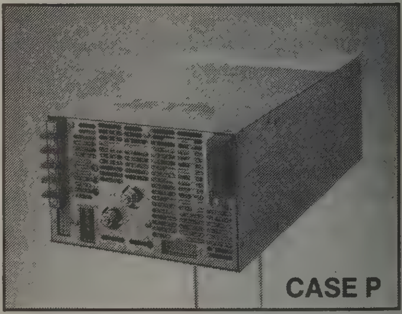
CASE L

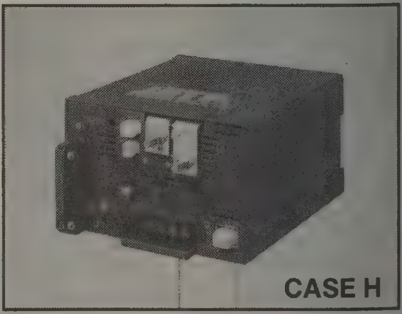
CASE B



CASE N



CASE P



CASE H

DISTINGUISHING FEATURES and BENEFITS

500 to 3000 WATTS:

A wide choice in high current DC power supplies enables you to minimize over-specification and make a selection closest to the applications needs. Models are available with 500, 800, 1000, 1200, 1500, 1800, 2000 and 3000 watt outputs in single output configurations.

ONE to FOUR OUTPUTS:

Your system's multiple DC voltage needs may be satisfied with a main output channel and selection of up to three auxiliary outputs. A variety of power levels for the main and auxiliary outputs, from 180 amps down to 3 amps, are available.

CURRENT to 600 AMPS and MORE:

High current needs may probably be satisfied in only one package but, should higher currents be needed, all JETA power supplies are automatically parallelable and capable of operation in fault tolerant (N+1) systems.

POWER FACTOR CORRECTION:

Many JETA products are available with PFC which meet the proposed IEC harmonics standard 555-2. The 1000W unit meets UL requirements for a maximum line current of 12A from a 15A, 115V service. The PFC line conditioner changes the high current pulses into a sinusoidal waveform in phase with the line voltage, thus reducing the rms line current and harmonics.

BATTERY BACKED MODULES:

Available up to 1200 watts, JETA's battery backed power supplies integrate proven high current, multiple output, switcher designs with a dual stage battery charger and a boost converter. The battery backed module, driven by a 48 volt battery, delivers highly reliable power even during brownouts and blackouts. Battery operation time is unrestricted. Models are also available with 0.995 PFC, ideal for high wattage office business systems.

INTERFACE SIGNALS and CUSTOMIZATION:

A variety of standard interface signals that are costly options elsewhere are provided enabling greater system utility. These include: power fail detection; remote inhibit; current monitor; remote programming; remote voltage adjust; and DC OK. In fact, JETA can fashion to your particular needs; OVP actuated,logic inverses or even reverse air flow. JETA can also start at the foundation and make electrical and mechanical modifications.

RELIABILITY THROUGH DESIGN:

JETA focuses on achieving the highest reliability in commercial and industrial products through: a unique hybrid thermal design (patent pending) that maintains the lowest component-to-ambient temperature gradient; a MOSFET based switching design that reduces the component count; high voltage transistor reshaping for safe area operation; fault tolerant design that provides protection for the system and the power supply; and the use of well established, conservative half-bridge, full-bridge and forward converter circuit designs. All ensure that the highest attainable reliability is replicated throughout the entire product line.

RELIABILITY THROUGH MANUFACTURING:

Reliability is not only a priority; it is ***the*** priority. JETA practices design for manufacturability (DFM) principles while designing its products and continuously monitors processes via statistical process controls (SPC) to intercept any undesirable trends on a real time basis.

STRESS TESTING:

Each unit is subject to our in-house vigorous stress tests. They consist of turning the unit on into short circuit and no-load conditions and shorting the outputs after the unit is on and loaded. This verifies the effectiveness of the circuitry and quality of components under abnormal conditions.

BURN-IN and GUARANTEE:

All products undergo a 24 hour cyclical burn-in prior to shipment. Infant mortality is eliminated, thus insuring that the most reliable product is delivered to you. And then, JETA guarantees the product for two full years for parts and labor. You will find no double standard, but one unvarying, inflexible standard for reliability.

PROTECTION and SAFETY CERTIFICATION:

Protective features for both the power supply and the system include overvoltage, thermal, overload, no-load, in-rush current, line fusing, AC ground termination, output isolation, brown-out, open and reverse sense leads and reverse voltage protection. In addition, JETA complies with the safety requirements of UL, CSA, IEC and VDE enabling the OEM speedy certification.

CUSTOM PRODUCTS:

Unique requirements for output power ratings, input voltage, package configuration, PFC and battery backup may be accomodated with JETA's modified standard product or unique custom capability. Contact JETA for a quotation today.

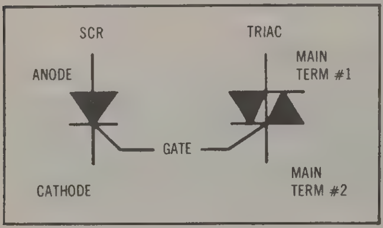
MINIGLOSSARY THYRISTORS/ HIGH POWER DIODES

THYRISTORS

A thyristor is a four-layer semiconductor (pnpn) that can be switched from an OFF to an ON state. This is usually done by a voltage or current pulse to the gate terminal. The device will then continue to conduct so long as the principal current of the device flows through the thyristor's two main terminals.

In many respects a thyristor is analogous to an electromechanical latching relay. In fact, thyristors have largely replaced these relays in newer equipment designs. But, misapplications and/or failure to fully understand the parameters of these and other solid state devices often leads to catastrophic field failures.

The terminology shown on this page has been condensed from common industry data books and is intended to be a guide for the engineer.



di/dt: *Critical rate of rise of ON state current* is the user's maximum design limit (Fig. 1).

di_R/dt: *Rate of decay of ON state current* (Fig. 1 & 2).

dv/dt (critical): *Rate of rise of OFF state voltage*. Lowest voltage rate of rise to cause a thyristor to turn ON.

dv/dt (reapplied) : *Rate of rise of reapplied OFF state voltage.*

I_{FSM}: *Nonrepetitive ON state surge current in diodes.* Maximum peak value of ½ cycles (60 Hz) a diode can withstand up to 100 times in its lifetime.

I_{TSM}: *Nonrepetitive ON state surge current in thyristors*. Maximum peak value of 60 Hz cycles a thyristor can withstand up to 100 times in its lifetime.

I_{DRM}/I_{RRM}: *Maximum peak forward/reverse leakage current* at specified temperature and repetitive conditions.

I_{GDM}: *Continuous gate current not to trigger*. Highest dc gate current that will *not* cause thyristor to switch from OFF to ON at a specific temperature.

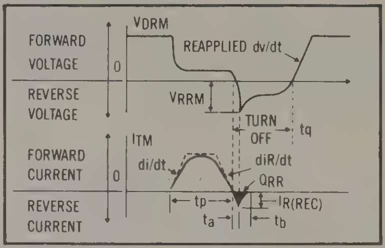


Fig. 1. Concurrent voltage and current waveforms

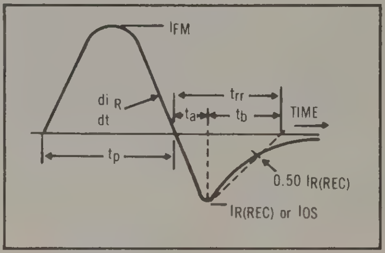

Fig. 2. Recovery current waveform

I_{GT}: *Continuous gate trigger current.* Absolute minimum gate current required to switch thyristor from OFF to ON.

I_H: *Holding Current*. Minimum current required to hold thyristor ON.

I_L: *Latching current*. Minimum current required to hold thyristor ON after removal of gate drive.

$I_{(REC)}$: *Recovery current*. Peak value of reverse current during recovery or turn OFF (Fig. 1 & 2).

I_{OS}: *Overshoot current*. See $I_{R(REC)}$.

I^2t: Maximum ON state, short time thermal capacity of the silicon element for operations less than ½ cycle of 180° conduction angle.

$I_{T(AV)}$: *Average ON state current* (max.)

Q_{RR}: *Reverse recovered charge* (Fig. 1).

$R_{\theta JC}$: *Junction-to-case thermal resistance* in degrees C per watt.

$T_{C(MAX)}$: *Max. allowable case temperature*.

$T_{J(MAX)}$: *Maximum allowable junction temp.*

t_d: *Delay time*. Interval between a specified point at beginning of gate pulse and the instant at which the principal voltage drops to a specified value. (OFF-ON) (Fig. 3)

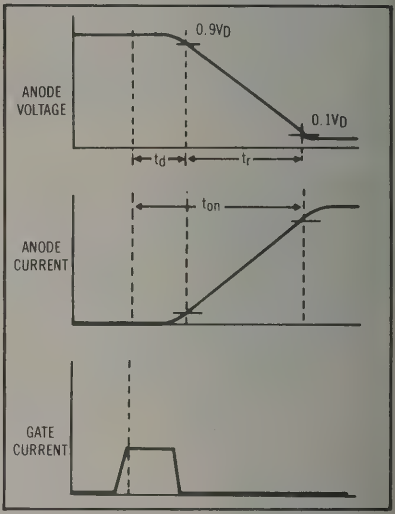

Fig. 3. Turn-on time waveforms

t_{on}: *Turn-on time*. The sum of delay time and rise time. (OFF-ON) (Fig. 3)

t_q: *Turn-off time.* Time between principal current reaching zero and the instant thyristor can block forward voltage without turning ON. (Fig. 1)

t_r: *Rise time*. Time between principal voltage dropping from one value to a second lower value when thyristor turns from OFF to ON. (Fig. 3)

t_{rr}: *Reverse recovery time*. (Fig. 2)

V_{DRM}/V_{RRM}: *Maximum repetitive peak OFF state/reverse voltage* excluding non-repetitive transients.

V_{DSM}/V_{RSM}: *Maximum nonrepetitive peak OFF state/reverse voltage*.

V_{FM}/V_{TM}: *Maximum forward voltage drop* at a specific forward current and case temp.

V_{GDM}: *Gate nontrigger voltage*. Highest dc voltage that will *not* cause thyristor to switch from OFF to ON.

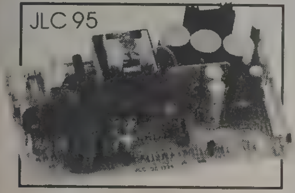
V_{LATCH}: *Latching voltage*. Voltage required for thyristor to latch ON at a given gate current and junction temp.

$V_{TM(DYN)}$: *Dynamic ON state voltage*. Transient ON state voltage of thyristor when triggered into conduction for a given load and time.

HIGH PERFORMANCE
OEM POWER SUPPLIES

We've got the power

At Joule Power, we've got the power supplies to meet your needs. We use only high quality components and employ advanced design techniques which demand fewer parts for a clean layout. We offer a variety of configurations for multiple applications and flexibility.

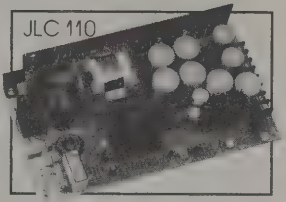


JLC 95

Input: 110 VAC / 220 VAC
Strappable
Size: 7.75″ x 4.25″ x 2.0″

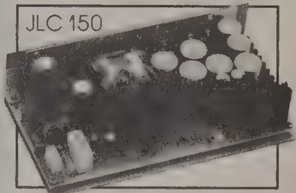
JLC 100

Input: 110 VAC / 220 VAC
Strappable, 12 VDC
Size: 6.0″ x 6.5″ x 2.0″



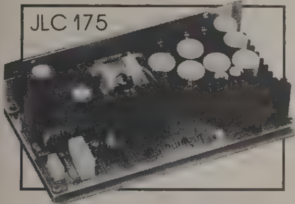
JLC 110

Input: 110 VAC / 220 VAC
Strappable
Size: 9.5″ x 4.75″ x 2.0″



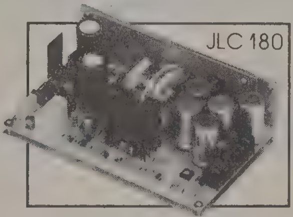
JLC 150

Input: 110 VAC / 220 VAC
Strappable
Size: 9.5″ x 5.0″ x 2.5″
w / cover: 9.5″ x 5.0″ x 2.7″



JLC 175

Input: 110 VAC / 220 VAC
Strappable
Size: 9.5″ x 5.0″ x 2.5″
w / cover: 9.5″ x 5.0″ x 2.7″

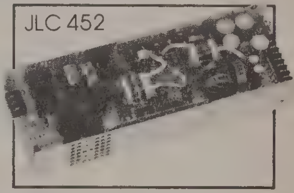


JLC 180

Input: 110 VAC / 220 VAC
Strappable
Size: 8.0″ x 5.0″ x 2.5″

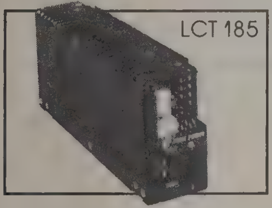
JLC 451

Input: 110 VAC / 220 VAC
Strappable
Size: 12.5″ x 5″ x 2.5″



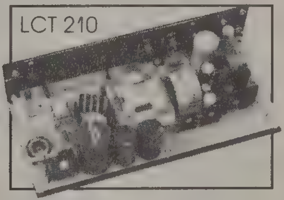
JLC 452

Input: Auto Ranging,
85 — 264 VAC
Size: 14.0″ x 5.0″ x 2.5″



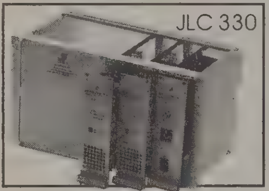
LCT 185

Input: 110 VAC / 220 VAC
Strappable
Size: 10.0″ x 4.40″ x 2.4″
w / cover: 10.15″ x 4.45″ x 2.54″



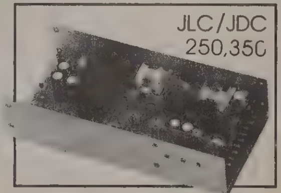
LCT 210

Input: 110 VAC / 220 VAC
Strappable
Size: 10.5″ x 4.8″ x 2.65″



JLC 330

Input: 110 VAC / 220 VAC
Strappable, 48 VDC
Rack mount
Size: 6U high x 220mm
deep x 12 HP wide



JLC / JDC
250,350

Input: 110 VAC / 220 VAC
Strappable, 48 VDC
Size: 10.5″ x 5.0″ x 2.5″

Joule Power has the ability to tailor all our standard products to meet various requirements of our customers, such as:

- Output Voltages from 5V to 48V
- Single or Multiple Outputs
- Auto Ranging Inputs
- UL 544 (Non Patient Connect)
- Power Factor Correction
- On/Off Switch
- Redundant Rack Mount Supplies (N+1 with Current Sharing)
- 2-Year Warranty

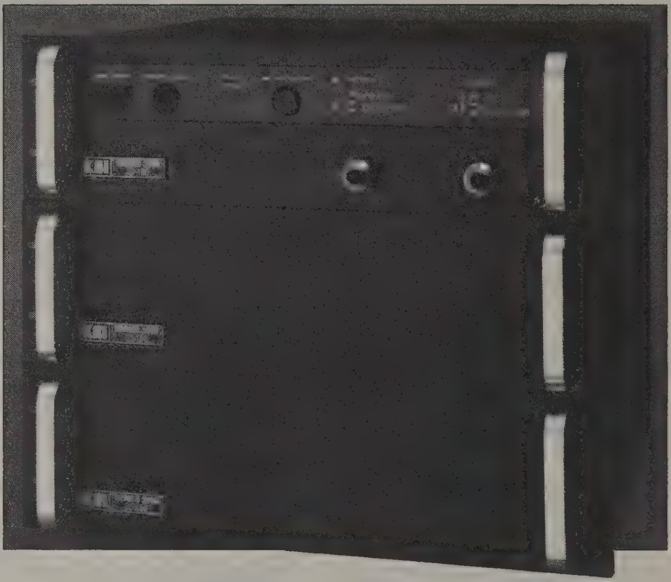
High Voltage Power Supplies



Reliable Power from the Reliable Source

Kaiser Systems, Inc. designs, builds, and sells high performance, highly reliable power supplies that are engineered to protect themselves and the systems they power. From initial concept through prototype and production units, our employees are concerned with more than just the specs. **Quality, Performance, Cost,** and **Delivery** are also part of the design.

Quality starts with good people doing a good job. Designing reliable circuits that utilize high quality components. Adhering to stringent QA standards in manufacturing. Making sure that each and every KSI power supply meets or exceeds the published specs.

Performance depends on how well the design is thought out. Is the circuit optimized? Have all fault conditions been considered? Can it be manufactured consistently? At KSI, performance means the product still conforms to the original specs, long after the warranty runs out.

Cost to manufacture is a function of application, design, production methods and quality control. Cost to the customer is the sum of acquisition and ownership expenses. KSI produces products knowing that cost must be in relation to value, and that the customer must get the best value possible for the amount spent.

Delivery is just as important as product performance. Without it there's nothing but excuses. At KSI, our MRP II operates at Class A level. That means we know what we're doing, when we're doing it and, most importantly, how we're doing it. It also means we have an on-time delivery record of 98%!

When we say Reliable Power from the Reliable Source , we mean it. Try us!

KSI Kaiser Systems, Inc.

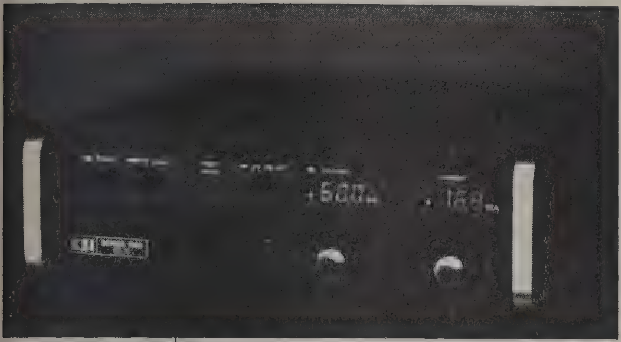
Standard High Voltage Power Supplies



The SERIES 1000 answers user needs for a multi-purpose, laboratory grade HV power supply with superior performance and unprecedented reliability.

Benefits:

High Frequency Switching Design

- Low stored energy for operator and equipment safety
- High efficiency and minimal heat dissipation
- Reduced size of internal components for smaller overall size
- Air-insulated for the lowest possible weight

Advanced Quasi-Resonant Inverter

- Greater reliability due to fewer components
- Better output regulation through optimized design
- Withstands minor fault conditions without system shut-down
- Control linearity with zero over-shoot
- Open and short circuit protected

Standard Features

- Constant voltage/constant current with automatic crossover and current limiting
- Full programming and monitoring from front panel or remote control
- Digital panel meters for voltage and current
- Soft start
- Self locking primary contactor
- Thermal overload protection
- Typical efficiency greater than 80%
- 5 year warranty

Optional Features

- OEM/Remote configuration
- Slaved bipolar operation
- IEEE-488 and RS-232C interface
- 220 Vac 50/60 Hz input

Performance Specifications Summary

- Voltage regulation: load and line better than ±0.005%
- Current regulation: load better than 100 microamps; line better than ±0.005%
- Ripple better than 0.1% rms, full load, dc to 100 kHz
- Stability better than 0.01% per hour, 0.05% per 8 hours, after ½ hour warm-up
- Transient response better than 3 ms with no overshoot, no load to full load change

Request Technical Specifications sheets for detailed specifications.

SERIES 1000 Standard Models

Output Voltage	Output Power (Watts)	Panel Height (Inches)
Choose from standard rated outputs: 5, 10, 20, 40, 60, 80, or 100 kV Negative or positive polarity	500	5¼
	1000	5¼
	2000	10½
	3000	15¾

All models have continuously adjustable voltage and current from zero to full rated output.

Request SERIES 1000 Technical Specifications Sheet for specific model numbers and rated outputs.

KSI Kaiser Systems, Inc.

126 Sohier Road, Beverly, MA 01915 • Phone: (508) 922-9300 • FAX: (508) 922-8374

Standard High Voltage Power Supplies

SERIES 5000
3 kW and 5 kW Models

The SERIES 5000 sets new standards for compact size and high performance in medium power high voltage supplies:
- Models available with outputs from 1kV to 60 kV at 3kW or 5kW continuous power ratings
- All models only 5-1/4 inches high in a standard 19 inch rack mount design
- Stable, well regulated output
- High immunity to noise, EMI, transients
- Extensive fault protection for dependable operation

Features

- Advanced high frequency switchmode design with low stored energy
- Constant voltage/constant current with automatic crossover
- Open and short circuit protected
- Arc-over protected
- Full front panel controls with digital meters
- Complete remote control and monitoring

Optional Features

- Constant power
- Parallel operation for increased output power
- ArcQuench™ arc suppression circuitry
- Adjustable overload trip
- Low output ripple (0.05% peak-to-peak)
- EMI filter
- OEM/Remote configuration for remote-only operation

Performance Specifications Summary

- Input: 187-264 Vac, three phase, 50/60 Hz
- Voltage and current regulation better than ±0.01%
- Ripple less than 0.1% peak-to-peak
- Stability better than 0.01% per hour, 0.05% over 8 hours, after one-half hour warm-up
- Temperature coefficient better than 0.01% per °C
- Efficiency better than 85%

Contact KSI for detailed model and specification data.

SERIES 6000
6kW and Higher

The SERIES 6000 is a family of highly reliable, high performance dc power supplies with output power ratings of 6 kW and higher. Customized for each application, they are the best choice for your toughest application.
- Output voltages from 50 V to 200 kV
- Modular design for packaging flexibility and compact size
- Tight regulation, low drift operation
- Extensive fault protection for long term dependability

Features

- Advanced high frequency switchmode design
- Low stored energy
- Separate converter and output chassis for installation flexibility
- Fully protected against fault conditions
- Control and monitoring per customer requirements
- ArcQuench™ arc suppression circuitry

Typical Specifications

- Voltage and current regulation better than ±0.01%
- Ripple less than 0.05% peak-to-peak
- Stability better than 0.01% per hour, 0.05% over 8 hours, after one-half hour warm-up
- Forced air or water cooling

Contact KSI for detailed model and specification data.

Capacitor Charging Power Supplies

LS1500
1500 J/s and Higher

The LS1500 series of capacitor charging power supplies offer unprecedented levels of reliability and dependability for lasers and other pulsed power applications.

- Models available with outputs from 1 kV to 40 kV at 1500 J/s average power
- Rack mounted or modular packaging
- High immunity to noise, EMI, transients

Features

- Advanced quasi-resonant high frequency converter utilizing IGBTs
- Open and short circuit protected, arc-over protected
- Rack mount chassis has full front panel control and monitoring with digital meters, plus full remote control interface
- Modular design is compact and air cooled
- Units can be operated in parallel for higher output power

Optional Features

- Custom interfaces, output configurations and performance specifications are available
- Modular units are available with output connector on top or rear
- EMI filter
- OEM/Remote rack mount configuration for remote-only operation

Performance Specifications Summary

- Voltage regulation better than ±0.5% at rep rates up to 200 Hz
- Fully protected against external open and short circuits, arc-overs, overvoltage and overtemperature
- Efficiency better than 85%

Contact KSI for detailed model and specification data.

LS5000
5000 J/s and Higher

The LS5000 series of capacitor charging power supplies offer the same high reliability as the LS1500 family, but at higher output power levels.

- Models available with outputs from 1 kV to 40 kV at 5000 J/s average power
- Only 5-1/4 inches high in a 19 inch rack mount design
- High immunity to noise, EMI, transients
- Compact, air cooled design

Features

- Advanced quasi-resonant high frequency converter utilizing IGBTs
- Open and short circuit protected, arc-over protected
- Full front panel control and monitoring with digital meters
- Full remote control and monitoring via standard 25 pin connector
- Units can be operated in parallel for higher output power

Optional Features

- OEM version with blank front panel
- Master/slave configurations for parallel operation
- EMI filter
- Custom interfaces, output configurations and performance specifications are also available

Performance Specifications Summary

- Voltage regulation better than ±0.5% at rep rates up to 200 Hz
- Fully protected against external open and short circuits, arc-overs, overvoltage and overtemperature
- Efficiency better than 85%

Contact KSI for detailed model and specification data.

KELTRON
CORPORATION
225 Crescent Street, Waltham, MA 02154 (617) 894-8700 / Fax (617) 899-9602

HIGH VOLTAGE OEM

Your Customs are Our Standards

Keltron is the only manufacturer prepared to deliver both standard and fully customized high voltage power sources, in small quantities and OEM production volumes — rapidly, with reliable deliveries and to meet your exact specifications.

Here's How

Each Keltron Series Power Supply is designed around a common PC board and basic chassis. This, coupled with effective use of CAE, allows rapid deliveries of both standard and wholly customized models — with excellent price/performance.

Common to All Keltron HV Power Supplies

- Excellent line and load regulation characteristics; Low Ripple; High Efficiency Converters
- Designed to meet applicable UL and CSA requirements. Many of these power supplies are recognized by UL, CSA, IEC, TUV
- Protection against arcs/shorts of unlimited duration

Among the Applications

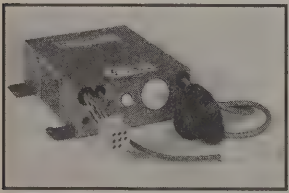
Video Projection • Beam Penetration Color Displays • Computer/ Film Recorders • Medical X-Ray Image Intensifiers • Dual Focus • Shadow Mask Color • Computer Graphics • TV Studio Monitors • HDTV

STANDARD SERIES

Keltron offers the following "standard" designs intended for timely and economical custom adaption to a wide variety of CRT display applications.

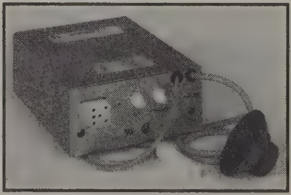
HX Series

HX Series: **For high-resolution color shadow-mask and high power monochrome CRT Monitors.** Quickly reconfigurable to a wide range of requirements. Anode outputs to 27 KV, 35 watts total power, with 5.5 to 9.0 KV focus, plus standard options for dynamic focus, G1 and G2; only 4.5" x 6" x 2.1". Supersedes Keltron's HR Series. UL and CSA 950 recognized.



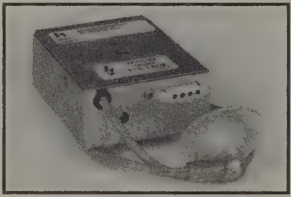
LP Series

LP Series: **Low-profile, low-cost supply for high-resolution color shadow-mask and high power monochrome CRT monitors.** Anode outputs to 25 KV, 35 watts total power, with adjustable focus to 9.0 KV, plus standard options for dynamic focus, G1 and G2, all in a 4.5" x 6" x 1.75" package. UL and CSA 950 recognized.



LH Series

LH Series: Similar to the LP Series, but **designed for lower anode ripple at voltages between 21 KV and 25 KV.** Package measures 4.5" x 6" x 2.1". UL and CSA 950 recognized.

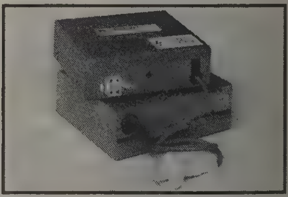


P500 Series

P500 Series: **Low cost, miniature supply for monochrome high-resolution CRT monitors.** Rated to 20 KV at 10 watts, plus standard options for G1 and G2, measures 3.1" x 4.1" x 1.4." UL and CSA recognized.

P400 Series: **For monochrome, high-resolution CRT monitor applications.** Similar to the P500 Series but optimized for very low anode ripple. Features filtered input leads, standard options for G1, G2 and Focus B+, superb load transient performance. Rated to 20 KV at 12 watts, measures 3.8" x 5" x 1.4". UL and CSA recognized.

HDF Series: **Dynamic focus supplies providing static focus voltages from 1.4 to 9.0 KV** with added wide-band dynamic focus voltage up to 500 V; internal dynamic focus amplifier with direct-coupled gain of 30; UL recognized.



Dynamic Focus: F600 top; HDF bottom

F600 Series: **Dynamic focus supplies,** similar to the HDF Series but **without the internal amplifier;** adds a dynamic focus input signal up to 400 V directly to the static focus voltage.

KELTRON CORPORATION

225 Crescent Street, Waltham, MA 02154 (617) 894-8700 / Fax (617) 899-9602

POWER SUPPLIES

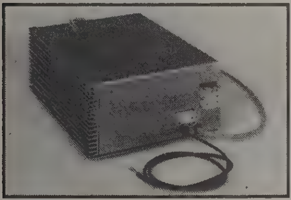
CUSTOM DESIGNS

Keltron is uniquely equipped to provide cost-effective, custom engineered models. These are examples of field proven Keltron custom designs.

PROJECTION

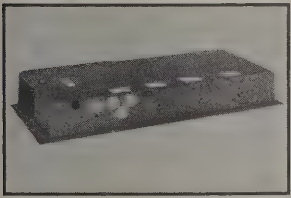
Anode and focus supplies for CRT projection; 20 to 50 KV, 40 to 250 watts. These utilize Keltron's proprietary Resonant Flyback technology, a converter topology which brings the advantages of switch-mode power conversion to high voltage. All designs are suitable for UL, CSA and TUV approval.

HP340535 - **34 KV, 3.0 mA nominal, 15.0 mA peak anode,** 10.5 KV focus, 800 V G1, 110/220 VAC input, measures 9" x 6.5" x 3.2".



HP340545

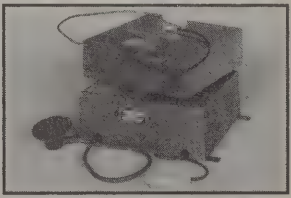
HVS00576 - **Power supply for flight simulator application** has a 32 KV, 6.5 mA nominal, 15.0 mA peak anode output with a built-in splitter for three tubes. Included in the package are three separate dynamic focus modules with programmable 7.5 KV to 10 KV outputs. Dynamic focus amplifiers provide DC-coupled 500 V peak-to-peak output, with a slew rate of 250 V/µS. Modular configuration for simplified field repair.



HVS00576

FILM RECORDING

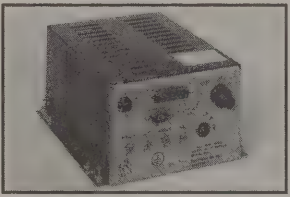
HVS00464 - **Low temperature coefficient outputs:** 25 KV, 100 µA anode; 5.5 KV to 6.5 KV, 600 µA focus; 300 V to 800 V G2. Built-in DC-coupled amplifier provides 200 V of dynamic focus with a small signal bandwidth of 200 KHz. Features logic circuits for tube protection.



Film Recording

HVS00574 - **Ultra-high resolution film recorder power supply:** 20 KV at 25 µA anode, 4.2 KV to 6.0 KV at 200 µA focus, 800 V G2 and -150 V G1. Features built-in 300 V DC-coupled dynamic focus amplifier and logic circuits for tube protection.

HVS00529 - **Complete power supply system for film recorder CRT.** Provides rock solid voltages for long exposure times. 3 of the 4 outputs are regulated. Very low noise, 18 KV anode; 2.5 to 3.3 KV DC focus with 300 Vp-p dynamic to 100 KHz. Regulated G2, adjustable from 700 to 1300 V. G1 output is -147 V @ 25 mA. Input ±15 V, extremely low conducted EMI. UL 1950 and CSA 950 approved.

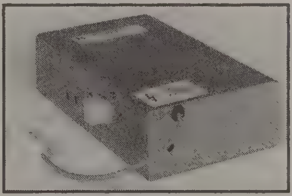


HVS00424

FAA DISPLAYS

HVS00424 and HVS00375 - **Self-contained high voltage supply provides anode, focus, G2 outputs, as well as dynamic focus.** DF amplifier boasts 1000 V/µS slew rate, up to 500 Vp-p, DC-coupled. Modular design for ease of field repair.

HDF50600 - **Dynamic focus module for raster display** provides 3.5 KV to 5.0 KV @ 1.0 mA and up to 800 V of dynamic focus correction.



HDF50600

Includes separate amplifiers for vertical and horizontal dynamic focus, each capable of 400 V swings.

DUAL FOCUS DIRECT VIEW

A family of custom designed supplies for DAF (Dynamic Astigmatism and Focus) applications, featuring two focus outputs, with or without internal horizontal and vertical amplifiers. Options include: DC restorer, overvoltage and overload protection, UL and CSA 950 approval, remote brightness control, and remote off/on.

BEAM-PENETRATION COLOR

For high-resolution color vector display using double anode penetron CRTs for up to 120 4-color fields per second; second anode 8 - 17 KV, first anode 15 KV, with dynamic focus and G1 and G2 voltages. Digital programming to 4 adjustable levels. Switching times: 125 µS max. for 3 KV; 300 µS max. for 9 KV; slew and recovery with 500 to 1350 pf load. First anode voltage: 15.0 KV @ 100 µA. Focus voltage: 2.2 to 3.5 KV, plus 300 V dynamic @ 300 µA. Grid voltage: -35 V @ 25 µA; turn-off blanking. Power input: +24 VDC ±15%. Designed for UL, CSA acceptance. Fault overvoltage: Active circuit latch-off.

The PD Series power supply is employing a unique phase control technique which enables high-stability and large-capacity. There are two types of display you can choose, meter indicators or digital displays, for the purpose of usage. The remote control function is also provided and it enables easy use in applications such as R&D, aging and as a system power supply. By using GP-610, GPIB Adaptor, most of the functions are controlled by computer.

- **Excellent temperature characteristics and transient response.**
- **Detection of over-voltage, over-current and over-heating conditions protects power supply circuitry.**
- **Three-terminal floating output.**
- **Forced-air fan cooling.**

High stability and large capacity: A unique phase control method which used a built-in pre-regulator ensures fast response and efficient high-stability supply of high currents.
High efficiency and reliability: The phase control method is combined with a choke-input filter to provide excellent regulation, low ripple and low noise–all at a high efficiency level.
High-accuracy voltage setting: The output voltage is settable using a ten-turn potentiometer, enabling smooth, high-precision setting.
Remote sensing: A remote sensing function is provided to compensate for the voltage drop in the resistance of the leads from the power supply to the load.
Remote control: The output voltage (and current) can be controlled by means of an external voltage (or resistance), enabling remote control of output.
Over-voltage protection: Over-voltage protection shuts the power off and disconnects the load to prevent damage caused by misoperation.
Voltage/current limiting: The voltage or current to be limited is presettable and LED shows in operational area.
Series and parallel connectable: Several power supplies can be connected in series to boost output voltage capability, or in parallel to boost output current capability. In addition, with either connection method, master-slave operation enables the output to be controlled from just one of the thus-connected supplies.
Output voltage on/off: The output switch can be used to electrically turn the output voltage on and off.

PWR PW SERIES

Microcomputer Control, Dual-Tracking, and Multiple Outputs

Two Series to Select from Four Models of the PWR Series for Systems Use and Four Models of the PW Series for Stand-alone Use.

PWR18-1.8Q
±18V/±1.8A, 8V/2A, –6V/–1A

PWR18-1T
±18V/±1A, 6V/5A

PWR18-2
±18V/±2A

PWR18-2TP
+18V/+2A, +36V/+1A, +8V/+2A

PWR18-2P
+18V/+2A

PWR36-1
±36V/±1A

PW18-1.8Q
±18V/±1.8A, 8V/2A, -6V/–1A

PW18-1T
±18V/±1A, 6V/5A

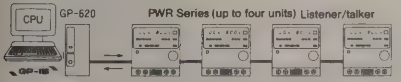
PW18-2
±18V/±2A

PW36-1
±36V/±1A

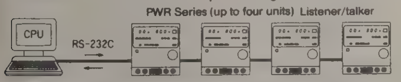
The PWR/PW Series power supplies are multi-function, dual-tracking CV/CC power supplies featuring a built-in micro-processor. And they provide multiple-output performance for experimental and systems use that rivals the previous approach of using several single-output supplies. The PW Series consists of highly versatile stand-alone power supplies, and the PWR Series provides in addition a listener function that enables digital-signal remote control of all functions and a talker function enables readback of not only all setting conditions, but of output voltage and current as well. This makes the PWR power supplies fully remotely controllable, multiple-output regulated-voltage/current power supplies.

The PWR system enables flexible configurations to suit a wide range of applications.

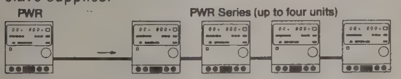
Expandable to systems applications using GPIB control: The GP-620 GPIB Adaptor can be added to adapt PWR supplies into systems application, providing listener/talker capability that enables not only full control of all power supply functions, but readout of output voltage and current values. By using IDs, control of up to four power supplies is possible, enabling a highly safe system configuration.



Expandable to computer-controlled programmable operation: By making direct connection to an external computer, it is possible to use these power supplies as programmable power supplies for application such as simulation testing. This simplifies the job of implementing a power supply system with all functions remotely controlled and readout of output voltage and current.



Master-slave operation: When including these supplies as part of a system, single control is possible by assigning one unit of a number of similar supplies as the master supply to control all functions of up to four slave supplies.



External remote control: By adding the RT-63 Remote Controller, it is possible to remotely switch the preset (output values), the outputs, and the output protect on/off of up to four units from a remote controller. It is also possible to perform remote control with contact or logic signals via RT-63.

The PWR/PW Series Combines Advanced Functions with Amazingly Simple Operation and Safety

Dual tracking: In addition to dual tracking, in which positive and negative voltages track from zero volts simultaneously, positive and negative voltages can be set independently.

Simultaneous digital display of voltage and current: Output voltage and current are indicated simultaneously on red LED displays, providing an easily readable display not possible in dark locations with dim LCDs.

Presetting of voltage and current value pairs (3 points): Three sets of frequently used voltages and currents (V-A pairs) can be preset, thereby enabling quick setup of the power supply output. (The PWR18-1.8Q,PWR18-1T,PW18-1.8Q and PW18-1T additionally feature presettable on/off delay time.)

One-dial control: To simplify operation, all condition settings are selected at push of a button. With a single dial being used to set all values. In addition, output voltage and current can be set to resolutions of 10mV and 10mA, respectively. The selected key is indicated by an LED.

Key-lock: A key-lock function can be used to forcibly hold all setting values, thereby preventing the inadvertent changes of values during testing when you leave the power supply unattended.

Dual safety: When the output is on, if a preset switch or variable switch is changed or tracking switch is set to on, a protection circuit cuts off the supply output, to prevent output of unexpected voltages and currents (when the output protect switch is set to on.)

Delay time: For multiple-output power supplies, when more than one of the outputs are switching on or off simultaneously, the testing device or circuit being supplies may be influenced unexpectedly, running the risk of damage. To prevent this, the delay time feature enables you to turn on a given output only after a delay time, and turn this output off this same delay time before the other outputs (The PWR18-1.8Q, PWR18-1T, PW18-1.8Q and PW18-1T only.).

Natural Cooling: An energy-efficient design has minimized the temperature rise within these supplies, this combining with a carefully thought-out structure to eliminate the need for a cooling fan, thereby reducing noise, vibration, and pull-in of dust.

Rack-size package: On the assumption that these power supplies will be used in testing and systems application, they have been designed in a case that meets EIA rack standards.

Last-one memory: A backup function holds setting values, so that when the power is switched on the values in effect when power was switched off are set automatically, eliminating the need to make setting once again.

PAR PA SERIES

Compact, High-Performance CV/CC Power Supplies

The PA Series Has Five Versions That Show What Power Supply Reliability and Stability Are All About.

PAR18-5
18V/5A
PAR36-3
36V/3A
PA18-1.2
18V/1.2A
PA18-3
18V/3A
PA36-1.2
36V/1.2A
PA36-3
36V/3A
PA70-1
70V/1A
PA250-0.4A
250V/0.4A

Designed to provide both compactness and high reliability, the PA Series of series-regulated constant-voltage/current power supplies provides simultaneous digital display of both output voltage and current. There are two 18V types, two 36V types, on 70V type, and one 250V type, enabling selection for a variety of applications. The outputs can be boosted by single-control serial and parallel connections, and remote control enables easy use of these compact power supplies in applications such as R&D, aging and as a system power supplies. The PAR Series is a micro-computer controlled versatile CV/CC power supply which incorporates reliable power remote sensing terminals.

Low ripple and noise: Series regulation achieves extremely low ripple and noise, as well as excellent temperature characteristics and electrical performance.

Simultaneously digital readout of both voltage and current: Voltage is displayed on a 3-1/2 digit LED display (autoranging, maximum display: 19.99V), and current is displayed on a 3-digit LED display, enabling checking of both voltage and current settings simultaneously. Constant-voltage and constant-current operation is indicated by green and red LEDs, respectively.

Series and parallel connectable: Several power supplies can be connected in series to boost output voltage capability, or in parallel to boost output current capability. In addition, with either connection method, master-slave operation enables the output to be controlled from just one of the thus-connected supplies.

Floating output: Because the output terminals are floating, operation is possible as either a positive or negative supply. Output sensing terminals are provided on the front panel for precise setting of the voltage actually applied to the load.

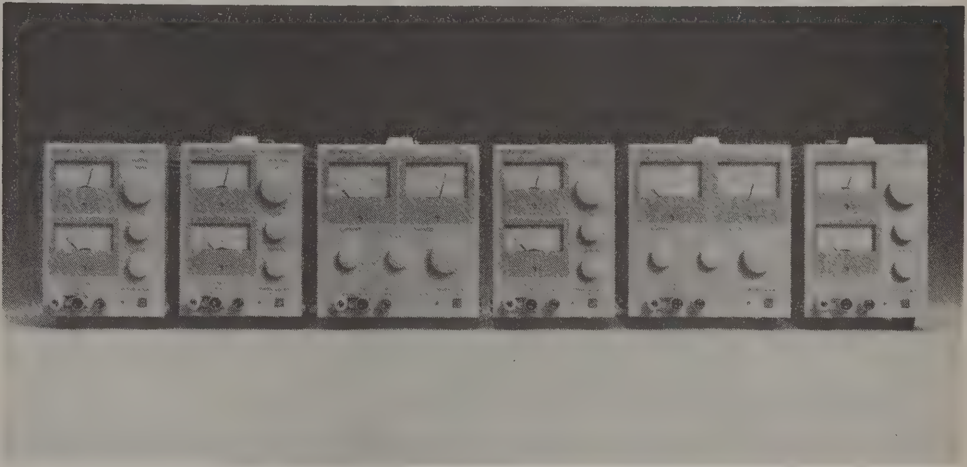
250V/0.4A



The PR Series of dropper-type CV/CC power supplies is designed to provide a compact power supply package with high performance, and ensures excellent reliability and superb design. Six types are available for a variety of requirements, three 18V types, three 30V types, two 36V types, one 70V type and one 250V type. Whether used individually or connected in series or parallel for greater capacity, the PR Series ensures excellent performance. These power supplies are housed in a compact rack-mount package and can be used on the benchtop as well.

MINIGLOSSARY
POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

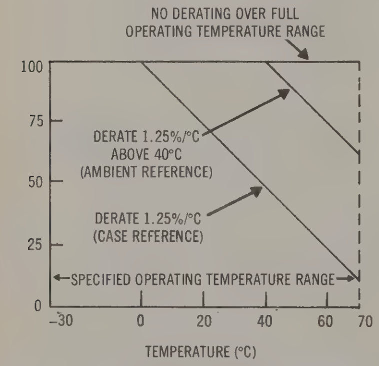

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

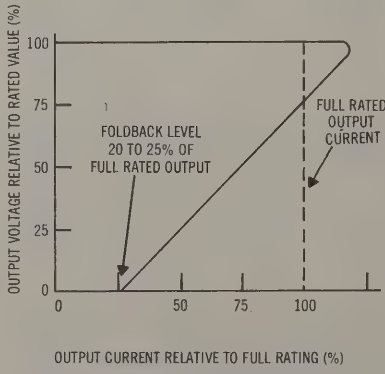

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

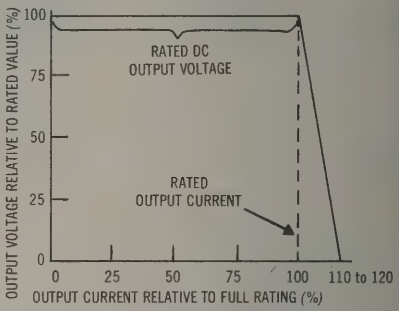

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

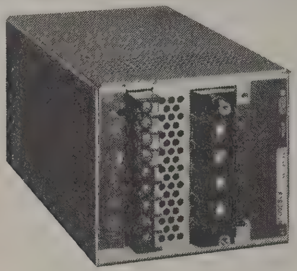
KEPCO® **THE POWER SUPPLIER™**

HEAVY DUTY INDUSTRIAL GRADE SWITCHING MODULES

150KHz FET-BASED a-c to d-c SWITCHING POWER SUPPLIES

RAX™
115/230V a-c input

These single output a-c to d-c switching power supplies employ FETs operating at 150 KHz to provide a low profile (4.3″) package that fits easily behind standard 5¼″ panels. Reliability is assured by a low parts count that results from extensive use of custom hybrid microcircuits using surface mount components. Available sizes: 50W, 100W, 175W, 300W, and 1500W.



Shown:
300-Watt Model RAX 24-12K (24V/12A) supplied fully enclosed for industrial applications.

Features:

- **"Power-OK" LED**
- **Remote on/off:** Optically isolated logic signal.
- **Active soft-start circuit.** Limits initial input current surge.
- **Remote error sensing:** Compensates for voltage drops between power supply and load.
- **Remote voltage control:** Adjust output setting with external resistance.
- **Adjustable voltage:** Internal trimmer accessible through case.
- **Overvoltage protection.**
- **Undervoltage protection in 300W and 1500W models:** Shuts down for voltage below 70% of nominal after 20 seconds.
- **Rectangular current limiting** so you can drive non-linear loads.
- **Parallel operation:** Units may be paralleled for increased current. The 1500W models feature automatic current sharing.
- **Holding time:** 30 milliseconds typically, 20 milliseconds minimum.
- **Fan cooling in 300W and 1500W models:** Other models employ convection. No external heat sinks required.
- **Built-in EMI filter** attenuates conducted noise below the requirements of FCC 20780, Class A.
- **Safety:** All models recognized by UL 478 (4,5); UL 1950. Certified by CSA 1402 level 3. Approved by TÜV Rheinland IEC 380 & 950, VDE 0806, EN 60 950. Also certified to meet the MIL STD 810D environment.
- **Produced in** ISO 9001 certified facility.

KEPCO. **THE POWER SUPPLIER™**

HEAVY DUTY INDUSTRIAL GRADE SWITCHING MODULES

600 WATT, 150KHz a-c to d-c SWITCHING POWER SUPPLIES

RBX™ 115/230V a-c input

These single output a-c to d-c switchers squeeze 600 Watts of stabilized power into a low profile package only 3¾″ high. Series RBX operates FETs at 150 KHz for high efficiency. The extensive use of custom hybrid microcircuits and a unique output power assembly contribute to high reliability by reducing the parts count well below that of conventional designs.

Features:

- **"Power-OK" LED**
- **Active soft-start circuit:** Limits a-c turn-on surge.
- **Remote error sensing:** Compensates for voltage drops between power supply and load.
- **Remote voltage control:** Adjust output setting with external resistance.
- **Adjustable voltage:** Internal trimmer accessible through case.
- **Overvoltage protection.** (See table)
- **Undervoltage protection:** Shuts down for voltage below 70% of nominal after 20 seconds.
- **Rectangular current limiting:** So you can drive non-linear loads.
- **Parallel operation:** Units may be paralleled for increased current. Provision is made for current sharing.
- **Holding time:** 30 milliseconds typically, 20 milliseconds minimum.
- **Fan cooling:** "Fan ok" circuit inhibits Power FET drive and turns off output if fan fails to operate.
- **EMI:** Auxiliary filter (FLA 250-20) available to meet FCC 20780 for Class B computing devices.
- **Safety:** All models recognized by UL and certified by CSA. Also certified to meet the MIL STD 810D Environment.
- **Produced in** ISO 9001 certified facility.

KEPCO THE POWER SUPPLIER™

HEAVY DUTY INDUSTRIAL GRADE SWITCHING MODULES

RCW™

85-264V a-c
125-370V d-c

750 WATT SWITCHING POWER SUPPLY, UNIVERSAL INPUT, POWER FACTOR CORRECTED

Operating at 60 KHz, these converters provide high efficiency at either 240V a-c source voltage, or 120V a-c. The user need do no switching to select input. The wide-range input accepts any mains voltage from 85 to 264 Volts.

To allow for paralleling, a current-share circuit is provided to equalize the outputs from as many as three of the 750 watt RCW models connected together.

Mechanically, RCW is a low-profile design measuring only 4.3" high on a 7.9" x 9.5" footprint. Delivering full power (750W) up to 50°C, at a modest cost, these 750 watt models are ideal systems power supplies for your demanding applications.

Features:

- **Low profile:** 4.3" high x 7.9" x 9.5" footprint.
- **85-264V a-c wide-range input, 125-370V d-c input.**
- **Power factor correction,** PF = 0.99 (meets IEC 555-2).
- **Current sharing** for N+1 redundancy.
- **EMI filter** meets FCC 20780 Class A.
- **Approved by** TÜV/UL/CSA to IEC 950.
- **Produced in** ISO 9001 certified facility.

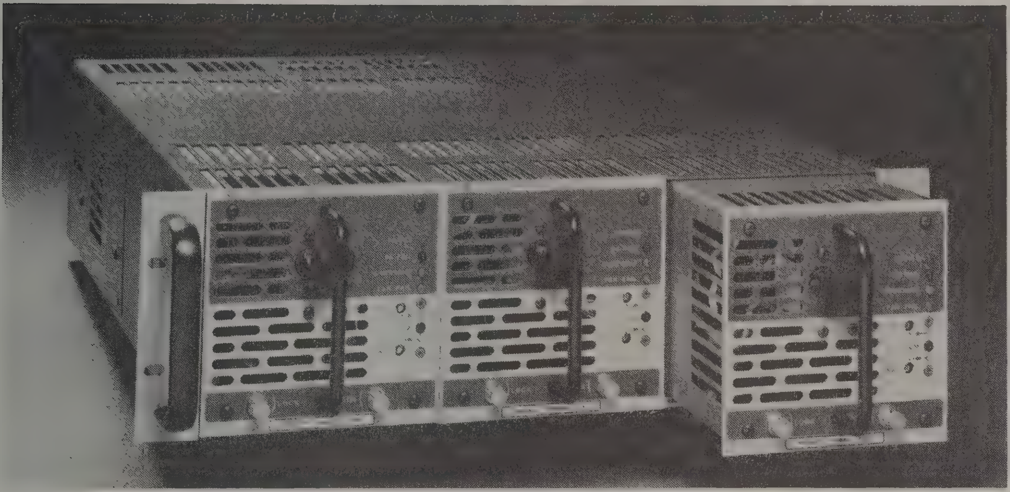
KEPCO. **THE POWER SUPPLIER™**

HEAVY DUTY INDUSTRIAL GRADE SWITCHING MODULES

HOT SWAPPABLE, 1000W POWER SUPPLIES



HSP™ 90-277V a-c
130-420V d-c

The Kepco HSP Series is a group of seven, kilowatt-size power supplies with outputs from 3.3 Volts to 48 Volts. They feature current-sharing for parallel operation and hot swappability for redundancy applications. Kepco's HSP have a universal input (90-277V a-c), and incorporate power factor correction (0.99) to meet IEC 555-2. These modern power supplies operate at 60 KHz in current mode. This provides rapid response to source and load changes and tight stabilization.

This KEPCO product is backed by a firm 5-YEAR WARRANTY

Features:

- **90-277V a-c wide-range input, 130-420V d-c input.**
- **Power factor correction, PF = 0.99** (meets IEC 555-2).
- **Hot swappable.**
- **Current sharing for N + 1 redundancy.**
- **Designed to EN 950 and UL 1950,** under evaluation.
- **EMI filter meets FCC 20780 Level A.**
- **1KW in 5" x 5" x 15.5" plug-in package.**

KEPCO THE POWER SUPPLIER™

HEAVY DUTY INDUSTRIAL GRADE d-c to d-c CONVERTERS

ERD™ SINGLE OUTPUT

24V and 48V d-c input

These are d-c to d-c converters operating at 300KHz. High frequency switching, plus extensive use of custom hybrid microcircuits with surface mount components, allow for small size (the ERD are only 3¾″ wide). The microcircuits afford high reliability by contributing to low parts count. The ERD are true transformer isolated power supplies whose output polarity is independent of the input. Available sizes: 30W, 60W, and 150W.

Features:

- **"Power-OK" LED.**
- **Remote on/off:** Optically isolated logic signal.
- **Remote error sensing:** Compensates for voltage drops between power supply and load.
- **Adjustable voltage** with internal trimmer.
- **Overvoltage protection.**
- **Rectangular current limiting** so you can drive non-linear loads.
- **Built-in EMI filter** meets conducted noise standard of MIL-STD 461B.
- **Safety:** All models recognized by UL, certified by CSA.
- **Produced in** ISO 9001 certified facility.

KEPCO® **THE POWER SUPPLIER**™

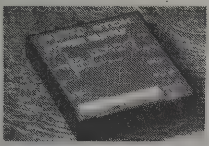
FPD™

This KEPCO product is backed by a firm 1-YEAR WARRANTY

UL RECOGNIZED CSA CERTIFIED

HIGH DENSITY d-c to d-c CONVERTERS

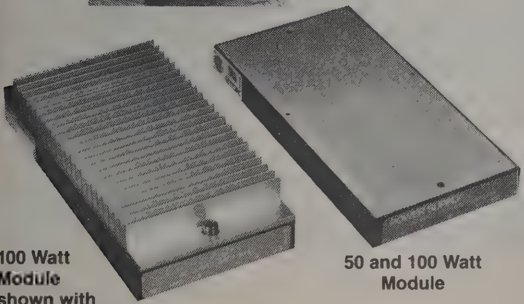
Flatpack d-c to d-c board-mount converters. Ideal for distributed power applications. Aluminum base plate/PCB stuffed with surface-mount devices… even a surface-mount transformer, a 500KHz fixed-frequency forward converter (not resonant mode) and beautiful, unpotted construction. Produced in ISO 9001 certified facility.



5 Watt Module, 20-56V Input

10 Watt Module, 36-72V Input

10 Watt Module, 20-56V Input



100 Watt Module shown with optional finned radiator

50 and 100 Watt Module

FINNED ACCESSORIES **Finned radiators available for 50W & 100W designs.**

The FPD 5W and 10W modules require no added cooling for normal operation. The 50W and 100W modules may require additional heat sinking. The special construction of FPD fastens surface-mount devices to the aluminum base plate so that excellent thermal coupling is obtained. Depending upon your application, FPD modules may be fastened by their base plate surface to a chassis or other cold plate – or a finned radiator may be attached as illustrated.

For normal operation at 100% current, the average base plate surface temperature should be maintained at or below 85°C.

FPD 50W	12V, 24V, 50V, 150V	use FIN-50
FPD 100W	24V, 48V	use FIN-50

KEPCO THE POWER SUPPLIER™

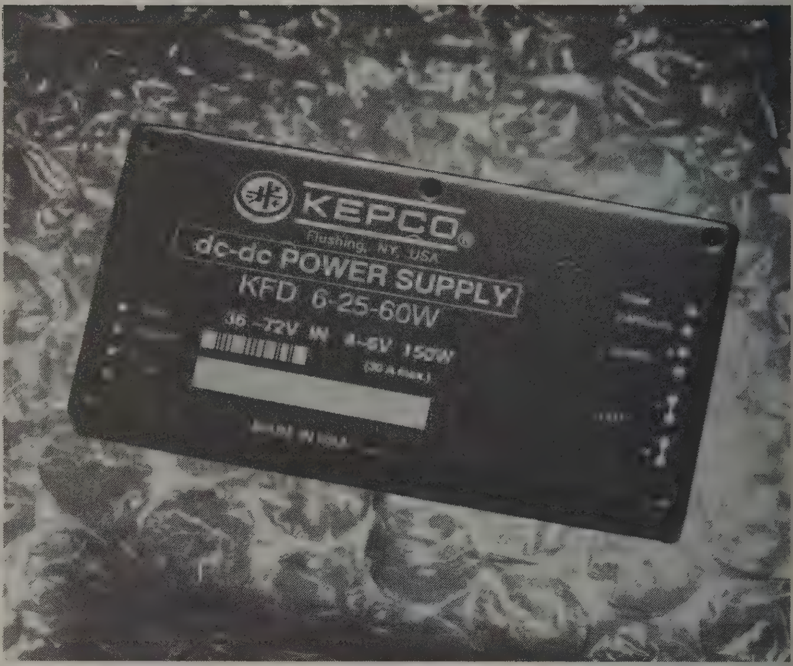
HIGH DENSITY d-c to d-c CONVERTERS

KFD™

KFD are high density dc-dc converters delivering 100~150 watts. Three outputs are offered: 5~6V, 15V, and 24V from either an 18-36V input or a 36-72V input. KFD are designed for PCB mounting and feature a 5-sided shielded metal enclosure. KFD are ideal for distributed power applications, telecommunications and computer-based instruments.

A built-in paralleling connection allows multiple KFD modules to current-share for redundancy (N+1) configurations.

Features:
- **Paralleling terminals** for redundant operation.
- **Remote on/off logic control.**
- **High efficiency (typ 80%).**
- **Overvoltage Clamp.**
- **Remote sense.**
- **Current Limit (CC type).**
- **Full input to output isolation.**



Model KFD 6-25-60W

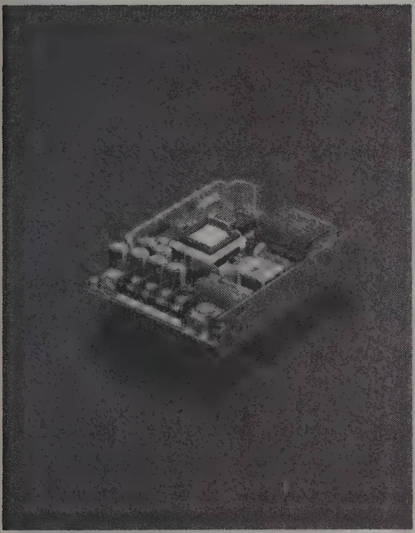
KEPCO. **THE POWER SUPPLIER™**

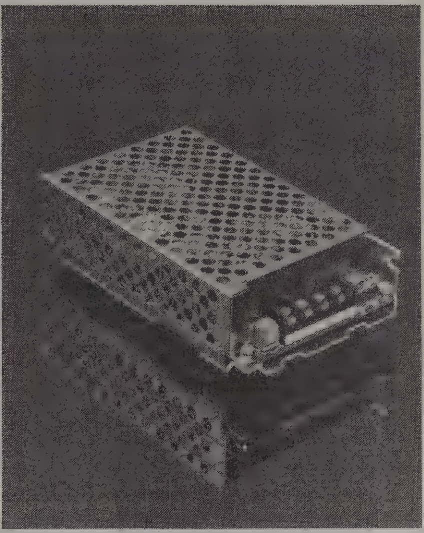
OEM a-c to d-c SLIM SWITCHING MODULES

Very compact switching power supplies featuring surface mount construction, 1-inch thin.

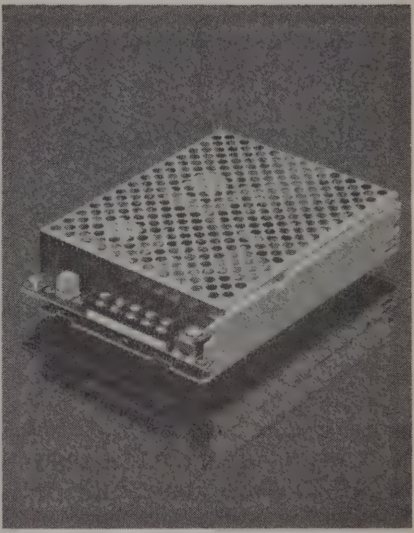
NORTH AMERICAN SERIES FAK™ 85-132V a-c input



15W Model FAK 5-3K
(optional enclosure CA-21)



25W Model FAK 5-5K
(shown with optional enclosure CA-22)



50W Model FAK 5-10K
(shown with optional enclosure CA-23)

These modern single output switchers employ advanced surface mount technology to achieve small size and very low profile, to fit where space is at a premium. They are designed to the standards of UL and CSA. Input is 85~132V a-c; outputs are 5V, 12V, 15V, and 24V d-c. The 15 and 25 Watt models employ flyback topology; the 50 Watt models are forward converters.

Features:

- **Power-OK LED:** green.
- **a-c input 85-132V; d-c input 110-170V.**
- **FET-based high frequency operation** (up to 250 KHz) for high efficiency.
- **Soft-start circuit:** Limits a-c turn-on surge.
- **Adjustable voltage:** Internal trimmer accessible through the case allows manual adjustment of the voltage setting.
- **Holding time:** 30 milliseconds typically, 20 milliseconds minimum.
- **Built-in EMI filter** attenuates conducted noise below the requirements of FCC 20780, for Class B computing devices. Optional perforated metal covers attenuate radiated noise and provide protection.
- **Safety:** UL recognized. CSA certified.
- **Optional Steel Enclosures:** CA 21, CA 22, CA 23.
- **Produced in** ISO 9001 certified facility.

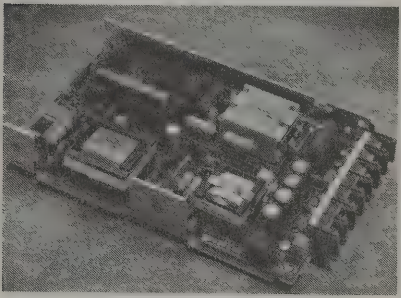
KEPCO® **THE POWER SUPPLIER™**

OEM a-c to d-c SLIM SWITCHING MODULES

Very compact switching power supplies featuring surface mount construction, 1-inch thin.

INTERNATIONAL SERIES FAW™

Wide Range 85-264V a-c input



50W Model FAW 12-4.2K

These modern single output switchers employ advanced surface mount technology to achieve small size and very low profile, to fit where space is at a premium. They are designed to the standards of UL, CSA and TÜV Rheinland. Input is 85~264V a-c; outputs are 5V, 12V, 15V, and 24V d-c. The 100 and 150 Watt groups feature 28V and 48V output models. The 15 and 25 Watt models employ flyback topology; the 50, 100 and 150 Watt models are forward converters.

Features:

- **Power-OK LED:** green.
- **Power-OK logic:** open collector.
- **a-c input:** 85-264V a-c; **d-c input:** 105-370V d-c.
- **Operating frequency:** 120-130KHz.
- **Soft-start circuit:** limits a-c turn on surge.
- **Adjustable voltage:** internal trimmer.
- **Holding time:** output is sustained by internally stored energy for 20ms typical 15ms minimum.
- **Built in EMI filter:** attenuates the conducted noise below the requirements of both FCC 20780 and VDE 0871 for Class B computing devices. Optional perforated metal covers attenuate radiated noise and provide protection.
- **Safety:** All models recognized by UL 478 (4,5); UL 1950. Certified by CSA 1402 level 3. Approved by TÜV Rheinland IEC 380 & 950, VDE 0806, EN 60 950. Also certified to meet the MIL STD 810D environment.
- **Connections:** input and output screw terminal barrier strip.
- **Remote error sensing:** the 50W, 100W & 150W FAW provide separate remote error sense terminals: 0.25V drop/wire.
- **Optional Steel Enclosures:** CA 24, CA 25, CA 26, CA 27 and CA 28.
- **Produced in** ISO 9001 certified facility.

KRW/MRW™

90-264V a-c
130-370V d-c

Series MRW and KRW are triple output card-style power supplies producing 35-65 Watts. Produced in ISO-9001-certified facilities, they're fully approved by TUV/UL/CSA to the IEC 950 specification and are fitted with Class B EMI filters. A wide-range a-c input accepts any voltage from 90-264V a-c. Optional enclosures are available.

Features:

- **90-264V a-c wide-range input, 130-370V d-c input.**
- **Built-in FCC 20780 Class B EMI filter.**
- **Approved by TUV/UL/CSA to IEC 950.**
- **Optional enclosures.**
- **Produced in ISO 9001 certified facility.**

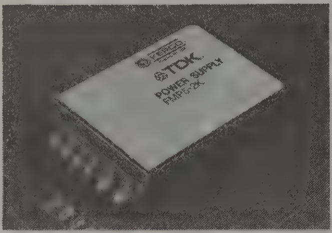
OEM a-c to d-c SLIM SWITCHING MODULES

FMP™

115V a-c input
110-170V d-c input

SINGLE OUTPUT LOW PROFILE PLASTIC ENCASED SWITCHING POWER SUPPLIES



10W model shown
Model FMP 5-2K

These are plastic encased 3- and 10-Watt single output a-c to d-c flyback voltage stabilizers, producing 5V, 12V, 15V, or 24V.

Features:

- **± 10% voltage adjustment.**
- **Voltage limited** by zener diode across output.
- **Rectangular current limiting** so you can drive nonlinear loads.
- **Low profile:** Only ¾″ thick.
  Produced in ISO 9001 certified facility.

DUAL OUTPUT LOW PROFILE PLASTIC ENCASED SWITCHING POWER SUPPLIES

These are plastic encased 3- and 10-Watt flyback a-c to d-c switchers producing a dual output (± 12V or ± 15V).

Features:

- **Principal (*plus*) output adjustable ± 10%;** auxiliary (*minus*) tracks it with an accuracy of ± 2% using a 3-terminal (linear) regulator.
- **Rectangular current limiting on both outputs.**
- **Low profile:** Only ¾″ thick.
- **Produced in** ISO 9001 certified facility.

ECM™

115V a-c input
110-170V d-c input

TRIPLE OUTPUT L-CHASSIS SWITCHING POWER SUPPLIES

These are triple output, 16 Watt metal enclosed switching power supplies featuring simplicity and high reliability.

Features:

- **Adjustable voltage:** (+5V) set by internal trimmer.
- **Auxiliary outputs:** (± 12V or ± 15V) use 3-terminal stabilizer.
- **Metal enclosure** reduces the radiated noise and provides protection.
- **Produced in** ISO 9001 certified facility.

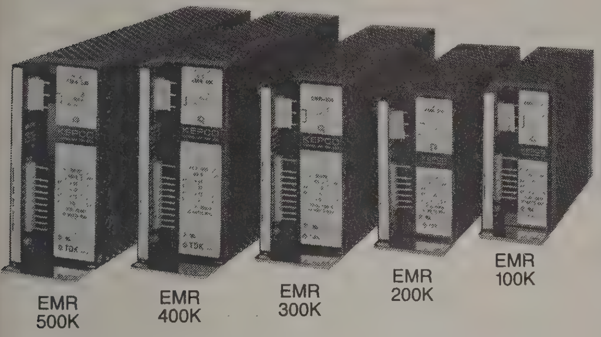
EMR™ THREE AND FOUR OUTPUT

115/230V a-c input



These fully enclosed multi-output power supplies are intended for industrial grade applications when low cost open frame units just won't do. Their built-in EMI filter meets FCC Class B, conducted EMI specifications. Molex input-output connectors allow easy installation. Connector cable kits available. Produced in ISO 9001 certified facility.

KEPCO. **THE POWER SUPPLIER™**

OEM a-c to d-c SWITCHING MODULES

ERX™ 115/230V a-c input

WORLD POWER™ SINGLE OUTPUT

For the demanding requirements of OEM instrument makers, these are affordable low cost switching power supplies built on an open frame L-chassis, with optional perforated metal enclosures. Input and output is via Molex pin headers for easy installation (except for the 240 Watt models which use a barrier strip for their high current output). The built-in EMI filter meets the conducted EMI attenuation limits of FCC Class B. The use of custom hybrid microcircuits reduces parts count and contributes to high reliability. Connector cable kits available.
Produced in ISO 9001 certified facility.

KEPCO® THE POWER SUPPLIER™

KEPCO CUSTOM SYSTEM POWER ASSEMBLIES

You design them... Kepco builds them for you.

These are combinations of Kepco power supplies and accessories, custom-designed by you and your Kepco sales engineer, expertly wired, ready for your rack — at surprisingly low cost.

Our expert engineers will work with you to layout a custom assembly to your specifications choosing from power modules that span 3 Watts to 1500 Watts, 2 Volts to 48 Volts — a-c and d-c inputs.

Call your Kepco Sales Engineer to help you meet your Custom Power Assembly needs.

Consult factory for special requirements.

KEPCO® THE POWER SUPPLIER™

POWER SUPPLIES for LABORATORY, BENCH & SYSTEMS

ATE™ LINEAR PROGRAMMABLE POWER SUPPLIES FOR AUTOMATIC TEST EQUIPMENT SYSTEMS.

FEATURING:

- Full external control over both voltage and current with automatic crossover; separate voltmeter and ammeter for continuous output monitoring. Local control through 10-turn rheostats on front panel, remote through fixed gain power amplifier scaling from an input of 10 Volts to rated voltage.
- Digital control. ATE power supplies can be controlled by any of Kepco's systems programmers including the MATE-verified TLD 488-16.
- Options: Digital or analog meters
- User selectable slow or fast mode of operation; slow mode is ideal for delivering constant voltage; in fast mode, the ATE can follow rapidly changing load voltages to deliver constant current, or follow high speed voltage or current programming.
- Two built-in, uncommitted amplifiers for scaling, summing, or other manipulation of programming signals. Both voltage and current control channels have full zeroing and calibration facilities for compatibility with Kepco's digital interfaces.
- Programmable/ tracking overvoltage protection.
- For optional digital meters, substitute suffix "DM" in the model number, eg. ATE 6-5 DM.

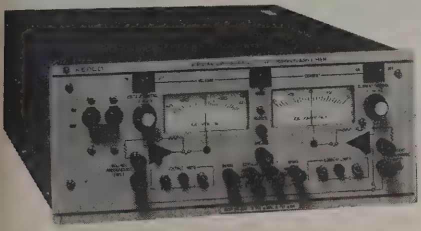
KEPCO. **THE POWER SUPPLIER™**

BIPOLAR POWER SUPPLIES for LABORATORY & SYSTEMS

BOP™ 4-QUADRANT VOLTAGE/CURRENT STABILIZERS



These are four-quadrant bipolar power supplies that can be controlled (programmed) linearly from positive to negative output. They may be programmed as a voltage source with current limiting, or as a current source with voltage limiting. Their wide bandwidth encompasses nearly all of the audio spectrum for use as a powerful amplifier, or as a driver of complex waveforms for ATE operations. The BOPs are able to sink power when driving dynamic loads. IEEE-488 programming is possible with the optional internal BIT cards (see below), or with one of the Kepco programmers.

BOP are high speed power operational amplifiers that can be used to provide dynamically agile voltage for test and simulation. They are *not* general purpose power supplies. By the nature of bipolar high speed power, they do not have any energy-storage, noise discriminating output capacitors. As a consequence, they will work best into mainly resistive loads. A provision is made to slow down operation as a current source to enable BOP to drive inductive loads. If your load is capacitive, (>0.1 microfarad), please consult the factory for the necessary precautions.

KEPCO. **THE POWER SUPPLIER™**

POWER SUPPLIES for LABORATORY & SYSTEMS

JQE™ 115/230V a-c input

GENERAL PURPOSE VOLTAGE STABILIZERS

Systems-type, voltage stabilizers with current limiting, programmable from the IEEE bus using Kepco digital interfaces. JQE's voltage control channel has an I-C front end for maximum stability and minimum offset. The rated power is delivered under the realistic thermal environs of a system's cabinet with no derating. The 10-turn voltage control is standard. For units requiring overvoltage protection and/or high speed programming, see the ATE group.

(1)External current sensing, using the *voltage* amplifier. Effects are measured for a 1-volt current sensing voltage drop.

(2)Whichever is greater.

(3)Typical temperature effect coefficients are: 0.005% per °C voltage mode; 0.01% per °C externally sensed current mode.

(4)One terminal grounded or connected so that the common-mode current does not flow through the load or (in current-mode) through a sensing resistor.

(5)20 Hz to 10 MHz.

For complete specifications send for Kepco Power Supply Catalog 146-1811. Data and specifications subject to change without notice.

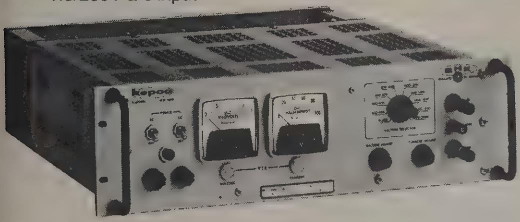
This KEPCO product is backed by a firm **5-YEAR WARRANTY**

BHK™

200 WATT AUTOMATIC CROSSOVER, CONVENTIONAL AND HIGH SPEED

115/230V a-c input



Models BHK 500-0.4M and BHK 1000-0.2M are programmable from the IEEE-488 bus using one of the stand-alone Kepco digital interfaces. For control of the 2000V model please consult the factory. The BHK are arranged in an automatic crossover configuration for control of both voltage and current. Provision is made for disconnecting the output capacitor for high speed programming.

200 WATT MODELS

MODEL	VOLTS	AMPS
BHK 500-0.4M	0-500	0-0.4
BHK 1000-0.2M	0-1000	0-0.2
BHK 2000-0.1M	0-2000	0-0.1

CONTROL/PROGRAMMING:
Output voltage is controlled from the panel by a combination of a 10-position decade switch and a 10-turn vernier control. This arrangement provides 0.005% resolution yet does not inhibit the ability to sweep program a BHK linearly through its entire range. External control can be exercised by a resistance (1000 ohms per volt) or by a control voltage, delivering 0 to +1 milliampere into the summing junction with respect to the plus (+) output/sense terminal. External signals can be substituted for, or summed with, the internal reference for additional control. BHK can be strapped for either conventional speed operation or for fast programming. In fast mode the output can be controlled at 0.5V per microsecond.

DIMENSIONS: 5 7/32"H x 19"W x 15 5/16"D (behind panel) **NET WEIGHT:** 38 lbs.

KEPCO® **THE POWER SUPPLIER™**

BIPOLAR POWER SUPPLIES for LABORATORY & SYSTEMS

HIGH VOLTAGE MODELS

FOUR-QUADRANT VOLTAGE/CURRENT STABILIZERS

BOP-HV™

These high voltage power supplies share the bipolar and source/sink capabilities of the lower voltage BOP. Their outputs can be made to vary smoothly and linearly through their entire rated plus and minus ranges, passing linearly through zero. They can source as well as sink 100% of their current rating at any voltage setting. BOP-HV models are bounded in all four quadrants by four fully adjustable, programmable boundary limits, and are digitally programmable with any of the Kepco SN series systems programmers.

KEPCO® THE POWER SUPPLIER™

BENCH OR RACK MOUNT TYPE POWER SUPPLIES

These keyboard-controlled Power Managers provide 75 Watts of well-behaved d-c power in four ranges from 0-12.5V to 0-125V. *Conventional control knobs are not to be found!*

DPS™

DPS is controlled by a convenient front panel keypad that commands a built-in microprocessor to set voltage, current limit, range, OVP, displays and over-current protection.
Remote talk-listen control is exercised via a simple RS 232C connection that may be addressed in BASIC or most common languages.
Keypad SLEW controls permit continuous adjustment of the voltage up and down for fine adjustment while the output is enabled.
Separate large-character LED displays are provided for both voltage and current.

Features:

- **Automatic low-range relay** allows higher current at low voltage.
- **Digital keypad** offers easy and precise setup.
- **Keypad SLEW control** for simple incrementing.
- **Three (volatile) memory locations** store configurations.
- **Programmed active pulldown circuit** for fast SLEW from full voltage to zero.
- **Serial interface RS 232C** can drive up to 31 instruments.
- **Full voltage and current readback through RS 232C.**

KEPCO. **THE POWER SUPPLIER™**

DIGITAL POWER SUPPLIES FOR THE BENCH

MBT™

Series MBT offers the control features needed for today's automatic test supplies as well as the versatility required of a benchtop instrument. They use fully linear series-pass stabilizers for low output noise and good stability. Control is by a panel mounted keyboard or rotary optical encoders for the traditional "feel" of control knobs. Remote input includes the IEEE-1118 2-wire serial bus for long range control. Option "G" adds an internal single board computer to support IEEE-488-2 (SCPI and CIIL) and RS 232C buses. MBT may be used to transmit commands to associated power supplies in the MAT and MST families. Optional relays are available for output isolation and polarity reversal.

Features:

- **Full control** over both voltage and current with automatic crossover 12 bits resolution each.
- **Control inputs:** panel keypad, control knobs or from one of three built-in communication buses.
- **Full talk-listen capability** via GPIB (IEEE 488-2) Kepco serial bus (IEEE-1118) or RS 232C.
- **Panel LCD screen** for menu-driven command structure and read back.
- **Calibration and self test routines built-in.**
- **Optional enable and polarity reversal relay.**
- **Tracking overvoltage protection** with SCR crowbar trigger.
- **No derating** any output setting, any load.
- **Selectable 115V a-c/230V a-c mains.**

For rack mounting in a standard 19" rack, use RA-37

KEPCO® THE POWER SUPPLIER™

BENCH TYPE AND RACK MOUNTABLE POWER SUPPLIES

MSK™ SINGLE OUTPUT

Model
MSK 10-10M

Powerful linear power supplies with unique "preview" feature

This new series gives you a selection of five models, offering 100 Watts of clean, stable benchtop power. The Kepco Series MSK features front panel 10-turn precision controls for voltage and current, with automatic crossover between modes. A pair of LED mode indicators (green for voltage mode, amber for current), two 3½ digit meters and heavy duty output binding posts for easy connection to your breadboards, are also on the front panel.

The preview switch (d-c on-off) allows you to pre-set voltage and current with the digital meters displaying the set values. At "d-c off", no voltage is applied to the output terminals and no load current needs to be drawn to set the current control. At "d-c on", the set voltage is applied to the output terminals. The appropriate mode indicator is lit, and the meters indicate *actual* voltage and current.

Series MSK power supplies use fully dissipative, high gain linear (series pass) stabilizer circuits, for low noise output, good stability, and accurate resettability. A built-in quiet, low-speed fan ensures good cooling in the crowded environment of your laboratory.

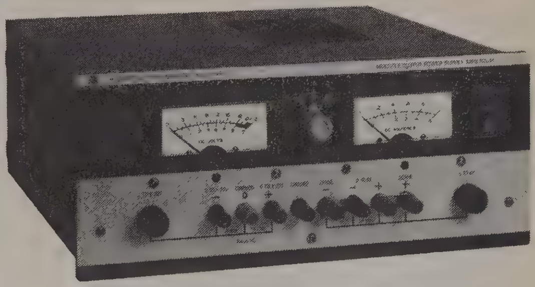
MPS 620M™ MULTIPLE OUTPUT



This power supply has been specifically designed to meet the needs of the IC/microprocessor experimenter.

The MPS 620M is actually two linear (series pass) power supplies in one: The first has a single 0-6V, 0-5A output for digital work; the second has two *tracked* outputs, 0 to +20V and 0 to −20V, both rated at 0-1Amp. The two power supplies are completely isolated from each other, sharing only the front panel meters and the chassis.

The 0-6V output is continuously adjustable with a 10-turn control on the front panel, and is backed up by a current limiter and overvoltage crowbar. The crowbar is set by a locking-type screwdriver adjustment. The fixed rectangular current limit circuit is set to approximately 110% of maximum current. The dual 0 to ±20V outputs are continuously adjustable by a single 10-turn front panel control, and tracking is better than ±1% +10mV. The outputs can be used in series to provide 0-40V, but since they share a common (center) terminal, they cannot be used in parallel. Both outputs are equipped with adjustable current limits.

70 WATT MODEL

OUTPUT	VOLTS	AMPS
Output #1	0 to 6	0-5
Output #2	0 to +20	0-1
Output #3	0 to −20	0-1

Outputs 2 and 3 are tracked.
Output 1 is protected by an overvoltage crowbar.

DIMENSIONS: 5⁷⁄₃₂"H x 12¹⁷⁄₃₂"W x 12⅞"D **NET WEIGHT:** 29 lbs.

STATIC SPECIFICATIONS

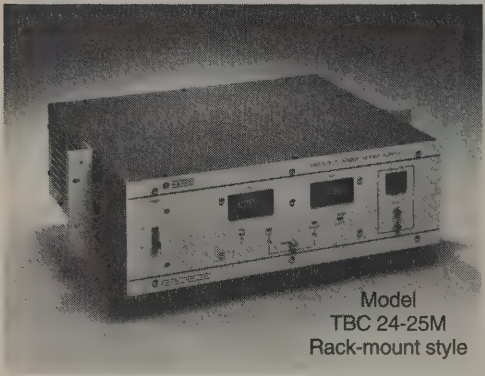
KEPCO® THE POWER SUPPLIER™

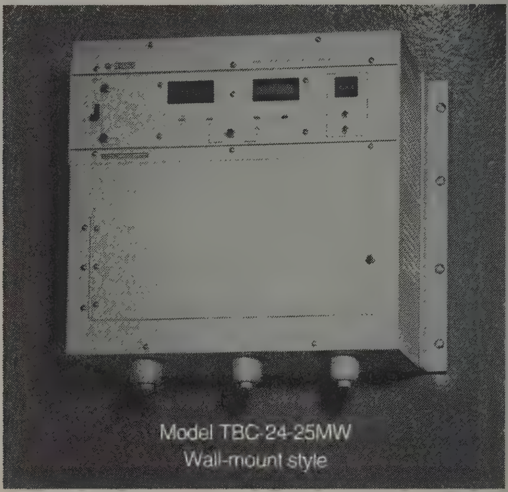
TELECOMMUNICATIONS BATTERY CHARGERS AND BURN-IN POWER SUPPLIES

SINGLE PHASE • 12A TO 120A • 300 TO 3000 WATTS

TBC™



Model
TBC 24-25M
Rack-mount style



Model TBC-24-25MW
Wall-mount style

Kepco's TBC are designed for float-equalize service to maintain battery arrays such as are found in many telecommunication installations. The TBC are fully filtered and stabilized battery eliminators that also find application as burn-in power supplies. The float and equalize settings are fully independent adjustments whose settings are made by screwdriver access through small sliding doors in the front panel. The digital voltmeter allows precise adjustment. A digital ammeter displays the charging current or output current.

If the current drops to zero – either because the ac mains power to the TBC is lost, the front panel circuit breaker is turned off or the voltage setting is adjusted below the battery's voltage, a "charging stopped" LED is illuminated and a flag signal is provided.

Equalize mode can be selected either with a front panel push button – or a remote contact closure. This sets the voltage to the equalize level (adjustable). A timer is activated that will reset back to float mode after a period of time (0.1 to 99.9 hrs) that can be set from the front panel with a thumbwheel selector. A flag signal is produced when the TBC is in equalize mode.

Kepco's TBC employ high frequency switching technology (100-150 KHz forward converters) for high efficiency, small size and light weight. The output is filtered so that residual voice band noise (on battery) is below 22dB rnC.

KEPCO® **THE POWER SUPPLIER**™

DIGITALLY CONTROLLED POWER SUPPLIES

Three 360 Watt MAT modules shown in RA 50 Housing

TMA/MAT™

Kepco's MAT are digital systems power supplies offering 360W, 720W and 1080 Watts of linearly-stabilized power for low noise high precision applications. Control is by a 2-wire serial bus conforming to IEEE-1118 which can control up to 27 MAT modules over a 900' span. MAT will also interface with Kepco's MBT power supply and can be intermixed with the 200 Watt MST units. IEEE-488 control can be implemented using either a stand-alone IEEE-488 to IEEE-1118 converter (Kepco TMA 488-27)or using either an MBT's IEEE-488 interface (or its keyboard) or the MST's IEEE-488 interface. In all instances, a full talk-listen interchange is implemented. The Kepco model TMA PC-27 is a plug-in card for PC's that will directly drive the IEEE-1118 bus for control of up to 27 MAT modules.

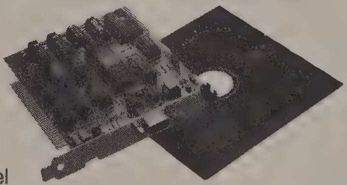
Features:

- **Full talk-listen control.**
- **360 and 720 Watt models** plug-in to enable installation and replacement from the front.
- **Isolation and polarity reversal relays built-in.**
- **Linear design** for low noise fast response.
- **12 bit resolution voltage and current.**
- **LCD metering**, voltage and current.
- **Available, to order without the digital control and without relays** for remote analog control by resistance.

This KEPCO product is backed by a firm **5-YEAR WARRANTY**

Use a PC to directly control Kepco's type MAT Power Supplies -without IEEE-488.

TMA PC-27 PLUG-IN CARD FOR YOUR PC



Software emulator of Kepco's model TMA 488-27. Where TMA 488-27 converts an IEEE-488 bus into the bit-bus to talk with Kepco's MAT, MBT and MST power modules, the new model, TMA PC-27, communicates directly from your PC to the MAT power modules. TMA PC-27 comprises a board that will fit into your PC or PC-AT or compatible computer. With the provided software, it allows your computer to emulate the whole TMA function. Your PC will communicate directly with up to 27 MAT power supplies providing all control and communication functions without requiring an IEEE-488 (GPIB) card.

360 WATT MODULES – 1/3 RACK

KEPCO® **THE POWER SUPPLIER™**

200W DIGITALLY PROGRAMMABLE PLUG-IN POWER SUPPLIES

MST™

Kepco's MST employ switching technology for high efficiency and high power density combined with linear stabilization techniques for accuracy and resolution. The switching front end is an advanced current mode controller with power factor correction. A power factor of better than 0.998 ensures that the MST meets IEC 555-2. A wide range a-c input accepts any mains voltage from 90 to 264V a-c.

MST are packaged in a 7" high 1/9th rack-width plug-in module that mounts in a special housing called RA-55. MST modules plug-in from the front and may be unplugged and removed without shutting down the entire power system. N+1 redundancy is provided with forced current sharing when like modules are mounted together and wired in parallel.

Each unit is totally self-contained with its own power factor controlled input and cooling system. Individual models may therefore be operated independently on the bench. (Cable kits available).

Features:
- **200W, 1/9 rack plug-in design.**
- **Power factor correction.**
- **Wide range a-c input.**
- **Programmable** SCPI & CIIL, 2-wire bus, IEEE-1118, VXI, IEEE-488-2, RS232C.

KEPCO® DIGITAL PROGRAMMING INTERFACES

This KEPCO product is backed by a firm 5-YEAR WARRANTY

SNR 488™

CARD-CAGE STYLE DIGITAL PROGRAMMERS FOR MULTIPLE UNIT SYSTEMS

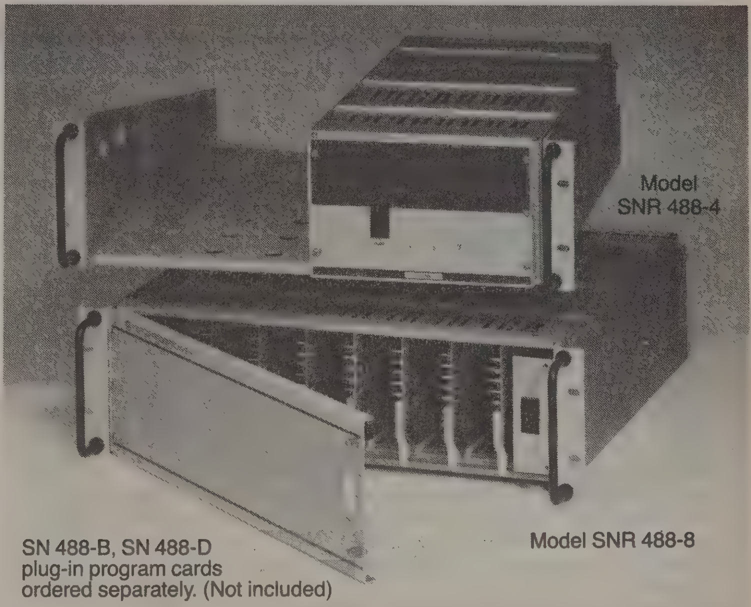
The SNR 488 system provides a card cage for plugging in dual channel program cards SN 488-B and/or SN 488-D.

Other provisions include:

IEEE-488 connector
Address select switch
Handshake card
Manual keyboard input connector
Local bus distribution to the card sockets

Each program card controls one Power Supply, and is isolated from the others in the card cage.

Two models of the SNR 488 card cages are available:
SNR 488-4 with space for four program cards, plus space for two ¼-rack or one ½-rack Power Supplies.
SNR 488-8 with space for eight program cards.



Model SNR 488-8

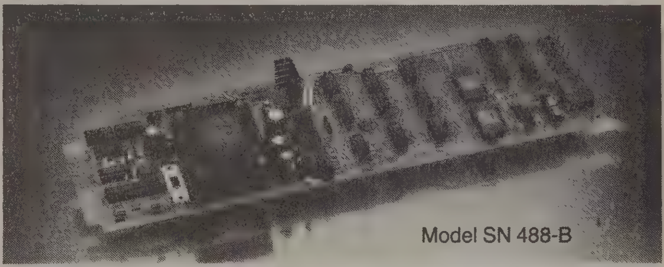
SN 488-B, SN 488-D plug-in program cards ordered separately. (Not included)

SNR 488 GENERAL SPECIFICATIONS

	SNR 488-4	SNR 488-8
a-c voltage	105-125/210-250, 50-440 Hz.	
Power	≈ 6VA	
Dimensions (behind panel)	(inches) $5\frac{7}{32}$H × 19W × $17\frac{13}{16}$D (mm) 132.6H × 482.6W × 452.4D	
Weight (packed for shipment)	17 lbs. 7.7 Kg.	23 lbs. 10.5Kg.
Color	Two-tone black & gray Fed. Std. 26440	Gray Fed. Std. 26440
Mounting	19″ rack (mounting "ears" supplied)	

SN 488-B plug-in program cards for SNR 488-4 and SNR 488-8, in 12 bit binary format.

SN 488-D plug-in program cards for SNR 488-4 and SNR 488-8, in 3 digit BCD.



Model SN 488-B

SN cards can control two functions of any power supply in the following groups: ATE, BOP,(1) BOP-HV, JQE,(2) PTR, PAT, CC,(3) PCX-MAT,(2) BHK,(4) OPS IX,(4) and NTC.

RESOLUTION: 3 digit BCD (decimal) is 1 part in 999 (0.1%). 12 bit binary (hexadecimal) is 1 part in 4095 (0.024%).

DATA FORM: N = C AAA BBB (9 ASCII encoded characters). To "talk" to a power supply you should transmit a nine character set of the form:

N = C AAA BBB

N is the address of the particular program card to which you wish to "talk" (there are eight possible addresses from 0 to 7).

"=" is the ASCII character that separates the card address from data.

C is control character: 0, 1, 2,..., F (see Truth Table in Manual).

AAA is data as a percent of full scale (Channel A)

BBB is data as a percent of full scale (Channel B)

Note: The maximum output of the binary models is FFF (Hex). The maximum output of the BCD models is 999. In both instances "maximum" corresponds to an analog programming voltage of ± 10V or ± 1V (depending on the range and polarity selected).

SN 488-B & SN 488-D GENERAL SPECIFICATIONS

SPECIFICATIONS		MODEL SN 488-B	SN 488-D
INPUT DATA FORMAT		Hexidecimal	Decimal
RESOLUTION		12 Bit Binary	3 Digit BCD
OUTPUT VOLTAGE	High Range	± 10V	
	Low Range	± 1V	
OUTPUT CURRENT		± 2 mA max.	
OUTPUT IMPEDANCE		<0.05 ohms	
LINEARITY ERROR 0 to +70°C		± 1/2 LSB	
TEMPERATURE COEFFICIENT	Full Scale	± 35 PPM/°C max.	
	Zero High Range	± 20μV/°C max.	
	Zero Low Range	± 10μV/°C max.	
LOGIC INPUT		TTL Compatible	
DATA TRANSFER FORMAT (ASCII CODED)		BYTE Serial BIT Parallel	
INTERFACE FUNCTIONS IMPLEMENTED		AH1, L1	
A-C INPUT	Voltage	105-125V/210-250V	
	Frequency	50-440 Hz	
	Power	≈ 7 VA	

(1) Instead of using built-in interface — when part of multiple unit installation
(2) Voltage channel only (3) Current channel only (4) 500V and 1000V models only

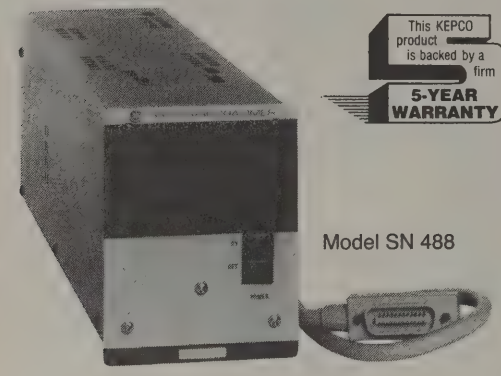
For complete specifications send for Kepco Power Supply Catalog 146-1811. Data and specifications subject to change without notice.

KEPCO®

STAND ALONE DIGITAL INTERFACES FOR SINGLE OR MULTIPLE CHANNEL OPERATION

SN 488™ For use with buses using IEEE format (byte serial, bit parallel) data transfer

SN 500™ For use with buses using bit parallel data transfer



This KEPCO product is backed by a firm **5-YEAR WARRANTY**

Model SN 488

These digital programmers are designed for use with all Kepco operationally-programmable power supplies (high speed and conventionally filtered) and/or voltage-controlled instruments. They enable you to interface your d-c power supplies with the logic bus of a computer-controlled system.

SN 488 and SN 500 are both available in decimal format (3-digit BCD), or in hexadecimal format (12-bit binary). A single channel instrument can be converted in the field to a dual channel model by plugging in auxiliary boards SN 603 or SN 612.

IEEE-488 STANDARD: The SN 488 implements the AH1 acceptor handshake and L1 listener plus listener-only functions of the IEEE-488 protocol.

PARALLEL INPUT: The SN 500 uses data buses having bit-parallel data transfer. Sixteen bits control one channel: two additional bits add a second full channel.

ISOLATION: The SN Series programmers incorporate optical isolation (up to 1000 Volts d-c), so they may be used to control floating power supplies.

CHANNELS: The SN 488 and SN 500 offer a choice of single or dual channel operation. Each channel is completely isolated from the other so that they can be used to drive independent instruments or two functions of the same instruments. SN cards can control two functions of any power supply in the following groups: ATE, BOP,(1) BOP-HV, JQE,(2) PTR, PAT, CC,(3) PCX-MAT,(2) BHK,(4) OPS IX,(4) and NTC.

POLARITY: The SN 488 and SN 500 provide a means of controlling positive or negative polarity. This feature is useful when the programmer controls a bipolar power supply such as the Kepco Series BOP.

RANGE: The SN 488 and SN 500 provide a means of controlling range over a 10:1 ratio. This is accomplished by a programmable attenuator. The "high" range provides a 0 to ±10V analog output; the "low" range provides a 0 to ±1V analog output. This multiplies small output resolution by 10:1.

RESOLUTION: 3-digit BCD (decimal) is 1 part of 999 (0.1%). 12 bit binary (hexadecimal) is 1 part in 4095 (0.024%).

(1) Instead of using built-in interface-when part of multiple unit installation
(2) Voltage channel only
(3) Current channel only
(4) 500V and 1000V models only

SN 488 & SN 500 MODEL TABLE

MODEL	NO. CHANNELS	DATA FORMAT	RESOLUTION
SN 488-121, SN 500-121	one	hexadecimal	12 bit binary
SN 488-122, SN 500-122	two (isolated)	hexadecimal	12 bit binary
SN 488-031, SN 500-031	one	decimal	3 digit BCD
SN 488-032, SN 500-032	two (isolated)	decimal	3 digit BCD
Field installable add-on channel:			
SN 612	1 added channel	hexadecimal	12 bit binary
SN 603	1 added channel	decimal	3 bit BCD
Interconnect devices for use with IEEE-488 bus.			
MODEL	TYPE		LENGTH
SNQ 488-1	Cable, printed circuit edge to IEEE- 488		1 meter
SNQ 488-2	Cable, printed circuit edge to IEEE- 488		2 meter
PC-488	Plug printed circuit edge to IEEE-488		—

Note: The SNQ cables have an IEEE-488 connector at one end and a printed circuit edge connector at the other end. Model SNQ 488-2 is supplied with each type SN 488 single/dual channel programmer (one cable services both channels). If the PC 488 adapter plug is used, a separate IEEE-488 cable should be ordered.

The SN 500 is supplied with a connector, PC 12, which may be field wired to the parallel data source.

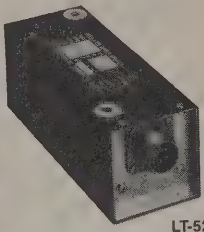
KGS ELECTRONICS DC POWER SUPPLIES
MODEL LT-SERIES SPECIFICATIONS

LT-55



LT-52A

Input Voltage:	28 VDC nominal, 20 to 40 VDC
Output Voltage:	Adjustable with external rheostat or potentiometer and most models have DC voltage control.
Regulation:	2% for line, 2% for load and 2% temperature.
Output Ripple:	50 mVpp max.
Altitude:	55,000 ft.
Protection: (Overvoltage)	Output voltage is limited to approximately 125% of rating even though remote control rheostat opens or shorts, or internal failure occurs.
Temperature:	−55°C to +71°C (sufficient cooling required at +71°C ambient)
Protection: (Overload)	Input and output current limit when overload exceeds approximately 125% or rating.

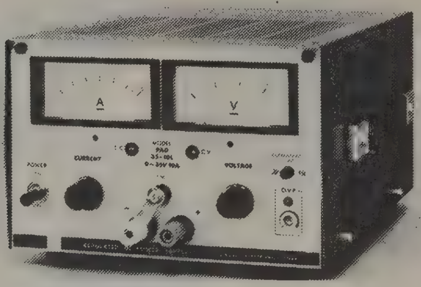
KIKUSUI INTERNATIONAL CORP.

DC POWER SUPPLIES FOR LAB SYSEMS & BENCH USE GP-IB

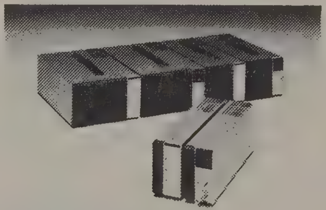


GENERAL-PURPOSE DC POWER SUPPLIES

Linear output PAD-L Series DC CV/CC power supplies combine high reliability with excellent line and load regulation. They're ideal for variable power sources in R&D, manufacturing burn-in and systems use.

- ☐ Low noise, linear output
- ☐ 0.005% line and load regulation
- ☐ IEEE-488, analog or resistive programmable
- ☐ Input choke circuitry for high efficiency and reduced line distortion
- ☐ Excellent temperature coefficient
- ☐ Options include preset voltage selector (manual or scan), soft start, and digital readouts

MODEL	DESCRIPTION
PAD 16-XXXL	0-16V @ 0-10, 18, 30, 50, 100, 200 or 500A
PAD 35-XXXL	0-35V @ 0-5, 10, 20, 30, 50, 100, 200 or 300A
PAD 55-XXXL	0-55V @ 0-3, 6, 10, 20, 35, 60, or 120A
PAD 70-XXL	0-70V @ 0-2.5, 5, 8, or 15A
PAD 110-XXL	0-110V @ 0-1.5, 3, 5, 10, 20 30, or 60A
PAD 160-XL	0-160 @ 0-1, 2, 3.5, or 7A
PAD 250-XXL	0-250V @ 0-2.5, 4.5, 8,or 15 amps
PAD 500-2L	0-500V @ 0-2A
PAD 600-1.5L	0-600V @ 0-1.5A

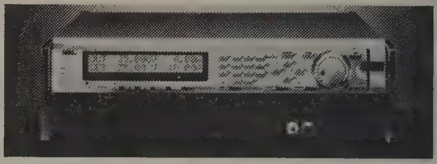


BURN - IN DC SWITCHERS

Light weight, high efficiency PAK-A Series DC CV/CC switching supplies have digital meters and are analog or resistive programmable.

- ☐ Constant voltage and constant current
- ☐ Compact package size
- ☐ IEEE-488, analog or resistive programmable

MODEL	DESCRIPTION
PAK 6-XXXA	0-6V @ 0-60, 120, or 160A
PAK 10-XXXA	0-10V @ 0-35, 70, or 100A
PAK 20-XXA	0-20V @ 0-18, 36, or 50A
PAK 20-XXA	0-35V @ 0-10, 20, or 30A
PAK 60-XXA	0-60V @ 0-6, 12, or 18A



PROGRAMMABLE DC POWER SUPPLIES

PAX Series programmable DC CV/CC power supplies feature fast rise times, low noise, and tight regulation.

- ☐ Fast response time — <50 µsec
- ☐ Program complex waveforms using the sequence mode
- ☐ Low Noise — <3mV P-P
- ☐ Optional plug-in GPIB or RS-232C interface cards for full control, plus read back of measured output readings

MODEL	DESCRIPTION
PAX 16-XX	0-16V @ 0-20, 40, or 60A
PAX 35-XX	0-35V @ 0-10, 20, or 30A

BIPOLAR POWER SUPPLIES

PBX Series programmable four quadrant power supplies can sequence multiple commands to output complex waveforms and can be used as programmable amplifiers.

- ☐ True four quadrant power supply
- ☐ Fast rise and fall times — <50µsec
- ☐ Low noise — <10mV P-P
- ☐ Optional plug-in GPIB or RS-232C interface cards for full control, plus read back of measured output readings

MODEL	DESCRIPTION
PBX 20-XX	0-±20V @ 0-±5, 10, or 20A
PBX 40-XX	0-±40V @ 0-±2.5, 5, or 10A

BENCH AND DUAL-TRACKING DC POWER SUPPLIES

PAB Series bench supplies are compact, economical units with excellent resolution, dual controls, and an output on/off switch.

With analog meters . . .

MODEL	DESCRIPTION
PAB 8-5	0-8V @ 0-5A
PAB 18-X.X	0-18V @ 0-1, 1.8, 3, or 5.5A
PAB 32-X.X	0-32V @ 0-0.5, 1.2, 2, or 3A
PAB 70-1	0-70V @ 0-1A
PAB 160-0.4	0-260V @ 0-0.4A
PAB 350-0.2	0-350V @ 0-0.2A

With digital meters . . .

MODEL	DESCRIPTION
PAB 18-X.XA	0-18V @ 0-1, or 1.8A
PAB 32-XA	0-32V @ 0-1.2, or 2A
PAB 70-1A	0-70V @ 0-1A
PAB 110-0.6A	0-260V @ 0-0.6A
PAB 250-0.25A	0-250V @ 0-0.25A
PAB 350-0.1A	0-350V @ 0-0.1A

PAB DU/TR Series provides independent ± output or dual tracking.

- ☐ Dual and triple output versions
- ☐ Linear output
- ☐ High reliability

MODEL	DESCRIPTION
PAB 18-2.5DU	Dual output; 0-±18V @ 0-+2.5A
PAB 32-1.5DU	Dual output; 0-±32V @ 0-+1.5A
PAB 25-1TR	Triple output; 0-±25V @ 0-+1A; 0-6VB, 0-5A

AC POWER SUPPLIES & DC ELECTRONIC LOADS FOR LAB SYSTEMS & BENCH USE.

ELECTRONIC AC POWER SOURCES

PCR-L Series single-phase or 3 phase sources deliver both AC and DC output with DC offset and FFT data output. All functions can be programmed and measured via the remote controller and optional GPIB or RS-232C interfaces.

- ☐ AC, DC, or AC/DC output capability
- ☐ Dual-range output voltage — 1-150VAC (0-212VDC) and 0-300VAC (0-424VDC)
- ☐ FFT data output
- ☐ Sequence mode generates complex waveforms
- ☐ Simulates brown outs, surges and spikes
- ☐ Peak current is four times RMS
- ☐ Programmable output impedance

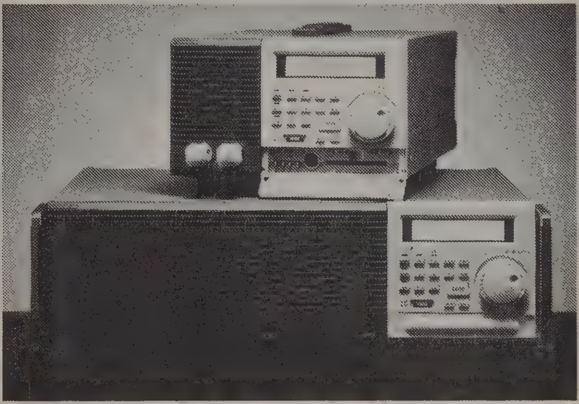
MODEL	DESCRIPTION
PCR 500L	0-150/0-300VAC; 500VA 0-212/0-424VDC; 250W
PCR 1000L	0-150/0-300VAC; 1000VA 0-212/0-424VDC; 500W
PCR 2000L	0-150/0-300VAC; 2000VA 0-212/0-424VDC; 1000W
PCR 4000L	0-150/0-300VAC; 4000VA 0-212/0-424VDC; 2000W
PCR 6000L	0-150/0-300VAC; 6000VA 0-212/0-424VDC; 3000W

PROGRAMMABLE LINEAR AC POWER SOURCES

PCR Series electronic sources accurately simulate power interruptions, power outages, voltage spikes, brownouts and surges.

- ☐ Linear, fully isolated output
- ☐ Single- or 3-phase operation
- ☐ Frequency from 5Hz to 500Hz
- ☐ Choice of control options and plug-in talk/listen GPIB interface card

MODEL	DESCRIPTION
PCR 500	0-140/0-280VAC; 500VA
PCR 1000	0-140/0-280VAC; 1000VA
PCR 2000	0-140/0-280VAC; 200VA
PCR 4000	0-140/0-280VAC; 400VA



HIGH PERFORMANCE SYSTEM OR BENCH ELECTRONIC DC LOADS

PLZ-3W Series is the closest thing yet to a real-world load. These high-speed electronic loads provide a wide operating voltage range (0.3-120VDC) and slew rates up to 4 A/µsec.

- ☐ Four operating modes — constant current, resistance, voltage and power
- ☐ Sequence mode acts as a 10-bit arbitrary waveform generator
- ☐ All functions can be programmed and measured values read back from the front panel or optional plug-in GPIB or RS-232C interfaces

MODEL	DESCRIPTION
PLZ 153W	1.5-120v, 0-30A, 150W
PLZ 303W	1.5-120v, 0-60A, 300W
PLZ 603W	1.5-120v, 0-120A, 600W
PLZ 1003W	1.5-120v, 0-200A, 1000W

Economical bench-top PLZ Series DC electronic loads for power' supply, battery and capacitor discharge testing.

- ☐ Digital meters
- ☐ Remote analog or resistive programmable
- ☐ Choices include the only full power to 0V load on the market (PLZ 152WA)

MODEL	DESCRIPTION
PLZ 72W	4-110V, 0-12A, 70W
PLZ 152W	4-110V, 0-30A, 150W
PLZ 152WA	0-110V, 0-30A, 150-W

Low-cost PLZ-WU Series burn-in or system DC electronic loads are remote analog or resistive programmable. (No meters.)

- ☐ Ideal for burn-in applications

MODEL	DESCRIPTION
PLZ 50WU	2-60V, 0-10A, 50W
PLZ 150WU	2-60V, 0-10A, 150W
PLZ 300WU	2-60V, 0-10A, 300W

For manufacturer's sales offices, see yellow pages. Also see our ads under Oscilloscopes and Hi-Pot Testers. GP-IB

200 TO 1500 W

WORLD'S MOST FLEXIBLE MODULAR POWER SUPPLIES

Series 4/Omega

FEATURES

- Up to 4 Watts / in³
- Up to 10 Outputs
- Isolated & Floating Outputs
- EMI Filter Meets VDE/FCC, Class B
- Meets UL, CSA, BS, IEC & EN Specs
- Wide Range User-Adjustable Outputs
- No Pre-Loading
- Low Leakage Current
- Field-Selectable 115/230VAC

AVAILABLE OPTIONS

- Power Factor Correction Per IEC555-2
- 48VDC Input
- Input Power Fail Signal
- Global & Individual Inhibits
- Auto Current Sharing on All Outputs
- Output Good Signals
- 300VDC Back-up Input
- Side Mount I/O Connections
- In-Line I/O Connections

How to Configure Your Own Series 4/Omega Power Supply

If you cannot find a standard Series 4 Omega that fills your requirements, Configure one yourself. Here's how to do it:

Step 1) List your Voltage & Current requirements (as all the outputs are floating, polarity can be ignored).

For Example:

	Volts	Amps	Watts
Output#1	5V	25A	125
Output#2	5V	10A	50
Output#3	12V	2A	24
Output#4	12V	4A	48
Output#5	28V	5A	140
		Total Power	387W

Step 2) Combine the individual output powers to determine the total output power and select the converter to suit your requirements.

Converters

200W	
400W	X
600W (PFC)	
1500W (PFC), 1000W Main	

(In above example a 400 watt converter is required).

Step 3) Refer to the table below and select the modules required.

Module	Volts	Amps	Type	Slots
A	2-6V	60A	Std	2
B	2-6V	25A	Std	1
C	5-15V	12A	Std	1
D	12-28V	7A	Std	1
E	5-15V(×2)	6A max*	Dual	1
F	5-15V	24A	Std	2
G	12-28V	15A	Std	2
H	12-28V(×2)	3.5A max*	Dual	1
J	25-60V	10A	Std	2
L	4.5-5.5V	100A	Std	2⑥

*Total Current

Step 4) Select case style from catalog drawings:

Side Mounted Terminals	No suffix	
In-Line Terminals	"U" suffix	×

Step 5) Put Modules in descending current rating (with voltage setpoint preceding module code letter)

Example: 400U 5B 5C 28D 12/12E

Step 6) Contact the Factory for Catalog number allocation, options, or assistance.

STANDARD MODELS (Partial Listing)

200-1500 Watt, User-Configurable, Single/Multiple Output
Series 4/Omega, Wide Adjustment Range, Switchmode Supplies

Catalog No.	Max. Power Watts	Full Output Ratings @ 50°C Ambient				Case Size H×W×L (Inches)
		Nominal Volts/Amps (Adjustment Range)				
		Output #1	Output #2	Output #3	Output #4

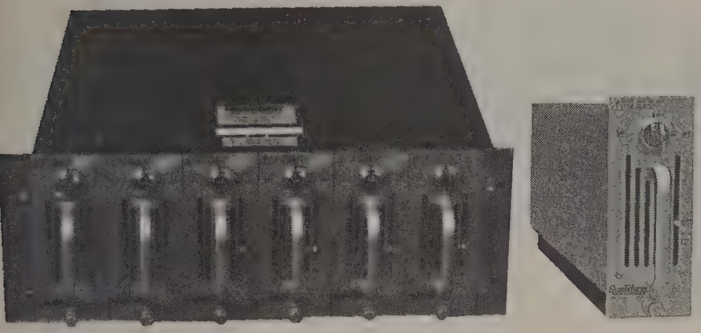
200 TO 3600 W HOT PLUG-IN POWER SUPPLIES AND POWER SYSTEMS

SERIES 4/OMEGA, PLUG-IN SUPPLIES/SYSTEMS



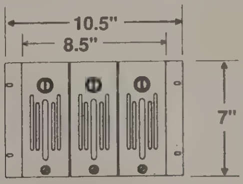
FEATURES

- Hot Plug-In/Replacement Supplies
- AC, PFC Inputs
- Zero System Down Time
- Fault Tolerant N+1 Power
- Independent DC Fan-Cooled Supplies
- Rack Mountable Enclosures
- 1 to 6 Supplies per Enclosure
- 400 to 3600 Watts per System
- 200 to 600 Watts per System
- User-Configurable System
- Meets UL, CSA, EN, BABT: BS6301 (Some Models)
- Out-Of-Tolerance Indicators and Status Signals
- Meets VDE & UL EMI, Class A
- User-Configurable Backplane with Mating Connectors
- 1 to 10 DC Outputs per Supply
- 2V to 56VDC Outputs

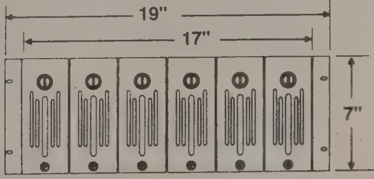
OPTIONS

- Customized Configurations
- Automatic Current Sharing with Power Supply Fail Signal
- Internal Isolation Diodes
- Custom Cabling

Up to 1800 Watts, MPS-4 (1/2 Rack)
1 to 3, Series 4 Plug-In Supplies Per System



Up to 3600 Watts, MPS-4 (Full Rack)
1 to 6, Series 4 Plug-In Supplies Per System



NOTE: Contact factory for specifications & availability.

SERIES 4/OMEGA POWER SUPPLIES

INPUT SPECIFICATIONS

AC Input Voltage Ranges	90-132/180-264VAC, externally selectable. (85-264VAC with PFC)
Input Frequency (AC Units)	47-63 Hz
In-Rush Current	13A
Hold-Up Time	20 msec, min.

OUTPUT SPECIFICATIONS

Output Polarity	All units are floating
Line Regulation	0.1% max.
Load Regulation	0.1% for 0 to 100% load change with remote sense
Transient Response	10% max. for 50% load change; recovery to <1% in 300 μsec
Minimum Load	No minimum load required
PARD, All Channels	1% measured over 50 MHz bandwidth
Temperature Coefficient	0.02%/°C max.
Current Limit	120% of rated current
Overvoltage Protection	125% of nominal output voltage; latching, individual adjustments
Reverse Voltage Protection	To 100% rated current, when fan is operating
Remote Sense	Remote sense will compensate for up to 0.5V of total load cable drop

GENERAL SPECIFICATIONS

Efficiency, Typical	75%
Turn-On Delay (Soft Start)	1 sec after input voltage applied
Dielectric Withstand	2200VDC, input-to-output
Leakage Current, Line-to-Chassis	0.56mA max. @ 264VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature Range	0-70°C
Derating, 50-70°C	Linearly to 50% at 70°C
Storage Temperature Range	−40 to +85°C
Cooling	Internal fan
Humidity	5-95% non-condensing
EMI/RFI, Conducted	VDE 0871 Level B, FCC 20780, Part 15-J Level B
Vibration & Shock, Operating	5-500 Hz; 0.03" to 0.25G, 5G half sine 15 msec, bottom
Vibration & Shock, Non-Operating	5-500 Hz; 0.15" to 1.0G, 10G half sine 15 msec, 3-axes

PHYSICAL SPECIFICATIONS

AC Input Connections	Terminal strip with (7 ea.) 6-32 screw terminals
DC Output Connections	M6 screw terminals on main channel; M4 screw terminals for auxiliary outputs; M3 screw terminals for sense connections

SAFETY

Safety Specifications	When correctly installed in a system the Series 4 will meet the requirements of UL 1950, CSA22.2 No. 220 or No. 950, BS7002, BS6301, IEC950, EN60950

IMPORTANT NOTES

Please consult factory if requirements are not met by models listed here. Specifications are subject to change without notice.

Approvals may be pending on some models; check with factory for status.

250 TO 650 W

SINGLE & MULTI-OUTPUT, LOW PROFILE, LOW COST SWITCHMODE POWER SUPPLIES

SERIES 2
2A: 250 WATTS, 2″×4.5″×9″
2B: 400 WATTS, 2.5″×5″×10″
2C: 500 WATTS, 2.5″×5″×11.5″
2D: 650 WATTS, 2.5″×5″×14″

FEATURES

- 1 to 4 Outputs
- Isolated & Floating Outputs
- EMI Filter (FCC/VDE)
- DC Ball-Bearing Fan Cooled
- OVP on All Outputs
- Approved to UL, CSA, VDE, EN Specs
- Input Power Fail Signal—Std
- Field-Selectable 115/230VAC—2B
- Three-Year Warranty

FEATURES

- Auto AC Line Select—Std on 2A, 2C, 2D
- Inhibit, Logic Low—Std on 2C/2D
- Margining Main-Std on 2C/2D
- Wide Range Adjustable Outputs (or factory set)

250 TO 650 STANDARD MODELS (Partial Listing)

Series/Watts	Output #1 (Main)*	Output #2	Output #3	Output #4**
2A/250W	5V/30A	12-15V/10A	12-15V/3A	5V/3A
	5V/30A	12-15V/10A	12-15V/3A	12-24V/2A
2B/400W	5V/50A	12-15V/15A	12-24V/3.5A	2-6V/6A

	5V/100A	12-15V/20A†	12-24V/5A	12-15V/10A
	5V/100A	12V/20A†	12V/10A	5V/10A

*Available as Single Output Supply
**5th Output available on 2D (5V/0.75A)
†30A peak
Note: Outputs are adjustable within indicated ranges or ± 10% if no range is shown.

INPUT SPECIFICATIONS

AC Input Voltage Ranges	90-132/180-264VAC, strappable 2B automatic line select (2A, 2C, 2D)
Input Frequency (AC Units)	47-63 Hz
In-Rush Current	30A
Hold-Up Time	20 msec, typical

OUTPUT SPECIFICATIONS

Output Polarity	All units are floating
Line Regulation	0.2% max.
Load Regulation	0.8% for 0 to 100% load change with remote sense
Transient Response	3% max. for 25% load change; recovery to <1% in 300 µsec
Overshoot, Turn-On	1% max.
PARD, All Channels	1% measured over 30 MHz bandwidth
Temperature Coefficient	0.02%/°C max.
Overload Protection	All outputs protected
Overvoltage Protection	125% of nominal output voltage; latching
Reverse Voltage Protection	To 100% rated current, main; 50% rated current, auxiliaries
Remote Sense	Remote sense will compensat for up to 0.5V of total load cable drop

GENERAL SPECIFICATIONS

Efficiency, Typical	75%
Turn-On Delay (Soft Start)	1 sec after input voltage applied
Dielectric Withstand	2200VDC, input-to-output
Leakage Current, Line-to-Chassis	3.5mA max. @ 264VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature Range	0-70°C
Derating, 50-70°C	Linearly to 50% at 70°C
Storage Temperature Range	−40 to +85°C
Cooling	Internal fan
Humidity	5-95% non-condensing
EMI/RFI, Conducted	VDE 0871 Level A, FCC 20780 Part 15-J Level A
Vibration & Shock, Operating	5-500 Hz; 0.03″ to 0.25G, 5G half sine 15 msec, bottom
Vibration & Shock, Non-Operating	5-500 Hz; 0.15″ to 1.0G, 10G half sine 15 msec, 3-axes

PHYSICAL SPECIFICATIONS

AC Input Connections	Terminal strip with 6-32 screw terminals
DC Output Connections	¼×20 studs on main channe barrier strip with 6-32 screw terminals for auxiliary outputs 2D/2E have 10-32 studs on CH2 output

SAFETY

Safety Specifications	UL478 or 1950, CSA22.2 No. 232, No. 220, No. 950, EN60950

IMPORTANT NOTES

Please consult factory if requirements are not met by models listed here. Specifications are subject to change without notice.

Approvals may be pending on some models; check with factory for status.

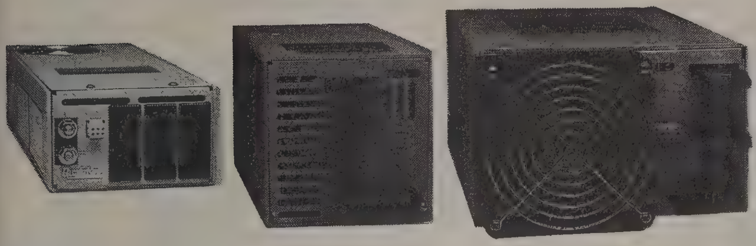
SINGLE OUTPUT SWITCHMODE POWER SUPPLIES & DC-DC CONVERTERS



SERIES 21, 23, 28, 31 & 36
(SEE FRONT PAGES OF THIS VOLUME FOR PRODUCT LINE PHOTOS)

FEATURES

- 2V to 56VDC Outputs
- International Safety Specs
- Wide Adjustment Ranges
- Inhibit
- Input Power Fail Signal
- Three-Year Warranty
- AC (1φ or 3φ) & DC Inputs
- EMI Filter (FCC/VDE)
- DC Ball-Bearing Fan Cooled
- Margining
- Compact Cases

AVAILABLE OPTIONS

- Power Factor Correction Per IEC555-2, <5% Total Harmonic Distortion
- Auto Current Sharing w/Supply Fail Signal (Ideal for N+1 Redundancy)
- Output Power Good Signal
- Output Current Monitor
- Universal Input: 90-264VAC
- Plug-In Configurations
- Rack Mounted/Redundant Power Systems

AC Input Voltage Ranges	90-132/180-264VAC, externally selectable; 180-264VAC 1φ or 3φ; universal input 90-264VAC (option)
Input Frequency (AC Units)	47-63 Hz
DC Input Voltage Range	42-56VDC
In-Rush Current, Peak	80A (max).—AC Units
Hold-Up Time	20 msec, typical

OUTPUT SPECIFICATIONS

Output Polarity	Floating
Line Regulation	0.2% max.
Load Regulation	0.8% for 0 to 100% load change with remote sense
Transient Response	3% for 25% load change; recovery to <1% in 300 µsec
Overshoot, Turn-On	1% max.
PARD, All Channels	1% measured over 50 MHz bandwidth
Temperature Coefficient	0.02%/°C max.
Current Limit	120% of rated current
Overvoltage Protection	125% of nominal output voltage; latching
Reverse Voltage Protection	To 100% rated current
Remote Sense	Remote sense will compensate for up to 0.5V of total load cable drop

GENERAL SPECIFICATIONS

Efficiency, Typical	75%
Turn-On Delay (Soft Start)	1 sec after input voltage applied
Dielectric Withstand	2200VDC, input-to-output
Leakage Current, Line-to-Chassis	3.5mA max. @ 264VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature Range	0-70°C
Derating, 50-70°C	Linearly to 50% at 70°C
Storage Temperature Range	−40 to +85°C
Cooling	Internal fan
Humidity	5-95% non-condensing
EMI/RFI, Conducted	VDE 0871 Level A, FCC 20780, Part 15-J Level A
Vibration & Shock, Operating	5-500 Hz; 0.03″ to 0.25G, 5G half sine 15 msec, bottom
Vibration & Shock, Non-Operating	5-500 Hz; 0.15″ to 1.0G, 10G half sine 15 msec, 3-axes

PHYSICAL SPECIFICATIONS

AC Input Connections	Terminal strip with 6-32 screw terminals
DC Output Connections	¼×20 studs; 5/16×18 studs, or bus bars

SAFETY

Safety Specifications	UL478 or 1950, CSA22.2 No. 234, No. 220, No. 950, EN60950

IMPORTANT NOTES

Please consult factory if requirements are not met by models listed here. Specifications are subject to change without notice.

Approvals may be pending on some models; check with factory for status.

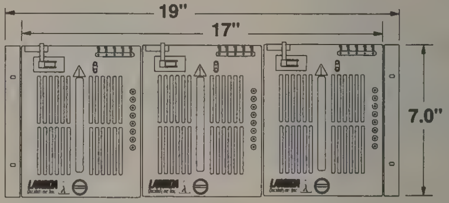
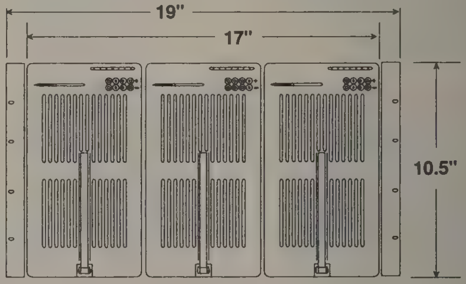
Up to 3000 Watts, MPS-28*
1 to 3, Series 28 Plug-In Supplies Per System



Up to 9000 Watts, MPS-31/36*
1 to 3, Series 31 or 36 Plug-In Supplies Per System



Depth: 20″ max.

*Note: Contact Factory for Specifications & Availability

FEATURES

- 2V to 56VDC Outputs
- Up to 9 Outputs
- International Safety Specs
- Wide Adjustment Ranges
- Inhibit
- Input Power Fail Signal
- Three-Year Warranty
- AC (1φ or 3φ) & DC Inputs
- EMI Filter (FCC/VDE)
- DC Ball-Bearing Fan Cooled
- Margining (Main)
- Compact Cases

AVAILABLE OPTIONS

- Power Factor Correction Per IEC555-2. <5% Total Harmonic Distortion
- Auto Current Sharing w/Supply Fail Signal (Ideal for N+1 Redundancy)
- Output Power Good Signal
- Output Current Monitor (Main)
- Universal Input: 90-264VAC
- Plug-In Configurations
- Rack Mounted/Redundant Power Systems

SWITCH MODE POWER SUPPLIES

Ω mega Plus

AC/DC Power Supplies
DC/DC Converters

General

The Omega Plus Series is a family of high density, compact, MIL-Spec switch mode power supplies. These advanced design power supplies accept a wide range of inputs, and are available in multiple output configurations. The Omega Plus Series is ideally suitable for airborne, shipboard, ground mobile, and C^3 applications. The Omega Plus Series of power supplies have been designed and qualified to the most stringent performance and environmental requirements.

Features

Ω MIL-SPEC/ INDUSTRIAL VERSIONS
Ω UNIVERSAL AC/DC INPUT
Ω SINGLE AND MULTIPLE OUTPUTS
Ω HIGH DENSITY - LOW PROFILE
Ω 100 HOUR BURN IN
Ω 3 YEAR WARRANTY
Ω ALTERNATE TEMPERATURE RANGE AVAILABLE

AC/DC Inputs

100 - 126 Vac, 47Hz - 460Hz 1 phase
200 - 252 Vac, 47Hz - 460Hz 1 phase
100 - 126 Vac, 47Hz - 460Hz 3 phase Delta
200 - 252 Vac, 47Hz - 460Hz 3 phase Delta
100 - 126 Vac, 47Hz - 460Hz 3 phase 4 wire Wye
100 - 126 Vac, 47Hz - 460Hz 3 phase 3 wire Wye
120 - 320 Vdc

MODEL	SIZE	VOLUME (CU./IN.)	WATTS (CU./IN.)
25S	2.50 x 3.00 x .80	6.0	3.4
50S	3.00 x 3.50 x .80	8.4	6.0
75S	3.25 x 4.25 x .80	11.0	6.8
75T	3.50 x 4.50 x .80	12.6	6.0
150S	4.50 x 5.75 x .80	20.7	7.3
150T	4.75 x 6.00 x .80	22.8	6.6
300S	6.00 x 6.50 x .80	31.2	10.0
300T	6.00 x 6.50 x .80	31.2	10.0

DC Inputs

14 - 36 Vdc

MODEL	SIZE	VOLUME (CU./IN.)	WATTS (CU./IN.)
25W	2.20 x 2.80 x .80	4.9	5.0
50W	2.50 x 3.50 x .80	7.0	7.2
75W	3.00 x 3.85 x .80	9.2	8.1
150W	3.50 x 4.50 x .80	12.6	12.0
300W	4.25 x 5.50 x .80	18.7	16.0

Typical Configuration Specifications

EFFICIENCY: 75% minimum (single and dual output models) and 70% minimum (multiple output models), measured at nominal input line and full load.

LINE REGULATION: Within 0.1% for input change from low line to high line, at constant load. For single, dual and main outputs 100 mV maximum for auxiliary outputs.

LOAD REGULATION: 0.1% for 0-100% of rated load at nominal input line for single, dual and main outputs. 150 mV for auxiliary outputs with 20% minimum main load.

AUXILIARY OUTPUT CROSS REGULATION: 1.0% maximum deviation when main output load changes from half load to full load.

LOGITEK INC. ™

101 CHRISTOPHER STREET, RONKONKOMA, NY 11779 (516) 467-4200 Fax: 516-467-4090

LOGITEK
RONKONKOMA, N.Y.
CAGE CODE 15420
OMEGA PLUS

PARD (Noise and Ripple): 100 mV P-P at 20 MHz bandwidth for 5V and 12V single, dual and main outputs. 200 mV for all outputs 15V or greater.

ISOLATION VOLTAGE: 1000 Vdc input to output, input to case. 200 Vdc output to case.

INSULATION RESISTANCE: 50 Megohm at 50 Vdc.

TEMPERATURE RANGE: Operating: -55°C to +100°C at 100% load. Temperature measured at base plate, conduction cooled via base plate only. Storage: -55°C to +125°C.

SHORT CIRCUIT PROTECTION: Under any short circuit condition, output voltage drops to less than one volt, with automatic recovery.

INRUSH CURRENT: Limited to 500% of nominal input current.

REMOTE ERROR SENSING: Sensing pins compensates for up to 0.5 volt drop on output leads.

OUTPUT TRACKING: Within 2%.

CURRENT LIMITING: Constant current, limited to 130% of rated output.

OVERVOLTAGE PROTECTION (Single Output): Automatic electronic shut down if voltage exceeds 30% of the nominal output.

INTERFACE: Hook-up via a D-subminiature connector.

QUALITY: We use only MIL qualified components, an inspection system which strictly adheres to MIL-I-45208, and a quality control system which has been surveyed and approved in accordance with MIL-Q-9858A. Also, Logitek's facility is now qualified to MIL-STD-2000.

EMI/RFI CHARACTERISTICS: Tested to MIL-STD-461C using test methods of MIL-STD-462.

ENVIRONMENTAL SPECIFICATIONS: Are to MIL-STD-810C for Shock; Acceleration; Humidity; Altitude; Salt Fog; Sand, Dust and Fungus.

HAMMER SHOCK: Per MIL-STD-901C.

CUSTOM & SPECIAL APPLICATIONS: Logitek's Engineering Department is available to discuss your applications of our power supplies or to custom design to meet your system's requirements.

LOGITEK 101 CHRISTOPHER STREET, RONKONKOMA, NY 11779 (516) 467-4200 Fax: 516-467-4090

UNIVERSAL INPUT SWITCHING POWER SUPPLIES

General Specifications:(1)

- **AC Input:** 90-260 VAC / 47-63 Hz
- **DC Outputs:** Output 1 adjustable 5%
  Output 2 tracks Output 1
- **Temperature Coefficient:** 0.02% / °C, all outputs
- **Humidity:** 0-90%
- **Operating Temprature:** 0° to 50° C
- **Storage Temperature:** –40°C to 80°C
- **Switching Frequency:** 30-40 KHz
- **Dielectric Strength:** 3750 VAC for 1 min.
- **Efficiency:** 70% minimum
- **Input Filter:** Pi or Capacitor Network
- **Isolation:** 500 VDC
- **Isolation Resistance:** 10 Ohms
- **MTBF:** 50,000 Hours
- **Hold-up Time:** 15-20 mSec
- **Safety: UL:** 1012, 478, 1950
  CSA: 22.2, No. 220
  TUV: IEC 950, EN60950
- **EMI:** Meets FCC Class 'B' and VDE 0871 Class B rules using static load.

AC ADAPTORS FOR NORTH AMERICA AND JAPAN

DC Output, Wall Plug-in and Desk-Top

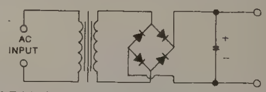
General Specifications

Input Voltage: 120VAC/60 Hz for North American models.
Input Voltage: 100VAC/50 - 60 Hz for Japan models.
Output Tolerance: ±5% at full load.
Operating Temperature: 0° - 40°C.
Storage Temperature: -20°C - 70°C.
Dielectric Strength: 1500VAC for 1 min.
Enclosure: Black Noryl, UL94V-0.
Output Cord: 6 ft, 20 - 24AWG, Black.
Safety: UL Listed per 1310 std. for wall mount units.
UL Listed per 1012 std. for desk top units.
CSA Certified to CSA std. 22.2 #107 or #223.

Options

1. Other outputs or custom design per customer specifications are available.
2. UL/CSA approvals for custom designed units.
3. Earth ground PIN on primary and/or secondary. For selected models.

SCHEMATIC DIAGRAM



REMARK: STANDARD CAPACITOR = 1000 MFD
HIGHER RATINGS ARE AVAILABLE ON SPECIAL ORDER.

DC REGULATED POWER SUPPLIES

General Specifications

Input Voltage: 105V to 129V (117V ± 10%)
Input Frequency: 57 to 63 Hz
Voltage Regulation: over all ±5%
Ripple Voltage: 50mV P-P max. at full load, low line
Dielectric Strength: 1500 Vrms
Overload Protection: Thermal shutdown

Storage Temperature: -20°C to +85°
Operating Temperature: 0°C to +50°C
Humidity: 10% to 90%
Burn-In: 8 hours
Safety: UL 1310, UL 1012, and CSA C22.2 No. 223.
Ground Pin: is optional on most models

DESK TYPE HOUSING: 4.3" x 3.5" x 2.6"

WALL MOUNT HOUSING: 3.3" x 2.2" x 1.9"

PX SERIES

10 KW DC POWER SUPPLIES

FAST DELIVERY

Stock to 4 Weeks

FEATURES

- 13 Models: 16 to 500 Vdc, 20 to 600 Adc
- Series and parallel master/slave operation
- High dielectric withstand: 2500 Vac
- Optional EMI suppression meets VDE 871A
- Digital control lines optically isolated
- Exclusive control loop diagnostics
- Enhanced transient response with Electronic Damping Circuit
- Benchtop or 19" rack mountable
- Power factor corrected for low AC input currents
- OVP shutdown standard, SCR crowbar optional
- Automatic V/I crossover
- Digital meters standard
- Programming resistors isolated from output
- Optional IEEE-488 programming
- Air exhaust in rear of cabinet

SPECIFICATIONS

Input voltage: 208/240 Vac, 50-60 Hz, 3-phase: standard
440/480 Vac, 50-60 Hz, 3-phase: optional

Regulation line and load combined: 0.10%

Stability: 0.10% for 8 hours after 30 minute warm up

Transient response: 75 ms to recover within 2% of regulated output with 50% to 100% or 100% to 50% load change; 75 ms to recover within 10% of regulated output with 0% to 50% or 50% to 0% load change with Electronic Damping Circuit.

Ambient Temperature: 0 to 50°C

Programming resistors: 1K full scale for output voltage, output current, and over voltage shutdown

Temperature coefficient: 0.04% /°C of maximum output current

Size: 12¼" H x 19" W x 24" D **Weight:** 260 lbs.

Note: Specifications subject to change without notice.

PRICE

All models: $4,795

OPTIONS

SCR crowbar: $195
EMI filter: $295
Electronic Damping (EDC): $695
440/480 Vac input: N/C
Custom input voltage: $295
Custom output voltage: $495
IEEE-488 Interface: $1,795
Other options: consult factory

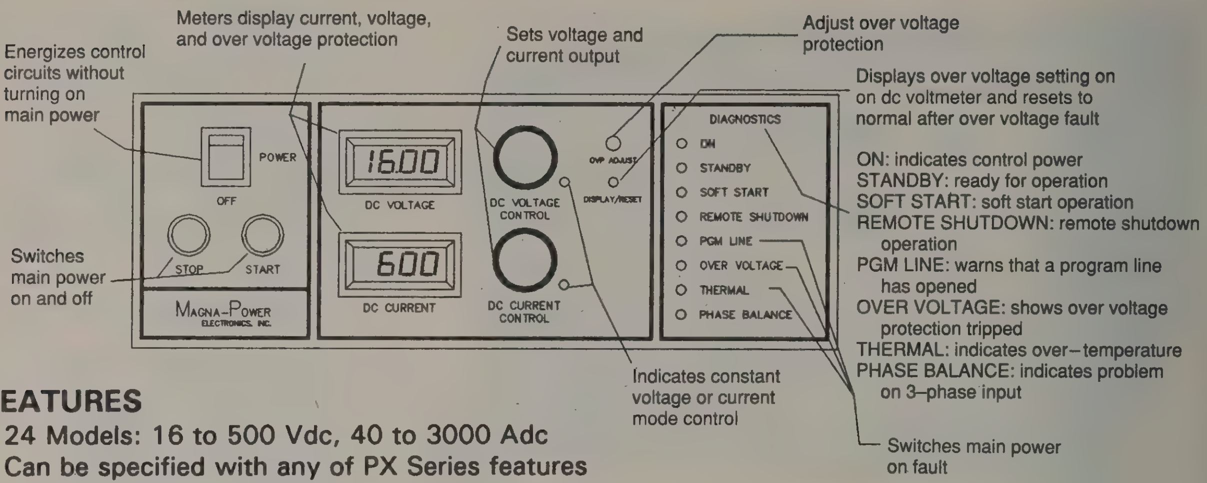
SX SERIES

20 TO 50 KW DC SYSTEMS

MODULAR

Engineered Assemblies



Energizes control circuits without turning on main power

Meters display current, voltage, and over voltage protection

Sets voltage and current output

Adjust over voltage protection

Displays over voltage setting on on dc voltmeter and resets to normal after over voltage fault

Switches main power on and off

ON: indicates control power
STANDBY: ready for operation
SOFT START: soft start operation
REMOTE SHUTDOWN: remote shutdown operation
PGM LINE: warns that a program line has opened
OVER VOLTAGE: shows over voltage protection tripped
THERMAL: indicates over–temperature
PHASE BALANCE: indicates problem on 3–phase input

Indicates constant voltage or current mode control

Switches main power on fault

FEATURES

- 24 Models: 16 to 500 Vdc, 40 to 3000 Adc
- Can be specified with any of PX Series features
- Or'd diagnostic functions for detection of module conditions
- Dedicated master control panel with digital control lines optically isolated
- Modules share currents equally

SX SERIES operate two to five 10 KW modules in master slave configurations for system specific applications. Control functions are merged into one panel for true system integration and control. Standard systems are configured for parallelled output. Non-standard systems can be specified for tracking plus and minus outputs, multiple outputs, and IEEE-488 programming.

SX SERIES are engineered from standardized modules, standardized control panels, and modular cabinets. This means quick delivery, minimum cost, and proven performance!

SIZE AND PRICE MATRIX

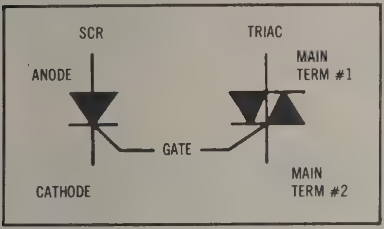
MINIGLOSSARY THYRISTORS/ HIGH POWER DIODES

THYRISTORS

A thyristor is a four-layer semiconductor (pnpn) that can be switched from an OFF to an ON state. This is usually done by a voltage or current pulse to the gate terminal. The device will then continue to conduct so long as the principal current of the device flows through the thyristor's two main terminals.

In many respects a thyristor is analogous to an electromechanical latching relay. In fact, thyristors have largely replaced these relays in newer equipment designs. But, misapplications and/or failure to fully understand the parameters of these and other solid state devices often leads to catastrophic field failures.

The terminology shown on this page has been condensed from common industry data books and is intended to be a guide for the engineer.



di/dt: *Critical rate of rise of ON state current* is the user's maximum design limit (Fig. 1).

di_R/dt: *Rate of decay of ON state current* (Fig. 1 & 2).

dv/dt (critical): *Rate of rise of OFF state voltage*. Lowest voltage rate of rise to cause a thyristor to turn ON.

dv/dt (reapplied) : *Rate of rise of reapplied OFF state voltage.*

I_{FSM}: *Nonrepetitive ON state surge current in diodes.* Maximum peak value of ½ cycles (60 Hz) a diode can withstand up to 100 times in its lifetime.

I_{TSM}: *Nonrepetitive ON state surge current in thyristors*. Maximum peak value of 60 Hz cycles a thyristor can withstand up to 100 times in its lifetime.

I_{DRM}/I_{RRM}: *Maximum peak forward/reverse leakage current* at specified temperature and repetitive conditions.

I_{GDM}: *Continuous gate current not to trigger*. Highest dc gate current that will *not* cause thyristor to switch from OFF to ON at a specific temperature.

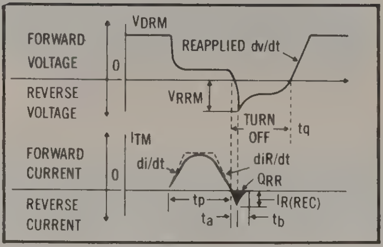


Fig. 1. Concurrent voltage and current waveforms

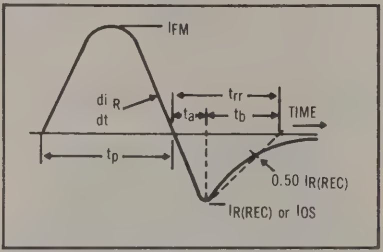

Fig. 2. Recovery current waveform

I_{GT}: *Continuous gate trigger current.* Absolute minimum gate current required to switch thyristor from OFF to ON.

I_H: *Holding Current*. Minimum current required to hold thyristor ON.

I_L: *Latching current*. Minimum current required to hold thyristor ON after removal of gate drive.

$I_{(REC)}$; *Recovery current*. Peak value of reverse current during recovery or turn OFF (Fig. 1 & 2).

I_{OS}: *Overshoot current*. See $I_{R(REC)}$.

I^2t: Maximum ON state, short time thermal capacity of the silicon element for operations less than ½ cycle of 180° conduction angle.

$I_{T(AV)}$: *Average ON state current* (max.)

Q_{RR}: *Reverse recovered charge* (Fig. 1).

$R_{\theta JC}$: *Junction-to-case thermal resistance* in degrees C per watt.

$T_{C(MAX)}$: *Max. allowable case temperature*.

$T_{J(MAX)}$: *Maximum allowable junction temp*.

t_d: *Delay time*. Interval between a specified point at beginning of gate pulse and the instant at which the principal voltage drops to a specified value. (OFF-ON) (Fig. 3)

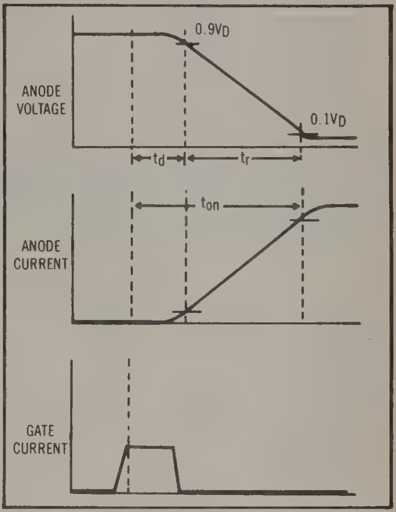

Fig. 3. Turn-on time waveforms

t_{on}: *Turn-on time*. The sum of delay time and rise time. (OFF-ON) (Fig. 3)

t_q: *Turn-off time*. Time between principal current reaching zero and the instant thyristor can block forward voltage without turning ON. (Fig. 1)

t_r: *Rise time*. Time between principal voltage dropping from one value to a second lower value when thyristor turns from OFF to ON. (Fig. 3)

t_{rr}: *Reverse recovery time*. (Fig. 2)

V_{DRM}/V_{RRM}: *Maximum repetitive peak OFF state/reverse voltage* excluding non-repetitive transients.

V_{DSM}/V_{RSM}: *Maximum nonrepetitive peak OFF state/reverse voltage*.

V_{FM}/V_{TM}: *Maximum forward voltage drop* at a specific forward current and case temp.

V_{GDM}: *Gate nontrigger voltage*. Highest dc voltage that will *not* cause thyristor to switch from OFF to ON.

V_{LATCH}: *Latching voltage*. Voltage required for thyristor to latch ON at a given gate current and junction temp.

$V_{TM(DYN)}$: *Dynamic ON state voltage*. Transient ON state voltage of thyristor when triggered into conduction for a given load and time.

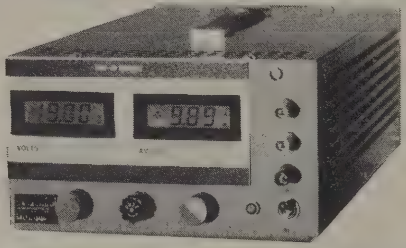
HWD Constant Voltage/Constant Current Supplies

FEATURES

- Digital Ammeter/Voltmeter
- Remotely Programmable
- Remote Sensing
- Series and Parallel Operation
- 1mV Volts Ripple
- .01% Load Regulation
- .01% Line Regulation
- Separate Voltmeter and Ammeter
- Models to 200 Volts
- Half Rack Size or Bench Mounting



APPLICATION

The HWD Series power supplies are designed to be used in the lab bench or for system application. The use of digital meters provides accurate readings of output voltage and current without the need of external DVM'S.

Model Number	Output		Regulation				Price

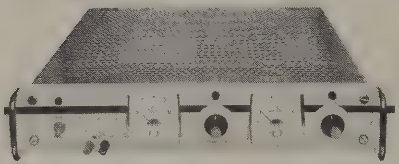
PR Constant Voltage/Current Silicon Supplies

FEATURES

- High Power — Small Size
- Remotely Programmable
- All Silicon Semiconductors
- Mode Lites
- Low Ripple
- .01% Regulation
- Constant Voltage/Constant Current
- Parallel Operation



APPLICATION

The PR Series find application in the laboratory and in systems where both versatility of operation and a high degree of regulation is required. The voltage to current crossover point may be set anywhere within the limits of zero to full rated output voltage and zero to full rated output current.

Model Number	Output		Regulation				Panel Ht.	Price

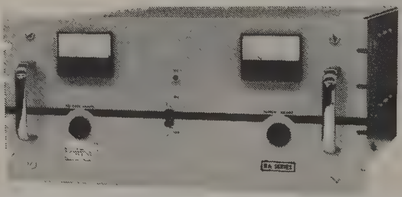
RA Constant Voltage Silicon Supplies

FEATURES

- High Power — Small Size
- Remotely Programmable
- Low Ripple
- Parallel Operation
- .01% Regulation
- All Silicon Semiconductors



APPLICATION

The RA Series are all silicon, relatively high in power, and tightly regulated. They find application in the laboratory and in systems where both versatility of operation and a high degree of regulation is required. Adjustable solid state current limiting provides load protection.

Model Number	Output		Regulation		Panel Ht.	Price

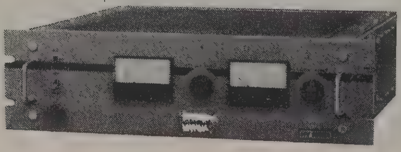
HV Constant High Voltage Supplies

FEATURES

- All Solid State
- Adjustable Current Limit
- < 1 Millivolt Ripple
- 10-Turn Voltage Adjustments
- Remote Programming
- Remote Sensing



APPLICATION

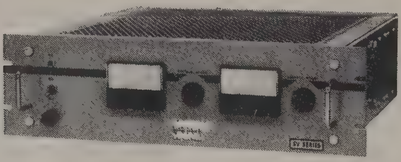
The HV is a versatile series of constant voltage units adjustable from zero to full rated voltage. Adjustable solid state current limiting is a feature. Options provide for either systems or laboratory use. Crossover from constant voltage to current limiting is automatic solid state and noninterrupting. Units may be operated in parallel for increased current capacity.

Model Number	Output		Regulation		Size	Price
	Volts	Amps	Line %	Load %		
HV 350-1	0-350	1	0.005	0.01	3½ × 19 × 16½	$2450.
HV 350-2	0-350	2	0.005	0.01	5¼ × 19 × 16½	2900.
HV 350-3	0-350	3	0.005	0.01	7 × 19 × 16½	3250.
HV 350-5	0-350	5	0.005	0.01	8¾ × 19 × 16½	3700.

SV Constant High Voltage Power Supplies

FEATURES

- All Solid State
- Adjustable Current Limit
- 3 Millivolt Ripple
- 0.01% Regulation
- 10-Turn Voltage Adjustments
- Remote Programming
- Remote Sensing
- Meters



APPLICATION

The SV is a versatile series of constant voltage units adjustable from 0 to full rated voltage. Options provide either systems or laboratory use. Crossover from constant voltage to current limiting is automatic solid state and noninterrupting. Units may be operated in parallel for increased current capacity.

Model Number	Output		RMS Ripple	Regulation		Size	Price

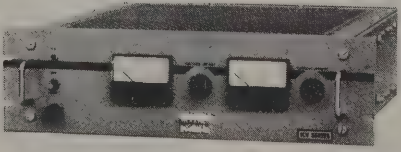
SV 600-0.5	0-600	0-0.5	<3mv	0.01	0.01	3½ × 19 × 16½	$2900.
SV 600-1	0-600	0-1	<3mv	0.01	0.01	5¼ × 19 × 16½	3500.
SV 600-2	0-600	0-2	<3mv	0.01	0.01	7 × 19 × 16½	4400.

KV High Voltage Power Supplies

FEATURES

- Output 100 to 1500 VDC
- Voltage Regulated 0.5%
- Current Regulated 0.5%
- Voltmeter and Ammeter
- Ripple 0.5% RMS
- Voltage/Voltage Programmable
- Resistance Programmable



APPLICATION

The KV1000 Series Power Supplies are constant voltage/constant current units with automatic crossover. Models are available with up to 3 ampere current capacity over the full voltage range. Options such as remote voltage and current programming, remote turn on and turn off make the unit a versatile piece of equipment for laboratory or manufacturing operations.

Model Number	Output		Regulation %		Panel Height	Price
	Voltage	Amps	Current	Voltage

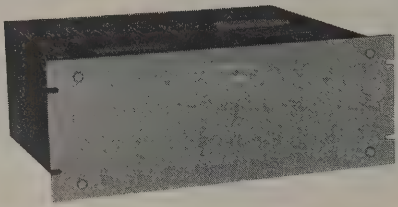
MS High Power System Component Power Supplies

FEATURES

- Most Complete Coverage
  Up to 600 Volts
  Up to 1200 Amperes
- Low Cost
- All Solid State
- Extreme Reliability



APPLICATION

Strictly designed for incorporation into systems, these supplies are considered as components. They are of exceptionally high reliability; yield the highest power at the lowest cost; and provide complete coverage of all possible needs.

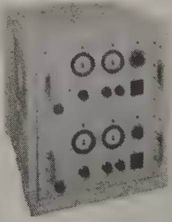
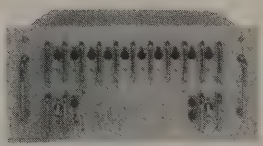
NOTE: The digits of the Model Number indicate the output voltage and current in amps. Example: MS9-600 has an output of 9 volts, current of 600 amps. MS9-1200 has an output of 9 volts at 1200 amps. **Consult factory for prices.**

Custom Power Supplies and Systems

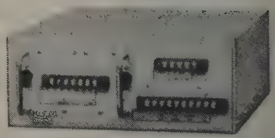
Double redundant regulated DC power distribution system for process industry. Features no break transfer and battery backup.



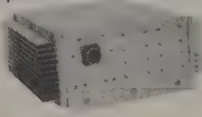
High power, 150-volt, constant current/constant voltage, shipboard-qualified power supply.



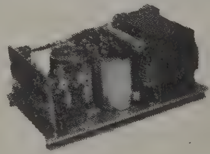
Regulated no-break, redundant 24-volt dc, 15-ampere, 10-channel power distribution system for television studios.



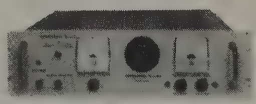
Uninterrruptable power supply, with internal battery charger, used for avionics instrumentation.



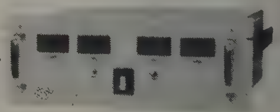
Mil Spec 4 output regulated power supply.



Regulated multi-output power supply for computer.



Automatic constant current battery charger with automatic range selection based on battery temperature and voltage level.



±5V 50A linear regulated power supply for semi-conductor testing and burn-in.

NOTE: Not pictured are these special devices: (a) Power supply for CW lasers; (b) Redundant power systems for military telephone communications systems; (c) Xenon lamp power supplies; (d) True RMS regulated ac power supplies; and (e) High current dc power supply for automotive production line testing.

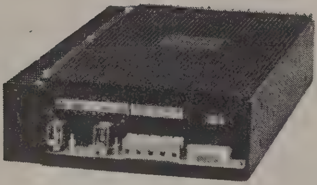
SM High Current Switching Power Supplies

FEATURES
- Soft Start—Solid State
- Overvoltage Protection
- Current Limit
- Remote Shut Down
- Over Temperature Protection
- 47-400 Hz AC Input
- Convection Cooled
- Fully Enclosed
- −0° to +70°C Ambient
- Lightweight
- Input Line Filter



SPECIFICATIONS
- Line Regulation 0.1%
- Load Regulation 0.1%
- Ripple and Noise 2% pp
- Efficiency 75% Typical
- Temperature Coefficient .02%/°C
- Stability 0.1%/8 hours
- Hold Up Time 16.5 MSec Minimum

* Prices shown for 100 pcs.

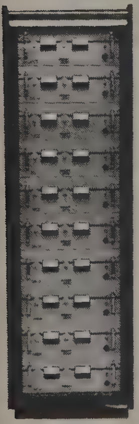
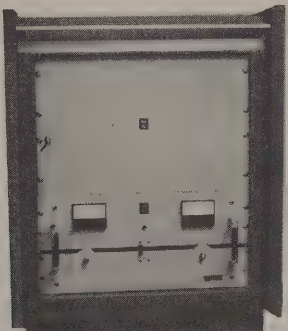
Custom Power Supplies and Systems

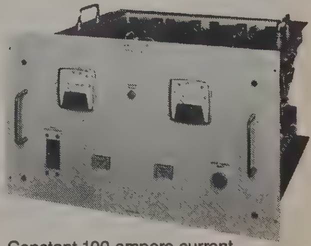


48-volt, 240-ampere redundant power supply for process industry.

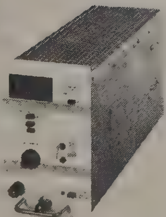


24-volt, 50 ampere distributed power system for process industry.

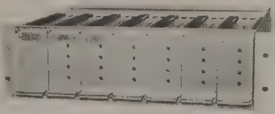
Tracking power supply: ± 15-volt, 75-ampere.



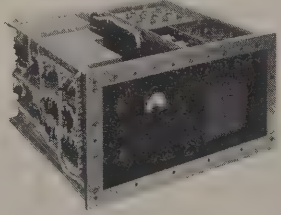
Constant 100 ampere current power supply for Xenon lamp application.



Constant current power supply. 3 ranges: 0-2ma, 0-20ma, 0-200ma. Maximum output voltage 1200 volts.



24-channel, individually adjustable, constant current distributed power source.



Multi-output Mil Spec power supply.

± 13-volt, 40-ampere power supply for telecommunications industry. Designed for redundant operation.

eem

MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

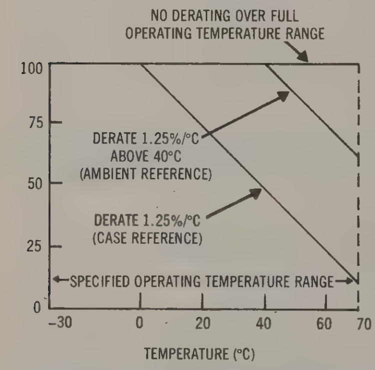


Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

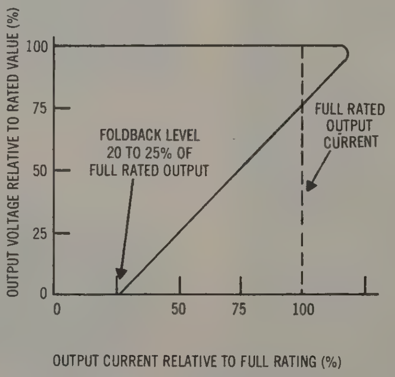

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

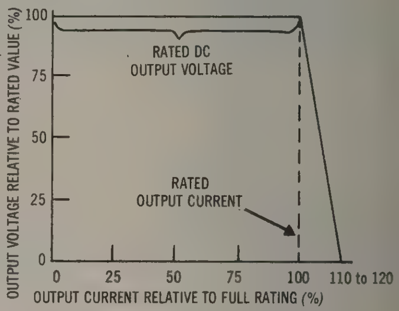

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

1 to 2000 Watts

YOUR CHOICE OF POWER TECHNOLOGIES

Hybrid • Part Hybrid • Discrete
Standard • Semi-custom • Custom

Whether your requirements call for one of our many standard parts, a standard part with a minor modification, an assembly of standard parts, or a completely new custom design — Modular Devices Inc is ready to assist you.

Modular Devices Inc (MDI) designs and manufactures a wide range of standard and custom power supplies for aerospace, military and industrial use. MDI has a complete thick film hybrid capacity on site, which permits us to produce unique power electronic functions for our customers quickly and efficiently. MDI can also meet challenging radiation and aerospace requirements. With its high technology power supply capability and custom hybrid facility, MDI is uniquely positioned to apply the best and most appropriate packaging technology to your diverse and challenging requirements.

MDI offers the optimum technology for each application.

Full Hybrid Power Supplies using thick film, chip and wire/surface mount components within hermetic hybrid enclosures allows ultimate power density. Low tooling and set up costs and availability of unique hybrid enclosures make power hybrid technology economical for small production runs. Careful computer aided thermal analysis and proven thermal management techniques assure high reliability. MDI's hybrid power supply technology incorporates the latest advances in high frequency techniques, power hybrid and miniature magnetic components. MDI's product capacity includes:

- Standard, off the shelf DC to DC converters to 80 watts, operating frequencies to 400 kHz, power densities to 40 W/in^3
- Custom variations of standard DC to DC converters to 120 watts
- Custom DC–AC static inverters to 10 watts
- Design and construction to "S" level, "B" level and other requirements
- Wide temperature range

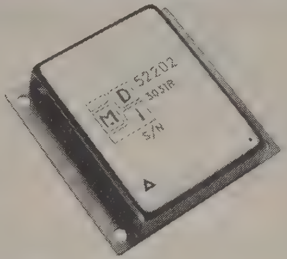
Hybrids combined with discrete components allow great volumetric efficiency as compared to all discrete designs. MDI's packaging technology incorporates the latest advances in NC milled and dip brazed enclosures, FLEX PRINT wiring and surface mount technology. This product capability provides:

- Higher packaging densities than all discrete designs
- Lower cost and quicker delivery than all hybrid designs
- Best suited for aerospace/high reliability, high density requirements at power levels from 50 watts to 1 KVA

Discrete Power Electronics encompasses a wide spectrum of power supply products as well as areas such as servo and power amplifiers, motor drives and controls. MDI's power supply technology incorporates the latest advances in high frequency switch mode power FET techniques. MDI's product capability includes:

- AC to DC power supplies to 5 KVA with single and multiple outputs with power densities to 4 W/in^3
- DC to DC converters to 2 KVA, operating frequencies to 450 kHz, power densities to 10 W/in^3
- DC to AC static inverters to 2 KVA, inputs 12 VDC to 400 VDC, output from 50 Hz to 1600 Hz
- Design and construction to NHB-5300, MIL-E-16400, NAVMAT P-4855A, WS 6536E, MIL-STD-2000 and other aerospace and military specifications

MODEL 3031R
DC-DC 80W
full hybrid
"The mouse that roared!"



MODEL 2536
DC-DC 75W, part hybrid
This unit is in terrific shape!

MODEL 2549
AC-DC 600W, all discrete
We call this unit "Arnold"

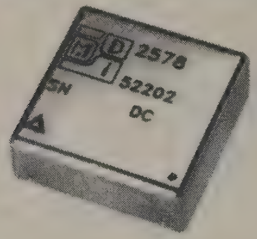
5 Watt HYBRID

DC-DC CONVERTERS



Features

- Completely self contained Thick Film Hybrid DC-DC Converter
- For MIL-STD-704/1275 applications
- T²L inhibit function
- Fully isolated design
- Single, dual or triple outputs
- Current limiting, power on soft start
- 200 kHz operation for low ripple and fast response time
- No external capacitors required
- High reliability screening available, specify "M" (e.g. "2578M-S05")
- Full hermetic package
- Radiation hardened available
- Internal EMI filter

Specifications

INPUT: 28VDC nominal
  Range: 16 to 50 VDC continuous.
  Survives 80 V transients/MIL-STD-704
  Current: 200 mA typical at full load
OUTPUT: Voltage & Current (see chart)
REGULATION: (see chart)
RIPPLE: 30 mV peak-to-peak, typical
PROTECTION: Short circuit protection by current limit.
ISOLATION:
  Input to case: 500 VDC
  Input to output: 500 VDC
ENVIRONMENT:
  Operating temperature:
    - 55°C ambient to +85°C case
  Linearity derates to zero at 115°C
  Storage temperature: -55°C to +150°C
  Case rise 30°C typical at full load
  Shock: 50G
  Acceleration: 500G
  Vibration: 30G
MECHANICAL:
  Dimensions: 1.08" x 1.08" x 0.380"
  Terminals: PC board mount
  Case: Kovar header, tin plate cover
  Weight: 0.5 ounces

We can modify these units to meet your custom converter requirements.

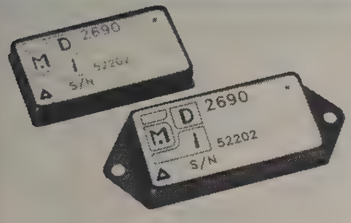
4-6.5 Watt HYBRID

RAD HARD DC-DC CONVERTERS

FULL FEATURE SERIES 2690R



ADD "F" FOR OPTIONAL FLANGE

Features

- Specifically designed for redundant or individual space applications
- Completely self contained Thick Film Hybrid DC-DC Converter
- No external filter caps required
- Fully isolated design
- For MIL–STD 704/1275 applications
- T^2L inhibit function
- Power on soft start
- 200 kHz operation for low ripple and fast response time
- RAD hard, 10^5 total dose
- Built-in EMI input filter meets MIL–STD 461C requirements CE01, CE03, CE07, CS01 and CS02
- Short circuit and overvoltage protection with externally selectable wiring option which yields latching/non-latching option
- Non-latching reset interval is externally programmable by choosing a capacitor to select the time constant.
- Capability of external synch for switching frequencies
- Built-in test capability with T^2L interface
- "S" level configuration available

Specifications

INPUT: 28VDC nominal
Range: 16 VDC to 50 VDC continuous
Survives 80 V transients
OUTPUT: Voltage & Current (see chart)
REGULATION: (see chart)
RIPPLE: 50 mV peak-to-peak, typical
ISOLATION:
Input to case: 500 VDC
Input to output: 500 VDC
ENVIRONMENT:
Full power from - 55°C to +85°C T_{case}
Linearly derates to zero from 85°C to 115°C
Storage temperature: -55°C to +150°C
Shock: 50G
Acceleration: 500G
Vibration: 30G
WEIGHT: 35 grams
DIMENSIONS: 2.12" x 1.12" x 0.375" (without flange)

OPTIONS:		
	2690	non-screened
	2690M	non-RAD High Rel
	2690E	125°C military
	2690L	50K RAD
	2690R	100K RAD
	2690S	space grade

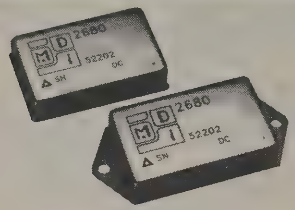
RAD HARD DC-DC CONVERTERS

FULL FEATURE SERIES 2680R



ADD "F" FOR OPTIONAL FLANGE

Features

- Specifically designed for redundant or individual space applications
- Completely self contained Thick Film Hybrid DC-DC Converter
- No external filter caps required
- Fully isolated design
- For MIL–STD 704/1275 applications
- T²L inhibit function
- Power on soft start
- 200 kHz operation for low ripple and fast response time
- RAD hard, 10^5 total dose
- Built-in EMI input filter meets MIL–STD 461C requirements CE01, CE03, CE07, CS01 and CS02
- Short circuit and overvoltage protection with externally selectable wiring option which yields latching/non-latching option
- Non-latching reset interval is externally programmable by choosing a capacitor to select the time constant.
- Capability of external synch for switching frequencies
- Built-in test capability with T²L interface
- "S" level configuration available

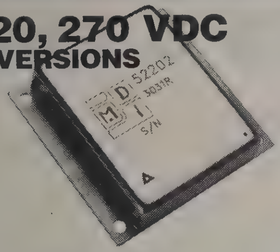
RAD HARD DC-DC CONVERTERS

SERIES 3031R, 3041R, 3051R

28, 120, 270 VDC
INPUT VERSIONS



Features

- Specifically designed for redundant or individual space applications
- Completely self contained Thick Film Hybrid DC-DC Converter
- No external filter caps required
- Fully isolated design
- T^2L inhibit function
- Power on soft start
- 200 kHz operation for low ripple and fast response time
- RAD hard, 10^5 total dose
- Built-in EMI input filter meets MIL–STD 461C requirements CE01, CE03, CE07, CS01 and CS02
- Short circuit and overvoltage protection with externally selectable wiring option which yields latching/non-latching option
- Non-latching reset interval is externally programmable by choosing a capacitor to select the time constant.
- Capability of external synch for switching frequencies
- Built-in test capability with T^2L interface
- "S" level configuration available

10 & 20 Watt

DC-DC REGULATED CONVERTERS

SERIES 2639 & 2649

Features

- Available in single & dual output
- 1.56 watts/cubic inch (#2639)
- 2.78 watts/cubic inch (#2649)
- Silicon rubber encapsulation
- Environmentally rugged for military application
- Operates down to zero load

Specifications

INPUT:
  28VDC nominal
  Range: 22 to 40 VDC cont.
  50VDC for 1 second maximum
  Reverse polarity protected to 50VDC
  Current (#2639):
    530 mA typical at full load
  Current (#2649):
    1020 mA typical at full load
OUTPUT:
  Voltage and Current (see chart)
  Voltage Adjustment: ±10% at full load
MINIMUM LOAD: zero
REGULATION: (see chart)
RIPPLE: (see chart)
  Frequency: 150KHz ± 20%
PROTECTION: Short circuit protection by current limit.
ISOLATION:
  Input to case: 500 VDC
  Input to output: 1000 VDC
ENVIRONMENT:
  Operating temperature:
    - 55°C ambient to +100°C case
  Storage temperature:
    - 55°C to +150°C
  Case rise 30°C typical at full load
  Meets or exceeds MIL-E-5400
EMI: add “E” to model number to specify an imbedded MIL-STD-461 EMI filter that meets CE01, CE03, CE07, CS01 and CS02 requirements
MECHANICAL:
  Dimensions (#2639): 4" x 2" x 0.8"
  Dimensions (#2649): 4" x 2" x 0.9"
  Terminals: turret solder type
  Case: extruded aluminum with black anodized finish
  Encapsulation: RTV silicon rubber
  Weight (#2639): 9.6 ounces
  Weight (#2649); 11 ounces

P/N 600183

Options:

- ☐ Radiation hardened
- ☐ Military environment required
- ☐ MIL STD 461 RFI/EMI
- ☐ MIL STD 2000
- ☐ Short circuit protection
- ☐ Overvoltage protection
- ☐ Inhibit function
- ☐ BIT
- ☐ Remote sensing
- ☐ Sync capability
- ☐ Reverse polarity protection
- ☐ Hold-up
- ☐ Input/Output connectorization

We can meet your custom requirements.

2 Watt High-Volt

DC-DC ADJUSTABLE CONVERTERS

SERIES 2682

Features

- Miniature package designed for board mounting
- Excellent line and load regulation
- Adjustable over a 4:1 range
- Encapsulated for environmental resistance
- Either output may be grounded (please specify)

Specifications

INPUT:
28VDC nominal
Range: 20 to 40 VDC
Survives 80 V transients
OUTPUT:
Voltage and Current (see chart)
REGULATION: (see chart)
RIPPLE: 1% p-p typ. (see chart)
ISOLATION:
Input to case: 1000 VDC
Input to output: 4000 VDC
ENVIRONMENT:
Operating Temperature
Full Power: -55°C to +85°C
Storage: -55°C to +150°C
Shock: 50g
Acceleration: 500g
MECHANICAL:
Dimensions: 2.56" x 1.31" x 0.55"
Terminals: 0.03" x 0.5"
Case: aluminum
Weight: 55 grams

FILTERED DC/DC CONVERTERS

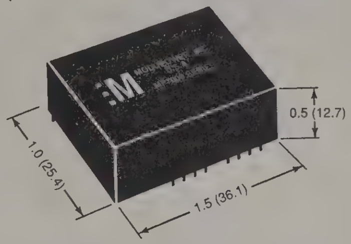
DO YOU NEED 3.3 VOLTS AND A WIDE-RANGE-INPUT DC/DC CONVERTER, TOO?

The MP7101 converts 5V to 3.3V: the MP7008 converts 7-35V to 3.3V

THE MP7101 5V TO 3.3V CONVERTER/REGULATOR IS HASSLE-FREE. This non-isolated converter requires no external filters and does not generate EMI or spikes. It includes short-circuit protection and thermal shutdown.

Vout: 3.3V ± 5%
Load Regulation: 0.3%
Iout: 1A continuous

Vin Range: 4.5V to 10V
Output Noise: 0.1mV(rms)
T(operating): -25°C/+85°C



MP7xxx and MP7101 Dimensions

These modules are a high-efficiency means of providing a regulated output from raw DC or DC/DC conversion. They are non-isolated, and have pulse-by-pulse current limiting and thermal shutdown. A logic-level ON/OFF control is also provided.

The MP7xxx series accepts 7-35V, and gives fixed and adjustable outputs

Part #	Vin Range V	Vout NOM. V	Iq mA	Eff min %	Ripple +Noise mVpp
MP7001	7-35	5.00	15	82	50
MP7003	14-35	12.00	15	88	100
MP7004	17-35	15.00	20	92	100
MP7008	7-35	3.3	20	80	50
MP7009	7-35	ADJ*	20	80	100

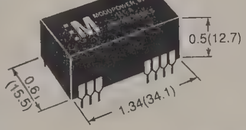
All Devices: Current Limit = 3.2A; I (standby) = 0.5mA; Input Ripple = 200mV;
*ADJ range is 1.33V to 30V; Vout is within approximately ± 5%.

DO YOU NEED AN ISOLATED DC/DC CONVERTER?

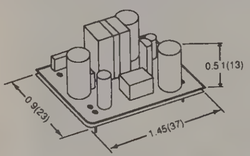
MP9xxx SERIES CONVERTERS NEED NO FILTERS AND PRODUCE NO NOISE. They mount on PC boards and have very low height requirements. The MP90xx, 91xx, 92xx, and 93xx are particularly low-cost modules. The MP90xx and 92xx use a 24-pin dual-in-line package, while the MP91xx is unpotted.

MP9xxx Series Converters are Fully Isolated, Allowing Inverted-Output Operation

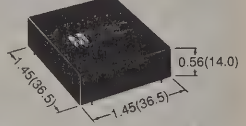
Series	PWR typ W	Isolation V
MP90xx	2	500
MP91xx	1.8	2000
MP92xx	2	2000
MP93xx	2	2000
MP94xx	4-6	500
MP96xx	20	500



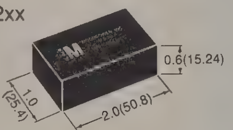
MP90xx & MP92xx



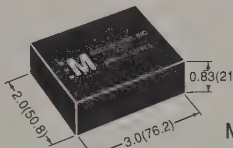
MP91xx



MP93xx



MP94xx



MP96xx

All Devices: Load regulation = ± 0.5%; T (oper) = 0°C/70°C (MP96xx is -20°C/+105°C);
MP94xx case is metal: all others are non-metallic; Short-circuit protected; Input and output filters (C, LC, or Pi)

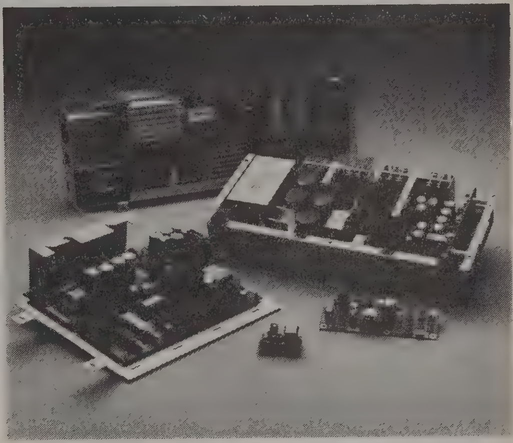
MultiPower, Inc.

YOUR POWER SUPPLY PARTNER

A Spectrum Electronics Corporation

Custom Switching Power Supplies
3 Watts Single Output To 2000 Watts And Over 20 Outputs

TYPICAL POWER ASSEMBLIES



FEATURES:

- POWER FACTOR CORRECTION
- BATTERY BACK-UP
- INTERGRATED HV/ LV DESIGNS
- CUSTOM PACKAGING
- SURFACE MOUNT APPLICATIONS

APPLICATIONS

- MEDICAL
- TEST AND MEASUREMENT
- FLAT—SCREEN TECHNOLOGY
- COMMUNICATIONS
- SPECIALTY COMPUTER
- INDUSTRIAL AND ROBOTICS

MultiPower, Inc.'s Switching Power Supplies Are Custom Engineered For OEM's:

- DESIGNS ACCOMMODATING A WIDE RANGE OF VOLTAGE AND WATTAGE REQUIREMENTS
- SHORTENED LEAD TIMES FROM QUOTES TO PROTOTYPES
- MAGNETIC DESIGN AND MANUFACTURING IN-HOUSE
- COMPLY WITH DOMESTIC AND INTERNATIONAL EMI/RFI REGULATIONS AND MIL-STD
- LOW LEAKAGE SWITCHING SUPPLIES DO NOT REQUIRE HEAVY ISOLATION
- SAFETY AND REGULATORY CERTIFICATION STAFF IN-HOUSE UL / CSA / TUV / IEC / FCC
- QUICK TURN QUOTES AND PROTOTYPES

Adapters

Multi Products International has been designing and manufacturing adapters for many years and today has one of the finest and most complete lines in the industry. Our expertise has led to the development of many innovations for custom use that have now become standards. Typical applications are for use with computer peripheral equipment, modems, medical electronics, office equipment, home appliances and other items which require a low voltage external power source.

Our adapters are designed to and/or listed by UL-CSA-VDE-CEE as required. Outputs are 3-24V AC or DC up to 40 VA. A large inventory is always on hand. In addition to the listed items, we can design and manufacture to meet your exact requirements.

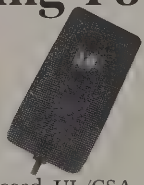
External Switching Power



When size & weight are critical, use our external switching power supplies. Available in table top configurations—up to 40 Watts. Configurations include single, double and triple outputs of +5, +/-12 and +/-15 VDC. All of these units are made to meet or exceed UL/CSA and VDE standards, providing higher capabilities in small, off the board packages. Custom design switching power supplies are also available in a variety of low profile and output ratings.

Regulated Single Output Power Supplies

Multi Products manufactures a large variety of regulated single output power supplies. Our power supplies are designed to and/or listed by UL-CSA-VDE-TUV as required. This allows the end user the convenience of incorporating our supplies into the final product, thus avoiding the costly and complicated agency approval process.

Below is a partial list of our single output models and general specifications. Call for options & sizes.

Regulated Triple Output Power Supplies

Multi Products International has become a major supplier of triple output supplies over the last several years. All of our triple output supplies meet or exceed the specifications of applicable safety agencies.

In addition to the products shown, MPI engineers will design custom supplies to meet specific requirements.

Modular Power Subsystem
S6000 SERIES

- ***Up to six DC Supplies in a single 5-1/4 inch inch chassis.***
- ***Configureable with AC supplies and electronic load modules***
- ***Constant Power operating envelope.***
- ***High efficiency design reduces size, weight and waste heat.***
- ***Controllable via IEEE-488.2, MATE/CIIL, SCPI or VXIbus Programmer.***

S6000 POWER SUBSYSTEM
POWER
TALK
LISTEN
REMOTE
OUTPUT

The S6000 Series programmable power supplies are designed for use in Automatic Test Equipment (ATE) requiring a wide variety of programmable sources in a minimum of rack space. The S6000 combines high density packaging with comprehensive selftest and control capability.

More Power and Outputs

Up to six single output (400W) or (200W) DC modules can be installed into a single 5-1/4 inch chassis. Because these modules may be paralleled, a maximum of 2,400 watts is available per chassis. Six additional slave chassis may be controlled from a single control chassis.

Constant Power Design

The DC power modules are "constant power" designs, meaning they can deliver current up to their maximum power rating at any point within their operating envelope. No longer is it necessary to select separate power supplies for high voltage and low voltage requirements. This benefits the overall station design because fewer modules are needed to cover a wider range of UUT requirements.

Greater Efficiency

Greater than 80% operating efficiency is achieved using an advanced power conversion design. This means less waste heat, reduced size and weight and improved station reliability due to lower operating temperatures. And if a failure does occur, the internal selftest firmware isolates faults to the module level for ease of maintenance and repair.

DC Module Selection

No. of Outputs	Power per Output	Voltage Range	1 (Max)	1 (FS)
LOW VOLTAGE MODULES				
Single Single	200W 400W	0 to 10 VDC 0 to 10 VDC	30A 60A	20A 40A

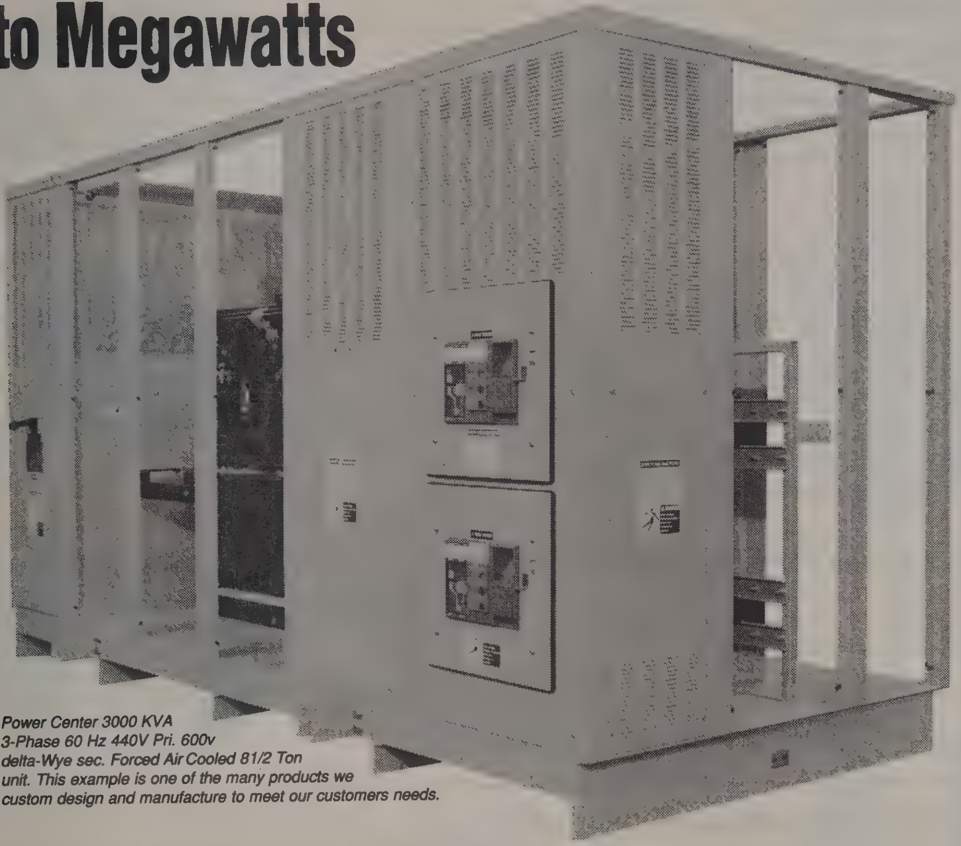
NWL... the Source for Custom AC/AC & AC/DC Power Supplies, Converters and Controllers from Watts to Megawatts



Power Center 3000 KVA 3-Phase 60 Hz 440V Pri. 600v delta-Wye sec. Forced Air Cooled 81/2 Ton unit. This example is one of the many products we custom design and manufacture to meet our customers needs.

Technical Diversification Highlights

- Silicon Controlled Rectifier (SCR) Supplies
- Reactors, Chokes and Filters
- High or Low Amperage and Voltage
- Regulated; Voltage, Current and Power
- Polarity Reversing Power Supplies
- AC/AC & AC/DC Power Supplies and Controllers
- Microprocessor Based Controls Systems
- High Voltage Isolation Transformers
- High Voltage AC & DC
- High Current AC & DC
- Transformers (Oil, Silicone, Water-Cooled, Dry and Epoxy)

Capability Range

- **Voltage:** Up to 20 KV input, Up to 300 KV output
- **KVA:** Up to 6,000
- **Current:** Up to 40,000 amps DC or 50,000 amps AC output

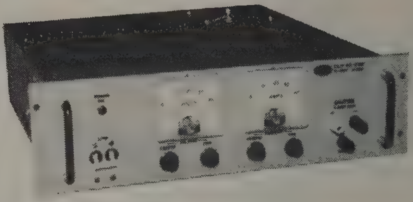
ORAM CUSTOM DESIGNS AND MANUFACTURES POWER SUPPLIES AND TRANSFORMERS TO ANY SPECIFICATIONS. CONTACT US WITH YOUR REQUIREMENTS.

POWER SUPPLIES

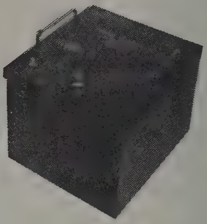
Low Voltage/High Current Power Supplies–DLR Series

☐ Low voltage (up to 1000V DC), high current (up to 5000A).
☐ Extremely low ripple with very good regulation and stability.
☐ Overcurrent, overvoltage, and overtemperature protection.
☐ Available in customer specified enclosures.



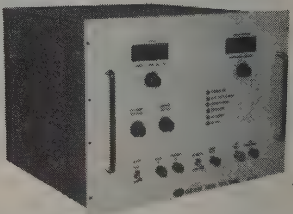
Power Packs–P Series

☐ Output voltage range from 3KV to 100KV.
☐ Output current range from 1mA to 20mA.
☐ Single phase input at customer specified input voltage.
☐ Fixed output polarity or floating pos-neg output.
☐ Oil filled, epoxy filled, or other insulating medium available.
☐ Mounting by ¼-20 mounting studs at bottom of each unit.
☐ Surge limiting resistors.
☐ Estimated life exceeds 30,000 hours at rated voltage and current.
☐ Custom requested features and specifications available.



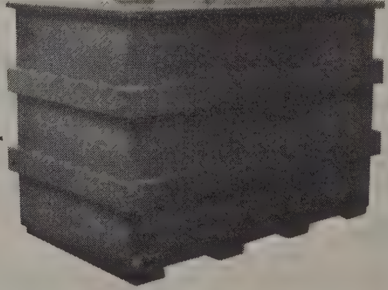
Unregulated High Voltage Power Supplies–DS Series

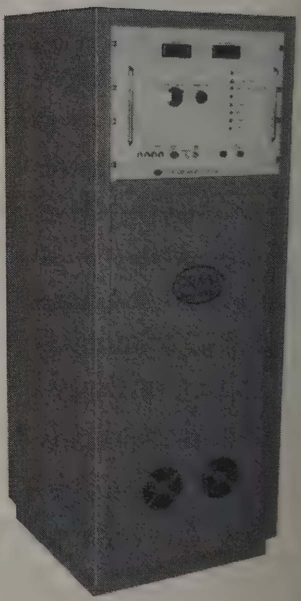
☐ Output voltage range from 1KV to 500KV.
☐ Output current range from 1mA to 50A.
☐ Adjustable overload and overvoltage trip point.
☐ Standard ripple is 2% rms of rated voltage. Ripple reduction of $^1/_{10}$ or $^1/_{100}$ is available as an option.
☐ Standard enclosure is in a rack mount chassis or customer specified.



Regulated High Voltage Power Supplies–DSR Series

☐ Output voltage from 1KV to 500KV.
☐ Output current range from 1 milliampere to 50 amperes.
☐ Regulated power supply with voltage regulation or current regulation or automatic crossover regulation between voltage and current; regulation 1%
☐ Standard is 2% rms of rated voltage. Ripple reduction of $^1/_{10}$ or $^1/_{100}$ available as an option.
☐ Standard enclosure is in a rack mount chassis or customer specified.





Tube Regulated High Voltage Power Supplies–DTR Series

☐ Output voltage from 1KV to 500KV; reversible polarity available as an option.
☐ Output current range from 1 milliampere to 50 amperes.
☐ Standard regulation is ±0.05% for line and load with option for regulation of ±0.01% or ±0.001% for line and load.
☐ Standard ripple is 0.05% with option for ripple of 0.01% or 0.001%
☐ Stability is 0.02% short term and 0.05% per 8 hour period, better stability available.
☐ Standard enclosure is in a rack mount chassis or customer specified.

ORAM

Telephone: (409) 258-5553 FAX: (409) 258-5555

Switching Power Supplies–DSF Series

☐ Output power level to 10KW; output voltage to 200KV with higher voltage available, please consult factory.
☐ Precise regulation with automatic crossover between voltage and current regulation.
☐ Standard regulation is ±0.05% for line and load, better regulation available.
☐ Ripple is 0.01% rms (0.1% above 100KV).
☐ Reversible polarity models available.
☐ Remote programming capability.
☐ High efficiency at maximum power output.
☐ Standard enclosure is in a rack mount chassis or customer specified.

ORAM HIGH VOLTAGE

TEST INSTRUMENTS

Liquid Dielectric Testers

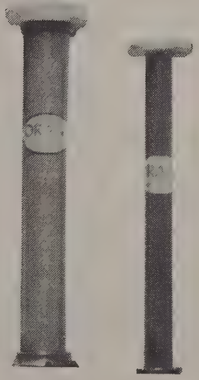
☐ Voltage Range from 50KV to 90KV.
☐ Memory meter to record breakdown voltage.
☐ Automatic motorized rise rate with manual dwell at any voltage.
☐ Accurately test for breakdown voltage of insulation oils in accordance with ASTM specifications.
☐ Customized units Features.

Non-Destructive AC/DC Hipot and Insulation Tester

☐ Selectable AC (15KV) or DC (40KV) output with function indicator.
☐ Audible failure signal.
☐ Continuously adjustable overload sensitivity control from 50µA to 5mA for non-destructive testing.
☐ Gravity operated output shorting solenoid.
☐ Enclosed in either bench top or 19″ rack mount.
☐ Customized units Features.

Resistive Voltage Divider

☐ High input impedance precision resistive divider network.
☐ Wide range of rated voltage, corona free.
☐ Accuracy of 0.5%, 0.25% or 0.1% available.
☐ Portable compact construction with BNC connectors.
☐ Custom division ratios.
☐ Digital or analog meter readout.



Transformers are available with a wide variety of voltage ratings and sizes to suit most customer needs.

☐ High Voltage—air or oil or epoxy insulation.
☐ High Voltage Isolation—air or oil or epoxy insulation.
☐ Filament—isolation with air or oil or epoxy insulation.
☐ High Voltage Filter Chokes.
☐ Saturable Core Reactors.

Transformers features custom designing with customer specified input and output voltage(s). Operation frequency of 60 hertz or 50 hertz or 50/60 hertz or 400 hertz or customer specified operation frequency are available, specify when inquiring.

DC to DC Converters

A broad range of DC/DC Converter products designed to support your company's Networking Applications.
Features : Low Common Mode Noise, Input Filtering, Regulated & Unregulated and Input/Output Isolation.

PCA Part No.	Standard Pkg and Pin Connection	Optional † Pkg and Pin Connection	V in Volts	V in Tolerance (%, Max.)	V out Volts (± 5%)	I out mA (Max.)	Ripple mV P-P (Max.)	Efficiency % (Typ.)	Isolation Vrms	Regulation	Enable

Performance Specifications

Input	28VDC ± 2 Volts
Anode Voltage	25KV (less than ± 1%)
Anode Current	0-1.2 MA
Ripple (P-P)	7.5 Volts (P-P) @ 1.2 MA
Temperature Coefficient	100 PPM/°C
Line Regulation	.05%
Focus Voltage	5-8 KV
G2 Voltage	200-1000 VDC
G1 Voltage	−150 VDC
Operation Temperature	−55° to 70°C

High Voltage Power Supplies

Engineers know us for quality and innovation in the design and manufacture of deflection components for CRT Displays and television cameras. High Voltage Power Supplies are part of the new Penn-Tran's team of deflection components, exactingly designed, manufactured and backed by our 45 years as a pioneer in the field.

These power supplies are suitable for multiple customer-specified applications, or we will design a prototype to suit your application. UL listed file.

GEOPOWER, INC.

CALL US WHEN YOUR NEED CUSTOM POWER AT OFF-THE-SHELF PRICES

We are a leading, international supplier to major **Telecommunications, Scientific, Medical** (UL-544), **and Computer** peripheral equipment manufacturers. We design and manufacture a wide range of commercial and high grade industrial power supplies. Our extensive product line includes:

- ☐ **SWITCHING, LINEAR and ferroresonant power supplies**
- ☐ **AC to DC and DC to AC converters**
- ☐ **Power levels from 10 watts to over 2,000 watts**
- ☐ **High frequency/high power density resonant converters (>500 kHz)**
- ☐ **High frequency saturable reactor post-regulators**
- ☐ **Battery backup/battery chargers**
- ☐ **Parallelable devices for N+1 redundancy**
- ☐ ***Low distortion ringers for Telecommunications, Linear and H.F. 8 to 100 Watts***

All our power products meet applicable UL, CSA, VDE, TUV and BABT requirements and comply with FCC class A or B.

In-house engineering personnel guarantee. Strict quality control, on time delivery and close co-ordination between our engineering team and yours is the basis of our world-class reputation.

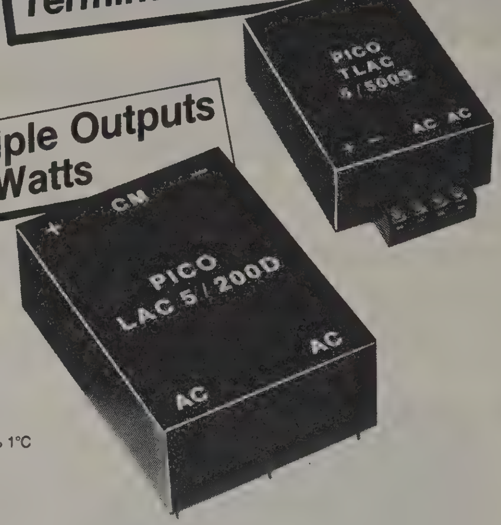
SERIES LAC-TLAC

Hi Reliability Isolated Regulated AC-DC Linear Modules

TLAC Standard Terminal Strip Modules

Single, Dual & Triple Outputs Up to 10 Watts



TYPICAL CHARACTERISTICS:
Test conditions: 25°C ambient
Input voltage: 105-125 VAC
Input frequency: 50 to 440 Hz
Line/load regulation: Consult chart
Output voltage tolerance: ±1.0%
Operating temperature: −25°C to +70°C
Output voltage temperature coefficient: 0.02% 1°C
Storage temperature: −55°C to +85°C
Typical isolation: 100 megohms
Short circuit protection: Continuous

Series LAC-TLAC AC-DC Linear Modules

FEATURES:
- Terminal strips available-TLAC
- Low output ripple = 1 to 2 MV RMS
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Excellent voltage regulation
- Excellent load regulation
- Up to 9 watts output power at 70°C ambient
- Typical isolation 100 megohms
- Single, dual and triple outputs
- No heat sink required
- No output capacitor required

This series of linear AC to DC Power Supplies are available in 46 different models. All single, dual and triple output models offer excellent line and load regulation, while maintaining the output voltage ripple at a minimum. Continuous short-circuit protection and isolation are also standard on all models. The convenience of PC mounting, with mounting inserts, allows the use of this encapsulated unit in harsh environments, and the TLAC models offer a terminal strip for easy electrical connection.

Series SW-Dual Output-AC-DC Switching Power Supplies

.5″ Height

FEATURES:
- Excellent line regulation ±1% (90–130 VAC)
- Excellent load regulation, from 25% to 100%, ±2%
- Continuous short circuit protection
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Isolation: 100 megohms at 1200 VRMS
- Wide input 90–130 VAC, 47 to 440 Hz

This series of switching AC-DC power supplies are available in 18 different models. All single and dual outputs are isolated and offer excellent line and load regulation. These units have continuous short circuit protection, require no output capacitors and will operate from −25°C to +70°C ambient, with no heat sink or electrical derating required. The hi-reliability SW Series, up to 15 Watts, is the design choice for your stringent industrial applications.

TSW Standard Terminal Strip Models Available***

TYPICAL CHARACTERISTICS:
Test conditions: 25°C ambient
Input voltage: 90–130 VAC, 47 to 440 Hz
Converter frequency: 200 – 800 KHz
Operating temperature: −20°C to +70°C ambient
Storage temperature: −55°C to +105°C
Output voltage temperature coefficient: 0.02%/°C
Isolation: 1200 VRMS

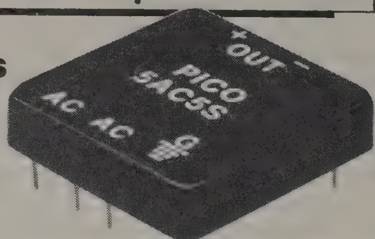
SERIES 5AC

Hi Reliability Hi Efficiency/Isolated Single and Dual Outputs Regulated 5 Watt AC-DC Switchers

Lowest Profile! 0.5"ht. up to 5 Watts



TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient
Input voltage: 90-130VAC (47-440Hz)
Line/load Regulation: See specifications below
Converter frequency: 25-35 KHz typ.
Operating temperature: –25°C to +70°C ambient
Output voltage temperature coefficient: 0.02%/°C
Storage temperature: –55°C to +125°C
Isolation: 1200V RMS
Short circuit protection: Continuous

OPTIONS AVAILABLE

- *Expanded operating temp (–55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (–55°C to +125°C)*
- *Hi Temp, burn in*

No Heat Sink or Electrical Derating Required

Low Capacity Option

All units can be manufactured with isolation capacity of 50pF. Contact factory.

5 Watt AC-DC Switchers

FEATURES:

- Low profile 0.500"
- Low weight
- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Excellent voltage regulation
- Excellent load regulation
- Up to 5 watts output power at 70°C ambient
- Low output ripple
- Isolation 1200V RMS
- Single and dual outputs
- No heat sink required
- Miniature size
- No output capacitor required
- Shielding

This series of low profile, 5 Watt AC to DC switchers come in 7 different models. These units offer high efficiency and precise regulation throughout the operating temperature range of –25°C to +70°C ambient, with no heat sink or electrical derating required. The 5 AC series keeps a maximum *0.500"* height while still offering you 1200 volts RMS isolation in a rugged encapsulated case. The convenience of PC mounting and the availability of three outputs should aid your circuit design.

SERIES 5AC SINGLE OUTPUT/INPUT VOLTAGE 90-130VAC (47-440Hz) (OPTIONAL 170-240VAC, 47-440Hz**)

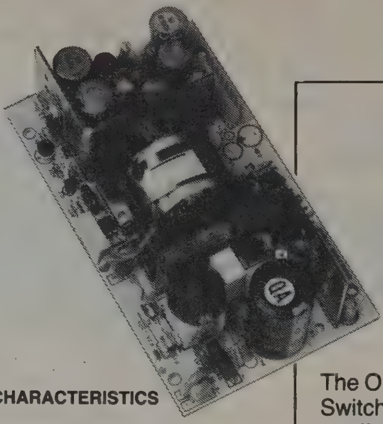
SERIES OFU

30-40-65 Watt
Universal Input (85-264 VAC)
No Jumper Required
Agency Approved
Isolated
Short Circuit Protection



Open Frame PCB AC-DC Switchers

FEATURES:
- 85 to 264 VAC input
- 47 to 440 Hz
- UL-CSA-TUV certified
- Compact size
- Meets FCC/VDE-EMI requirements
- Hi-Reliability
- Over voltage protection
- Over current protection
- 100% hi-temperature testing
- Single-Dual-Triple outputs

The OFU Series of Open Frame AC-DC Switching Power Supplies are designed to offer the best of today's technical advancements. Standard features include small size, universal input, agency approvals, plus 100% burn-in. For a high reliable, low cost answer to your circuit requirements, let PICO simplify your power needs for computer designs or industrial applications.

TYPICAL CHARACTERISTICS:

Meets conduction limits: FCC 20780 Level B, VDE 0871 Level A

Meets or exceeds:

UL 1950

CSA 1402C

EN 60950/IEC 950

Efficiency: 65% min. @ full load

Hold-up time: 16 msec typical

Line regulation: ±0.5% max. @ full load

Inrush current: 30 Amps @ 115 VAC
60 Amps @ 230 VAC

Isolation: 3750 VAC—input to output
1250 VAC—input to ground

ELECTRICAL CHARACTERISTICS ALL MODELS:

Input voltage: 85 to 264 VAC

Input frequency: 47 to 440 Hz

Input current:	OFU 30	OFU 40	OFU 65
115 VAC	0.65A	0.85A	1.0A
230 VAC	0.35A	0.45A	0.6A

Over voltage: 5.6 to 6.6V threshold on 5V output models

Over current: All outputs short circuit protected

Ripple/noise: 1% p-p max. on all models

Temp. coefficient: ±0.04%/°C

OFU3-30 Watt, 85-264 VAC Input

For manufacturers' sales offices, see yellow pages

The OFB Series of fully enclosed AC-DC Switching Power Supplies are designed to offer the best of todays technical advancements. Standard features include small size, jumper selectable input voltage, meeting agency requirements and 100% burn-in, for a high reliable, low cost answer to your circuit requirements. One to four standard outputs ease your distribution problems for computer designs or industrial applications.

TYPICAL CHARACTERISTICS:

Input voltage: 90-130 VAC or 180-260 VAC jumper selectable

Input frequency: 47 to 440 Hz

Input current:	OFB 5	OFB 13
115 VAC	0.9 A	2.8 A
230 VAC	0.5 A	1.5 A

Ripple and noise: 1% p-p max.

Short circuit protection: All outputs

Over voltage protection: Output one all models

Temp. coefficient: ±0.04%/°C

Efficiency: 65% min. @ full load

Line regulation: ±0.5% max. @ full load

Isolation: Input to output 3000 VAC
Input to ground 1500 VAC

Operating temp: 0°C to +50°C

Storage temp: −20°C to +85°C

Hold-up time: 20 msec typical

EMI requirements: Meets requirements FCC 20780 Level B, VDE 0871 Level A

Safety requirements: Model OFB 5 certified,
UL-1950,
CSA-1402C,
EN 609050/IEC 950.

Model OFB 13 meets requirements of
UL-1950,
CSA 1402C,
IEC 950.

The OFJ Series of AC-DC Switching Power Supplies are designed to offer the best of todays technical advancements.
These models are available in 100 and 200 watts. Standard features include jumper selectable input voltage, meeting agency requirements and 100% burn-in, for a high reliable, low cost answer to your circuit requirements. 14 models with up to 5 standard outputs provide solutions for power distribution problems.

TYPICAL CHARACTERISTICS:

Input voltage: 90–130 VAC or 180–260 VAC jumper selectable

Input frequency: 47 to 440 Hz

Input current:	OFJ 10	OFJ 20
115 VAC	2.2 A	4.2 A
230 VAC	1.2 A	2.4 A

Ripple and noise: 1% p-p max.

Short circuit protection: All outputs

Over voltage protection: Output one all models

Temp. coefficient: ±0.04%/°C

Efficiency: 65% min. @ full load

Line regulation: ±0.5% max. @ full load

Isolation: Input to output 3750 VAC
Input to ground 1750 VAC

Operating temp: 0°C to +50°C

Storage temp: −20°C to +85°C

Hold-up time: 20 msec typical

EMI requirements: Meets requirements FCC 20780 Level B, VDE 0871 Level A

Safety requirements: Meets or exceeds UL-1950, CSA-1402C, IEC 950

OFJ 20-Input 90-130 VAC or 180-260 VAC

PILLAR INDUSTRIES

MANUFACTURER OF

STANDARD/CUSTOM AC/AC OR AC/DC ADAPTORS

- **UL, CSA Approved Power Supplies**
- **VDE Approved European Power Supplies**
- **JIS Approved Japanese Power Supplies**
- **British (U.K.) Style Power Supplies**
- **Switching Power Supplies**
- **Full Range Power Supplies**
- **Linear Power Supplies**
- **Battery Chargers**

GENERAL SPECIFICATIONS

- Input Rating:

120 VAC	60Hz	UL/CSA	North America.
220 VAC	50Hz	VDE/TUV	Europe.
100 VAC	50/60Hz	JIS	Japan.
240 VAC	50Hz	BSI/SAA	U.K/Australia/S. Africa.

- Tolerance of Output Voltage: ±0.5V at rated load.
- Dielectric Withstand Voltage: UL/CSA JIS 1500 VAC/One Minute.
  VDE BSI TUV SAA 4000 VAC/One Minute.
- Humidity: 95%
- Storage Temperature: -40°C to +70°C.
- Operation Temperature: -10°C to +40°C.
- Output Cord: 6 feet, AWG 24 or heavier.
- MTBF.: 30000 hours at 25°C, full load.
- Q A STD: MIL-STD-105D
- Customer Design Are Available On Request To Meet Exact Specification.

PILLAR INDUSTRIES/1780 EVERGREEN STREET/DUARTE, CA 91010/TEL: 818-358-1337/FAX: 818-358-0398

PILLAR INDUSTRIES Manufacturer of AC ADAPTORS

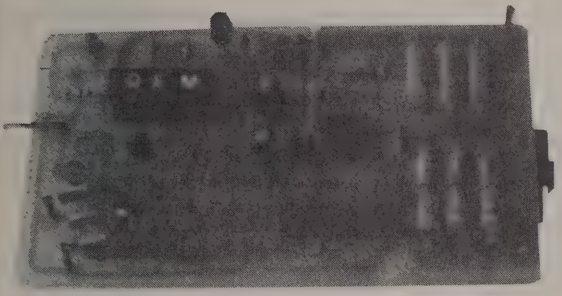
30 WATT AC/DC DESKTOP POWER SUPPLIES HAVE 90 TO 260VAC INPUT RANGE

Single, dual, and triple outputs are available. The most common outputs are 5, + or -12VDC, and + or -15VDC. Any combination of outputs may be used, provided that the total output does not exceed 30 watts.
All outputs have short circuit protection with automatic recovery. An AC input cord and a DC output cable is supplied with each unit. Size: 5.1 x 2.75 x 1.25 inches.

BATTERY CHARGERS FOR TELECOM EQUIPMENT



Battery Charger for most popular telephones including Motorola, NEC, OKI, and UNIDEN. Batteries are completely discharged, then fully recharged within 1 hour, via use of the unique current charge curve.

BATTERY CHARGERS FOR HAND TOOLS

A broad line of battery chargers are available for battery operated hand tools. All feature our unique rapid charging capability. Phone or Fax your requirements to us for a quote.

BATTERY CHARGERS FOR AUTOMOTIVE & ELECTRIC CARS

BATTERY CHARGER
15 AMP
12 VDC

Battery Chargers for the lead-acid batteries used in Electric Cars. Rated at 12VDC @ 15A. Will completely charge two 12VDC batteries within 4 hours.

DC MOTOR SPEED CONTROLLERS

For:
12VDC @ 10A
12VDC @ 20A
12VDC @ 30A
12VDC @ 40A

TEST EQUIPMENT FOR AC/AC & AC/DC ADAPTORS

ADAPTOR TESTER, provides maximum load of 3A, tests input and output power, no load and full load voltages, and ripple. Performs HI-POT tests and provides printed output of all test data.

MINIGLOSSARY
ENCAPSULATION

MATERIALS/HANDLING

Catalyst: A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

Conformal coating Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

Curing agent: See catalyst.

Hardener: See catalyst.

Hermetic: A permanent gas-tight seal.

RTV: Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

Thermoplastic: Plastic materials which can be made to flow *repeatedly* with the application of heat.

Thermosetting: Plastics which once cured cannot be made to flow again.

Thixotropy: The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

Viscosity: Measured in units of *poise* or *centipoise.* The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

PROCESSING

Casting: Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

Dip coating: Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

Embedding: Wherein an encapsulant substantially fills all voids in and about an assembly.

Impregnation: A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

Molding: Similar to casting except this process usually implies multicavity molds and costly machines.

Potting: Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

DIELECTRIC

Arc resistance: An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

Breakdown voltage: The voltage at which an encapsulant fails electrically.

Capacitance: The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

Corona: A luminous discharge of electricity due to air ionization when a certain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

Dielectric: Insulator (Nonconductor.)

Dielectric constant: The property of a material that determines its ability to store electrostatic energy.

Dielectric strength: The ratio of dielectric breakdown to the thickness of insulating material.

Dissipation factor: The ratio of a dielectric material's energy losses.

Flashover: Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

Insulation resistance: (IR) An insulating material's total DC leakage.

Surface resistivity: The resistance of the surface of an insulating material to the flow of direct current.

Voltage endurance: Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

Volume resistivity: The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

Pioneer Magnetics

Your best choice in high power switching supplies

It's the broadest line in the industry. From 500 to 3000 watts, single or multiple output. AC/DC or DC/DC. All the standard features and options you'll ever need or want. You can optimize your design with the International Line supplies, designed to meet tough noise and safety specs for worldwide applications. Pioneer power supplies are setting industry standards for reliability, performance and affordability.

- More than 400,000 units in the field.
- Over 250,000 hours MTBF.
- Conservatively rated for full performance at maximum output.
- Internal EMI filtering.

The International Line–

First choice for precise DC output power.

- >.99 active power factor correction.
- Meets FCC and VDE level A conducted noise (150 kHz to 30 MHz) and level B radiated noise specs.
- Meets SELV level of IEC/VDE, UL and CSA safety standards (standard models approved).
- Certifications provided upon request with volume orders.
- Full output rating at 50°C ambient.
- 85% efficiency.
- Completely isolated output.
- OV, overload and reverse voltage protection.
- Soft start; no turn-on or turn-off overshoot.
- Self-contained forced-air cooling.
- No minimum load required; each channel independently regulated.

Specifications

AC Input

90-264 VRMS,
47-63 Hz, Single or Three Phase. Line dips to 70-140 VRMS.

DC Input

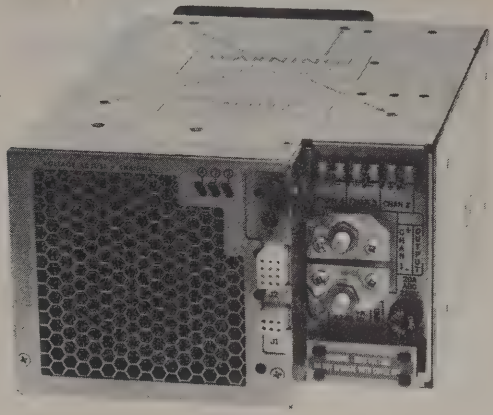
38-63 V continuous (70 VDC short term).

Pioneer Magnetics

Number one in high power switching supplies.

800-233-1745

1745 Berkeley St., Santa Monica, CA 90404
(310) 829-6751 • FAX (310) 453-3929



Dynamic Regulation:

International Line Units: Output Transient Response: 2% deviation (100mV deviation for units under 5V) with recovery to 1/2% in less than 500 μsec for a 25% load step, 1A/μsec slew rate.

P-P Ripple and Noise: 1% of nominal output at full load current, 20 Hz to 20 MHz bandwidth for 5V to 48V outputs. 50 mV for outputs less than 5V.

Static Regulation:

- Line: ±0.25% over full line range.
- Load: ±0.25% over no load to full load.
- Voltage Stability: ±0.1% after 30 min. warm-up for a 24-hr. period.
- Temperature Coefficient: ±0.02%/°C from 0°C to 50°C.

Over-Temperature Protection:

Supply is automatically latched off in the event of an over-temperature condition.

Standard Options:

- Power fail signal.
- Logic on/off.
- Crowbar.
- Remote programming/margining.
- Local margin check.
- Output tolerance status.
- Output power good signal.
- OV secondary channels.

Special Options

- Single channel battery backup.
- Single wire current sharing.
- Load sharing for power or redundancy.
- Tailored EMI filtering for system requirements.
- "Hot-Pluggable" versions of all products with "OR"-ing diodes for Fault Tolerant Redundant and N+1 applications.
- Power Shelf – 19" or 24" rack to hold "Hot-Pluggable" Power Supplies.
  Custom options can be designed to your exact requirements.

NEW!

High-Power Switchers Provide >.99 Power Factor Correction.

MEETS PROPOSED IEC 555-2.

If you're seriously interested in Power Factor Correction, you owe it to yourself to investigate Pioneer's new high-power switchers that use a patented resistor emulation PFC technique. It has made available a full range of single and multiple output switchers able to provide up to 42% more output power – 1KW from any standard 120 VAC, 15 A wall outlet and comply with UL's 12 A limitation.

Check these outstanding features:

- Meets UL 1012 and UL 1950, CSA 1402C and CSA 22.2 Standard No. 234 and 350, EN 60950, DIN VDE 0805/90, IEC 950.
- Meets VDE and FCC EMI specifications.
- Standard 5" x 8" package, 23 lbs. max.
- Insensitive to input voltage and frequency variations – 90-264 VAC, DC and 43-120 Hz.
- Eliminates input switching or strapping.
- Wide range of output power – 500 to 2500 W.
- No minimum load.
- 0 to 50°C operation at full load.
- Overvoltage/overcurrent/overtemperature protection.
- Soft start.
- Remote sense.
- No turn-on or turn-off overshoot.
- Completely isolated outputs.
- Self-contained forced-air cooling.

PFC Bulk Power Converters.

PROVIDES 375-390 VDC or 48 VDC TO CONVENTIONAL DC/DC CONVERTER OR DISTRIBUTED DC BUS NETWORKS. MEETS PROPOSED IEC 555-2.

- Meets UL, CSA and IEC safety standards.
- Meets VDE and FCC EMI specifications.
- >.99 active power factor correction.
- Eliminates input switches or jumpers.
- 90-264 VAC or DC and 43-120 Hz @ 20 A max.
- Single Output: 380VDC: 1680 W from 96-150 VAC input; 2100W & 3100 W available for 180-264 VAC input.
  48 VDC: 1500W from 96-150VAC input, 2100 W from 180-264 VAC input.
- 380 VDC: 4" x 8" x 11" package.
- 48 VDC: 5" x 8" x 11" package.
- Overvoltage/overcurrent/overtemperature protection.
- 0 to 50°C operation at full load.
- Input and output fuses.
- Brownout to 75 VAC.
- Holdup performance improved up to 200%.
- Self-contained forced-air cooling.

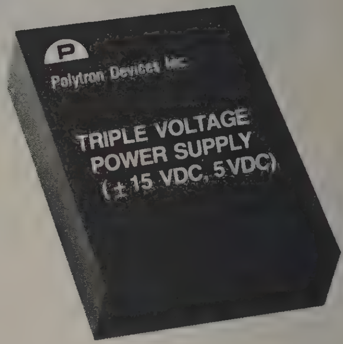
LINEAR ENCAPSULATED POWER MODULES

See section 4050 pages D•2292-2296 for DC/DC converters.

FEATURES:

- REGULATION LINE & LOAD 0.2% to 0.02%
- P.C. CARD OR CHASSIS MOUNTING
- SHORT CIRCUIT PROTECTION
- SINGLE, DUAL, TRIPLE OUTPUTS

FROM STOCK



SPECIFICATIONS: ①

- **INPUT VOLTAGE AND FREQUENCY:** 105 to 125Vac–50 to 440Hz
- **VOLTAGE OUTPUT TOLERANCE:** Factory set at ±1% (fixed)
- **TEMPERATURE COEFFICIENT:** 0.02% / °C typical
- **INPUT ISOLATION:** 50 Mohms
- **OPERATING TEMPERATURE:** –25°C to +71°C
- **STORAGE TEMPERATURE:** –25°C to 85°C

LINEAR ENCAPSULATED POWER MODULES

50VDC TO 250VDC

See section 4050 pages D•2292-2296 for DC/DC converters.

FEATURES:

- SHORT CIRCUIT PROTECTION
- HIGHLY REGULATED FLOATING OUTPUT
- P.C. CARD OR CHASSIS MOUNTING
- DOMESTIC AND/OR EUROPEAN LINE VOLTAGE

SPECIFICATIONS:

All electrical specifications are at 25°C and nominal input voltage unless otherwise noted.

- **INPUT VOLTAGE AND FREQUENCY**
  115VAC nominal (105 to 125VAC)—50 to 60Hz
  Other optional input voltages are available.
  Use designated suffix to order these units:
  220VAC nominal (200 to 240VAC) suffix X
  240VAC nominal (220 to 260VAC) suffix XE
  100VAC nominal (90 to 110VAC) suffix Q
  115/220VAC nominal (105 to 125VAC or 200 to 240VAC) suffix AX
- **VOLTAGE OUTPUT TOLERANCE**
  Factory set at ± 1% (fixed)
- **TEMPERATUE COEFFICIENT**
  0.02%/°C typical
- **INPUT ISOLATION RESISTANCE**
  100 Mohms
- **ISOLATION VOLTAGE**
  2500VDC
- **OPERATING TEMPERATURE**
  −25°C to +71°C
- **STORAGE TEMPERATURE**
  −55°C to +105°C

MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

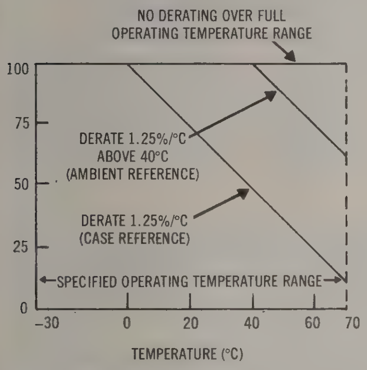

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

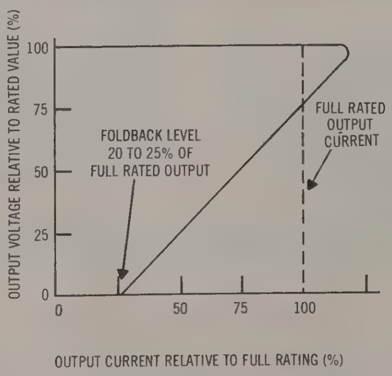

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

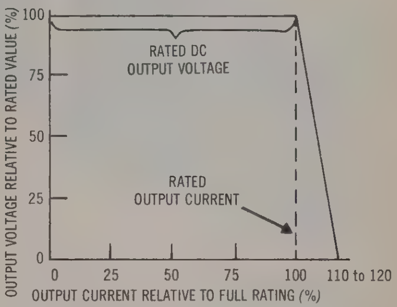

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

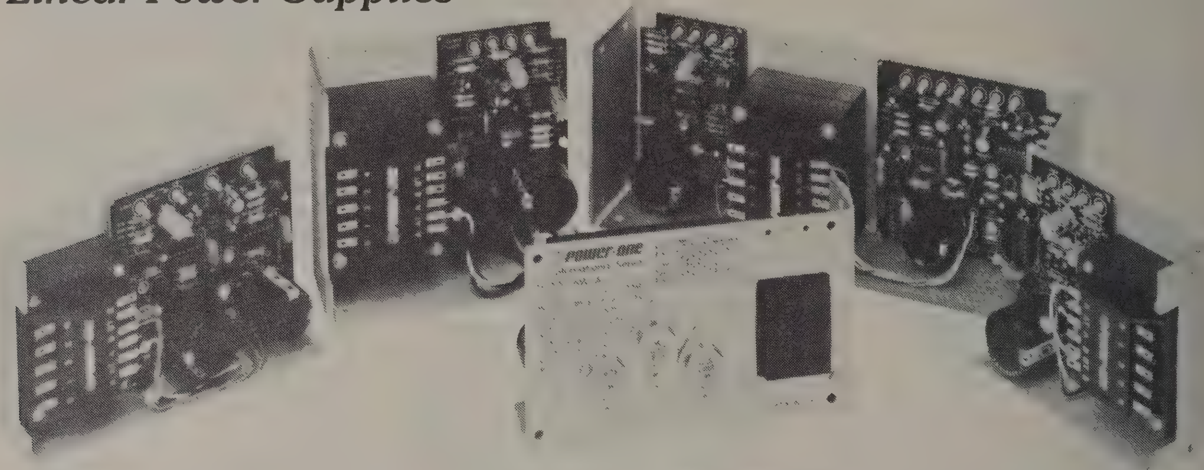
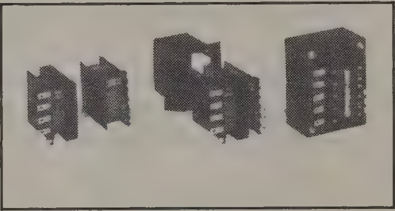
International Series

Linear Power Supplies



FEATURES

- VDE TRANSFORMER CONSTRUCTION
- WORLDWIDE AC INPUT CAPABILITIES 100/120/220/230/240 VAC
- MEETS DOMESTIC AND FOREIGN SAFETY STANDARDS - UL, CSA, IEC, VDE, BPO, ECMA, CEE
- INDUSTRY STANDARD PACKAGES



INTERNATIONAL TRANSFORMER CONSTRUCTION

Power-One's patented International Series transformers feature separate, fully enclosed, primary and secondary coils. Meets safety requirements of VDE, UL, CSA, BPO, IEC, CEE, and ECMA.

DESCRIPTION

POWER-ONE's new International Series is the first and only high reliability D.C. power supply series designed for products sold throughout the world's major electronics markets.

The International Series can be used anywhere, for almost any application. It meets the most important safety requirements of UL, CSA, IEC, VDE, BPO, ECMA, and CEE. Also, each unit provides the AC input ranges needed for worldwide operation: 100, 120, 220, 230, and 240 volts, 47 to 63 Hz. This multi-range input capability reduces customer inventory and service requirements since only one standard off-the-shelf power supply is needed, regardless of the product's final destination. These are exclusive features of the International Series, and are not available on any competitive standard model.

In an effort to meet the world's toughest safety regulations, POWER-ONE achieved a technological breakthrough in power transformer design. Our new patented winding process features separate, fully enclosed primary and secondary windings. This unique construction complies with the most respected regulatory safety agency specifications, worldwide.

The end result is that product acceptance throughout the world is greatly simplified for domestic and foreign equipment manufacturers. The International Series power supplies comply with the major body of regulatory safety agencies responsible for product safety in virtually all of the major world markets. Its compatibility with world safety standards, combined with dramatically increased flexibility, results in far greater potential for international acceptance of your products.

MEETS SAFETY AGENCY REQUIREMENTS THROUGHOUT THE WORLD

Why compliance is so important!

For years electronic equipment manufacturers have found that safety requirements for most of the world's electronics markets are significantly different than those established in the USA by Underwriters Laboratories (UL). Also, there is little consistency in the requirements among the world's regulatory safety agencies. This has created almost impossible compliance problems for designers who are developing products for worldwide distribution.

Recognizing this dilemma, POWER-ONE initiated an extensive R&D program aimed at producing the first D.C. power supply line that truly meets the world's toughest safety requirements. The innovative new International Series—the solution to the difficult problem of gaining worldwide acceptance for your products.

SAFETY AGENCIES WORLDWIDE

The following regulatory agency specifications have gained industry-wide acceptance as the most important to comply with when designing products for the world's major electronics markets. The International Series meets or exceeds the leakage current, creepage distance, and dielectric withstand test requirements of these safety agency specifications:

UL1950, EN60950, CSA1402

INTERNATIONAL SERIES DESIGN STANDARDS:

Leakage Current, Line to Ground: 0.05mA Max.

Safety Spacings, Live Parts to Dead Metal: 9.0 mm

Dielectric Withstand Voltage,
Input to Ground: 3750 VAC
Input to Outputs: 3750 VAC
Outputs to Ground: 500 VDC

International Series
Linear Power Supplies

MEETS INTERNATIONAL SAFETY REQUIREMENTS THROUGHOUT THE WORLD

SPECIFICATIONS

AC Input:	100/120/220/240 VAC +10% −13%. 47-63 Hz. Tolerance for 230 VAC operation is +15%, −10%. Derate output current 10% for 50 Hz operation.
DC Output:	See Voltage/Current Rating Chart. Adjustment range ±5% minimum.
Line Regulation:	±.05% for a 10% line change.
Load Regulation:	±.05% for a 50% load change.
Output Ripple:	5V through 15V models: 5.0 mV PK-PK maximum; 24V and 28V models: 0.2% PK-PK maximum.
Transient Response:	50µ seconds for a 50% load change.
Short Circuit and Overload Protection:	Automatic current limit/foldback.
Overvoltage Protection:	Provided on 5V outputs where indicated. Set at 6.2V ±0.4V. Other outputs use optional overvoltage protectors OVP-12 and OVP-24.

Stability:	±0.3% for 24 hours after warm-up.
Temperature Rating:	0°C to 50°C full-rated, derated linearly to 40% at 70°C.
Temperature Coefficient:	.01%/°C typical, .03%/°C maximum.
Efficiency: (typical)	5V outputs: 45% 12V and 15V outputs: 55% 24V and 28V outputs: 60%
Vibration:	Per MIL-STD-810C, Method 514, Procedure X
Shock:	Per MIL-STD-810C, Method 516, Procedure V
EMI/RFI:	These linear power supplies have inherently low conducted and radiated noise levels. For most system applications they will meet the requirements of FCC Docket 20780 for Class A equipment and VDE 0871 for Class A equipment without additional noise filtering.

International Series - Map Series

55 Watts to 130 Watts

FEATURES

- AUTOMATIC SELECTING AC INPUT: 90-132/175-264 VAC, 47-63 HZ
- ALL OUTPUTS FULLY REGULATED
- MEETS DOMESTIC AND INTERNATIONAL SAFETY: 3750 VAC ISOLATION • VDE SAFETY SPACINGS
- UNIVERSAL TERMINAL BLOCK CONNECTORS
- UNIVERSAL MOUNTING SYSTEM
- HIGH POWER DENSITY, UP TO 2.2 WATTS/CUBIC INCH
- MOSFET SWITCHING TECHNOLOGY
- RUGGED WRAP-AROUND CHASSIS
- 105°C RATED STORAGE CAPACITORS
- 75% TYPICAL EFFICIENCY
- PLATINUM BARRIER SCHOTTKY RECTIFIERS
- CONVECTION COOLED
- THERMAL SHUTDOWN WITH WARNING
- UL RECOGNIZED, CSA CERTIFIED
- MEETS DOMESTIC AND INTERNATIONAL EMI: FCC 47CFR, PART 15, LEVEL B • VDE 0871 LEVEL B
- INTERNAL INPUT LINE FILTER
- POWER-FAIL WARNING SIGNAL
- FULL LOAD BURN-IN AND THERMAL CYCLING
- 2 YEAR WARRANTY

B. Fully regulated output, voltage adjustable ±4% minimum. Factory set to ±1% of nominal.
C. Fully regulated output, voltage fixed.

ELECTRICAL SPECIFICATIONS

AC Input: Automatic selecting dual range: 90-132 VAC or 175-264 VAC. 47-63 HZ single phase. NOTE: AC input range selection is fully automatic. No manual switchover is required.

DC Outputs: See Voltage/Current Rating Charts.

Output Power: See Voltage/Current Rating Charts.

Peak Output Power: See Voltage/Current Rating Charts. Peak power capability is recommended for short term operation only. Contact POWER-ONE for technical assistance on specific applications.

Brown-Out Protection: Regulation is maintained down to 90/175 VAC, at full rated load, with no compromise in performance.

Hold-Up Time: 20 msec minimum at full rated load and nominal AC input voltage. Hold-up time increases to 40 msec at 50% load.

Power-Fail Warning Signal: TTL compatible signal goes low before the main +5V output drops 5%, at full rated load. Minimum warning time: MAP80: 5 msec MAP130: 2.5 msec Warning time increases at reduced load levels.

Efficiency: Measured at full rated load and nominal AC input voltage. 75% ±5% depending on how the load is distributed among the outputs.

Regulation Characteristics: See Voltage/Current Rating Charts for individual model ratings.

Measurement method: LINE: Measured over a 90-132 VAC or 175-264 VAC line change. LOAD: Measured over a 20% to 100% load change.

Initial Setting Tolerance: Measured at 50% of full rated load on all outputs.

Minimum Load: Minimum output models require the following main +5V output minimum loads in order to maintain regulation:

MAP130 series: 3A
MAP80 series: 1A
MAP55 series: 0.5A

Note: Minimum load requirements increase at higher than 50*C.

Remote Sensing: Provided on MAP130 multiple output models on the main +5Voutput and on MAP130 single output models.

Output Noise and Ripple: 0.3% RMS, 1% PK-PK maximum on main +5V output.

Transient Response: Main +5V output: 500 µsec typical for a 50-100% load change and recovery to within 1% of initial voltage set point. Maximum excursion: 4% from initial voltage set point.

Overload Protection: Fully protected against output overload and short circuit. Automatic recovery upon removal of overload condition. Delayed-foldback current limiting characteristics assure reliable turn-on into reactive and non-linear loads. Provided on MAP130 series models.

Overvoltage Protection: Provided on the main +5V output. Set at 6.2V ±0.6V.

Overtemperature Protection: Initiates shutdown in the event of an overtemperature condition. Automatic reset. Power-Fail Warning Signal is initiated prior to shutdown. Provided on MAP130 series models.

Power-Up Initialization Period: Typical 0.3 sec turn-on delay assures orderly ramp-up and stabilization of all output voltages during power-up.

Input Protection: AC input line fuse provided.

Internally located.

Inrush Current: Internally limited by thermistor.

Temperature Rating: OPERATING: 0°C to +50°C at full rated output power. Consult factory for operating information between +50°C to +70°C. STORAGE: -55°C to +85°C.

Temperature Coefficient: ±0.03%/°C typical, ±0.05%/°C maximum over entire operating temperature range of 0°C to +70°C.

Cooling: Convection cooling is adequate where non-restricted air flow is available. When operating in a confined area, forced air cooling is recommended.

Vibration: Per MIL-STD-810D, Method 514.3, Category 1, Procedure I.

Shock: Per MIL-STD-810D, Method 514.3, Procedure III.

SAFETY SPECIFICATIONS

The International Series meets the safety requirements of the world's most respected regulatory safety agencies. All models exceed the following safety standards:

Leakage Current: Line to Ground (max.): 500 µA

Safety Spacings: 8.0 mm minimum between primary and secondary circuitry. 4.0 mm minimum between primary and grounded circuitry.

Dielectric Withstand Voltage (min.): Input to Ground: 3750 VRMS; Input to Outputs: 3750 VRMS; Outputs to Ground: 700 VDC. Consult POWER-ONE for testing methods.

UL RECOGNIZED: UL File Number E55974

CSA CERTIFIED: CSA File Number LR38879

TUV Essen Certified: TUV certified to meet the requirements of VDE 0805, VDE 0806, IEC 380, IEC 950, and EN60950.

EMI SPECIFICATIONS

All International Series models are equipped with internal line filtering which allows compliance to the conducted emisson limits of FCC 47CFR, Part 15, Level B; and VDE 0871 Level B.

NRG Series

350 to 550 Watt Modular Power Supplies

The **NRG MID POWER SERIES** is a modular power solution utilizing standard off the shelf power modules configured to customer requirements. Products are available from 350 to 550 watts. This flexible power system is delivered completely configured, burned-in, and tested.

FEATURES

- FULLY MODULAR DESIGN
- AUTOSELECT AC INPUT
- UP TO SEVEN OUTPUTS
- WIDE SELECTION OF VOLTAGES/ CURRENTS
- FCC/VDE CATEGORY B EMI/RFI
- VME COMPATIBLE SIGNALS
- UL1950/EN60950 CERTIFICATIONS
- CURRENT SHARE/CURRENT MONITOR
- CUSTOM INTERFACE SIGNALS
- UL1950 & IEC950 CERTIFICATIONS
- FULLY REGULATED OUTPUTS
- HIGH POWER AUXILIARY OUTPUTS
- ADJUSTABLE AUXILIARY OUTPUTS
- POWER FAIL SIGNAL
- INDUSTRY STANDARD MOUNTING
- FULLY ISOLATED OUTPUTS

OPTIONS

- FAN AND COVER
- IEEE587 CATEGORY A AND CATEGORY B
- IEC601/UL544 CERTIFICATION
- CUSTOM INTERCONNECT CONFIGURATIONS

SELECTION AND CONFIGURATION

1. Choose a chassis based on the required wattage.
2. Choose the output modules. a minimum and maximum of one main module must be specified.
3. For standard products, auxiliary modules are configured in a descending power rating. Auxiliary module #1 should have the highest power rating.
4. Decide on the options. Standard options are listed on the next page. Please consult the factory for special requirements such as logic option boards.
5. Isolated outputs are provided on standard products. Consult factory for other interconnect options.
6. Use VC connector option when ordering any combination that includes dual output modules.
7. When using a C9 module, Aux. #1 and #2 can only be C9 or K0. A C9 cannot be used in the Aux. #3 position.

CONSULT THE FACTORY FOR ADDITIONAL CONFIGURATION INFORMATION.

International High Power Series

500 to 2500 Watt Multiple Output Modular Power Systems

FEATURES

- FULLY MODULAR CONSTRUCTION
- UP TO 21 FULLY REGULATED OUTPUTS...2V THRU 48V
- WORLDWIDE AC INPUT: 90-132/180-264 VAC, 47-440 HZ, FIELD SELECTABLE
- 100% SWITCH-MODE OUTPUTS
- MOSFET SWITCHING TECHNOLOGY
- CURRENT-MODE CONTROL
- PARALLELABLE OUTPUTS WITH CURRENT SHARING
- AUTORANGING ON PFC PRODUCTS
- MEETS FCC AND VDE EMI LIMITS
- UL RECOGNIZED, CSA CERTIFIED
- UPS BATTERY BACKUP OPTION
- 48 VDC INPUT OPTION
- 300 VDC INPUT OPTION
- HIGH RELIABILITY HYBRID CONTROLLERS
- BALL BEARING DC FAN
- EXTENSIVE SYSTEM INTERFACE FEATURES
- .99 PFC AVAILABLE

DESCRIPTION

The International Series High Power products are modular power systems using separate switch-mode DC Output Modules to provide the voltage and current ratings required by each specific application.

The system is based on a 300 VDC System Power Bus derived from either the AC utility line, a user supplied 300 VDC source, or our optional battery backup UPS module. This 300 VDC bus provides the bulk DC required by each output module for conversion to its specified output voltage and current ratings.

This independent modular approach provides complete isolation between the outputs, as well as all other system elements. Also, the switching circuitry of each output module is clocked and synchronized by the Sync & Bias Supply section to reduce electrical interference between the outputs.

SELECTION AND CONFIGURATION

The modularity of the International Series High Power products allows the user to specify a power system configured from a wide selection of standard off-the-shelf plug in modules. The power system is delivered completely assembled, burned in, and tested. A part number comprised of a series designation, module listing, and options can be configured as follows:

1. **Choose a chassis based on required wattage and/or power factor.**
2. **Select the module(s).**
3. **Decide on the option(s).**

INTERNATIONAL SERIES HIGH POWER PRODUCT OVERVIEW

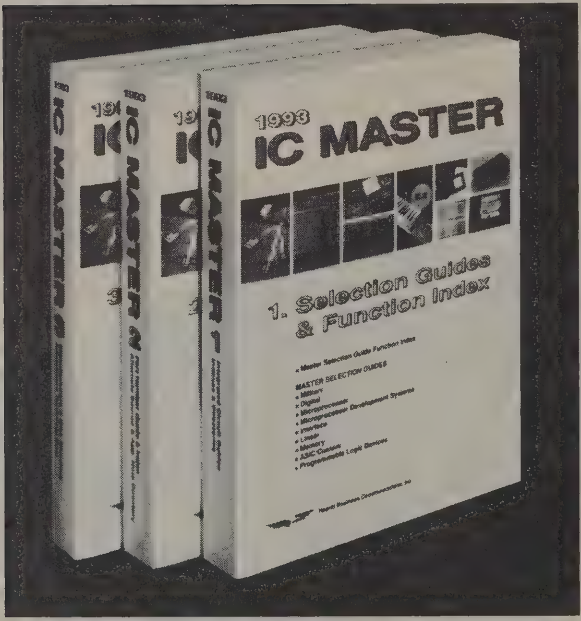
SUPER TIME SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your job has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516)227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, FAX Marie at (516)-227-1901. She'll FAX the IC Master subscription form back to you right away.

And, if you tell her you saw it in the 1993/94 EEM, she'll take $10 off the subscription price!

PS-STANDARD/"BABY" AT SERIES

FEATURES

- UL recognized, CSA certified, and TUV approved
- EMI/RFI within limits of VDE 0871/6.78 and FCC Part 15, subpart J
- Operates on 115 or 230 VAC
- OVP on +5 VDC output
- Full ONE YEAR WARRANTY
- 200-325 Watts
- Custom options available
- Tight regulation on all outputs available
- Automatic current limit
- Short circuit protection
- MTBF greater than 50,000 hours

BATTERY BACK-UP OPTION

The "Standand" PS-AT Series is now available with a battery back-up module to give you uninterruptible power source capabilities. Operation in the back-up mode is a function of the ampere hours rating of the external (customer supplied) batteries. Add suffix BU to model number.

FEATURES

- No outage at switch over
- 85% efficiency
- Battery charging circuit available
- Low battery voltage signal
- Automatic switch-off for low batteries
- Automatic switch-over from batteries when AC returns

MODIFIED STANDARDS, AND CUSTOM DESIGNS AVAILABLE

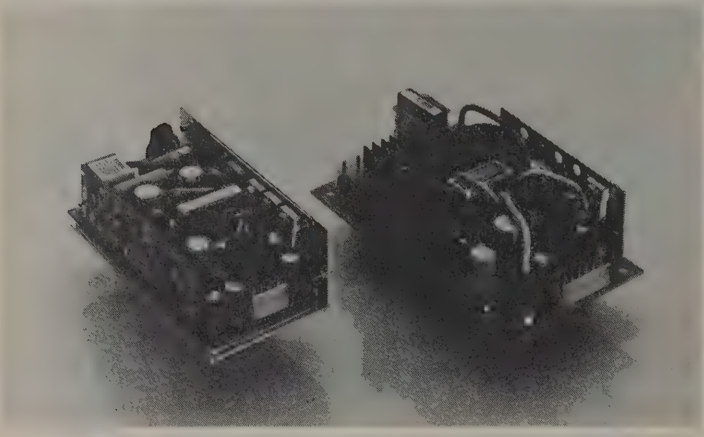
PVI UNIVERSAL AUTOMATIC AC INPUT SERIES

SINGLE AND MULTIPLE OUTPUTS



FEATURES

- Automatically Accommodates Universal AC Sources
- Designed and Tested to Worldwide EMI/RFI Regulations. Meets VDE and FCC Level "B" Emissions
- Compact Size
- Overload Protection
- Overvoltage Protection
- Many Options Available
- MTBF Greater than 100K Hours
- UL Recognized, CSA Certified, TUV Licensed
- High Peak Currents for Starting Loads

SPECIFICATIONS

PARAMETER	CONDITIONS	LIMITS
AC INPUT	No load to full load	90-260 VAC (115 or 230 VAC nominal) Auto input range without any external changes
AC INPUT FREQUENCY	No load to full load	47-63 Hz (consult factory for 440 Hz operation)
INPUT SURGE CURRENT	Peak (cold start)	15A (115 VAC) 30A (230 VAC)
DC OUTPUT		See Model Selection Chart
DC OUTPUT ADJUSTMENT	+5VDC output	+4.5V to OVP trip point
HOLD-UP TIME	Nominal input voltage and max output power	20 ms
LINE REGULATION	Within specified AC limits	±0.5% typical
LOAD REGULATION	20% to 100% load change	±1.0% main output ±3.0% for auxiliary output without post regulator ±1.0% for auxiliary output with post regulator

PARAMETER	CONDITIONS	LIMITS
RIPPLE AND NOISE	Max load	50mV Pk-Pk max 5V output 1% max any other output
TRANSIENT RESPONSE	50% load change	2% max deviation, returns to initial condition in 1 ms max
AMBIENT OPERATING TEMPERATURE	Continuous duty, full rating Derate linearly to 50% of full rating at +71°C	0° to 50°C 0% to 70% (fan cooled) 50° to 71°C
STORAGE TEMPERATURE	Non operating	−20°C to +80°C
OVERVOLTAGE PROTECTION	+5V output only	+6.2V ± 0.4V
SHORT CIRCUIT PROTECTION	Will withstand a continuous short without damage; will automatically return to regulation upon removal of short.	
OVERLOAD PROTECTION	Maximum rated current cannot be drawn from all outputs at the same time. The overload protection feature will reduce all output voltages to a safe dissipation level when the total output power exceeds 125% of maximum rated power.	
NO LOAD OPERATION	No damage to power supply will occur when operating at no load.

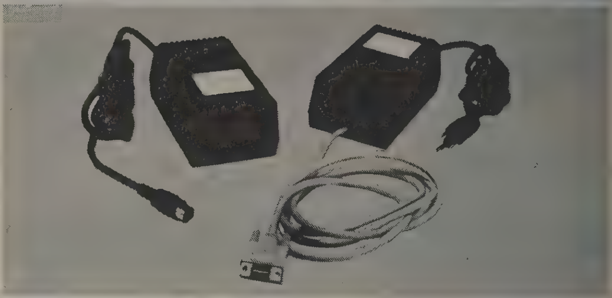
PES AC-DC AUTOMATIC DESKTOP SERIES

AC INPUT



FEATURES:

- Automatically accommodates universal AC sources.
- Designed to meet universal safety standards.
- Designed and tested to world wide EMI/RFI regulations. Meets VDE and FCC Part 15 level "B".
- Overload protection.
- Overvoltage protection.
- Custom outputs available.
- Compact size.

20, 40 AND 60 WATT CONFIGURATIONS

PARAMETER	CONDITIONS	LIMITS
AC INPUT	No load to full load	90-260VAC Typical, 85-265VAC available
AC INPUT FREQUENCY	No load to full load	47–440 Hz
INPUT SURGE CURRENT	Peak (cold start)	20A for PES-20 & PES-30 25A for PES-60
DC OUTPUT		See Voltage/Current Rating Chart
DC OUTPUT ADJUSTMENT		Main output internal adjustable from 4.5V till OVP trip point
HOLD-UP TIME	Nominal input voltage and max output power.	20m Sec. at 120VAC FULL LOAD
LINE REGULATION	Within specified AC limits	Main output 0.1% Aux. output 1.5%
LOAD REGULATION	20% to 100% load change	5% at cable connector ends.
DIELECTRIC WITHSTANDING		3,750VAC-Outpout/Input. 1,500VAC-Input/GND 500VAC-Output/GND
RIPPLE AND NOISE	Max load	Typical 1% peak-peak
AMBIENT OPERATING TEMPERATURE		0°C to 40°C
STORAGE TEMPERATURE	Non operating	–20°C to +85°C
OVERVOLTAGE PROTECTION		124%±8% on Main output
SHORT CIRCUIT PROTECTION	The Overload Protection feature protects against Short Circuit	
OVERLOAD PROTECTION	The overload protection will reduce all output voltage to safe dissipation level when the average power rating exceeds 125–150% of max power	
NO LOAD OPERATION	ALLOWED	

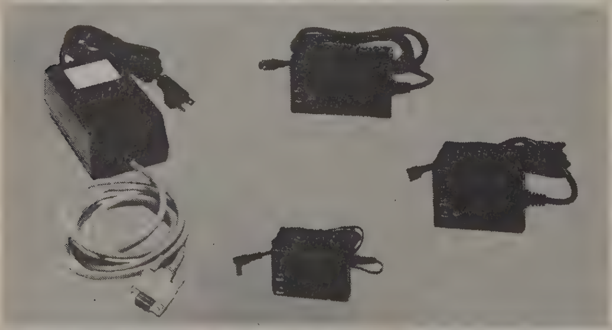
PER WALLMOUNT AND DESKTOP SERIES

AC-DC REGULATED

2 TO 24 WATT CONFIGURATIONS

FEATURES:

- 120 VAC or 220 VAC input
- Designed to meet universal safety standards.
- Regulated outputs typically 1.5%
- Overload protection. • Short circuit protection.
- Custom outputs available. • 100% burn-in before shipment.
- 0° to 50°C operation. • Fully one year warranty.



SPECIFICATIONS:

PARAMETER	CONDITIONS	LIMITS
AC INPUT	No load to full load	Nominal 120VAC or 220VAC options.
AC INPUT FREQUENCY	No load to full load	50 Hz or 60 Hz
DC OUTPUT		See Voltage/Current Rating Chart
DC OUTPUT ADJUSTMENT		No Adjustable
DIELECTRIC WITHSTANDING		VDE option 3,750VAC RMS. UL option 1,500VAC RMS
AMBIENT OPERATING TEMPERATURE		0°C to 40°C
STORAGE TEMPERATURE	Non operating	–20°C to +85°C
SHORT CIRCUIT PROTECTION		Protected by Post Regulators used.
OVERLOAD PROTECTION		Protected by Post Regulators used.

POWER SWITCH CORP.

17 Vreeland Street, Lodi, New Jersey 07644
TEL: 201-478-5788 • FAX: 201-478-8201

PEA WALLMOUNT AND DESKTOP SERIES

AC-DC UNREGULATED
2.5 TO 35 WATT CONFIGURATIONS

FEATURES:

- 120 VAC or 220 VAC input.
- Designed to meet universal safety standards.
- Custom outputs available.
- 100% burn-in before shipment.
- 0°C to 50°C operation.
- Full one year warranty.

SPECIFICATIONS:

PARAMETER	CONDITIONS	LIMITS
AC INPUT	No load to full load	Nominal 120VAC or 220VAC Option.
AC INPUT FREQUENCY	No load to full load	50 Hz. or 60 Hz. option.
DC OUTPUT		See Voltage/Current Rating Chart
DC OUTPUT ADJUSTMENT		No Adjustable
DIELECTRIC WITHSTANDING	VDE option 3.750VAC RMS. UL option 1,500VAC RMS	
AMBIENT OPERATING TEMPERATURE		0°C to 40°C
STORAGE TEMPERATURE	Non operating	–20°C to +85°C
SHORT CIRCUIT PROTECTION		No protection.
OVERLOAD PROTECTION	Thermal fuse overload protection in the primary installed for 220VAC input. Option for 120VAC input.	

PET WALLMOUNT AND DESKTOP SERIES

AC-AC
4 TO 50 VA CONFIGURATIONS

FEATURES:

- 120 VAC or 220 VAC input.
- Designed to meet universal safety standards.
- Custom outputs available.
- Thermal overload protection available.
- Full one year warranty.

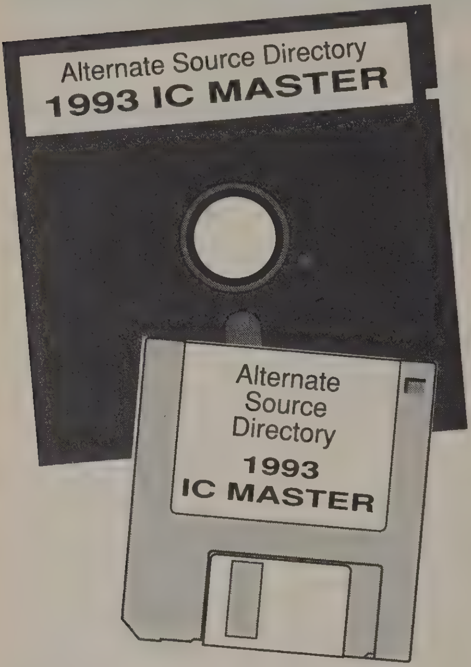
SPECIFICATIONS:

PARAMETER	CONDITIONS	LIMITS
AC INPUT	No load to full load	Nominal 120VAC or 220VAC Option
AC INPUT FREQUENCY	No load to full load	50 Hz. or 60 Hz. option
AC OUTPUT		See Voltage/Current Rating Chart
DIELECTRIC WITHSTANDING	VDE option: 3,750VAC RMS UL option: 1,500VAC RMS	
AMBIENT OPERATING TEMPERATURE		0°C to 40°C
STORAGE TEMPERATURE	Non operating	–20°C to +85°C
SHORT CIRCUIT PROTECTION		No protection
OVERLOAD PROTECTION	Thermal fuse overload protection in the primary installed for 220VAC input. For 120VAC input is option.	

Hearst Engineering Software

ICMASD

Alternate Source Directory



The all new 1993 ICMASD-IC Alternate Source Directory on Disk is identical to the Alternate Source Directory Section contained in Volume Two of the printed version of the 1993 IC Master. All you need is an IBM XT/AT or 100% compatible personal computer with hard drive.

ICMASD is the most comprehensive and reliable guide available to all ICs known to have a realistic replacement or alternative. The 1993 version contains over 106,000 listings to help you find the functional equivalents for both current and discontinued parts.

The electronic ICMASD is fast, convenient...and can be customized for your specific needs!

ENHANCED FLEXIBILITY

ICMASD is organized in a similar fashion to the printed version in the IC MASTER. The database is arranged by manufacturer, showing the manufacturer's original basic part number. All known replacements for that part are listed in alphanumeric order.

The enhanced flexibility of the electronic ICMASD allows you to add comments, up to 19 digits long, to any device listing in the system. These comments can be part numbers, project notes, prices, or any information unique to your application.

USER FRIENDLY

ICMASD is very user friendly. There are no tricky commands to learn. The software is completely menu driven. ICMASD comes complete with documentation that is brief and to the point. It can be ordered on five 51/4" double-sided, double-density disks OR on one 51/4" high-density disk OR on one 31/2" high-density disk.

Published annually in March

FAST AND CONVENIENT

ICMASD includes a complete Manufacturers & Distributors Directory listing the addresses and phone numbers of every manufacturer in the IC industry. With this complete directory any manufacturer or distributor is just a phone call away.

To order your 1993 ICMASD,
contact your local IC MASTER distributor or, send your purchase order and check for $179.50 plus tax* to:

Marie Botta
Hearst Business Publishing
645 Stewart Avenue
Garden City, NY 11530
(516) 227-1300 • FAX (516) 227-1901

*Please add sales tax in NY,MA,IL, CA, or GST tax in Canada
For delivery outside the USA, please add $20 per ICMASD.

For faster service, have your VISA or MasterCard handy, and call our CREDIT CARD HOTLINE: 1-800-833-7138

HIGH VOLTAGE POWER SUPPLIES FOR ALL CRT APPLICATIONS STANDARD AND CUSTOM DESIGNS

COMMERCIAL

For monochrome and color CRT computer displays, as well as graphics workstations, CAD/CAE systems, medical equipment, phototypesetting, film recorders and projection equipment, or other applications.

RUGGEDIZED

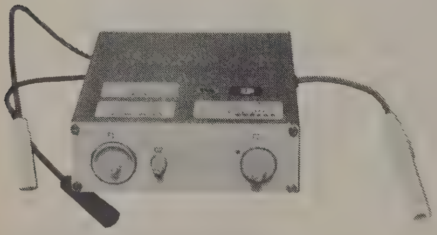
For higher tech yet low cost applications, requiring semi-stringent environments. Especially suitable for commercial avionics, industrial programs, or foreign military not bound by full mil-spec requirements.

MILITARY

For applications ranging from submarine to space shuttle. Whether shipboard, battlefield or avionics, our technology has been tested and qualified to the extremities of military ranges. Call for details.

Rantec Microwave & Electronics, Inc. has over 21 years of experience in the design and manufacture of high voltage power supplies. Selling to the world's leading manufacturers, we are respected for our technical superiority, exemplary product reliability and incomparable customer support. Experience the pride we take in our products. *When IMAGE counts*, there's no better choice than Rantec.

CDF Series Color Dual Focus Commercial HVPS



FEATURES:

- 20kV to 29kV @ 1.2mA, multiple outputs
- Dual focus outputs (independently adjustable)
- DF input permits modulation of Focus #2
- Low cost
- Overvoltage & overcurrent safety circuits
- Customer-specified options available
- Remote on/off
- Beam current sense (optional)
- High quality, MTBF > 65,000 hrs.
- Low ripple, tightly regulated
- UL & CSA recognized models

Series CDF is designed to power the latest bi-potential color CRT's. Attributes include fixed outputs for anode, G1 and B+ (to power your external amplifier), as well as adjustable focus #1, focus #2 and G2 outputs. An AC-coupled DF input (DC restored) enables modulation of focus #2. Overvoltage and overcurrent protection, beam current sense, remote on/off and optional remote G2 adjustment are also featured in this sophisticated, highly reliable, yet low cost high voltage power supply.

ELECTRICAL SPECS (Typical):

- **Anode** : 27kV ±3% @ up to 1.2mA; Ripple: <3Vp-p
- **Focus #1**: 5.9kV to 9.2kV @ ±5uA
- **Focus #2**: 5.9kV to 9.2kV @ ±5uA
- **G2**: 200V to 850V @ ±5uA
- **G1**: -200V @ up to 2mA
- **Amp B+**: +400V @ up to 3mA (optional)
- **DF Input**: Up to 1kV (DC restored)
- Input: ±32V ±5% (options available)
- Regulation
  Line: .04%
  Load: .04%
  Dynamic Load: 60V peak @ 1.2mA
- Remote on/off - TTL compatible
- Beam current sense (optional)

MECHANICAL SPECS:

Size: 8.0" x 5.75" x 1.9"
Weight: Approx. 4.5 lbs.

ENVIRONMENTAL SPECS:

Operating Temp: 0 to +60°C case
Storage Temp: -35°C to +90°C
Operating Altitude: 0 to 10,000 ft.
Humidity: 0 to 95% non-condensing

Rantec reserves the right to change specifications at any time without prior notice. It is Rantec's policy to improve products as new techniques and components become available.

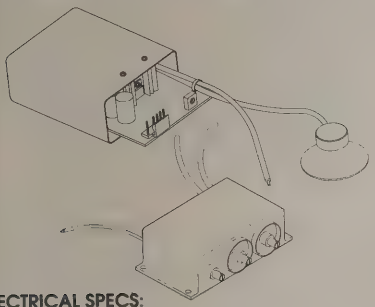
CLC Series Color Low Cost Commercial HVPS



FEATURES:
- 20kV to 29kV @ 1.2 mA, multiple outputs
- Super low cost
- Modular design for installation ease
- Low ripple, tightly regulated
- Overvoltage & overcurrent safety circuitsv
- Single and dual focus options
- Customer-specified options available
- REmote on/off
- Beam current sense
- UL & CSA recognized models

Series CLC offers maximum versatility with compact modules to be mounted separately, minimizing interference while permitting accessability to voltage adjustments. One module houses the fixed anode, focus, G1 and Amp B+ outputs, while the second module interfaces to provide adjustments for the Focus and G2 outputs and the DF input. All this and super low cost too! Available in a dual focus configuration as well! (Pictured.)

ELECTRICAL SPECS:

Voltage Module
- **Anode**: Fixed output specified from 20kV to 29kV ±3% @ up to 1.2mA; Ripple: <3Vp-p
- **Focus**: Fixed output specified from 30% to 60% of anode voltage @ up to 250uA
- **G1**: -200V @ up to 2mA
- **Amp B+**: +400V @ up to 3mA, 6mA peak
- Input: +24V ±5% (options available)
- Remote on/off - TTL compatible
- Beam current sense

Potentiometer Module:
- **Focus**: 19% to 31% of anode @±15uA (options available)
- **G2**: 100V to 1kV @ ±15uA
- **DF Input**: AC-coupled, up to 1kV (DC restored)

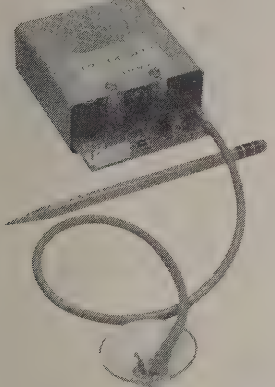
MECHANICAL SPECS:

Approximate Size:
Voltage Module : 5.9" x 3.4" x 1.8"
Potentiometer Module: 4.0" x 3.0" x 1.5"

ENVIRONMENTAL SPECS:

Operating Temp: 0 to +60°C case
Storage Temp: -35°C to +90°C
Operating Altitude: 0 to 10,000 ft.
Humidity: 0 to 95% non-condensing

SLC Series Super Low Cost Commercial HVPS



FEATURES:
- 2kV to 25kV, multiple outputs
- Up to 10 watts total output power
- Lowest cost unit available
- Highly reliable/MTBF >350,000 hrs.
- Overvoltage safety circuitry (DHHS compliant)
- Low ripple, tightly regulated
- UL recognized models
- Extremely compact
- Customer-specified options available

Series SLC is a sophisticated, light-weight, compact unit ideally suited for use in high resolution monochrome CRT displays. This cost-effective alternative to high-end flybacks is aggressively priced for high volume programs.

ELECTRICAL SPECS:
- **Anode**: Fixed output specified from 2kV to 25kV ±3% @ up to 10 watts maximum total all outputs; Ripple: <3Vp-p
- **Aux #1**: Specified -1kV to +1kV ±10% @ up to 1mA
- **Aux #2**: Specified -1kV to +1kV ±10% @ up to 1mA
- Input: +24V ±5% (options available)
- Regulation
  Line: .3%
  Load: .1%
  Dynamic Load: 10V/100uA

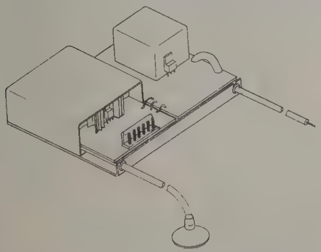
MECHANICAL SPECS:

Size: 4.1" x 3.12" x 1.46"
Weight: Approx. .5 lbs.

ENVIRONMENTAL SPECS:

Operating Temp: 0 to +60° case
Storage Temp: -35°C to +70°C
Operating Altitude: 0 to 10,000 ft.
Humidity: 0 to 95% non-condensing

DAC Series Dynamic Amplifier Commercial HVPS



FEATURES:
- 10kV to 20kV anode plus G2 & G1 @ up to 10 watts
- Focus output 2kV to 5kV @ up to 500uA
- Internal dynamic focus amplifier
- Local and remote focus adjustments
- Optional increased bandwidth
- Low cost
- Remote on/off
- UL recognized models
- Customer-specified options available

Series DAC combines anode, focus, G2 and G1 outputs with an internal dynamic focus amplifier in a low cost, compact design. Ideal for film recording or other highly sensitive applications, the tightly regulated DAC exhibits low ripple and noise, enabling generation of extremely stable, crisp images.

ELECTRICAL SPECS:
- **Anode**: Fixed output specified from 10kV to 20kV ±3% @ up to 10 watts maximum total for anode, G2 & G1 outputs
- **Focus**: Specified from 2kV to 5kV adjustable ±15% @ up to 500uA
- **DF Amplifier**: 0 to 10V input, 0 to 500V output, DC to 100kHz
- **G2**: Specified -1kV to +1kV ±10% @ up to 1mA
- **G1**: Specified -1kV to +1kV ±10% @ up to 1mA
- Input: +24V ±5% (options available)
- Regulation
  Line: .3%
  Load: .1%
  Dynamic Load: 8V/100uA

MECHANICAL SPECS:

Size: 6.5" x 5.5" x 1.45"
Weight: Approx. 1.5 lbs.

ENVIRONMENTAL SPECS:

Operating Temp: 0 to +65°C case
Storage Temp: -35°C to +70°C
Operating Altitude: 0 to 10,000 ft.
Humidity: 0 to 95% non-condensing

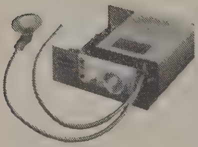
CDC Series Color Display Commercial HVPS



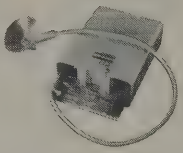
FEATURES:
- 18kV to 30kV @ 1.2mA, multiple outputs
- Extremely low cost
- UL & CSA recognized, TUV Certifiable
- Overvoltage safety circuit (DHHS compliant)
- High quality, MTBF >68,000 hrs.
- Low ripple, tightly regulated
- Other options available

ELECTRICAL SPECS:
- **Anode**: 25kV adjustable ±1kV @ 0-1.2mA
- **Focus**: 5.5kV to 8.5kV @ ±15uA (alternate ranges available)
- **G2:** 0-825V or 200-1kV @ ±5uA
- **G1:** -200V ±10% @ 1mA
- **Amp B+ output:** +400V ±10% @ 3mA
- **DF Input:** 500V max/40Hz to 250kHz
- Input: +24V ±5% (options available)
- Remote on/off - TTL compatible
- Optional Anode Monitor and Beam Current Sense

MECHANICAL SPECS:
Size: 6.0" x 5.0" x 1.75" Weight: <1.8 lbs.

ENVIRONMENTAL SPECS:
Operating Temp: 0 to +65°C case Storage Temp: -35°C to +90°C
Operating Altitude: 0 to 10,000 ft. Humidity: 0 to 95% non-condensing

LCC Series Low Cost Commercial HVPS



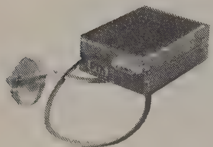
FEATURES:
- 2kV to 20kV at up to 10 watts, multiple outputs
- Extremely low cost
- Designed for high volume production
- UL recognized, CSA, TUV certifiable
- Overvoltage safety circuit (DHHS compliant)
- High quality, MTBF >100,000 hrs.
- Other options available

ELECTRICAL SPECS:
- **Anode**: Fixed output specified from 2kV to 20kV ±3% @ up to 10 watts maximum all outputs
- **Aux #1**: Specified – 1kV to 1kV ±10% @ up to 1mA
- **Aux #2**: Specified – 1kV to 1kV ±10% @ up to 1mA
- Input: +24V ±1.2Vdc (options available)
- Low ripple <5V p-p (C_L = 1500pf)
- Tightly regulated .3% line, .1% load

MECHANICAL SPECS:
Size: 5.10" x 3.12" x 1.4" Weight: <.9 lbs.

ENVIRONMENTAL SPECS:
Operating Temp: 0 to +60°C case Storage Temp: -35°C to +85°C
Operating Altitude: 0 to 10,000 ft. Humidity: 0 to 95% non-condensing

ULC Series Commercial HVPS



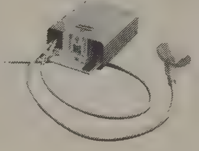
FEATURES:
- 2kV to 20kV at up to 10 watts, multiple outputs
- Low cost
- UL recognized, CSA, TUV Certifiable
- High quality, MTBF >100,000 hrs.
- Low ripple, tightly regulated
- Optional overvoltage protection and remote on/off
- Other options available

ELECTRICAL SPECS:
- **Anode**: Specified from 2kV to 20kV adjustable ±5% @ up to 10 watts maximum total all outputs
- **Aux #1**: Specified -1kV to + 1kV ±10% @ up to 1mA
- **Aux #2**: Specified -1kV to + 1kV ±10% @ up to 1mA
- Input: +24Vdc ±10% (options available)
- Low ripple • Tightly regulated

MECHANICAL SPECS:
Size: 4.13" x 3.16" x 1.37" Weight: <.9 lbs.

ENVIRONMENTAL SPECS:
Operating Temp: 0 to +65°C case Storage Temp: -35°C to +85°C
Operating Altitude: 0 to 10,000 ft. Humidity: 0 to 95% non-condensing

LFC Series Low Cost Commercial HVPS



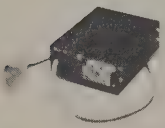
FEATURES:
- 2kV to 20kV at up to 10 watts, multiple outputs
- Extremely low cost
- Designed for high volume production
- UL recognized, CSA, TUV certifiable
- Overvoltage safety circuit (DHHS compliant)
- High quality, MTBF >100,000 hrs.
- Other options available

ELECTRICAL SPECS:
- **Anode**: Fixed output specified from 2kV to 20kV ±3% at up to 10 watts maximum total all outputs
- **Focus:** Specified up to 50% of anode ±10% at up to 50µA
- **Aux #1**: Specified -1kV to + 1kV ±10% @ up to 1mA
- **Aux #2**: Specified -1kV to + 1kV ±10% @ up to 1mA
- Input: +24V ±1.2Vdc • Low ripple • Tightly regulated

MECHANICAL SPECS:
Size: 5.10" x 3.12" x 1.4" Weight: <1 lb.

ENVIRONMENTAL SPECS:
Operating Temp: 0 to +60°C case Storage Temp: -35°C to +85°C
Operating Altitude: 0 to 10,000 ft. Humidity: 0 to 95% non-condensing

ULI Series Ruggedized HVPS



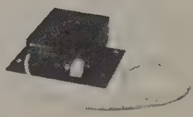
FEATURES:
- 2kV to 20kV at up to 10 watts, multiple outputs
- Low cost
- "Ruggedized" for avionics or industrial applications
- Light weight, only 1 lb.
- Low ripple, tightly regulated
- Optional overvoltage protection and remote on/off
- Other options available

ELECTRICAL SPECS:
- **Anode**: Specified from 2kV to 20kV adjustable ±5% @ up to 10 watts maximum total all outputs
- **Aux #1**: Specified -1kV to + 1kV ±10% @ up to 1mA
- **Aux #2**: Specified -1kV to + 1kV ±10% @ up to 1mA
- Input: +24Vdc ±10% (options available)
- Low ripple • Tightly regulated

MECHANICAL SPECS:
Size: 4.13" x 3.16" x 1.37" Weight: <.9 lbs.

ENVIRONMENTAL SPECS:
Operating Temp: -40°C to +85°C case Storage Temp: -40°C to +95°C
Operating Altitude: 0 to 30,000 ft. Humidity: 0 to 95% non-condensing

DFI Series Dynamic Focus Ruggedized HVPS



FEATURES:
- 2kV to 5.2kV at up to 600µA
- "Ruggedized" for avionics or industrial applications
- Internal dynamic focus amplifier
- 300V p-p modulation
- DC to 200kHz
- Local and remote trim, or fully remote; and on/off
- Other options available

ELECTRICAL SPECS:
- **Focus Voltage**: Specified 2kV to 5.2kV @ up to 600 µA
- Local Adjustment: ±15% • Remote Adjustment: ±3% or ±18% (no local)
- Input: +24Vdc ±10% (options available)
- **Dynamic Focus Amplifier:** Input 0-10V, Output 10-300V
- Low ripple • Tightly regulated

MECHANICAL SPECS:
Size: Power Supply 4.13" x 3.16" x 1.37" Weight: Approx. 1.2 lbs.
Baseplate 4.13" x 5.00" x 0.34"

ENVIRONMENTAL SPECS:
Operating Temp: -40°C to +85°C case Storage Temp: -40°C to +95°C
Operating Altitude: 0 to 30,000 ft. Humidity: 0 to 95% non-condensing

SMI-18-01 Shadow Mask Ruggedized HVPS

FEATURES:

- 18kV @ 600µA, multiple outputs
- Compact size, lightweight
- Sophisticated performance to power hi-res color displays
- "Ruggedized" for use in general aviation pilot displays
- Internal dynamic focus
- Low ripple, tightly regulated
- Other options available

ELECTRICAL SPECS:

- **Anode**: 18kV adjustable ±500V @ 600µA
- **Focus**: Adjustable 25% to 31% of anode @ ±15µA
- **G2:** +400V ±10% @ up to 1mA • **G1**: -100V ±10% @ up to1mA
- **Dynamic Focus**: -600V @ 5V input (TTL) • Input: +28.5V ±4.5V
- Low ripple • Tightly regulated
- Reverse voltage protection

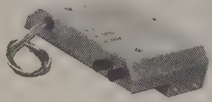
MECHANICAL SPECS:

Size: Approx. 4.96" x 3.15" x 1.23"
Weight: Approx. 1 lb.

ENVIRONMENTAL SPECS:

Operating Temp: -25°C to +70°C case
Operating Altitude: 0 to 55,000 ft.
Storage Temp: -40°C to +90°C
Humidity: 0 to 95% non-condensing

SMI-14-01 Shadow Mask Ruggedized HVPS



FEATURES:

- 14kV @ 1.2mA, multiple outputs
- Extremely compact size, lightweight
- Sophisticated performance to power hi-res color displays
- "Ruggedized" for use in general aviation pilot displays
- Four outputs, including adjustable anode, focus & G2
- Remote on/off

ELECTRICAL SPECS:

- **Anode**: +14.0kV adjustable @ .45mA average, 1.2mA peak
- **Focus:** Adjustable +3.0kV to +4.2kV @ ±15µA
- **G2**: Adjustable +180V to +510V @ ±5µA
- **G1**: Adjustable -130V @ 0-800µA
- Input +15V ±1V @ 2A • Tightly regulated • Low ripple
- Remote on/off – TTL Compatible

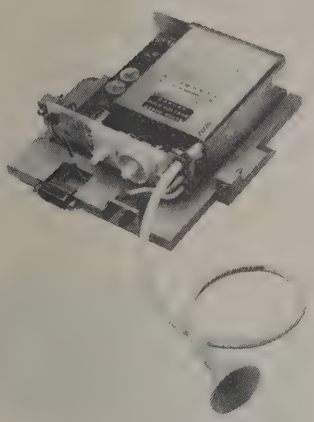
MECHANICAL SPECS:

Size: Approx. 3.62" x 4.83" x 1.26"
Weight: Approx. .75 lb.

ENVIRONMENTAL SPECS:

Operating Temp: -20°C to +75°C case
Operating Altitude: 0 to 55,000 ft.
Storage Temp: -55°C to +85°C
Humidity: 0 to 95% non-condensing

CDI Series Color Display Ruggedized HVPS



FEATURES:

- 18kV to 29kV @ 1.2mA, multiple outputs
- Alternate focus adjustment ranges
- Low ripple, tightly regulated
- Customer-specified options available
- Remote on/off
- Beam current sense, anode monitor
- Overvoltage & overcurrent protection

Series CDI ruggedized high voltage power supply is an extremely cost effective alternative to a "full-MIL" unit. Consider the advantages of a mature, proven design with tens of thousands of units in the field. The CDI has been fully qualified, including operational testing for vibration per MIL-STD-167-1, humidity per MIL-STD-202, and 12 hours of temperature cycling, with non-operational testing for shock per MIL-STD-810C, and altitude to 50,000 feet. The CDI is ideally suited for use in airborne, shipboard or ground applications.

ELECTRICAL SPECS:

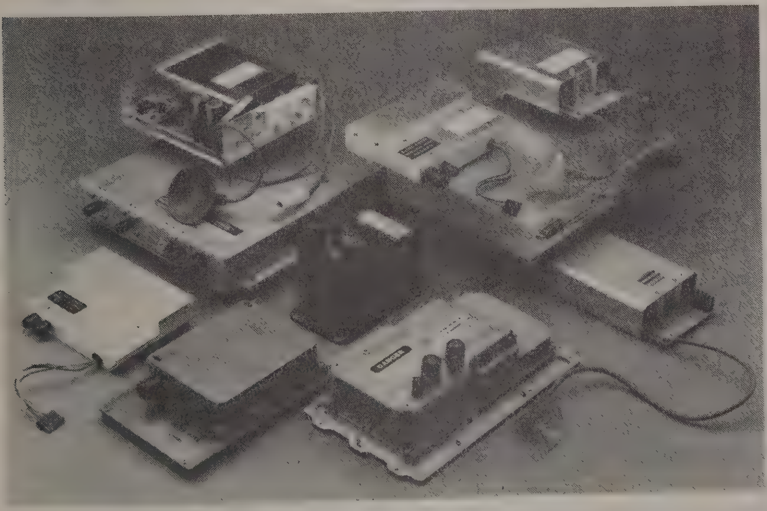
- **Anode**: Specified from 18kV to 29kV ±1kV @up to 1.2mA; Ripple: <3Vp-p
- **Focus**: 5.5kV to 8.5kV @ ±5µA (alternate ranges available)
- **G2**: 200V to 1kV @ ±5µA
- **G1**: -200V ±10% @ up to 2mA
- **Amp B+**: +400V ±10% @ up to 3mA
- **DF Input**: 500V max./40Hz to 250kHz
- Input: +24V ±5% (options available)
- Remote on/off - TTL compatible
- Beam current sense
- Anode monitor

MECHANICAL SPECS:

Size: 6.0" x 5.0" x 1.75"
Weight: Approx. 1.8 lbs.

ENVIRONMENTAL SPECS:

Operating Temp: 15°C to +85°C case
Storage Temp: -55°C to +90°C
Operating Altitude: 0 to 10,000 ft.
Humidity: 0 to 95% non-condensing



Experience the pride we take in our products. When IMAGE counts, there's no better choice than Rantec.

THE FAST AND EASY WAY TO FIND IC MANUFACTURERS' DATA BOOKS!

The 1993 DIRECTORY OF IC MANUFACTURERS' DATA PAGES is a unique index designed to save you time and help you find the manufacturers' precise data book or sheet that you need on any integrated circuit listed in the 1993 IC Master.

Simply look up any IC by base number. The cross-reference will show you the manufacturer's complete device number together with the name and issue date of the applicable manufacturers' data book.

For example: If you wanted the complete manufacturers' data on device number ADOP07. Look up base number 07. Following the base number is the manufacturer's name...Analog Devices, the complete device number ADOP07 and the page number of where the device is described in the IC Master. The listing will then show you that the manufacturer's data book is Analog Devices "Linear Products DataBook" .

Now you can contact Analog Devices by phone or FAX and request the EXACT data book you need. No wasted words, no wasted time.

Plus, where and whom to call for technical information, at any IC manufacturer, is at your fingertips in the complete Manufacturers & Distributors Directory.

A guaranteed time saver, this unique directory is a must for every engineering department!

Don't waste another precious engineering minute.

ORDER THE 1993 DIRECTORY OF IC MANUFACTURERS' DATA PAGES...TODAY!

To order your 1993 Directory of IC Manufacturers' Data Pages,
Contact your local IC MASTER distributor or,

CONTINUOUS DUTY DC POWER SUPPLIES

MAGNETICALLY REGULATED — GUARANTEED 10 YEARS

- Withstand 220% surges
- Inhrently failsafe
- Immune to EMI/RFI
- CSA and UL approved
- Continuous duty under full load
- Any failure mode drops output
- 13.8 VDC at up to 70° C. ambient
- Impervious to sustained short circuits
- No derating between -30° and 70°C.

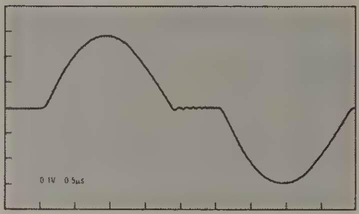
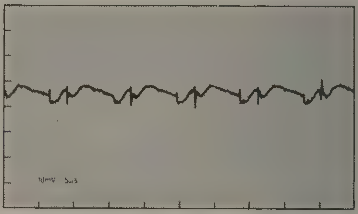
The Future is Now…True Series Resonant Technology Today

Technology and Determination: Resonant Power Technology is an industry leader in the design and manufacture of high technology switching power supplies. In 1985, the founders of RPT began their work towards developing the first commercially available, off-line, series resonant switching power supply. Series resonance provided a smaller, lighter, highly reliable and quieter (both in EMI and output noise & ripple) product that also was able to produce significant surge currents.

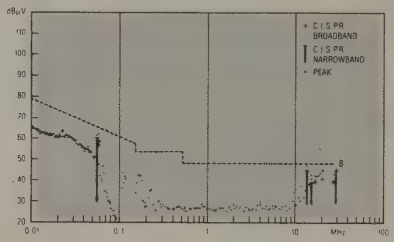


Resonant Circuit Sinusoidal Current Waveform



12 Volt Output Noise Waveform

Radio-Interference Voltages
frequency range: 0.01–30 MHz



RP-130
Series Performance Against
VDE Class B Limits

■ Series resonance offers a number of performance advantages. Switching sinusoidal currents at the zero cross-over point elminates the peak switching stress, typically in the multiple kilowatt region, experienced by pulse width modulated products. Very low switching stress combined with inherent peak current limiting and thermal limiting circuitry results in a power converter whose durability exceeds that indicated by calculated MTBF's in excess of 80,000 hours. RPT's products have been designed using premium quality components derated conservatively thereby enhancing the reliability of its series resonant topology.

■ The sinusoidal current waveform generated by the resonant circuit produces lower RFI/EMI and output noise than conventional square wave converters, due to the substantial reduction in the rate of current change i.e. di/dt. FCC and VDE Class B levels are achieved without use of external filtering on all RPT power supplies. Output ripple levels typcially achieved only by linear power supplies (20 mVolts peak to peak on all outputs) are also a by-product of the series resonant technology.

■ Higher switching frequencies allow the use of smaller passive components resulting in overall size reductions of 2 or 3:1 as compared with conventional switching power supplies. RPT's products typically offer power densities greater than 3.5 Watts/cubic inch.

■ Resonant Power's product line is based upon resonant modules of 130 and 230 Watts offered in single or multiple output versions. A unique characteristic of the resonant converter is its ability to share power equally when placed in a master/slave relationship. RPT has designed and manufactured custom power supplies offering in excess of 600 Watts and 7 outputs utilizing parallel converters. RPT encourages custom designs and offers a broad range of options including power fail detect, power good signal, remote shut down and individual output voltage margining circuits in order to satisfy its customers' individual requirements.

INPUT

Input Specifications

Input Voltage Range (Internally Selectable)	95–132 VAC or 190–264 VAC
Input Frequency	47-440 Hz
Input Protection	Internal Fuse
Inrush Current Limit: 80–130 Watts (117 VAC/230 VAC)	20A max/40A max
140–230 Watts (117 VAC/230 VAC)	20A max/40A max
Input EMI Filter:	FCC Class B std VDE Class B opt
Universal Input	Optional
Power Factor Correction	Optional
* UL544 (Leakage Current <100uA) & VDE Class B EMI	Optional
* MIL-STDs: 461C, 704D, 810D	Available on custom units

OUTPUT

Output Specifications

Line/Load Regulation (Outputs 1 & 2)	1% nominal
(Outputs 3 & 4)	3% nominal
Ripple all outputs	20 mV peak-to-peak
Hold-Up Time	30 mSec
Temperature Coefficient	0.05%/degree C
Overload Protection	Fold back with automatic recovery
Thermal Protection	Fold back with automatic recovery
Overvoltage Protection	6.2 ± 0.6 Volts crowbar on the + 5 Vdc Output 14.0 ± 1.0 Volts crowbar on the + 12 Vdc Output*
Power Good Signal	Signal given when:
	+ 5 Vdc 4.6–4.9
	– 5 Vdc – 4.3–4.7 Vdc
	+ 12 Vdc 10.8–11.8 Vdc
	– 12 Vdc – 10.4–11.2 Vdc
AC Power Fail Detect	To customer specification

Environmental Specifications

Operating Temperature Range:	0°C to 70°C
Storage Temperature	– 25°C to 75°C

General Specifications

Transient Response	500 µsec to settle to within 1% of the final value after a 25% load step
Frequency	250 kHz Resonant Frequency
Conversion Method	Series Resonant circuit switching sinusoidal current in zero current mode

Specifications subject to change without notice.

COMMON SPECIFICATIONS

Input
105 to 130/198 to 265 VAC (selectable on barrier block) 47-1000 Hz also 300 VDC ±10%. Brownout protection to 90/180 VAC.

Protection
All outputs are current limited, continuous overload and short circuit proof. Single outputs have self-recovering overvoltage protection. Thermal protection is provided by a thermal relay which opens the power input if the case temperature goes above 80°C. Multiple outputs have self-recovering OVP on the 5V output only.

Operating temperature
−40°C to +80°C case (no derating).

EMI filter
Will meet VDE 0871(A) and FCC spec for conducted emissions using an external filter. Corcom filter 3 SPIA is recommended. For MIL 461A, Captor A4581 is recommended.

Mounting
Mounting on bottom by means of 6, 10-32 tapped inserts.

Storage temperature
−55°C to +85°C

Cooling
Maximum mounting base temperature for full output is 80°C. For no (air or conductive cooling), maximum ambient temperature of 30°C for full power output.

Temperature stability
Better than .02%/°C.

Size
11.12″ × 5.29″ × 1.75″. Single outputs. (28.3 cm × 13.5 cm × 4.3 cm).
10.55″ x 5.29″ × 1.75″. Multiples.

Weight
5.5 lbs.

MTBF
115,000 hours as calculated by MIL-HDBK-217C. (Model 325).

Remote sensing
All models have remote sensing.

FEATURES

- ■ Meets MIL-STD's
- ■ Low profile 1.7″
- ■ Ruggedized design
- ■ 115/230 VAC input without any strapping
- ■ Fully protected
- ■ Full power out at 80°C case temperature
- ■ Brownout protection to below 95 or 190 VAC
- ■ Parallelable (consult factory for procedure)
- ■ Up to 1.6 W per cubic inch
- ■ Soft start limits inrush to 13 amps max.

MINIGLOSSARY
POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

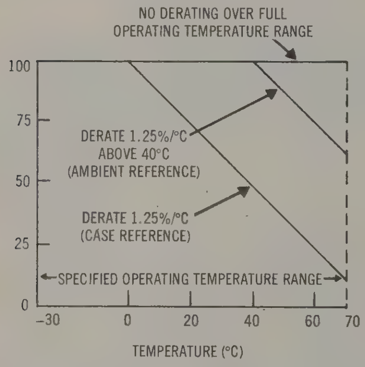

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

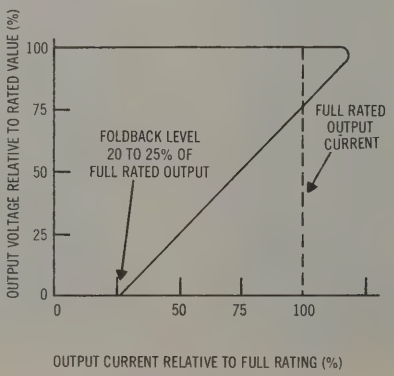

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

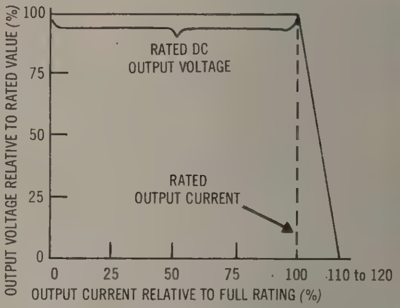

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

SHOGYO TRANSFORMERS AND ADAPTERS

Your design deserves Shogyo quality and reliability.
You deserve…
Shogyo Service…comprehensive, responsive and fast
Shogyo Professionalism…the helpful experience you need
Shogyo Prices…always competitive, usually better
and…
Shogyo Selection…with complete custom design capabilities

Including a diverse offering of UL/CSA approved:

- Power transformers:
  standard core sizes from EI-28 to EI-86, Nylon 66, PBT or Phinolic bobbin materials, channel frame or PCB mounting, enclosures with or without endbells, and UL recognized AWM, terminal, or pin connections
- Double protection power transformers:
  conform with UL 1411 seven hours construction and abnormal test requirements, 3500V dielectric test voltage
- Line matching transformers:
  70.7 and 25 volt, maximum power levels from 2 to 16 watts, standard core sizes from EI-41 to EI-66, and a secondary impedance of 8 ohms
- Telephone coupling transformers:
  high quality low insertion loss, core sizes from EI-19 to EI-35, frequency response of 300–3500Hz ± 3dBa, and a secondary impedance of 500, 600, or 900 ohms
- Lamp ballast transformers:
  UL 935 listed simple reactance coil type
- Wall-mount, plug-in adapters:
  European or American, 120V, 50/60Hz inputs, outputs from 3VDC to 24VDC, 100mA to 1.7Amp, and 0.3 to 14.4 watts

And featuring:

- PC pin, solder leg mount or lead wire connections
- A complete line of mating cords and terminating plug connectors

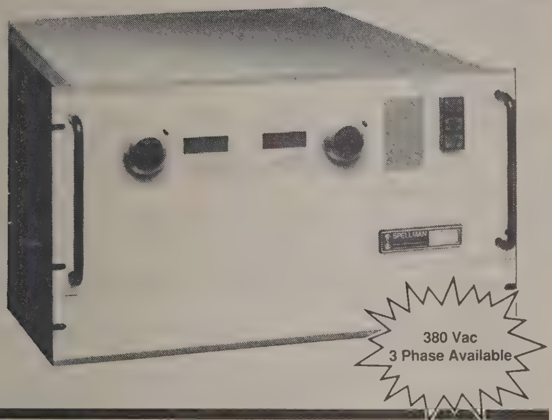
SR6 SERIES

SR6 Series 6kW HV Power Supplies



Features:

- Compact design and light weight
- Low cost per Watt
- Low stored energy
- Low EMI and RFI
- Overvoltage, Overcurrent, Arc, and Short Circuit Protection
- Constant Voltage/Constant Current Operation with Automatic Crossover
- Arc Detect, Arc Quench and Arc Count
- Extensive Local and Remote Operation
- 85% efficiency
- System Status Indicators

The SR6 series incorporates series resonant converter technology with a unique patented control circuit to provide unmatched performance. Special circuitry enables this supply to operate without damage or interruption in rugged environments that frequently pose threats to conventional high voltage power supplies. In addition, the SR6 series protects your load from excessive peak currents by instantaneously limiting the output current when an arcover condition is sensed.

Remote Interface:

- Remote Voltage Control (0 to 10V)
- Remote Current Control (0 to 10V)
- Voltage Test Point (0 to 10V)
- Current Test Point (0 to 10V)
- Remote Power On/Off
- External Interlock
- Inhibit Control of High Voltage Output
- External HV On/Off Control and Indicators

The SR6 series provides extensive remote control capabilities with many standard features not usually found in other supplies. This combination provides the SR6 with flexibility for integration into your applications. Optional circuitry is available to meet your requirements. See Options section.

Specifications:

- Input: 208Vac ±10%, 50 or 60Hz, three phase.
  380Vac, three phase, available.
- Output controls: Voltage and current are continuously adjustable over entire range via 10-turn potentiometers with a lockable counting dials.
- Voltage regulation:
  Load: 0.005% of full voltage for full load change.
  Line: ±0.005% of full voltage over specified input range.
- Current Regulation:
  Load: 0.05% of full current ±100uA for any voltage change.
  Line: ±0.05% of full current over specified input range.
- Ripple: 0.1% P-P.
- Temperature Coefficient: 100ppm/°C. Higher Stability (50ppm/°C) available on special order.
- Stability: 0.01%/hr. after ½ hour warm up, 0.02% per 8 hrs. (typical).
- Metering: Digital voltage and current meters, 1% accuracy.
- Output cable: 10 ft. shielded high voltage cable, removable at rear panel.
- Physical: 10½" H x 19" W x 19" D rack mount for units 1 to 70kV. 10½" H x 19" W x 24" D for units 80 to 120kV.

Options:

AOL	Adjustable Overload Trip
FG	Floating Ground
LR	Low Ripple (0.05% P-P)
CPC	Constant Power Control
APT	Adjustable Power Trip
220	220V AC Single Phase Input w/higher ripple
RMI	Remote Mode Indicators
ROA	Remote Overvoltage Adjust
SL	Mounting Slides
	Filament Power Supply
	12kW & 18 kW Parallel Operation

If you don't see the features or options that your application requires, please contact us with your needs so we may discuss customizing one of our products to match your application.

Maximum Rating		Model Number
kV	mA	
1	6000	SR1*6
2	3000	SR2*6
3	2000	SR3*6
6	1000	SR6*6

60	100	SR60*6
70	86	SR70*6
80	75	SR80*6
100	60	SR100*6
120	50	SR120*6

* Specify "P" for positive, "N" for negative, or "PN" for reversible polarity.
Higher voltage models available on special order.

Parallel Operation:

Parallel Operation options to increase the power and current output capability of the SA4 and SR6 Series HV Power Supplies are available. Each system is comprised of two, three (or more) separate rack mount chassis consisting of the Master and the Slave(s). Signal Cables are connected from the Master to the Slave supplies via 15 pin mini D connectors located on the rear panels and the appropriate HV Interconnect and Ground cables are connected to provide the paralleled outputs.

The modular construction of the Spellman SA4 and SR6 Series permits "mix and match" stacking which make cost efficient output power combinations possible. For example, an SR6 with an SA4 combination provides a 10kW output system.Two SR6's with one SA4 will provide a 16kW output capability in 26.25" of rack space.

SA4 SERIES

SA4 Series 4kW HV Power Supplies

SPELLMAN
SA4

Features:

- Compact design and light weight
- Low cost per Watt
- Low stored energy
- Low EMI and RFI
- Overvoltage, Overcurrent, Arc, and Short Circuit Protection
- Constant Voltage/Constant Current Operation with Automatic Crossover
- Arc Detect, Arc Quench and Arc Count
- Extensive Local and Remote Operation
- 85% efficiency
- System Status Indicators

The SA4 series incorporates series resonant converter technology with a unique patented control circuit to provide unmatched performance. Special circuitry enables this supply to operate without damage or interruption in rugged environments that frequently pose threats to conventional high voltage power supplies. In addition, the SA4 series protects your load from excessive peak currents by instantaneously limiting the output current when an arcover condition is sensed.

Remote Interface:

- Remote Voltage Control (0 to 10V)
- Remote Current Control (0 to 10V)
- Voltage Test Point (0 to 10V), 0.5% accuracy
- Current Test Point (0 to 10V), 0.5% accuracy
- Remote Power On/Off
- External Interlock
- Inhibit Control of High Voltage Output
- External HV On/Off Control and Indicators

The SA4 series provides extensive remote control capabilities with many standard features not usually found in other supplies. This combination provides the SA4 with flexibility for integration into your applications. Optional circuitry is available to meet your requirements. See Options section.

Specifications:

SL SERIES

Compact 10W-1200W HV Power Supplies

Spellman's SL series high voltage power supplies are designed to meet uncompromising performance standards in a minimum of space. These are full featured supplies available in a wide range of outputs with many available options. This makes the SL series ideally suited for satisfying the requirements of applications such as:

- Analytical X-Ray
- CRT Testing
- Electrostatics
- E-Beam Systems
- Capacitor Charging
- Hipot Testing
- General Laboratory
- CW Lasers

Due to the high degree of flexibility built into the design, the SL series can be easily customized for OEM requirements.

Features:

- Very Compact and Light Weight
- Low Stored Energy
- Low EMI and RFI
- Voltage Range from 1 to 130kV
- High Stability
- Constant Voltage / Constant Current Operation with Auto Crossover
- Reversible Polarity Standard up to 6kV
- Overvoltage, Overcurrent, Arc and Short Circuit Protection
- System Status Indicators
- Extensive Analog and Digital Interface
- Designed to Comply with UL/CSA/IEC Standards

A resonant high frequency inverter with proprietary control provides fault free operation in extreme transient and arcing environments together with greater than 85% efficiency.

Specifications:

- Input: 115Vac/220Vac ±10%, 50/60Hz internally selectable.
- Output: Models available from 1kV to 130kV. Each model is available in positive, negative or reversible polarity output.
- Local Controls: Voltage and current are continuously adjustable by ten turn potentiometers with lockable counting dials, on/off circuit breaker/switch, high voltage on switch/indicator and high voltage off switch/indicator.
- Voltage Regulation:
  Load: 0.005% of maximum voltage for full load change.
  Line: ±0.005% of maximum voltage for a ±10% input line change.
- Current Regulation:
  Load: 0.01% of maximum current ±100uA for full voltage change.
  Line: ±0.005% of maximum current for a ±10% input line change.
- Ripple: 0.1% p-p of maximum output, voltage or current regulated.
- Temperature Coefficient: 100ppm/°C voltage or current regulated. Higher stability is available on special order.
- Ambient Temperature: Operating: 0°C to 50°C
  Storage: -40°C to 85°C .
- Stability: 100ppm/hour after a one half hour warm up for both voltage and current regulation.
- Metering: Digital voltage and current meters, 3 1/2 digit ± 1 least significant digit.
- Output Cable: 10 feet of shielded high voltage cable removable at the rear panel.
- Size: 10W and 300W: 1 3/4" H X 19" W X 19" D** rack mount.
  600W & 1200W: 3 1/2" H X 19" W X 19" D** rack mount.
  **Depth becomes 24" for 80-130kV ranges
- Weight: 30-50 lbs depending on model.

Remote Interface:

- Remote Voltage Control: 0-10V = 0-100% ± 0.5% of output.
- Remote Current Control: 0-10V = 0-100% ± 0.5% of output.
- Voltage Test Point: 0-10V = 0-100% ± 0.5% of output.
- Current Test Point: 0-10V = 0-100% ± 0.5% of output.
- Remote H.V. On/Off Control: Contact closure.
- Remote H.V. On/Off Status: +24Vdc at 100mA maximum.
- External Interlock: Contact closure.
- High Voltage Enable: Open collector compatible.

Standard Features:

- 10 second slow start
- Voltage and Current Regulation
- Arc Quench
- Arc Count/Arc Trip

Options:

AOL	Adjustable Overload Trip
FG	Floating Ground (15V Standard)
FGLL	Low Leakage Floating Ground 10nA
LR	Low Ripple, .05% p-p
NSS	No Slow Start
SS(X)	Non-Standard Slow Start
APT	Adjustable Power Trip
CPC	Power Regulation
SL	Mounting Slides
FPS	Filament Power Supply
APM	Analog Panel Meters
RMI	Remote Voltage/Current and/or Power Status
	Remote Power Control (std w/CPC & API)
	Remote Power Test Point (std w/CPC & API)
	Focus Power Supply

Front Panel Status Indicators:

- Voltage Control Mode
- Current Control Mode
- Interlock Open
- Interlock Closed
- High Voltage Inhibit
- Overcurrent
- Overvoltage
- Arc
- Regulation Error
- Overtemperature

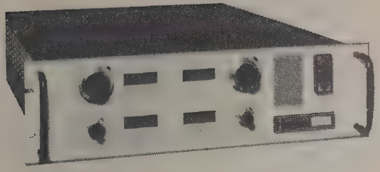
DF3 & FF3 SERIES

DF3 Series 3kW XRD X-Ray Generator



Spellman High Voltage Electronics has again redefined "state of the art" in XRD power supplies. The DF3 offers a unique combination of low cost, high performance and compact size. These features are achieved through Spellman's leadership in high frequency resonant inverter technology.

The DF3 uses a sine wave current source produced by a series resonant circuit to generate dc high voltage at switching frequencies greater than 20kHz. The high efficiency of this unit allows for air cooling in a 5¼" high chassis.

Features:

- Ideal for use with most common XRD X-Ray tubes.
- Compact Size, 5¼" high chassis.
- Greater than 85% efficiency.
- High Stability through precision feedback control circuits.
- Solid encapsulants insure maintenance free operation.
- System fault diagnostics and display including filament errors, overvoltage, over current and tube water flow interlock.
- Automatic ramp of the high voltage and emission current to preset values.
- Continuous adjustment for both high voltage and emission current.
- Fail Safe Interlock.
- Fail Safe X-Ray ON Lamp Circuit.
- Water Flow Control.
- Extensive remote interface capabilities.

Specifications:

- Input Voltage: 187-242 Vac, 50 or 60 Hz, single phase (three phase optional)
- Output Voltage: 0-70kV negative polarity.
- Output Current: 0-80 mA.
- Maximum Output Power: 3kW (4kW optional)
- Output Voltage Regulation:
  Load: 0.005% of rated output for a full load change.
  Line: 0.005% of rated output over specified input range.
- Temperature Coefficient: 50 ppm/°C (20 ppm/°C optional).
- Long Term Stability: 0.01%/8 hours.
- Emission Current Regulation:
  Load: 0.01% of rated output for a 10-60kV change
  Line: 0.005% of rated output over specified input range.
  Temperature Coefficient: 50 ppm/°C.
  Long Term Stability: 0.01%/8 hours.
- Ripple: 0.03% rms below 1kHz
  0.75% rms above 1kHz.
- Filament Voltage: 14 Vac (dc filament optional).
- Filament Current: 5A (up to 12A max available).
- Size: 5¼"(13.26cm) H x 19" (48.26 cm) W x 22" (55.88cm) D.

Metering and Control:

- Front Panel Meters: Digital tube voltage, tube current meters, tube power and filament current meters are provided.
- Front Panel Controls: Potentiometers are provided for tube voltage, tube current, tube power limit and filament current limit. Front panel switches include Control Power On, X-Ray Off and X-Ray On (fail safe).
- Status Indicators: The following status indicators are located on the front panel:

HV Inverter Error
Fil Inverter Error
Interlock Closed
Interlock Open
Overvoltage
Overcurrent
Overpower
HV Regulation Error
Current Regulation Error
kV Minimum Error
Arc Indicator
Filament Current Limit
Open Filament

Additional Features:

- Water Flow Switch: A 24Vdc signal is available on the rear panel to turn on the cooling water to the X-Ray tube. This signal can be enabled either when control power is on or when the high voltage is turned on. (Customer must specify).
- Fail Safe Interlock: A 220Vac or 12-24Vdc signal is available on the rear panel to energize an external X-Ray on lamp. This signal is energized when the high voltage is turned on. High voltage will not enable if this circuit is open.
- Preheat and Ramp: Automatic preheat and ramp control circuits are provided which ramp the kV and mA slowly to set levels. kV ramps in approximately 2 seconds while mA ramps in approximately 10 seconds.
- Output Connector: 75kV, 3 conductor Federal Standard X-Ray connector. -60kV is connected to terminal "C". Terminals "S" and "L" are jumped together. The filament output is connected between terminals "C" and "S". Other configurations are optional.
- Remote Signal Connector: Remote interface is available via a 50 pin mini D connector. Extensive remote programming and monitoring is provided.

FF3 Series 3kW XRF X-Ray Generator

After establishing a leadership position in XRD power supplies, Spellman High Voltage Electronics has brought its expertise to the XRF field. This unit was designed to be used with most end window X-Ray fluorescence tubes. Designed in conjunction with the DF3, the FF3 meets all the specifications of the DF3 with the following exceptions:

Specifications Different from DF3

- Output Voltage: 0-70kV positive polarity.
- Output Current: 0-100 mA.
- Maximum Output Power: 3kW (4kW, 80mA optional).
- Filament Voltage: 14 Vac (dc filament optional).
- Filament Current: 12A ac.
- Optional dual filament power supply available.

Additional Features:

- Output Connector: 75kV, 3 conductor Federal Standard X-Ray connector for the high voltage output. A two position terminal block is provided for the filament output.

XR18 & CC6 SERIES

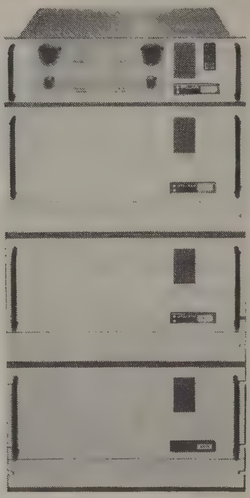
XR18 Series 18kW HV Generator for X-Ray

Features:

- Compact design
- Low stored energy
- 0.1% P-P ripple
- Low EMI and RFI
- Overvoltage, arc, and short circuit protection
- Extensive Local/Remote Operation
- 85% efficiency
- Extensive tube protection features
- Fail Safe X-ray On indicator

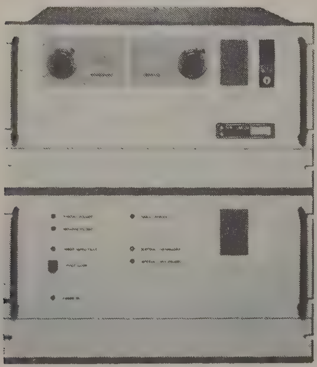
Specifications:

- Input: 208 Vac ±10%, 50 or 60Hz, three phase
- Output: 10-60kV continuously adjustable, negative polarity.
- Output Voltage regulation:
  Load regulation: 0.005% of full voltage for 0 to 100% load change.
  Line regulation: ±0.005% of full voltage over specified input range.
- Output Voltage Ripple: 0.1% P-P (≤360Hz)
- Output Voltage Stability: 0.01%/hr. after 1/2 hour warm up. , 0.02% per 8 hrs. (typical).



- Voltage and Current Temperature Coefficient: 100 ppm / °C Higher Stability (50 ppm / °C) available on special order.
- Emission Current: 0-300mA, continuously adjustable.
- Emission Current Stability: 0.01% per 8 hours after 1/2 hour warm-up.
- Emission Current Regulation: 0.01% ±50 µA for a 50% voltage change.
- Filament Compliance Voltage: 0-20Vac
- Filament Current: 0-18A ac.
- Bias Output Voltage: 0-1kV dc.
- Bias Current: 1mA max.
- Bias Ripple: 0.1% rms.
- Metering: Digital meters for kV, mA, filament current, and bias voltage.
- Controls: AC ON/OFF, Output Voltage, Emission Current, X-Ray ON, X-Ray OFF, Bias Voltage, Filament Limit.
- Output Connector: Federal Standard 75kV X-Ray connector.
- Interface Connector: 50 pin female mini-D.
- Dimensions:
  Three chassis,
  each 10½"H x 19"W x 19"D.
  One chassis, 5¼"H x 19"W x 19"D.
- Weight: 265 lbs total.
- Ambient Temperature:
  Operating: -20°C to 40°C
- Storage: -40°C to 85°C

CC6 Series 6kW Cable Charging System



The Spellman CC6 series is designed for powering long lengths of communications cable and repeaters. A combination high frequency series resonant inverter topology, protective clamps, bleed and crowbar circuits provide fault free operation. The CC6 is ideally suited for testing:

- Power feed cable
- Submarine cable
- Fiber optic cable
- Ship board or land based installations

Because of the flexibility built into the design, the CC6 can easily be customized for OEM requirements.

Features:

- Low stored energy
- Low EMI and RFI
- Redundant externally adjustable overvoltage and overcurrent protection
- True constant current operation
- True cable current sensing
- Reversible polarity via rear panel link
- Output range from 1-6kV
- Power range from 1-6kW
- System status indicators
- Analog/digital interface compatible with RS232
- Safety crowbar automatically engages on power down or during a cable fault
- Internal flyback and reverse transient protection
- 85% efficiency
- Designed to provide stable operation while driving complex cable impedances
- Internal dummy load for calibration and fault system verification
- Designed to meet UL and CSA standards
- Cable charged, dummy load and crowbar indicators

Specifications:

- Input: 220Vac ±10%, 50/60Hz, 1 phase
- Output: Four models available from 1kV to 6kV
- Local Controls: Voltage and current continuously adjustable over entire range via 10 turn potentiometers.
- Voltage Regulation:
  Load: 0.005% of voltage for full load change
  Line: 0.005% of voltage over specified input range
- Current Regulation:
  Load: 0.05% of rated current ±100 µA for any voltage change
  Line: 0.05% of rated current over specified input range
- Output crowbar will automatically engage for any power supply fault.
- Dummy Load: 300 Watts for calibration.
- Temperature Coefficient: 0.01%/°C over the temperature range from -20°C to 40°C. Higher stability available.
- Stability: 0.01%/hour after 1/2 hour warm up. 0.02%/8 hours typical.
- Metering: Digital voltage and current meters. 1% accuracy.
- Output Connector: 90A terminal block

RHSR, RHR & UHR SERIES

RHSR Series Medium Power HV Power Supplies

Features:

- Exceptionally Good Regulation
- Very Low Ripple
- Remote Programming and Test Points
- Overload and Short Circuit Protected
- Low RFI
- Low Stored Energy

Specifications:

- Input: 105-125Vac, 50-60Hz
- Output: Voltage continuously adjustable over entire range from zero to maximum rated voltage by means of a 10-turn potentiometer
- Load Regulation: 0.001% for FL Change.
- Line Regulation: ±0.001% for a ±10% input change.
- Ripple: 0.001% RMS
- Stability: 0.005%/hr; 0.01%/8hrs
- Metering: Analog voltage and current meters, 2% accuracy.
- Size: All units are 19" W x 16" D. See Chart for height.

Max. Rating			Model Number	Height (In Inches)
kV	mA	W		
5	10	50	RHSR5PN50	5 1/4"
10	6	60	RHSR10PN60	5 1/4"
15	4	60	RHSR15PN60	5 1/4"

50	1	50	RHSR50*50	8 3/4"
60	1	60	RHSR60*60	8 3/4"

* Specify "P" for positive, "N" for negative or "PN" for reversible polarity

RHR Series Medium Power HV Power Supplies

Features:

- Good Regulation
- Low Ripple
- Overload and Short Circuit Protected
- Low RFI
- Low Stored Energy
- Three Year Warranty

Options are available to adapt the unit to each specific requirement. Options include remote voltage programming, remote voltage and current monitoring, current regulation and external interlock. Contact factory for further details.

Specifications:

- Input: 105-125Vac, 50-60Hz
- Output: Voltage continuously adjustable over entire range from zero to maximum rated voltage by means of a 10-turn potentiometer.
- Load Regulation: 0.01% for FL change.
- Line Regulation: ±0.01% for a ±10% input change.
- Ripple: 0.02% RMS + 2V RMS, Models over 100kV are 0.1% RMS
- Stability: 0.02%+ 2V/hr; 0.05%+ 5V/8hrs
- Metering: Analog voltage and current meters, 2% accuracy.

All units up to 100kV are designed for 19" rack mounting. Units over 100kV consist of a driver chassis, high voltage stack and a rack mountable remote control panel with 15' of cable. See chart for dimensions.

If you don't see the model that your application require we invite you to contact us with your special requirements so we may discuss customizing our products to meet your needs.

PTV SERIES

200W & 350W Modular HV Power Supplies

The Spellman PTV Series modular high voltage power supplies now deliver up to 350 Watts of continuous power. A quasi-resonant inverter design provides over 85% efficiency with very fast dynamic response and very high peak current capability. The PTVs incorporate extensive standard features in two modules with power output ranges of 200W and 350W in a wide range of output voltages operating to the most exacting specifications. An optional 600 Watt pulse capability is available for applications requiring fast response and high peak power.

Applications:

- Projection Television
- X-ray systems
- E-beam systems
- Capacitor charging systems
- CPT testing

Features:

- Output voltages from 1kV to 60kV at 200W and 350 Watts
- Voltage programming from zero to rated output
- Current programming from zero to rated output
- Output Inhibit control via TTL signal
- Test points for output voltage and current
- Designed to meet UL, CSA and IEC950 specifications
- 1 second slow start
- EMI/RFI input filter
- Overvoltage and Short Circuit protection
- Low stored energy
- Internal 10.24V reference

Signal Input Connector

Nine pin mating connector and pins provided.

Pin	Function
1	10.24V Reference
2	Current Program*
3	Voltage Test Point*
4	Voltage Program*
5	Ground, Common
6	Current Test Point*
7	HV Enable/Inhibit (TTL high to enable)
8	OVP Monitor
9	Program/Test Point Return

* Program and Test Point Scaling:
0 to 10V ±1% = 0 to rated output

Options:

- G2 Zener Regulated Output (1kV, 1mA max)
- Optional Input: 100 Vac ±10%, 50/60 Hz
- Floating Ground (50V max.)
- Bipolar Master/Slave
- Special HV Output Termination
- Special Input Termination
- Inhibit Polarity
- No Slow Start
- Alternate Test Point Scaling
- Custom Designed Modules

Specifications:

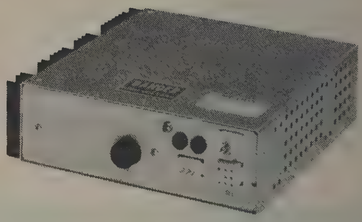
Input:
115 Vac ±10%, 50/60Hz
220 Vac ±10%, 50/60Hz
Specify at time of ordering.

Output:
Models from 1kV to 60kV.
Each model is available in positive or negative polarity outputs.

Voltage Regulation:
Load:
Static: 0.01% of output voltage no load to full load
Dynamic: 1.25% E_{OUT}/mA
Line:
0.01% for a ±10% change in input voltage

Current Regulation:
Load:
0.05% of output current from 0 to rated voltage
Line:
0.05% of rated current over specified input range

Efficiency: 80%



Ripple:
PTV200:
1 - 30kV: 0.05% p-p of output voltage
40 - 60kV: 0.1% p-p of output voltage
PTV350: 0.2% p-p of output voltage

Switching frequency (nominal): 60 kHz

Temperature:
Operating: -20°C to +40°C
Storage: -40°C to +85°C

Voltage Temperature Coefficient: 0.01%/°C

Stability (voltage & current):
0.01%/hr after 1/2 hour warm up
0.02% per 8 hours

Cooling:
200 Watt: convection cooled
350 Watt: fan cooled, rear air intake

Size:
1-40kV: 3 3/16"H x 10 3/4"W x 10"D (81mm x 273mm x 254mm)
50,60kV: 4 3/16"H x 10 7/8"W x 11 13/16"D (106.5mm x 276mm x 351mm)

HV Output Cable:
18" ±1" (457mm) UL listed high voltage cable

Power Input Connector: IEC320

AC Line Voltage Input Cable:
Length: 8 ft (2.4 m)

Output Voltage	200 Watt Model PTV200		350 Watt Model PTV350

MP & SMS SERIES

MP Series 10W High Stability HV Power Supplies

Designed as high performance DC to DC converters with output voltages up to 30kV, the MP Series power supplies combine linear and switched mode techniques minimizing internal dissipation and generated RFI. This gives improved output voltage stability and increased reliability. The high frequency oscillator may be synchronized to other MP modules or to an external source.

Applications:

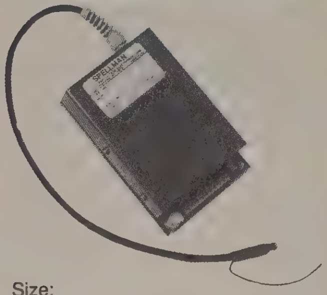
- Photomultiplier tubes
- Scintillators
- Electron guns
- Ion guns
- Nuclear instruments

Features:

- High stability - 0.001% line and load regulation
- Low output ripple - 0.001% p-p
- Remote Voltage Programming
- 10V reference output for external control
- Output current and voltage monitor
- Arc and short circuit protected
- Internal oscillator may be synchronized externally
- Other options available

Specifications:

- Input Voltage: +24Vdc ±2V. Other input voltages available as option.
- Input Current: Less than 1A at full output.
- Output Voltage: Continuously adjustable over entire output range. Positive or negative output polarity.
- Line Regulation: 0.001% for input change of 1V.
- Load Regulation: 0.001% for 100µA to full load change (at maximum voltage).
- Temperature Coefficient: Better than .0025%/°C.
- Stability: <0.007%/hr at constant operating conditions after 1 hour warm up.
- Output Control:
  1) Internal 10-turn potentiometer
  2) External Potentiometer
  3) Remote Voltage Programming, 0 to 10V, accuracy 0.1% full scale
- Output Voltage Monitor: 0 to +10V represents zero to full output ±1%.
- Output Current Monitor: 0 to +10V represents zero to full output ±2%.
- Operating Temperature: 0°C to +50°C
- Storage Temperature: -35°C to +85°C
- Input: 10 pin connector (mating connector supplied)
- Output: 20" shielded cable with flying leads



- Size:
  1-5kV: 5.8"L x 3.86"W x 1.65"H
  10-15kV: 7.44"L x 3.86"W x 1.65"H
  20-30kV: 8.75"L x 3.86"W x 1.65"H

Output Voltage	Max. Current	Ripple (full load)	Model
kV	mA	mV	
0 to 1	10	10mV p-p	MP1*
0 to 1.5	6	10mV p-p	MP1.5*
0 to 2	5	10mV p-p	MP2*
0 to 2.5	4	10mV p-p	MP2.5*
0 to 3	3	10mV p-p	MP3*
0 to 5	2	20mV p-p	MP5*
0 to 10	1	100mV p-p	MP10*
0 to 15	0.60	150mV p-p	MP15*
0 to 20	0.50	200mV p-p	MP20
0 to 30	0.33	300mV p-p	MP30

* Specify "P" for positive polarity or "N" for negative polarity

SMS Series 60W Modular HV Power Supplies

Features:

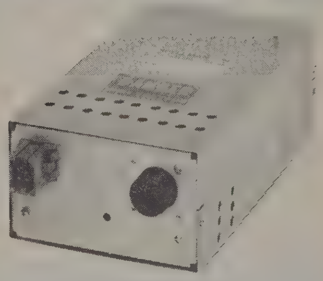
- Output voltages from 1kV to 60kV @ 60 watts
- Voltage programming from zero to rated output
- Current programming from zero to rated output
- Inhibit control of output via TTL signal
- Test points for output current and voltage
- Mode indicators for current and voltage control
- Overvoltage protection
- Overvoltage latch reset
- Designed to meet UL® requirements
- Low stored energy
- Compact package

The SMS series is based on a resonant flyback circuit that provides over 80% efficiency and high pulse current capability. This supply is ideal for applications requiring high peak current from a power supply that operates from a low voltage DC input. With the addition of optional circuitry, the SMS series has capability of delivering constant power down to 25% of the rated output voltage.

Specifications:

- Input: +28Vdc ±10%
- Output: 10 models from 1kV to 60kV. Each model is available in positive or negative polarity outputs.
- Load Regulation:
  Static: 0.01% of output voltage for NL to FL change.
  Dynamic: 10V/100µA max. NL to FL.
- Line Regulation:
  ±0.01% for ±10% input voltage change.
- Ripple:
  1-30kV: 0.05% p-p of output voltage.
  40-60kV: 0.1% p-p of output voltage.
- Physical:
  5" x 9" x 3"
- Input Connector: 9 pin AMP Metri-Mate
- Output Cable: 18" ±1" of UL® approved high voltage wire.
- Voltage Stability: 0.02% per 8 hours
- Voltage Temperature Coefficient: 0.01% per °C

The flexibility of the SMS series' design makes it ideal for customizing to fit OEM and special requirements.



Maximum Rating		Model number

MM & MR SERIES

MM Series PCB Mount HV Power Supplies

The MM Series high voltage power supplies are low cost, general purpose DC to DC converters, with output voltages up to 15kV, designed for direct PCB mounting. High reliability is designed into a compact and lightweight modular block intended for customer designed products at power levels up to 5 Watts.

The MM Series can be used with an external resistor feedback loop to provide regulated outputs. Application Notes are available from Spellman that show a range of voltage regulated circuits using the MM high voltage power supply.

Applications:

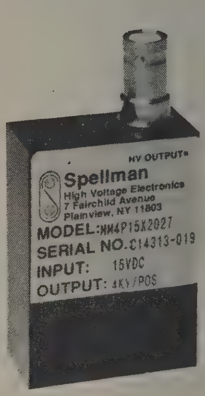
- Photomultiplier Tubes
- Solid State Detectors
- Flow Sensors
- Analytical Instruments
- Spectral Source Lamps
- Ink Jet Printers
- Gas Chromatography

Features:

- Outputs up to 15kV at 1.5W, 3W or 5W
- Low cost
- Compact size
- Arc and short circuit protected
- Positive or Negative Outputs
- Output Voltage Proportional to Input Voltage

Specifications:

- Input Voltage: 9Vdc, 12Vdc, or 24Vdc. Other input voltages available upon special order.
- Output Voltages: Any preset maximum voltage between 500V and 15kV is available. Multiple outputs can also be supplied. Output voltage is proportional to the input voltage over the range 10% to 100%.
- Output Power: 1.5W, 3W or 5W continuous; higher peak power available.
- Output Ripple: Less than 0.1% rms
- Load Regulation: 10% maximum
- Module Efficiency: 55% to 70%
- Isolated Outputs available
- Alternate Input Voltages available (6Vdc to 28Vdc)
- Modules are fully encapsulated in an ABS Box and may be wave soldered.
- Size:
  Up to 3kV: 1.57"L x 1.57"W x 0.79"H
  Over 3kV to 5kV: 1.97"L x 1.97"W x 1.18"H
  Over 5kV to 10kV: 2.95"L x 1.97"W x 1.38"H
  Over 10kV to 15kV: 3.74"L x 2.80"W x1.38"H



MR Series PCB Mount HV Power Supplies

The MR Series high voltage power supplies are low cost, miniature regulated modules with output power capabilities of 3 to 5 Watts.

Output voltages are up to 1500V, with input voltages from 11V to 18V dc. The refined flyback circuitry allows the module to be packaged in a small case size and achieve efficiencies up to 80%.

Typical ripple of less than 8% p-p can be improved by adding extra smoothing.

The module is able to run into a short circuit and is ideal for use in capacitor charging applications such as powering flash lamps.

Features:

- Small case size
- Low cost
- PCB Mounting
- Positive or Negative Output
- High Power Density
- Fully Regulated
- Output Current Limited
- Separate Output Control or Fixed Output
- High Efficiency
- Flexible Design can be adapted for special requirements

Specifications:

- Input Voltage: 11Vdc to 18Vdc. Other input voltages available upon special order.
- Output Voltages: Any output voltage up to 1500V. To be selected by customer requirements.
- Output Power: 5 Watts up to 800V.
  3 Watts from 800V to 1500V.
- Line Regulation: 0.1%
- Load Regulation: 0.1% for no load to full load change.
- Ripple at Full Load:
  Below 800V - 15% p-p of output voltage.
  800V to 1500V - 8% p-p of output voltage.
  Note: Improvement can be achieved by adding extra smoothing. A larger case size is required if mounted internally.
- PC Board mounting
- Modules are fully encapsulated in an ABS Box and may be wave soldered.
- Pin diameter is 1.2mm/.047"
- Size:
  Up to 800V: 2.1"L x 1.6"W x 0.51"H
  Over 800V to 1500V: 2.95"L x 1.97"W x 0.51"H

EPM, LCM & UM SERIES

EPM Series 30W Modular HV Power Supplies

Features:

- Output voltages from 1kV to 30kV @ 30 watts
- Voltage programming from zero to rated output
- Current programming from zero to rated output
- Inhibit control of output via TTL signal
- Test points for output current and voltage
- Overvoltage protection
- Designed to meet UL® requirements
- Compact package
- Low stored energy

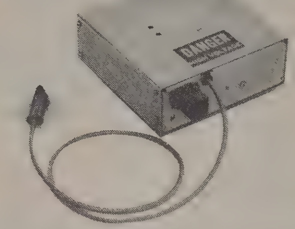
The EPM series utilizes proprietary circuitry enabling these high voltage power supplies to yield full output current from near zero to maximum output voltage. Current regulation is standard on all models and is particularly valuable in applications that require a current source into the load such as:

- Electrophoresis
- Electron Beam
- Ion Sources
- Photomultipliers
- Laboratory Applications

Specifications:

- Input: +24Vdc ±10%
- Output: 8 models from 1kV to 30kV. Each model is available in positive or negative polarity outputs.
- Load Regulation:
  Static: 0.01% of output voltage for NL to FL change.
  Dynamic: 10V / 100µA NL to FL.
- Line Regulation:
  ±0.01% for a ±10% input voltage change.
- Ripple: 0.1% p-p of output voltage.
- Physical: 5.7" x 5.7" x 2"
- Input Connector: 9 pin AMP Metri-Mate
- Output Cable: 18" ±1" of UL® approved high voltage wire.
- Voltage Stability 0.01% per 8 hours
- Voltage Temperature Coefficient: 0.01% per °C
- Voltage Test Point: 10V ± 2% = Max. rated output
- Current Test Point: 10V ± 2% = Max. rated output

Spellman engineers designed the EPM to be very flexible so that it can be easily customized to fit your OEM and special requirements. Please contact Spellman's Sales Department to discuss your application's requirements.



Maximum Rating kV	Maximum Rating mA	Model Number
1	30	EPM1*30
3	10	EPM3*30
5	6	EPM5*30
10	3	EPM10*30
15	2	EPM15*30
20	1.5	EPM20*30
25	1.2	EPM25*30
30	1	EPM30*30

* Specify "P" for positive polarity or "N" for negative polarity

LCM Series CRT HV Power Supplies

Feature:

- Eight standard model from 2kV to 30kV
- Tight dynamic and static regulation
- Proven reliability
- Focus and Grid outputs up to ±1100 volts
- Short circuit and overload protected
- UL® recognized

The LCM series provides a low cost regulated high voltage source for applications such as powering CRT's. This design employs an ultrasonic resonant sinewave oscillator that reduces stored energy and minimizes RFI. All high voltage components are vacuum encapsulated in a high quality silicone elastomer ensuring corona-free operation.

Specifications:

- Input: +24Vdc ±10% @ 800mA maximum at full load.
- Output voltage: See chart
- Load Regulation: 0.5% maximum
- Line Regulation: ±0.1% for a ±10% input change
- Ripple: see chart
- Operating Temperature: 0°C to 50°C.
- Output Cable: 15" ±1" of 40kV UL approved high voltage wire with anode cap.
- Case Dimensions: $4\frac{5}{32}$" L x $1\frac{3}{8}$" H x $3\frac{5}{32}$" W for 2-22kV models. 6" L x $2\frac{1}{8}$" H x $3\frac{3}{4}$" W for 30kV models.

Model	Maximum Rating voltage	Maximum Rating current	Ripple (V p-p)
LCM3.5	2 to 3.5kV	5mA @ 2kV 2.8mA @ 3.5kV	4
LCM5	3.5 to 5kV	2.8mA @ 3.5kV 2mA @ 5kV	4

LCM30	22 to 30kV	0.45mA @ 22kV 0.33mA @ 30kV	16

UM Series Unregulated Modular HV Power Supplies

Features:

- Low Cost
- Low Ripple
- Fully Enclosed Shielded Metal Case
- Encapsulated for Full Environmental Protection

The UM series provides compact, economical, unregulated high voltage for CRT's, PMT's, image intensifiers and scintillation counters. Maximum output voltages are from 1kV to 30kV and are proportional to input voltages.

Specifications:

- Input: +24Vdc ±10% for maximum rated output
- Line regulation: Output voltage is approximately proportional to input voltage.
- Load Regulation: Less than 20%, no load to full load at maximum rating.
- Ripple: 0.1% RMS
- Output: Adjustable from zero to maximum rated voltage by adjustment of input.
- Dimensions: Consult factory.

NEW! **CZE & MG9 SERIES**

Capillary Electrophoresis HV Power Supplies

Features:

- 30kV output voltage, programmable
- 0-300µA load current, programmable
- Auto polarity reversing upon digital command in <1.5 sec at no load.
- Low stored energy
- Digital ON/OFF control

Description:

The Spellman CZE2000 and CZE1000R High Voltage power supplies are designed to meet the requirements of the Capillary Zone Electrophoresis application and other applications requiring a hot switched reversible output voltage. The DC output voltage and current are continuously adjustable from 0 to 30kV and 0 to 300µA. Output polarity is reversible on the fly.

Options:

- Rack Mount w/meters and controls (CZE1000R)
- Alternate Input Voltage
- Alternate Test Point Scaling
- Special Connectors

Specifications:

Input Voltage
    CZE1000R: 115Vac ±10%
    CZE2000: 24 Vdc ±10%
Input Current: 1 A max.
Output Voltage: 0 to 30kV programmable
Output Current: 300µA max from 1-30kV
Line regulation:
    0.01% for a 10% input voltage change
Load Regulation:
    0.01% for a no load to full load change
Ripple: 0.1% peak to peak
Voltage Test Point:
    0 to 10V ±1% full scale
Current Test Point:
    0 to 10V ±2% full scale
Remote Enable: 3.4V=ON; <1V=OFF
Output Time Constant w/ no load: 0.3 sec.
Stored energy: 0.45 joules @ 30kV
Size:
    CZE1000R: 5.25"H x 19"W x 17" D
    CZE2000: 3.5"H x 5" W x 10"L

MG9 Series Magnetron HV Power Supplies

The Spellman MG9 Magnetron HV power supply is a high frequency, high efficiency unit designed specifically to power 6kW magnetrons such as the YJ1600. It contains the filament and optional magnet control supplies necessary to provide optimum drive. This rugged design delivers reliable power to magnetrons used for varied applications including:

- Industrial Cooking
- Powder Drying
- Rubber Vulcanization
- Sintering of Ceramics
- Processing of Radioactive Waste
- Plasma Generation

The MG9 can easily be customized for OEM requirements.

Features:

- Compact design and light weight
- Low stored energy
- Filament Supply with Local Controls
- Over voltage, over current, arc, and short circuit protection
- Constant Voltage/Constant Current Operation with automatic crossover
- Optional ±3A Transconductance Magnet Supply
- System Status Indicators
- Low Ripple
- Low Cost

Specifications:

- Input: 480Vac ±10%, 3 phase, 50/60Hz.
- Output: 0 - 8.0kV at 0 - 1.25A.
- Maximum Output Power: 9.0kW
- Slow Start: 1 second
- Voltage Regulation:
  Load: 0.1% of maximum voltage average for 0-100% output current
  Line: ±0.1% of maximum voltage average for a ±10% line voltage change.
- Current Regulation:
  Load: 0.5% of maximum current average for 0-100% output voltage
  Line: ±0.5% of maximum current average for a ±10% line voltage change.
- Ripple: 10% RMS max. in both voltage and current mode.
- Temperature Range: Operating: 0°C to 40°C; Storage: -40°C to 85°C.
- Metering: Filament RMS Voltmeter. Accuracy is ±2% (measured at primary output terminals).
- Voltage Programming: 10V = 8kV ±1%
- Current Programming: 10V = 1.25A ±1%
- Voltage Monitor: 0-10V = 0-8kV ±1%, Z out = 1K ±1%.

MG9
SPELLMAN

- Current Monitor: 0-10V = 0-1.25A ±1%, Z out = 1K ±1%.
- Filament Supply: The power supply provides a regulated filament drive to the primary of an external filament isolation transformer. (Customer Supplied).
- Size: 19"W X 10.5"H X 17"D.

Magnet Power Supply (optional):

- Typical output: ±3Adc at ±12Vdc. Configured as a transconductance power amplifier with 0-10V input voltage, and -3A to +3A output current. Option includes front panel meter.

WRM Series, HVD Series & Custom Designs

WRM Well Regulated Modular HV Power Supplies

Specifications:

- Input: +28Vdc ±10%
- Output: Controllable from zero to maximum rating via resistive divider or voltage source (floating or grounded). See chart for output voltage ratings.
- Line regulation: ±0.01% for a ±10% input voltage change
- Load regulation: 0.05% for a full load change
- Ripple:
  1500D/3000D - 0.01% RMS
  6000D - 0.02% RMS
  10KD - 0.03% RMS
  30KD - 0.1% RMS
- Protection: Overload, Arc and Short Circuit.
- Temperature:
  Operating: 0°C to +50°C
  Storage: -30°C to +85°C
- Dimensions: Consult Factory

HVD Series Resistive Dividers

Features:

- High Input Impedance
- 25 ppm Temperature Coefficient
- High Accuracy
- Corona-Free Operation

Spellman's Resistive Voltage Dividers provide laboratory or production facilities with a convenient method of measuring up to 100kVdc or 200kVdc with accuracy better than 0.5%. The Dividers are designed for use with standard high impedance digital and differential voltmeters.

	HVD100	HVD200

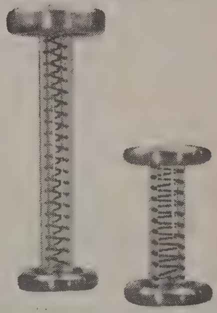
(2) For accuracy of 0.25% specify HVD200-1



Custom Designs

Homologation:

To homologate is to communicate, to concur, to act in harmony, from the Greek *"homologos."* At Spellman, we always blend our thinking with yours. We analyze your system, your needs and your plans. We nurture the technology and the hardware at the beginning - and throughout the product life.

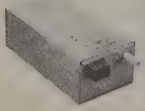
Through such homologation we now create each year more than 40 new power supply sub-systems. These sub-systems accelerate introduction, extend life and improve market share of a wide variety of OEM products. Custom power supplies have been homologized into OEM applications such as, Capillary Zone Electrophoresis, Projection Television and Analytical X-ray.

X-Ray Power Supplies

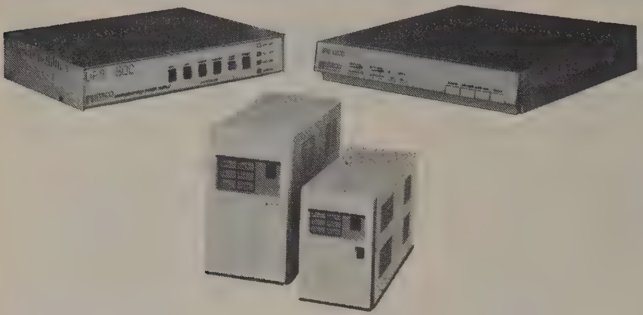
High peak power up to 100kW and continuous power up to 30kW is available using propriety circuitry to improve performance and reliability. Typical applications include CT scanners, radiological equipment, x-ray lithography and industrial x-ray systems. Spellman's HV generators include a floating filament supply, emission control and built in diagnostics.

Capacitor Chargers

Spellman's rack mounted models are available for current operation to permit capacitor charging at a linear rate. Special models can be ordered for high power when the capacitance and repetition rate is high.



STACO ENERGY PRODUCTS CO.



Staco Standby Power System

- Sinewave Output
- Continuos EMI/RFI Filtering
- Fastest Transfer Rate
- Intelligent Communication for Orderly Shut Down
- LED Displays

"SPS" Series are Low Profile Models for single PC protection with Squarewave Output. "S" Series are Tower Models with PWM Sinewave Outputs, 1MS Transfer Rate (S650, S1200) and Network Communication (S650, S1200).

Manufacturers Type	VA	Manufacterers Type	VA

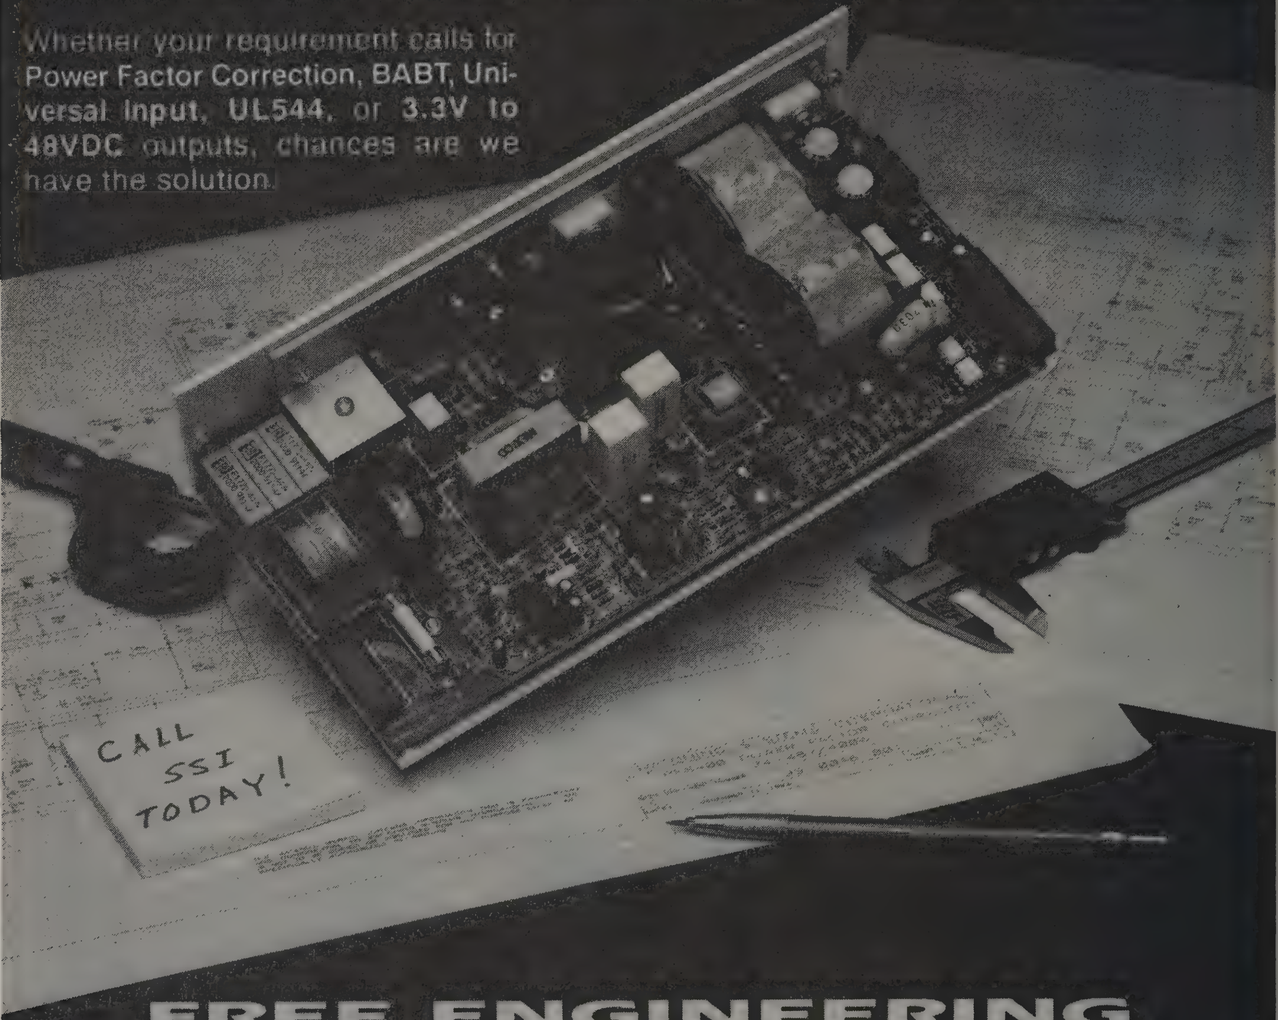
OUTPUT TERMINATIONS

Stancor wall plug-in power sources have output termination compatible with Switchcraft PC-722A or 722A with 6 ft. output cord. Secondary plug size 2.1 x 5.5 mm. Wired Outside-Positive; Inside-Negative for AC-DC models.

CUSTOM POWER REQUIREMENTS

REDEFINED WITH STANDARD SOLUTIONS

Whether your requirement calls for Power Factor Correction, BABT, Universal Input, UL544, or 3.3V to 48VDC outputs, chances are we have the solution.



FREE ENGINEERING

Our maximum versatility continues to make custom made open frame switchers obsolete. Offering over 600 standard products ranging from 100 to 400 watts of output power, we can easily custom tailor our units to your special requirement with no NRE charges.

Medical, data processing, telecommunications, and instrumentation are just a few of the diversified industries which utilize SSI's products.

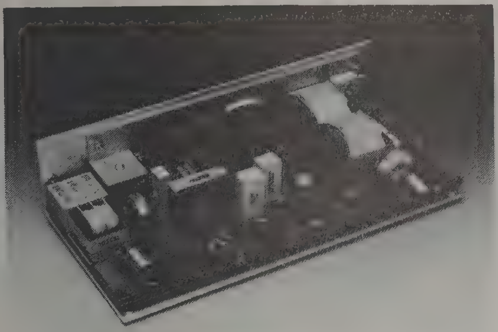
SQM International All Purpose Series



Input: 90-132VAC/180-264VAC, 47-440Hz
Inrush: 15A @ 115V for 1/2 cycle } Cold Start
30A @ 230V for 1/2 cycle } Cold Start

Output: See output voltage table

Line Regulation: 0.2%, all outputs

Load Regulation: 1%, main output
5%, aux. no. 1
1%, aux no.'s 2, 3 and 4

Adjustment Range: ±5%, aux no.'s 2, 3, 4 and main output

Centering: ±3% aux. no. 1

Cross Regulation: 3% aux. no. 1 (change main output from 50% to 100% of max rated load)

Ripple and Noise: 50mV P-P max, main output (10MHz bandwidth)
1% of nominal, aux no. 1 (10MHz bandwidth)
100mV P-P max, aux no.'s 2, 3, and 4 (10MHz bandwidth)

Efficiency: 75% typical

Operating Temp: 0-50°C at full rated load. Derate to 50% of full rated load at 70°C.
Unit requires forced air cooling. Unit is equipped with overtemperature shutdown.

Temp Coefficient: 0.02% per °C

Overvoltage Protection (Main Output): OVP on main output is set between 6-6.5 V. This protection is reset by recycling input power.

Overload Protection: All outputs are protected against overload and short circuit conditions. Recovery is automatic when load is reduced.

Holdover Storage: 16mSEC minimum at full rated load, nominal input voltage

Transient Response: Recovery to within 1% of nominal output voltage within 500μSEC for a 25% load step.

Overshoot: No voltage spikes on turn-on, turn-off, or power fail

Power Fail (Opt): A TTL signal (high or low, customer specified) appears within 5mSEC to warn of input voltage drop below minimum operating level.

Power Valid (Opt): A TTL high signal appears when main output is within TTL operating range.

Universal Input (Opt): 90-264VAC autoranging

Remote Inhibit: (Opt): TTL low or switch closure

PF501 POWER FACTOR CORRECTION MODULE

The PF501 power factor correction module is designed for use in conjunction with SSI's "SQV" Series and d"SQM" Series switchers.

PF501 accepts an input voltage range of 90-264 VAC and provides 500 watts of output power at 400 VDC with a power factor of better than .99 at full load. PF501 can also be used as a power source for any DC/DC converter requiring 400 VDC as an input.

SPECIFICATIONS

Input: Universal, 90-264VAC, 47-63Hz
Power Factor: Exceeds .99 at full load
Harmonic Current Attenuation: Exceeds requirements of IEC 555-2
Output: 400VDC @ 1.25A (non isolated)
Line Regulation: 2%
Load Regulation: 3%, 10-100% load
Ripple and Noise: 3% P-P max
Overshoot: No overshoot
Operating Temp: 0-40°C at full rated load. Derate to 50% of rated load at 70°C
Outline Dimensions: 6" x 5" x 2.25"

NOMOGRAPH VOLTAGE DROP

NOMOGRAPH OF VOLTAGE DROP ACROSS LOAD SUPPLY LEADS
(as a function of wire size and load current)

THIS NOMOGRAPH CAN BE USED TO FIND:

Maximum current carrying capacity recommended for any standard wire size.*

1) With a straight edge, connect from the wire size on Scale 2 to the point "A" on Scale 3.
2) Read I_{max} on Scale 1.

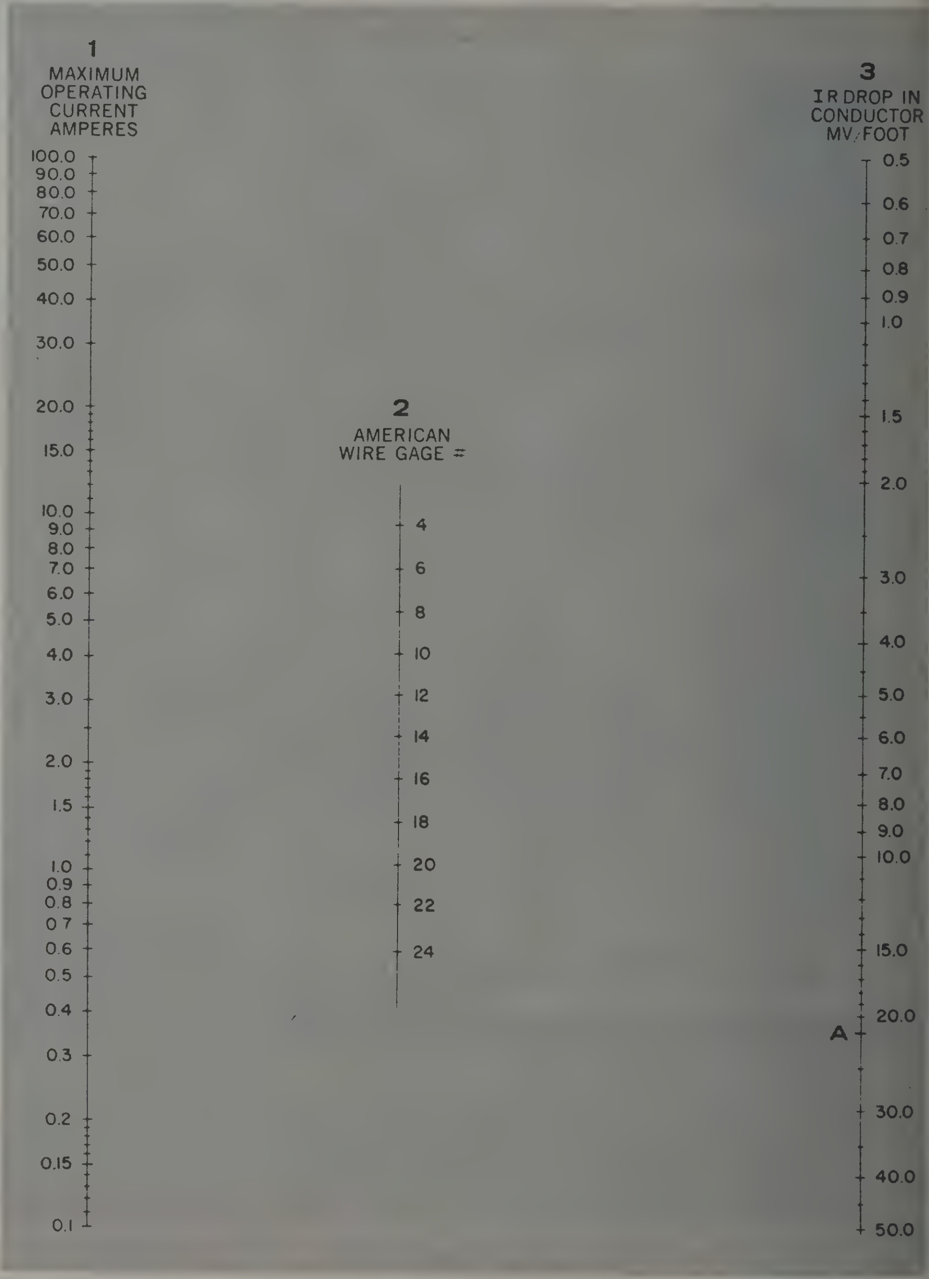
Voltage drop in millivolts per foot for known wire size and operating current.

1) With a straight edge, connect the known current on Scale 1 and the wire size on Scale 2.
2) Read voltage drop on Scale 3.

Wire size required for known operating current and known maximum tolerable voltage drop across supply leads.

1) Determine maximum tolerable drop in millivolts **per foot** of lead (sum of positive and negative leads).
2) Connect the value on Scale 3 (as determined in step 1) to the known current on Scale 1.
3) Read wire size on Scale 2.

* *Based on an arbitrary minimum 500 circular mils per ampere. High-temperature class insulation will safely allow higher currents.*



NOTE: A voltage stabilized Power Supply controls the voltage across its output terminals. Hence, the wire conductors used to connect the load must be considered as part of the load. At high load currents, the voltage drop across the supply leads may appreciably degrade stablization at the load. Kepco models equipped with the *remote error sensing* feature can automatically compensate for voltage drops of up to 500 mV across each load supply lead.

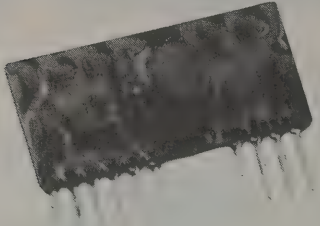
TAMURA SINGLE-IN-LINE DC to DC CONVERTERS

Polarity Reversing ■ Voltage Boosting ■ Voltage Decreasing ■ Direct Battery Input

Tamura DC/DC converters provide board level DC power conversion eliminating costly regulator circuitry, additional off-board power supplies and avoid time consuming safety agency certification. Single output SIP models complement the main power supply by providing polarity reversing, voltage boosting, voltage decreasing and direct battery input.

NEW 5W & 10W MODELS



FEATURES

- Input Volt: ±20%; 5VDC, ±10%; 24VDC, ±30%.
- Output Volt: ±1%; Econo/Battery, ±5%.
- Line Reg: 0.8%; Econo, 1.2%; BAN/BAP.
- 5VDC, 2%; 12/15VDC, 1%.
- Load Reg: 1.5%, 30 -100% FL.
- Efficiency: 60% to 72% typ.
- Temp. Coef: ≤0.03%/˚C; 5VDCout Econo, 0.05%/˚C; 12VDCout Econo/Battery, 0.1%/˚C.
- Operating Freq: 50-300kHz, FL to NL.
- Ripple/Noise: 60mV typ, ≤100mV p-p.
- Operating Temp: -10˚C to +70˚C, FL.
- Storage Temp: -30˚C to +85˚C.
- Humidity: 95% RH.
- Case Mat'l: UL94 -V0 epoxy.
- Insul. Resistance: ≥50MΩ at 500VDC.

TAMURA ISOLATION TYPE DC/DC CONVERTERS

Tamura's isolation models in a Dual-In-Line package (DIP) have single and dual outputs from 300 to 3,000mW with built-in noise filter inductors and overload protection. For telcom requirements there are 48VDC quad output devices.

FEATURES

- Input Volt: 5VDC, ±10%; others ±20%.
- 48VDC range, 42 to 60V.
- Output Volt: ±1%, Telcom, ±2%.
- Line Reg: 0.5%; -0505, 0.8%; Telcom, 1%.
- Load Reg: 3.0%; 5VDC out, 6%; Telcom, 8%.
- Efficiency: 60% to 72% typ.
- Temp. Coef: <0.03/°C.
- Overload Protection: 130-200% FL.
- Operating Freq: 50 -300kHz, FL to NL.
- Ripple/Noise: 60mV typ, 100mV p-p max.
- Operating Temp: -10°C to +70°C.
- Storage Temp: -30°C to +85°C.
- Humidity: 95% RH.
- Case Mat'l: UL94V-0 epoxy; 0.3mm alum., 3.0W.

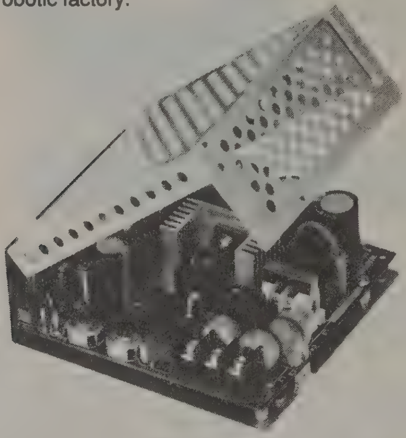
EN60 950

Tamura switching power supplies offer sound mechanical construction, excellent thermal management and fault tolerant electronic design resulting in high end-user reliability. Tooled for millions of units, they reflect true vertical manufacturing integration and are produced in a fully robotic factory.



FEATURES

- UL/CSA/VDE File Nos.
- 90-132/180-264VAC.
- EMI Input Filter.
- AC Power Fail Signal.
- 100,000 -150,000 hrs MTBF.
- To 85% Efficiency.
- Turn-On Delay: <100msec.
- Input Surge: <30A, cold start.
- Voltage Adj: 10% of nominal.
- Line/Load Regulation: 0.5%.
- Noise/Ripple: ≤75mV p-p.
- Hold-Up Time: ≥20msec.
- Transient Response: ≤1msec (50-100% load chg).
- Remote/Local Sensing.
- Overload/No-Load Protection.
- OVP: All outputs.
- Stability: 0.1% for 8 hrs.
- Elevated Temp Burn-In/Stress Test.
- Convection Cooled.
- 50°C Rated.
- Storage Temp: -20°C to +85°C.
- Oper. Humdity: 0-95% RH.
- Temp. Coef: ±0.02%/°C max.
- Warranty: Two years.
- Removable Cover/Perm Nut Mtg.-**OPTIONAL**

TAMURA LITE-SWITCHER™ SERIES

50W, 1" High, 85-264VAC, 1-3 Outputs

file nos. E133370
E132244

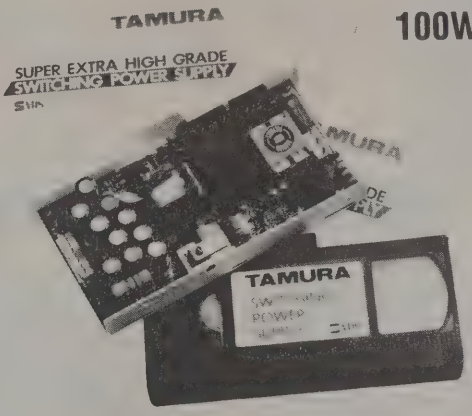
file no. LR44447

file no. 3817

EN60 950

Tamura's Lite-Switcher is smaller than a VHS cassette and weighs only 17 oz., yet delivers a full 50 watts of reliable DC power. You can easily design size and weight out of your products. A wide range universal AC input enables operation anywhere in the world. Certification to the new requirements of IEC, UL and CSA that takes effect in 1992 has been completed. Built-in EMI circuitry insures that FCC and VDE class B emission levels aren't exceeded.

NEW 30W & 100W MODELS



FEATURES

- Input: World Wide 85-264VAC.
- Low Profile: 1" x 3.74" x 7.09".
- EMI: FCC part 15J Class B; VDE 0871 Class B.
- UL 1950.
- CSA 1402C
- VDE (IEC 950).
- Hybrid Integrated Control Ckt (HIC).
- Operating Frequency: 150-200kHz.
- Input Current: 1.3/0.9A @ 120/220VAC.
- Surge: 24A/40A @ 120/220VAC.
- Line Regulation: <1%.
- Load Regulation: <2%, NL to FL.
- Ripple & Noise: 100mV; 48V, 200mV; 24V, FVM (V2, V3) 150mV.
- Voltage Adj: ±5%, FVS; +5% FVM (V1).
- Output Overshoot: None.
- Transient Response: <1msec to 2% of nom. VDC (50-100% load chg).
- Hold Up Time: 20msec typ (100VAC).
- OVP: All FVS; FVM (V1) only.
- Overload Protect: FVS, 120%; FVM, 200%.
- Temp. Coef: ±0.005%/°C; others, ±0.03%/°C.
- Stability: 0.1%; others 0.2%.
- Efficiency: 70% typ (120VAC).
- Convection Cooled.
- Rated Temp: FVS, +60°C; FVM, +50°C.
- Operating Humidity: 30-90% RH.
- Leakage Current: 1.0ma rms.
- Insulation Resistance: ≥100MΩ at 500VDC.
- Vibration: 10-55Hz, 2G (all axis, 1 hr).
- Shock: 20msec, 20G (all axis, 3x ea).
- Weight: FVS, 17 oz; FVM, 24 oz.
- Elevated Temp. Burn-In/Stress Test.
- Warranty: 2 years
- Optional Cover
- Optional Terminal Block

* Speciifications refer to all FVS single output and main FVM output (V1) except as noted.

TAMURA LINEAR POWER SUPPLIES...THE POWER-ONE ALTERNATIVE

file no. E140527 file no. LR69809 file nos.: 3206 3208 3210 3216 3218 3257 3212 3214 3259 3261 EN60 950

Tamura has set reliability standards through component upgrade design. Critical specs such as temperature, voltage and current have been derated so that, for example, 105˚C instead of 85˚C electrolytic caps are used. The result is the highest available MTBF as calculated by MIL-HDBK-217D at full load, 120VAC and 25˚C.

UL544 FOR MEDICAL AND DENTAL

FEATURES

- MTBF to 460,000 Hrs.
- UL Recognized.
- CSA Certified.
- 100/120/220/230/240VAC.
- Remote Sensing.
- 2 Year Warranty.
- 5V OVP Built-in.
- Optional OVP Module.
- Short Circuit Protection.
- Overload Protection.
- Burn-in.
- Voltage Adjust: ± 5%.
- Line/Load Reg: ± 0.05% typ.
- Noise/Ripple: ≤5.0 mV p-p.
- Transient Response: <50 µsec (50% load chg).
- Stability: ± 0.3%.
- 50˚C Rated.
- Temp coef: ± 0.3%/˚ C max.
- Vibration: MIL-STD-810C.
- Shock: MIL-STD-810C.

TAMURA VDE WALL PLUG-INS, 220VAC, 50Hz.

DC Unregulated & DC Regulated

file nos. 7969-3330, 3331

CALL FOR MITI MODELS

Tamura wall plug-ins enable smaller, cooler running designs - with no safety agency restrictions. End-products will be lighter, more portable, easier to build and less costly. Over 30 million units shipped last year - no returns. 600 OEM models with UL, CSA, VDE, MITI, CEE and SAA listings are available. See more DC regulated models from 15 to 60 watts in this section, AC/AC models in Transformers and battery chargers in Batteries.

FEATURES

- VDE Licensed (Europe). Input: 220VAC ±10%, 50Hz.
- EMI: Meets VDE 0871, Class B.
- Short Circuit Protection.
- Thermal Protection.
- 100% Testing.
- Temp Range: 0 to +40°C.
- Case Temp Rise: 35°C max.
- Oper Humidity: 10-90% RH.
- Mat'l: ABS resin/UL 94-V0.
- Color: Black.
- No Audible Noise.

REGULATED MODELS:

- Load Reg: Spec'd for ±20%
- chg from 80% FL.
- Line Reg: At FL, 10% lline chg.
- Ripple: 10mv rms typ.

Note 1: Typical output voltage for % load (FL) and line (VAC) indicated.
Note 2: "UL", UL 1310 listed; "UL*:, UL 1310 listing incl. UL 1411 recognized xfmr;
"C", UL approved for battery chgr ckts (contact battery mfgr for recommended volt.)
Note 3: Complies (C) with or is listed (L) to CSA C22.2, No. 223.66
Note 4: See output plug table for dimensions, gender and polarity.
Note 5: Five switched output voltages of 3.0, 4.5, 6.0, 7.5 & 9.0VDC with universal, polarity reversing, output plugs. Ratings are for 6.0VDC setting.

FEATURES

- Input: 120VAC ±10%, 60Hz.
- EMI: Meets FCC Part 15.
- Short Circuit Protection.
- Thermal Protection.
- Transformer: 3 Flange Bobbin.
- 100% Testing.
- US 3 - Blade Ground Plug Avail
- Temp Range: 0 to +40°C.
- Case Temp Rise: ≤35°C.
- Oper Humidity: 10-90% RH.
- Mat'l: ABS resin/UL 94-V0.
- Color: Black.
- No Audible Noise.

REGULATED MODELS:

- Load Reg: Spec'd for ±20% chg from 80% FL.
- Line Reg: At FL, 10% line chg.
- Ripple: 10mv rms typ.

INPUT 120VAC 60Hz

For applications requiring more power from an external power source, Tamura offers 15, 20, 30, 40 and 60 watt output ratings in compact, light weight, wall plug-in and table top cases for world wide use.

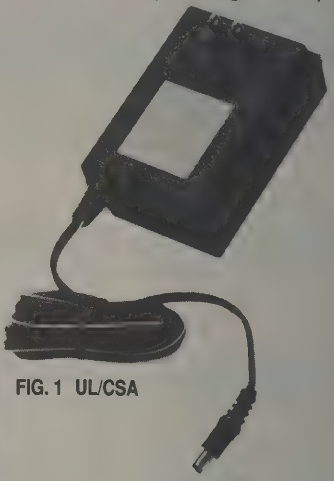

FIG. 1 UL/CSA

FEATURES

- World Wide AC Input.
- UL 1310 Listed: 15/20/30W.
- UL 1950 Recognized: 40/60W.
- No Minimum Load.
- Input Surge: ≤50A; ≤20A, 20/30W.
- Efficiency: 65%-70% typ.
- Ripple/Noise (p-p): 100mV, 20/30W; 5V-6V, 40/60W; 150mV, 9V-17.5V 40/60W; 200mV, 15W.
- Hold-Up: ≥10msec; ≥5msec, 15W.
- Overload Protection: ≥110% FL .
- Operating Temp: 0°C to +40°C.
- Storage Temp: -10°C to +70°C.
- Operating Humidity: 10-90% RH.
- Storage Humidity: 5-95% RH.
- Withstand Voltage: 1.5kVrms; VDE model, 3kVrms.
- Insulation Resistance: ≥50MΩ @ 500VDC.
- EMI: FCC part 15J Class B; VDE 0871 Class B.
- AC Input Connector: IEC type #320 receptacle (40/60W)

15, 20 & 30 WATT MODELS: 90-132VAC, 47-63Hz. FOR UL/CSA TYPE WALL PLUG

TAMURA BATTERY CHARGERS

Wall Plug-In, 120VAC, 60Hz.

file no. E82180

file no. LR38236

CALL FOR MITI MODELS

Tamura battery chargers are particularly suited for charging NiCd, lead acid and Gel-Cell batteries. They are UL 1310 listed for battery charger circuits. Contact the battery manufacturer for recommended voltage and current. For additional UL/CSA/VDE models see DC Power Supplies section for DC regulated and unregulated models and Transformers section for AC to AC models.

FEATURES

- UL Listed For Battery Charger Ckts.
- UL 544 Medical Capability.
- Thermal Overload Protection.
- 100% Testing.
- Transformer: 3 flange bobbin.
- US 3-Blade Ground Plug Available.
- Temp Range: 0 to +40°C.
- Case Temp Rise: ≤35°C.
- Oper Humidity: 10-90% RH.
- Material: Black ABS resin/UL 94-V0.
- No Audible Noise.

YOUR QUALITY SUPPLIERS FOR AC ADAPTORS

GENERAL SPECIFICATIONS

- Input:

120VAC	60Hz	UL/CSA	North America.
220VAC	50Hz	VDE/TUV	Europe
100VAC	50Hz	JIS	Japan.
240VAC	50Hz	BSI/SAA	UK, Australia, S.Africa.

- Output: ±0.5VDC rated load.
- Temperature: 0°C to +40°C full load conditions.
- Dielectric Withstand Voltage: UL CSA JIS 1500VAC 1 Minute
  VDE BSI TUV SAA 4000VAC 1 Minute
- Enclosure: Noryl SE-100J, Cyclolac ABS or Equivalent.
- O/P Cord: 6 feet AWG 24 or heavier.
- Safety: UL, CSA, JIS, VDE, TUV, BSI, SAA.
- MTBF: 30000 Hours at 25°C full load.
- QA: MIL-STD-105D.

SWITCHING POWER SUPPLY

SPECIFICATION:

INPUT SPECIFICATIONS

Input Voltage	100VAC to 250VAC
Input Frequency	47Hz to 63 Hz
Fusing	Internal
Hold up Time	20MS

OUTPUT SPECIFICATIONS

Line Regulation	
All Output	±0.2%
Load Regulation	
Output #1	±3%
Outut #2	±5%
Output #3	±10%
Ripple & Noise, 20 MHz BW	
All Output	1% Max.

GENERAL SPECIFICATIONS

Efficiency	73% Min.
Cooling	Convection
Operating Temperature	0°c to 40°C
Storage Temperature	-20°C to 85°C
Temperature Coefficient	+/-0.03%/°C
MTBF	50.000 Hours

Meets FCC Class "B" And VDE Class "A"

OUTPUT ELECTRICAL SPECIFICATION:

25 WATTS

PART NUMBER	OUTPUT #1	OUTPUT #2	OUTPUT #3
TDA05401	5V - 4.0A		
TDA12201	12V - 2.0A		
TDA24111	24V - 1.1A

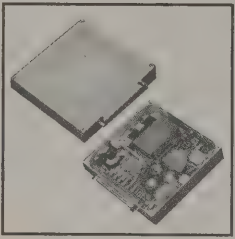
TECHNIPOWER

"MIL-SPEC" & "MIL-QUAL" MODULAR POWER SUPPLIES FROM TECHNIPOWER

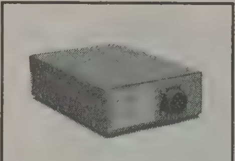
These advanced, high reliability, modular power supplies are the economical, proven alternative to expensive custom supplies. Choose from a large selection that are suitable for the most demanding Mil-Spec and industrial applications. Ask about modifications.



"MIL-SPEC" 300 Series DC/DC Converters — 175 Watts

For high-density applications where high reliability, light weight and small size are essential.

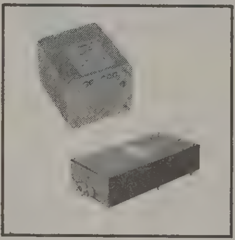
These compact units incorporate a full range of advanced performance features — soft start, tight regulation, high efficiency, low ripple, remote sensing, voltage adjust. EMI filtering, undervoltage, overvoltage, short circuit, and over current protection.



AC Source Models TVC:
105 to 125 VAC
DC Source Models TYC:
21 to 30 VDC

"Mil-Qual" Triple Output Switchers ... Field Repairable Or Sealed Models

The efficiency and size advantages of a switcher ... the desirable output of a linear ... plus high density packaging! These Technipower "Mil-Qual" Triple Output Switchers come in fully sealed models to meet Mil-901 for severe shock and extreme environment use; and in field repairable models for harsh environment, moderate shock applications! Included are a Mil-type connector input/output and a special EMI/RFI filtering circuit. MTBF is rated at more than 100,000 hours, and full power is provided at max operating temperatures — no derating. These high efficiency (80%) switchers also feature Mil-704A transient protection; have a 47-430 Hz input range, are conductively cooled, and exhibit a power range to 300 W. They are designed to meet reliability guide lines for NAV/MAT P-4855, and are ideal for military ground-base and airborne uses, surface and submarine naval systems, aerospace and space optics. Numerous industrial applications can be found wherever harsh environment and/or rugged conditions exist, such as for oil well exploration, mining, rail systems, mobile communications, and rugged terrain construction.



Harsh Environment "Mil-Qual" Switchers

Fully encapsulated, partially encapsulated or open frame, these switching power supplies are designed for high thermal application. With as low as 0.1% overall source/load effects, 0.1% PARD and 500 microsecond recovery.

VC-80 Series
AC-DC Converters. Partially encapsulated, 2.8 to 125 VDC, to 450 Watts output. 110,000 hours MTBF @ 80°C base

HF-80/HFC-80 Series
AC-DC, DC-DC stabilized. Partially encapsulated, 2.8 to 250 VDC, to 375 Watts. 70,000 hours MTBF @ 80°C base.

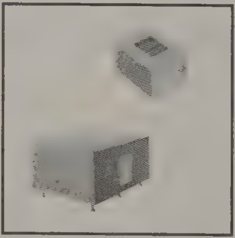
YC-95 Series
Ruggedized DC-DC Converters. Hermetically sealed, 2.8 to 125 VDC, to 450 Watts. 110,000 hours MTBF @ 95°C base.

CD-95/CDC-95 Series
Stabilized DC-DC Converters. Encapsulated, 2.8 to 250 VDC, to 275 Watts. 60,000 hours MTBF @ 95°C base.

CL/CLC Series
AC-DC, DC-DC, open frame stabilized converters. 3 to 32 VDC, to 256 Watts. 50,000 hours MTBF.

SCR-80 Series
Stabilized AC-DC phase control. High current, partially encapsulated, 5 to 160 VDC, to 2,000 Watts.

RA-80 Series
Special circuit AC-DC. Programmable from zero. Partially encapsulated, 0 to 160 VDC, to 1000 Watts.



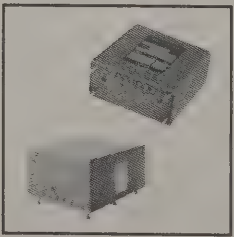
Harsh Environment "Mil-Qual" Linear Supplies

Ultra high reliability for military and industrial harsh environments. These fully encapsulated AC-DC supplies are designed for use in extreme MIL environments. Source/load effects are as low as 0.05% with 1 mV rms PARD and 50 Microsec. recovery.

PM-95 Series
Stabilized AC-DC modules. Fully encapsulated, 3 to 325 VDC, to 800 Watts. 80,000 hours MTBF @ 95°C base.

DPM-95, TDPM-95 Series
Stabilized, AC-DC, dual output, tracking and non-tracking. 12 to 15 VDC, to 150 Watts. 50,000 hours MTBF @ 95°C base.

F-115, FD-115 Series
Stabilized, AC-DC modules. 3 to 325 VDC, to 500 Watts. 50,000 MTBF @ 115°C base.



"Mil-Spec" Linear Supplies

For industrial, military and commercial use. The partially encapsulated AC-DC stabilizers are designed for moderate environments. They have 0.05% load effect, 1 mV rms PARD and generally have 50 microsecond recovery.

PL-80 Series
Lower cost, high density, stabilized AC-DC modules. 3 to 152 VDC, to 75 Watts. 120,000 hours MTBF @ 80°C base.

P-80 Series
Fully encapsulated, series stabilized DC modules. 3 to 325 VDC, to 800 Watts. 100,000 hours MTBF @ 80°C base.

MC-65 Series
Series stabilized, DC-DC modules. Up to 30% more current. 3 to 152 VDC, to 750 Watts. 1,000,000 hours MTBF @ 65°C base.

DP-80, TDP-80 Series
Tracking and non-tracking, AC-DC, dual output. 6 to 150 VDC, to 10 Watts. 50,000 hours MTBF @ 80°C base.

NP-80 Series
Non-stabilized, low cost, 3 to 1,000 VDC, to 975 Watts. 250,000 hours MTBF @ 80°C base

Custom Capabilities For Module Rack Mounts Available

TECHNIPOWER

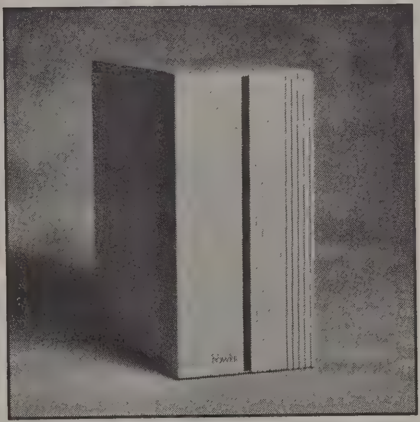
TECHNIPOWER

ALL TECHNIPOWER UPS AND SURGE PRODUCTS COVERED BY $25,000 CONNECTED EQUIPMENT INSURANCE

Executive Series

- Microprocessor control
- On line double conversion
- Excellent brownout capabilities
- Voltage regulation
- 1% frequency regulation
- Continuous sine wave output
- Total harmonic distortion of <5%
- Available in 800, 1,000, 1,250 and 1,500 VA



Dual Power Series

- On line, no transfer time
- 90% efficiency
- Pure sine wave
- Patented energy recovery circuit
- Double power path transfer
- Total harmonic distortion <5%
- Available in 600, 900, 1,250 and 1,600 VA

Double Life Surge Suppressors

- Redundant surge circuitry
- EMI and noise filtration
- Protection on all three lines
- Visual indicator on second surge circuit
- Lifetime warranty
- Ten second delay

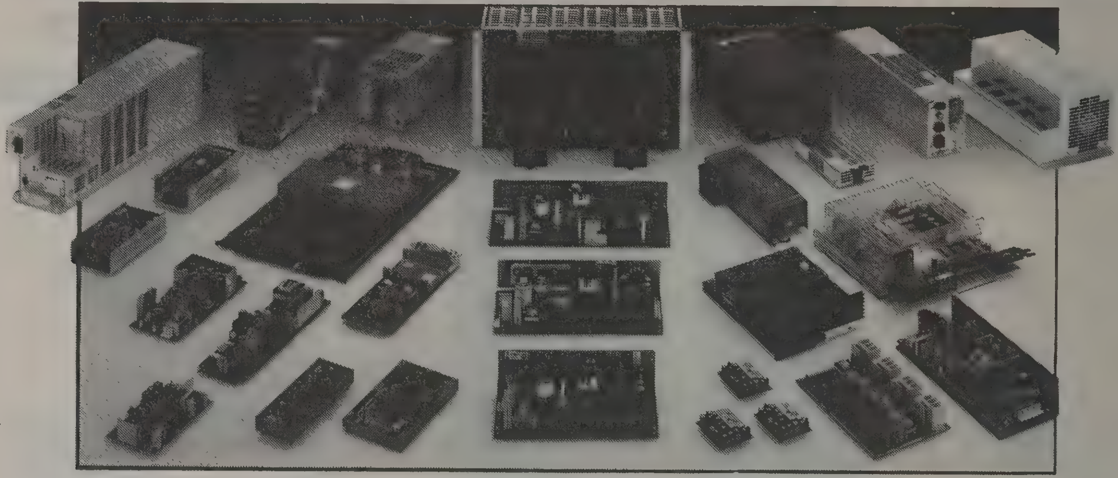
SWITCH MODE POWER SUPPLIES & DC - DC CONVERTERS



TECTROL has over twenty years of switching power supply and DC-DC converter experience. With hundreds of proven designs in service, Tectrol offers a wide variety of products to satisfy the most exacting customer needs.

- STANDARD PRODUCTS
- CUSTOM DESIGNS
- MILITARY PRODUCTS

PRODUCT

Switching Power Supplies and DC-DC Converters covering a power range from 1 to 2000 Watts are available in various topologies, configurations and packages. All Tectrol products are designed to meet International Safety requirements such as UL, CSA, VDE, BSI, and conform to FCC and/or VDE Class A and B emission standards.

- 1 TO 2000 WATTS
- UNIVERSAL (90-264V) INPUT
- MODULAR & SEMI - MODULAR DESIGNS
- REDUNDANT (N+1) SYSTEMS
- 1 MHZ RESONANT CONVERTERS

MARKET SERVED

We are a qualified power supply vendor to many major multinational corporations.

- TELECOMMUNICATIONS
- COMPUTER & PERIPHERALS
- PROCESS CONTROL
- MEDICAL
- AEROSPACE & MILITARY

ENGINEERING AND MANUFACTURING

Tectrol is recognized as one of the most technically advanced manufacturers of Switching Power Supplies and DC-DC converters world-wide. Automation enables Tectrol to provide consistent product quality, high volume production and competitive prices for the benefit of our customers.

- AUTO-INSERTION EQUIPMENT
- SURFACE-MOUNT FACILITIES
- PASS THROUGH PRODUCTION LINE
- AUTOMATED TESTING

HIGH RELIABILITY POWER SUPPLY (N+1) PARALLEL REDUNDANT APPLICATIONS with CURRENT SHARING AND HOT-PLUG CAPABILITY

(OTHER REDUNDANT SYSTEMS AVAILABLE INCLUDING TM-600)

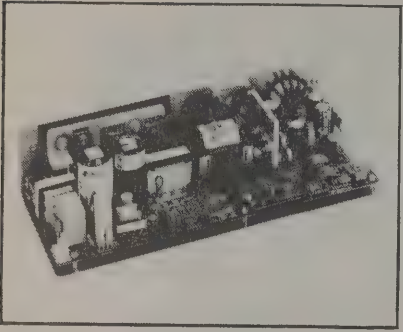
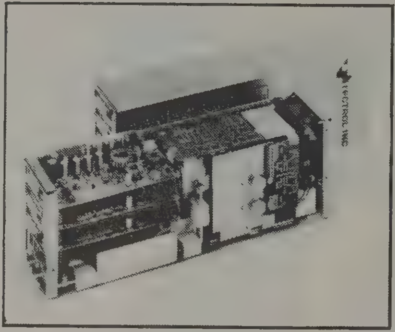
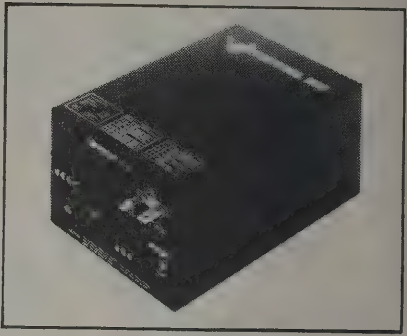
SEMI-MODULAR & MODULAR POWER SUPPLIES



TO204 / TO304



TM600



TO825

STANDARD FEATURES:
- 77-86% EFFICIENCY
- INHIBIT - ACTIVE LOW
- CURRENT LIMITED OUTPUTS
- POWER TRADING BETWEEN SECONDARIES
- OVER TEMPERATURE PROTECTION
- OVER VOLTAGE PROTECTION
- UL, CSA & (TUV)VDE APPROVED (OR IN PROCESS OF APPROVAL)
- MEETS FCC & VDE EMI STANDARDS

SPECIFICATIONS

AC Input
100/120/220/240 VAC + 10% −13% 47-63 Hz

Line Regulation
±.005% maximum over full range.

Load Regulation
±.015% from zero to full load.

Output Ripple
<1mV pk-pk (DC to 100kHZ)

Transient Response
Maximum deviation less than ±1%.
Recovers within 0.5% in less than 20µ sec.

Overvoltage Protection
SCR crowbar type standard on +5V outputs set to 6.2V ±200mV. Optional on other outputs.

Temperature

Operating	0-70° derated linearly above 50°C to 50% load at 70°C
Storage	−40°C to +85°C

Short Circuit and Overload Protection
Automatic, self recovering controlled profile foldback and delayed re-entrant foldback type.

Remote Inhibit
Standard on series N,3,4,5,2TA output 1.

Remote Sense
Standard on all models.

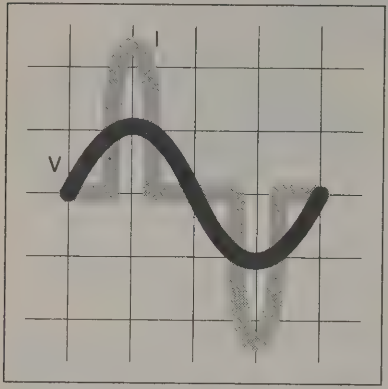
POWER FACTOR CORRECTED SWITCHING POWER SUPPLIES

Tectrol designs and manufactures Power Factor Corrected Power Supplies for medium to high power applications.



Some Advantages are:

a) **Maximum power is made available for end system use for any given branch circuit current rating.**

b) **Compliance with pending regulatory requirements (eg. IEC-555) for line current harmonic content limits.**

c) **Elimination of Neutral conductor current overload in 3-phase systems due to the additive nature of the harmonic current content generated by switching power supplies with no power factor correction.**

d) **Elimination of the unnecessary stress on the power distribution system caused by the "Wattless" component of the line current in an uncorrected power supply.**

On a 15 ampere setrvice, UL limits current draw to 80% of the branch circuit rating, i.e. 12A.

Output power is defined as Vin (rms) x Iin (rms) x Power Factor x Efficiency.

The typical Power Factor x Efficiency (PFE) product for an uncorrected supply is about (0.65 x 0.75) = 0.48. This results in a maximum output power available for system use of about 670W from a 115VAC/15A line.

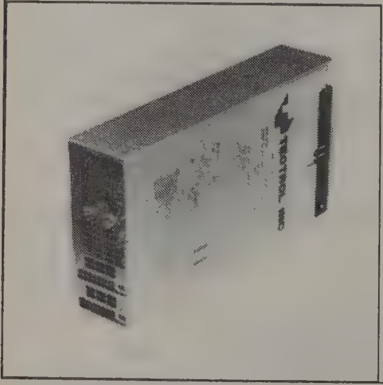
If the power factor is improved to 0.99 the available power is increased to 1024W, an increase of 53%.

Power Factor Corrected Unit - 1000W model

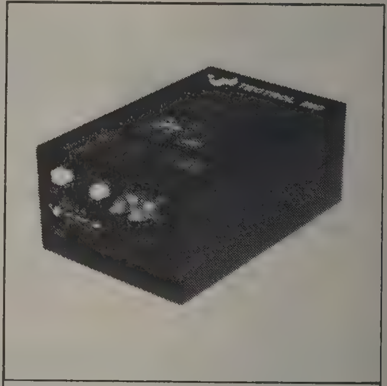
Input Ratings
Voltage: 85 - 265VAC / 47 - 63Hz
Current: Less than 12A rms
Power Factor: 0.99 typical.
Hold Up Time: 20msec minimum at 90VAC
Efficiency: 75% minimum
Surge withstand capability: To IEEE-587, Category A/B

Output Ratings
Single output models: 1000W; 5VDC / 200A to 48VDC / 21A
Multiple output models: Output 1: up to 750W, votages from 2.2VDC - 48VDC
Outputs 2 - 5: 150W or 250W per output, 2.2VDC - 48VDC

All outputs have low ripple and noise characteristics (<1%), and are fully regulated and adjustable.



Features
- Built in PFC circuity
- UL, CSA, & TUV approved
- FCC 20780 A & VDE 0871, level A
- Forced current sharing on main & single output modules
- Master remote ON / OFF
- Master remote latching shut down
- Advance thermal warning output
- AC power fail output
- Overload / Short circuit protected, all outputs
- Over voltage protected, all outputs
- Built in Forced-Air fan cooling



Tectrol is a leader in standard or custom packaged Power Factor Corrected multiple output power supplies for single unit stand alone applications or for parallel-redundant system applications with hot-plug-in capability.

Standard units are offered for 1000 - 1500W, in an 8" x 5" x 11 to 13" package.

Contact Tectrol for your PFC Power Supply solutions.

FOR FURTHER INFORMATION ON POWER FACTOR CORRECTED SWITCHING POWER SUPPLIES, PLEASE CONTACT TECTROL

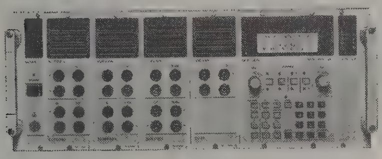
TEXMATE/GOSSEN: Precision Programmable DC Lab Power Supplies

GOSSEN Laboratory Power Supplies

Built to exacting IEC and DIN standards, Gossen-Metrawatt bus programmable DC lab power supplies are representative of the finest quality instrumentation from Europe's leading manufacturer. Most Gossen-Metrawatt products are now available in the USA from Texmate.

Four selectable DC output modules

with up to 8 isolated outputs



MSP-Konstanter from $3000 to $9000

Especially suited for demanding medical applications

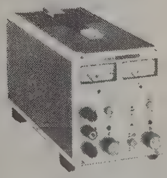
Four selectable DC output modules with up to 8 isolated outputs • Front panel manual and bus programmability • Constant voltage or constant current operation • Integral metering all outputs : voltage, current, power • Features low ripple, isolated outputs, remote sensing, 0-40°C operation, 2-speed cooling fan, series or parallel operation • Interface IEC-625, IEEE-488, RS-232C • Dimensions: 18"W x 7"H x 15.4" deep • Modules include: Single output 0-7VDC; 0-7amp; dual 0-8VDC; dual 0-3amp; dual 0-16VDC; dual 0-1.5amp; dual 0-40VDC, dual 0-0.6amp • 120/220VAC power input.

Analog Controllable Lab Power Supplies

System Konstanter

Series 14K	48W	from $650
Series 24K	96W, 128W	from $1100
Series 34G	320W	from$1950

Series 14K



Series 24K

Precision power supplies • Constant voltage/constant current • Benchtop or submodule for 19" rack • Optional interface to IEC625/IEEE 488 bus for computerized measurement and testing systems

Applications for Gossen Power Supplies

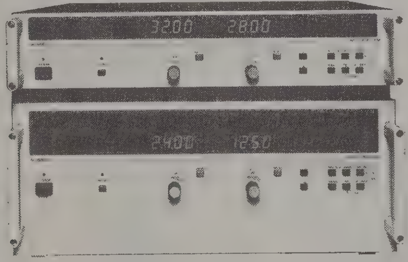
- Computer power supplies
- Super collider magnets
- Medical research laboratories
- Sonar/Microwave/Radar
- QC Testing
- Custom Power Supplies (100W to 100kW)

Fax us your specs for a custom quote.

Single Output System Power Supplies

with remote sensing

SSP-Konstanter from $2900 to $8200



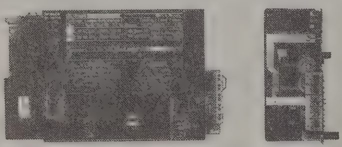
62N	0-25A, 500W max. or 0-50A, 1000W max.
64N	0-100A, 2000W max. or 0-150A, 3000W max.

Single output system DC power supplies • Manual and optional bus programmability • Integral volts/amps/power meters (4-digit LED) • Optional IEC-625, IEEE-488, RS-232C interfaces • Efficient primary switching regulation • Output ungrounded/isolated • Remote sensing • On/off fast response setability • Non-volatile memory of 255 settings • Master slave configurable • Dimensions: 19"W x 3.5"/7"H x 20" deep, 19" rack mountable • Model 62N power input: 208/240 VAC; Model 64N power input: 3Ø 208/240 VAC • Compact/Lightweight

Other Gossen Power Supply Products

For more than 30 years, Gossen-Metrawatt has been a leader in high quality economical power supply designs that meet the most stringent European standards.

Electronic Ballasts for Metal - halide lamps



Designed for metal-halide lamps 125 through 575W, approved for OSROM Series HTI and HMI, or any other lamp meeting these specifications.

DC to DC Converters 24V to 12V, 80 & 195W

For commercial vehicle applications. Most prestigious German vehicle manufacturers use Gossen-Metrawatt DC to DC converters.

Battery Charger for Automotive Industry

For 12V starter batteries

Konstanter Hi Current & Hi Voltage Systems

Voltage	6.5V-350V	3kV-12.5kV	3.5kV-6.5kV
Power	35W-250kW	7kW-250kW	14W-4.2kW

MINIGLOSSARY

FIBER OPTICS

Acceptance Angle
The maximum angle within which light will be accepted by an element such as a detector or waveguide. In the latter, it is quantified as half the vertex angle of the cone within which optical power may be coupled into bound modes of a fiber.

Aligned Bundle
An assembly of fibers in which the coordinates of each fiber are the same at the two ends of the bundle, also called *Coherent Bundle*.

Bend Radius
The radius of curvature that an optical fiber can bend without breaking.

Bundle
Multiple optical fibers in a single housing used to transmit light or images.

Cladding
The low refractive index material that surrounds the core of the fiber to contain core light while protecting against surface contaminant scattering. In all-glass fibers, the cladding is glass.

Effective Numerical Aperture
The real numerical aperture of a fiber when the computed NA is not valid due to a change in the glass indices during the drawing and fusion process.

Fiber Bundle
A rigid, or flexible, concentrated assembly of glass or plastic fibers used to transmit optical images or light.

Fiber Optic Light Guide
A bundle of optical fibers arranged randomly for the purpose of transmitting energy, not images.

Fiber Optic Probe
A flexible optical probe having a bundle of glass fiber arranged to transmit an image

Gap Loss
The optical power loss caused by space between axially aligned fibers.

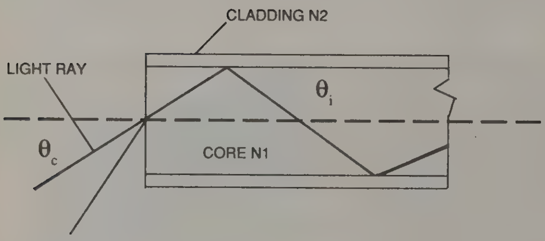
Image Transducer
Any arrangement of a bundle of optical fibers that alters the shape of the image. For example, by a systematic regulation of the spacing of the fibers from the entrance end to the exit end, a distortion of the image can occur that may be used to neutralize or compensate for the distortion introduced by the lens, prism or mirror components in an optical system.

Large-Core Fiber
Optical fiber with a large core, often a step-index fiber. "Large" is sometimes defined as greater than 85 µm.

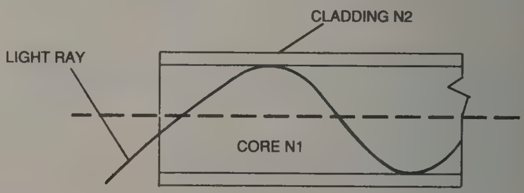
Multifibers
An array of optically distinct fibers that are fused into one strand. They are used to keep the resolution efficiency of the smaller single fibers and eliminate difficulty in handling. Their specific usage is determined by their flexibility or rigidity.

Packing Fraction
The ratio of the active core area of the fiber bundle to the total area at its light emitting or receiving end.

Plastic Fiber
Fiber in which both the core and cladding are made of plastic.



(a) Light propagation in a step index fiber.



(b) Path of light rays in a graded index fiber.

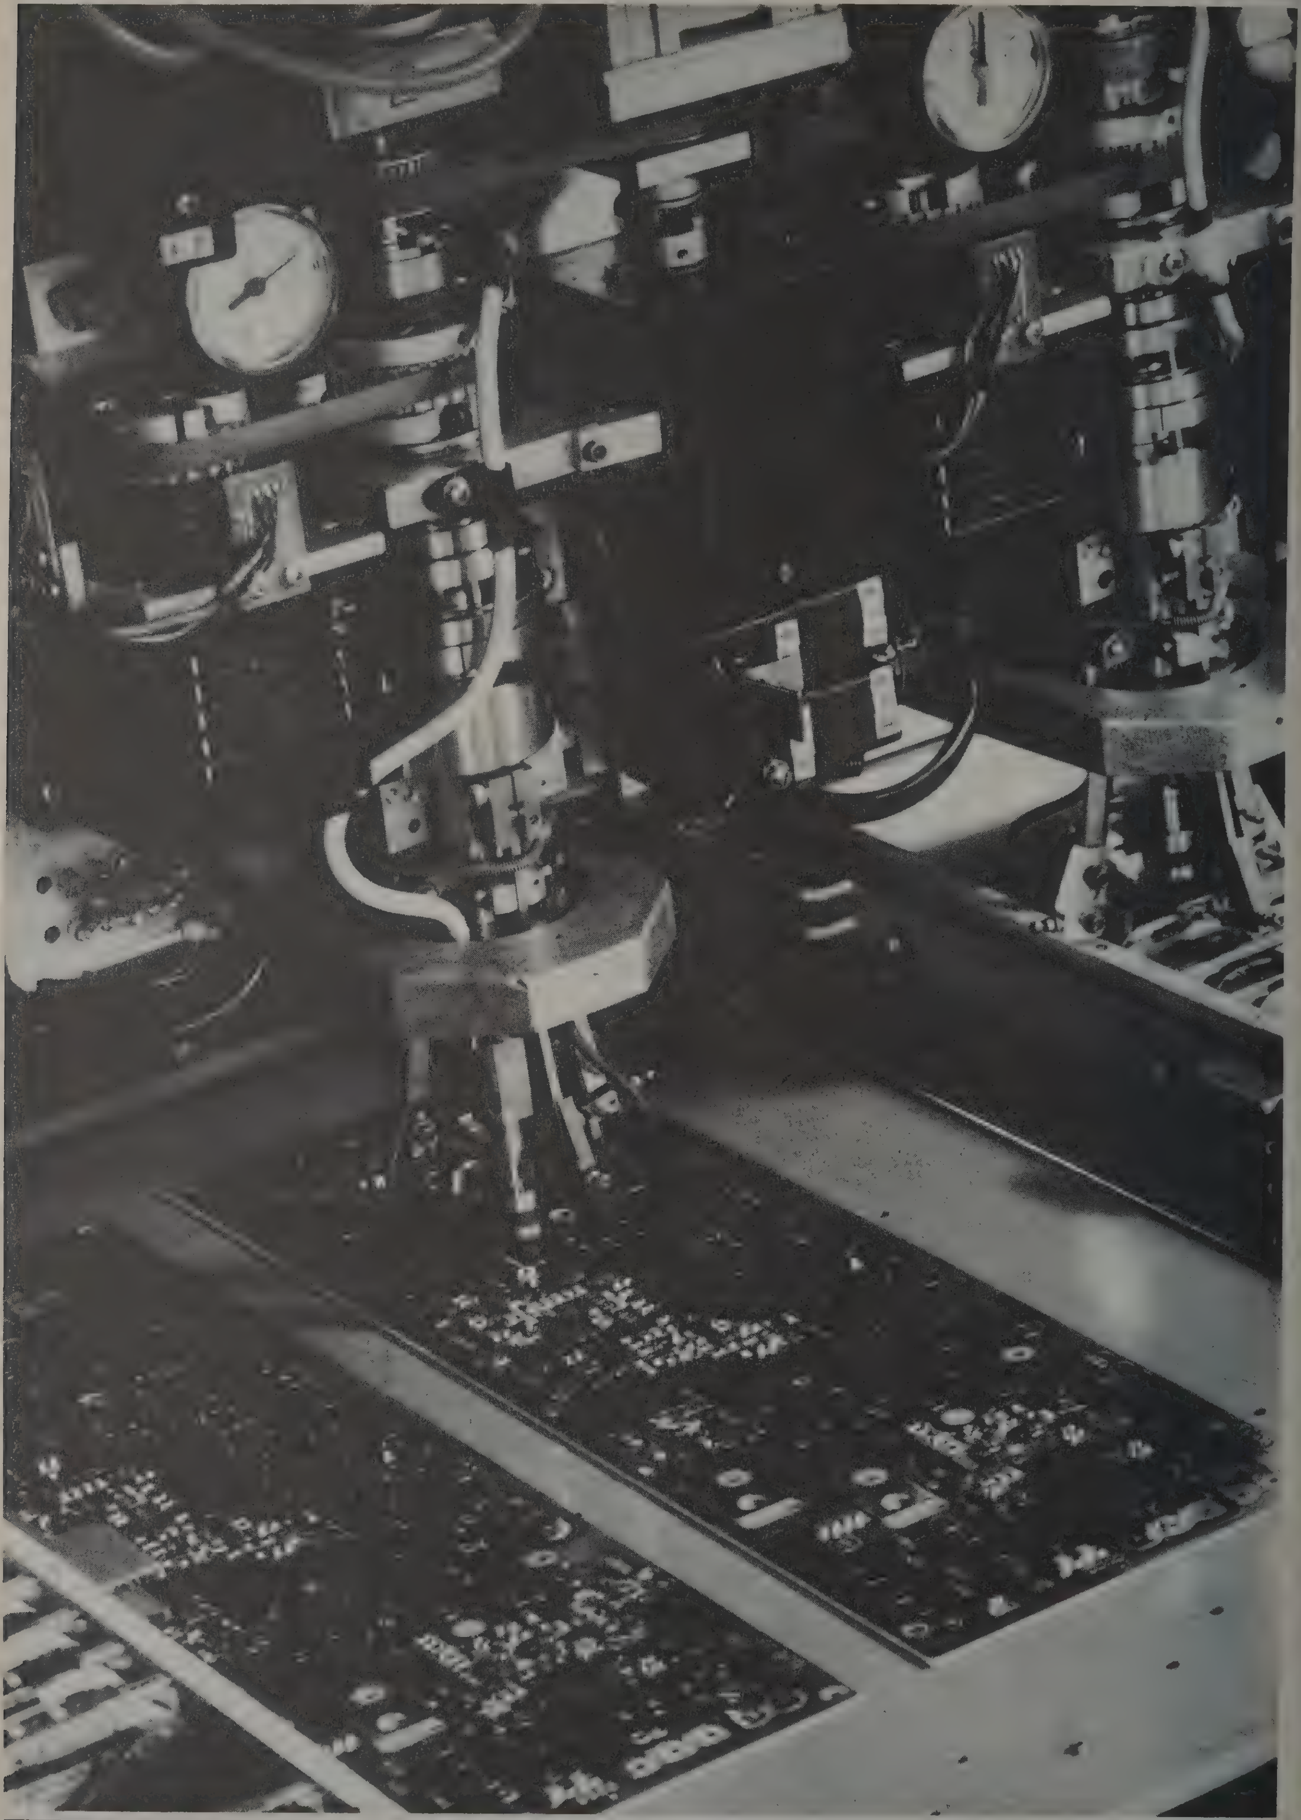
SWITCHING POWER SUPPLIES FOR OEM PRODUCTS

1993/94 CATALOG



TODD

Todd Products Corp. is committed to consistently meet and exceed the customers' needs and expectations at the lowest possible cost...

INTRODUCTION TO TODD PRODUCTS CORP.

Todd Products Corp. is a designer and manufacturer of standard, modified standard and custom switching regulated power supplies. Our product range is one of the broadest available.

Todd started operations in 1968 and soon became known as an innovator in switching power supply technologies. Today we are recognized for many important accomplishments including our unique "Veri-Drive" low loss inverter topology and the extensive use of surface mount devices.

Our power supplies are used in a wide variety of OEM applications. Market segments include computer, medical, telecommunication, control, test and bus systems, and more.

Our outstanding reputation for reliability, technological innovation and service reaffirm the company's quality objective...

Todd Products Corp. is committed to consistently meet and exceed the customers' needs and expectations at the lowest possible cost through employee involvement at all levels.

Dedication to Total Quality Management is company wide. We are considered pioneers in Employee Stock Ownership Programs (ESOPs) through which the company is owned by its 230+ employees. Each employee accepts personal responsibility for the quality of our products and the success of the company.

Todd's headquarters is in Brentwood, NY, where a 52,000-square-foot facility combines executive offices, engineering, and manufacturing.

TOTAL QUALITY MANAGEMENT

Implementing and monitoring systems and procedures in a continuous improvement process is the focus of Todd's Total Quality Management efforts.

The evaluation of failure modes, implementation of corrective action and computerized tracking systems provide a continuous refinement process with measurable results.

Conformance to domestic and international safety and quality standards keeps the system effective. We were one of the first power supply manufacturers to start an ISO 9000 quality system and to apply for registration to ISO 9002.

We are certified to BABT 340, TUV Rhineland PSQA, CSA Custom Rectifier and UL Data Programs.

QUALITY FROM THE START

The worldwide focus on quality is serious business at Todd. Users of electronic systems demand the highest quality products and expect competitive prices.

We begin each project with a thorough understanding of each customer's needs and expectations. Given the required design parameters, with quality and performance as the desired result, our products are designed to meet demanding criteria for:

- Reliability
- Performance
- Dependable Dock-To-Stock Quality
- Conservative Derating
- Manufacturability/ Testability
- International Safety Approvals
- Serviceability

Before a new power supply goes into production, special reliability tests and pilot runs verify the design. This assures that all products meet the defined conditions of use. These tests also establish specifications for test department and inspection personnel.

Only when all of these prerequisites are satisfied can a quality product be manufactured.

MEETING OEM REQUIREMENTS WITH SUPERIOR TECHNOLOGY

At Todd, engineering, quality, manufacturing and sales departments work closely together to become an integral part of our customer's product development. Personnel from all departments learn each customer's requirements and respond with innovative and cost-effective solutions. This is done by applying conventional and proven new technologies.

By employing a "zero-mass" approach to circuit topology, we achieve a low parts count and provide elegant solutions to OEM performance requirements. This insures circuit simplicity, high MTBF and robust reliability.

At Todd, engineering, quality, manufacturing and sales departments work closely together to become an integral part of our customer's product development.

TODD

All sections of the power supply design employ high-efficiency technology. The inverter configuration incorporates proprietary "Veri-Drive" circuitry. In addition, high efficiency Mag-amp regulators and high power MOSFET "Boost" converters are used.

Single board construction, extensive use of surface mount devices (SMD), and unique board layout allow for maximum use of air flow. This assures that component body temperature is reduced, and this increases overall reliability. The use of surface mount devices reduces the number of through-hole connections, further enhancing reliability and quality.

WORLD-CLASS MANUFACTURING FOR THE GLOBAL MARKET

Efficiency, performance, and value are needed for success in both domestic and international markets. Our multi-faceted approach to these principles is a major factor in our success and in the success of our OEM customers.

Todd's total commitment to quality is so intense that any employee can halt a production process when a quality problem is suspected.

JUST IN TIME MANUFACTURING

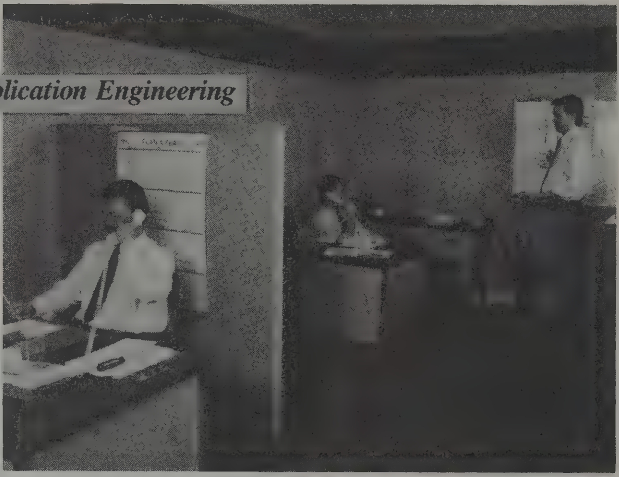
We work on a Just-in-Time basis throughout the manufacturing process. A computerized MRP system, common material usage and a "single piece flow" manufacturing line add to the success of JIT. Manufacturing includes only those activities which add value through continuous evaluation of methods and flow.

Using a dock-to-stock incoming system, three departments—purchasing, quality, and engineering—must approve vendors. Accepted vendors must prove their ability to provide consistent quality and on-time delivery. Vendor audits are performed regularly.

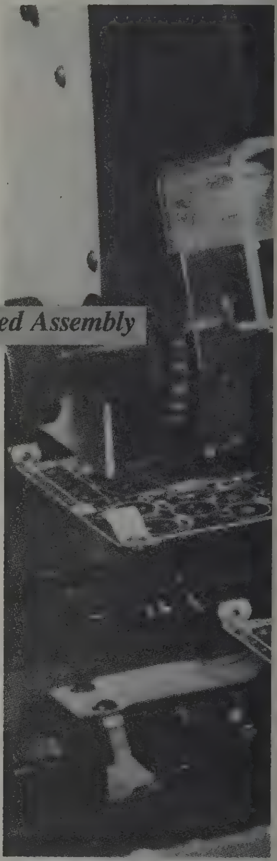
TRAINING

Foremost in achieving the highest quality is the effectiveness of any company's managers and production staff. At

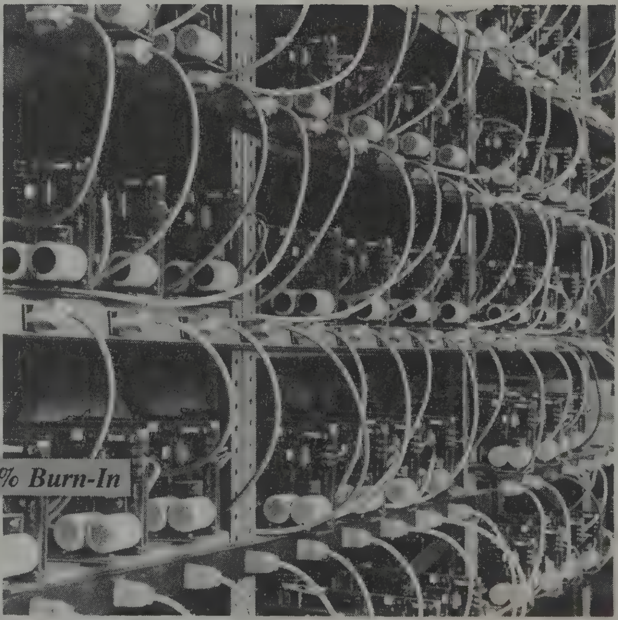
Contamination by cleaning solvents and electro-static discharge are typical manufacturing problems which we have eliminated.



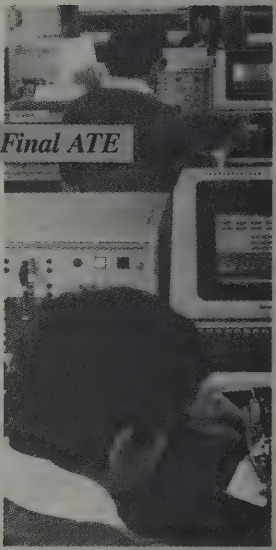
Application Engineering



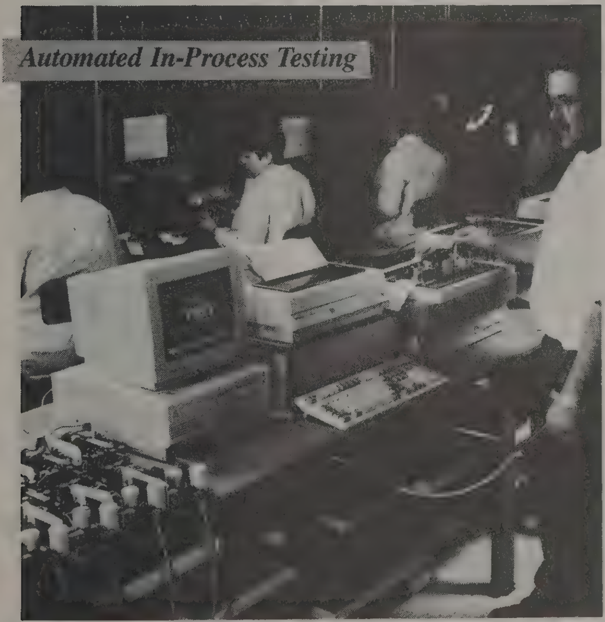
Automated Assembly



100% Burn-In



Final ATE



Todd, we achieve very high levels of effectiveness through initial training, frequent refresher training, and extensive cross-training. Our Total Employee Involvement Program teaches all aspects of achieving and maintaining quality. Personnel take a proactive stance rather than remain in a "wait and fail" mode. This is done in conformance with written standards for workmanship and quality. Todd's total commitment to quality is so intense that any employee can halt a production process when a quality problem is suspected.

AUTOMATION

Repeatability and verification are critical to manufacturing a product of world-class quality. Among the systems and equipment we utilize to assure repeatedly precise products are:

Automatic Test Equipment (ATE)—All populated circuit boards are checked on "Bed-of-Nails" automatic in-process testers. After mechanical assembly, all units are burned-in. All finished products are calibrated, tested and checked against specifications, safety agency guidelines and customer requirements.

Surface Mount Devices (SMD)—All PC boards are double sided with plated through-holes. Installation of surface mount devices and axial leaded components is automated. This keeps costs down, manufacturing repeatability high, and adds to superior reliability.

ESD AND CONTAMINATION CONTROL

We take steps to protect all power supplies from undetectable damage and insure long-term reliability. Contamination by cleaning solvents and electro-static discharge are typical manufacturing problems which we have eliminated.

CHEMICALS:

We do not use any chemicals that will degrade the long-term reliability of Todd power supplies or endanger the health of our employees.

ESD:

The following precautions protect against damage from electro-static discharge:

- Parts are received and kitted in dissipative bags and containers
- Work-in-process is moved in rigid dissipative containers
- Stations are equipped with dissipative bench and floor mats
- Personnel wear wrist or ankle grounding-straps
- Finished products are packed and shipped in protective bags
- Weekly audits of grounding equipment are made

MAGNETIC DEVICES

Magnetic devices have a critical role in the performance and safety of power supplies. To be certain that we have total control over all aspects of the magnetics which go into every Todd power supply, we design and build them ourselves.

CUSTOMER SERVICE

Everyone at Todd strives to provide the highest level of customer service in the industry. Our goal is to become the primary power supply vendor to each of our customers. Company growth has always been through expansion within our existing customer base. We know this can be achieved only when customer service is outstanding. Our promise of quality and service is backed by a two year warranty.

Magnetic devices have a critical role in the performance and safety of power supplies. To be certain that we have total control over all aspects of the magnetics which go into every Todd power supply, we design and build them ourselves.

TODD

How to Use This Power Supply Locator.

Todd Products Corp. has a wide range of switching power supplies. Available models range from 150 to 1500 watts; single and multiple output; AC or DC input. This Locator makes selection of the best power supply for your application simple. Here's how it works:

1. Determine your Input Voltage requirements: AC or DC.
2. Decide on your output needs: Single, Dual, Triple, or Quad output.
3. Calculate the maximum power the power supply must deliver.
4. Locate the appropriate section meeting these criteria.
5. Review the output current ratings of the products available within your needs.
6. Find detailed specifications for the model selected on the page shown in the locator.

Custom Designs

Custom Designs .... Page 28
If you cannot locate a standard product meeting your needs, please review the information on pages 28 and 29, and contact the factory.

Prices

Prices shown are list prices for small quantities. Companies needing production quantities can receive quantity pricing by contacting a Todd Products Area Business Manager, at the factory.

To Order

Terms and Conditions .... Page 30
Orders can be placed through your local representative or directly through the factory by calling 1-800-223-TODD, or 516-231-3366.

Technical Support

You can talk to an Engineer regarding applications, technical problems, etc., simply by calling our Toll Free Hot Line 1-800-223-TODD.

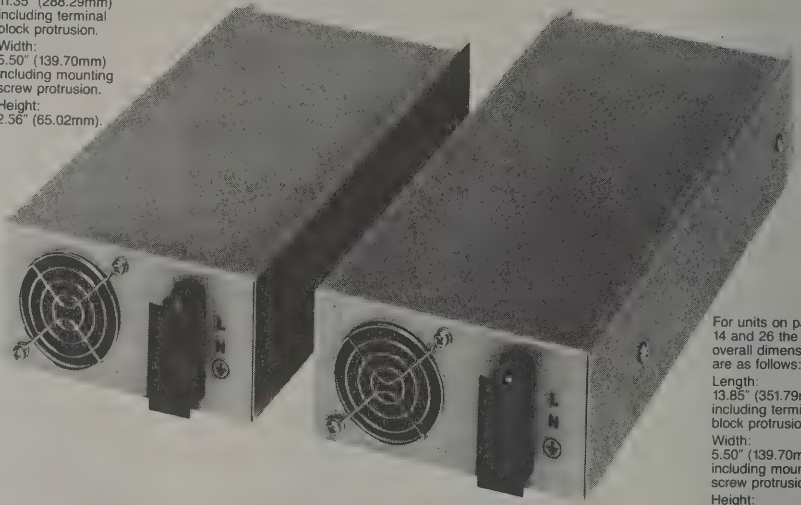
TODD

LOW-PROFILE COVER OPTION

New, low profile in-line cooling option for applications requiring special self-cooling or mounting configurations.

For units on pages 12, 20, 22, and 24 the overall dimensions are as follows:
Length:
11.35" (288.29mm) including terminal block protrusion.
Width:
5.50" (139.70mm) including mounting screw protrusion.
Height:
2.56" (65.02mm).



For units on pages 14 and 26 the overall dimensions are as follows:
Length:
13.85" (351.79mm) including terminal block protrusion.
Width:
5.50" (139.70mm) including mounting screw protrusion.
Height:
2.56" (65.02mm).

Features:

- Can be installed in locations where switching power supplies with top-mounted fans cannot be used
- End-panel fan and exhaust locations let multiple supplies be close-mounted either vertically or horizontally
- Smaller envelope requires less mounting space
- Self-cooling offers flexibility for power supply location within the overall system
- Lower volume, laminar air flow creates minimum disturbance to ambient system air and reduces overall noise
- All mounting surfaces are usable. Intake and exhaust are located in the front and back panel of the unit
- Fan position reinforces natural convection in vertically mounted units
- Covered input terminals comply with all safety regulations
- Adds only 2.35" to overall length of power supply
- Clean, contemporary look
- Available as low-cost option on most supplies (see chart)

The following switching power supply models accept low-profile **Option "V" Cover.**

1000 WATTS
3.38″ x 8″ x 12″
SUPERMAX

Introducing SUPERMAX…
A New Concept in Power Supply Technology

1000 watts…Open frame technology…Designed-in power factor correction…Meets IEC 555-2… It's the new SUPERMAX series of switching power supplies and a whole new concept in power supply technology. With SUPERMAX, Todd Products has brought its advanced open frame switching power supply technololgy to the high power shoe box world. Now users of 1000 watt shoe box switchers have a superior alternative—the SUPERMAX 1000 with power factor correction to 0.99 designed-in, and the same flexible, high reliability, low cost designs that have made Todd's MAX series product line the industry standard in open frame switchers.

Designed-in Power Factor Correction

The SUPERMAX 1000 is the first 1000 watt power supply that incorporates power factor correction in the basic design. Unlike traditional shoe box switchers where power factor correction is an add-on, the SUPERMAX series was designed around a power factor correction base. The series incorporates a proprietary Todd design that optimizes both power factor and efficiency to achieve active power factor correction to 0.99 with efficiencies of over 75%, making it one of the best in the industry.

Operated from Standard AC Power Receptacles

As electronic systems have become more complex, the demand for power supplies with higher outputs, increased efficiencies, and lower power consumption has increased. A power factor of 0.99 and an efficiency of over 75% allows the SUPERMAX to be used in systems that must operate from standard AC power receptacles and draw less than 12 amps at 120 VAC. The SUPERMAX also meets the requirements of IEC 555-2 for harmonic line distortion, a specification that will be imposed on all systems sold in Europe.

The Smallest Power Factor Corrected 1000W Switcher

Housed in a low profile package, measuring 3.38″ × 8″ × 12″ versus traditional shoe box switchers that measure 5″ × 8″ × 12-15″, the SUPERMAX 1000 is the smallest power factor corrected 1000 watt unit available today. The package allows great flexibility in system mechanical design. Industry standard mounting allows three units to be mounted where two shoe box units were before.

High Reliability, Quick System Assembly, Low Cost

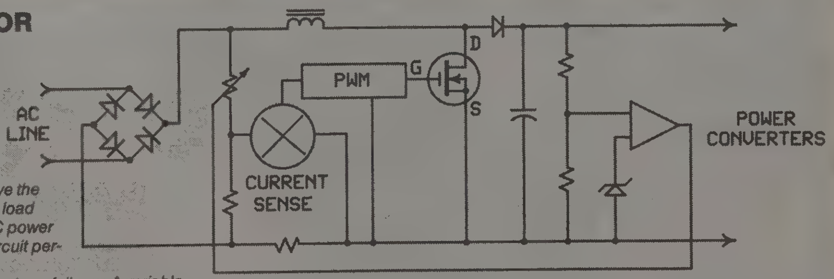
The SUPERMAX series was designed with several unique features and capabilities that ensure high reliability, lower cost, and improved system assembly. For example, customers have the option of self-cooling with internal ball-bearing fans, or a no-fan configuration for systems with supplied air cooling. Connectors are provided for AC input, outputs 2, 3 and 4, and status and control lines to facilitate high speed production assembly. This feature eliminates the barrier strip assembly process needed to install ring terminals during production and test.

The SUPERMAX features the proven and field tested reliability features that have made the MAX product lines an industry standard. These include MAGNA-FLUX mag amp control for 1% regulation on all outputs; true remote inhibit for system On/Off functions; VDE and FCC Class A RFI filtering; and International safety agency approvals (including IEC 950). All this at prices competitive with standard shoe box switchers without power factor correction.

Todd's SUPERMAX 1000 series is destined to be a super star.

SIMPLIFIED POWER FACTOR CORRECTOR CIRCUIT

Power factor is the ratio of power in watts to the product of volts and amperes flowing into a load. To minimize the amount of current required to supply power to the load, power factor should approach one. Unity power factor requires that the voltage and current be in phase as well as have the identical wave shape. The true unity power factor load looks purely resistive to the driving source, the AC power line. The Todd front end power factor corrector circuit performs this function.



The operation of the simplified schematic shown is as follows: A variable attenuator, controlled by a voltage regulating circuit, provides an attenuated replica of the line voltage to the AC line current sensing circuit. The current sensing circuit controls the charge and discharge of an energy storage choke to force the line current to track the line reference voltage. The circuit operates at a constant high frequency and forces continuous conduction of the choke when significant power is being drawn by the power supply load.

The output of the power factor corrector circuit is a regulated high voltage DC that feeds the output power converters of the power supply. Regulation is provided by sensing the voltage and controlling the attenuation of the variable attenuator which adjusts the reference to the current circuit. Regulation is maintained while keeping the power factor of the power supply at close to unity.

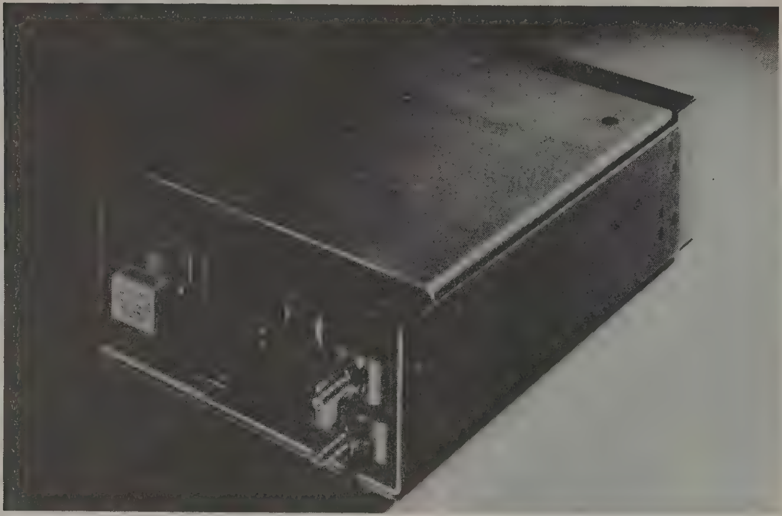
FOR DETAILS



The Ultra-compact SUPERMAX 1000 and 1500

Featuring:

- Compact, low-profile package, only 3.38"H x 8"W x 12"L
- Active Power Factor Correction to 0.99
- Designed for low AC line distortion per IEC 555-2
- Aux. outputs are Todd MAGNA-FLUX mag amp regulated
- High-reliability, low-cost open frame technology
- Integral RFI filters meet EN 55022 level B and FCC, Class A
- True remote inhibit for system on/off

Now SUPERMAX, the smallest 1000 watt power factor corrected open frame switcher, is also available in single-output 1000 and 1500 watt versions. Incorporating all the innovation of the multi-output 1000 watt, Todd's SUPERMAX series offers high performance and low cost with reliable open frame technology. Connectors are provided for quick system assembly, and units can be operated without fans with sufficient customer-supplied airflow. SUPERMAX gives you all this and more at prices no higher than those of common shoe box switchers without pf correction.

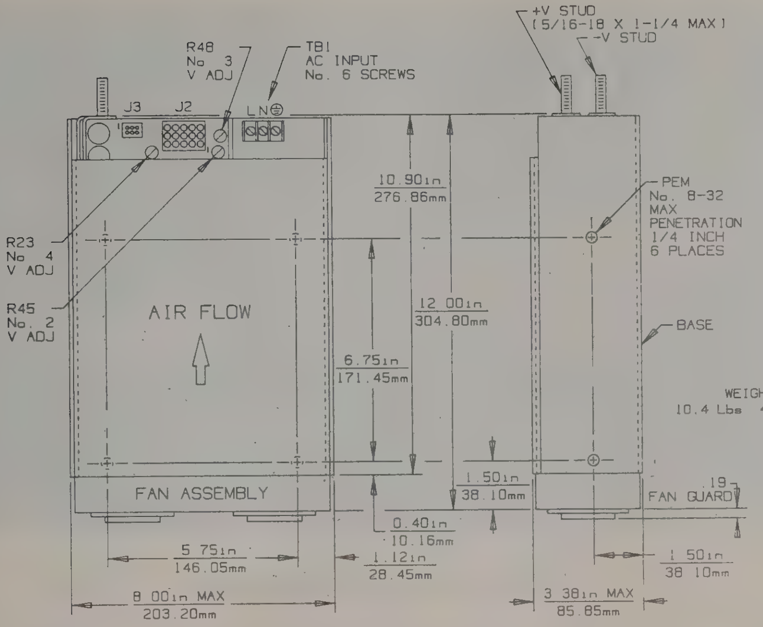
1000-1500 WATTS
3.38″ × 8″ × 12″
SUPERMAX



SPECIFICATIONS: ALL MODELS.

AC Input: 90-264 Vac continuous range, 47 to 63 Hz. Internally fused for 20 A.
Power Factor: 0.99 typical at full load.
Input Current: 12A max @ 120 Vac under full load conditions.
Adjustability: All outputs user adjustable.
Line & Load Reg: ±1% over AC input range and 0 to 100% load change. Main +5V output requires minimum load of 10%.
Ripple & Noise: Less than 0.2% rms, 1% p-p or 100mV, whichever is greater.
Remote Sense (Output #1): Compensates for 250 mV total line drop. Open sense lead protection.
Temperature Coefficient: 0.02% per degree C.
Stability: 0.1% over 8 hours after 30 minutes warm-up.
Transient Response (+5V): Output voltage returns to within 1% in less than 500 µsec for a 50% load change. Peak transient does not exceed 5%.
Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.
Overvoltage Protection (All outputs): Protects load against power supply induced overvoltage. Trip point is set at maximum 136% of nominal voltage.
Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.
Inrush: Cold Start AC current is less than 90 A at 115 Vac, 180 A at 230 Vac. Limited by surgistor.
Brownout Protection: Holds regulation to 85 Vac.
Thermal Protection: Shuts down power supply if overheated. Automatic recovery.
Holdup Time: 20 ms minimum after removal of power at full load and through input voltage range.
Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.
Efficiency: 75% typical.
Safety Agencies: Contact factory for status of UL1950 recognition, CSA22.2 #234 certification, and licensing by TUV to IEC950, VDE 0805, and class 1, SELV.
Conducted RFI: Meets FCC Part 15, Subpart J, Class A; EN 55022 Level "B"; and German Decree "VFG 243."
Output Isolation: Isolated from ground 50 V.
Reverse Voltage: Protected against reverse voltage up to supply current rating.
DC Power Good: Provides a TTL "1" when output #1 is above 4.6 Vdc nominal.
Power Fail: Provide TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power, VMEbus compatible, provides 48ma sink current capability.
Cooling: Self-cooled with internal ball-bearing fans. Can be operated without fans with sufficient customer-supplied air flow.
Reliability: Over 100,000 hours, when calculated in accordance with MIL-HDBK-217E, and in Option "X" configuration.
Remote Inhibit: True inhibit shuts unit off with TTL "0" signal, or contact closure.

OPTIONS:

Option "X", System Cooling: Customer supplied air of 100 CFM through end of unit provides sufficient cooling for full power operation. Fans are not included with unit.

Consult factory for other available options.

The appropriate 9-inch Powerhouse in your telecom product gives you the outputs you need for ISDN, LAN, and T1 applications, and standard voice and data networks. High current auxiliary outputs provide regulation characteristics for proper operation of line drivers, network interfaces and RS232 type outputs. Or, use a 9-inch Powerhouse in your computer-based product for needed output regulation, power for 50 Amps of Logic and four hard disk drives requirements.

And, you can increase power by 40% as you add peripherals–without redesigning for a larger power supply by upgrading from the MDT 160/220 series.

Check the specifications of these low-profile, 9-inch Powerhouse switchers that give you more design freedom.

SPECIFICATIONS:

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. See Option "A" for automatic line selection. Internally fused for 10 A.

Adjustability: All outputs user adjustable ±5% minimum.

Line & Load Reg: ±1% over AC input range and 0 to 100% load change. Output #1 requires minimum load of 10%.

Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.

Remote Sense (Output #1): Compensates for 250 mV total line drop. Open sense lead protection.

Temperature Coefficient: 0.02% per degree C.

Stability: 0.1% over 8 hours after 30 minutes warm-up.

Transient Response (Output #1): Output voltage returns to within 1% in less than 500 µsec for a 50% load change. Peak transient does not exceed 5%.

Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.

Overvoltage Protection (Output #1): Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 136% of nominal.

Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.

Inrush: Cold Start AC current is less than 10 A at 115 Vac, 18 A at 230 Vac. For MTX, 10 A at 115 Vac, 20 A at 230 Vac. Limited by surgistor.

Brownout Protection: Holds regulation to 85 Vac or 170 Vac.

Thermal Protection: Shuts down power supply if overheated. Automatic recovery.

Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.

Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.

Efficiency: 80% typical.

Safety Agencies: Approved UL478, UL1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805/VDE 0806 class 1 SELV and EN 60 950.

Conducted RFI: Meets FCC Part 15, Subpart J, Class A; EN 55022 Level "B"; and German Decree "VFG 243."

Output Isolation: Isolated from ground 50 V.

Reverse Voltage: Protected against reverse voltage up to supply current rating.

Cooling: 30 CFM required to achieve full ratings.

Reliability: Over 100,000 hours MTBF; when calculated in accordance with MIL-HDBK-217.

Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero.

OPTIONS:

Option "A", AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.

Option "C", Cover: Limits contact with power supply interior. Add "C" suffix to model number.

Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings, at 50°C ambient temperature.

Option "G", DC Power Good: Provides a TTL "1" when output #1 is above 4.6 Vdc nominal. Not available if Option "P" is selected.

Option "P", Power Fail: Provides TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48ma sink current capability. Not available if Option "G" is selected.

Option "V": Low profile, end venting cover with integral ball-bearing fan. See page 8.

Consult factory for other available options.

*Contact factory for detailed mechanical and electrical specifications. The drawings on opposite page do not represent this MSC product. The MSC-402 features input and output connectors, remote sense on Output #1 and Output #2, and remote on/off—all standard.

VMEbus and Multibus compatibility is only one feature of this series. You'll find switchers to power up to 80 Amps of Logic and four hard disk drives–with up to 16 Amps peak current to meet peripheral startup needs.

You'll find the outputs you need for ISDN, LAN, T1 applications and for standard voice and data networks. High current auxiliary outputs provide regulation characteristics for proper operation of line drivers, network interfaces, and RS232 type outputs. And, you can upgrade power output by 25% without redesigning for a larger power supply.

Check the specifications of these bus driving switching power supplies to find the right one for your products.

SPECIFICATIONS: ALL MODELS.

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. See Option "A" for automatic line selection. Internally fused for 12 A.
Adjustability: All outputs user adjustable ±5% minimum, except where noted.
Line & Load Reg: ±1% over AC input range and 0 to 100% load change. Main +5V output requires minimum load of 10%.
Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.
Remote Sense (±5V): Compensates for 250 mV total line drop. Open sense lead protection.
Temperature Coefficient: 0.02% per degree C.
Stability: 0.1% over 8 hours after 30 minutes warm-up.
Transient Response (+5V): Output voltage returns to within 1% in less than 500 μsec for a 50% load change. Peak transient does not exceed 5%.
Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.
Overvoltage Protection (+5V): Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 6.8V.
Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.
Inrush: Cold Start AC current is less than 80 A at 115 Vac, 20 A at 230 Vac. Limited by surgistor.
Brownout Protection: Holds regulation to 85 Vac or 170 Vac.
Thermal Protection: Shuts down power supply if overheated. Automatic recovery.
Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.
Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.
Efficiency: 80% typical.
Safety Agencies: Approved UL478, UL1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805/VDE 0806 class 1 SELV and EN 60 950.
Conducted RFI: Meets FCC Part 15, Subpart J, Class A; EN 55022 Level "B"; and German Decree "VFG 243."
Output Isolation: Isolated from ground 50 V.
Reverse Voltage: Protected against reverse voltage up to supply current rating.
Cooling: 30 CFM required to achieve full ratings.
Reliability: Over 100,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.
Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero.

OPTIONS:

Option "A", AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.
Option "C", Cover: Limits contact with power supply interior. Add "C" suffix to model number.
